DETAILS OF DISTRIBUTION REINVESTMENT PLAN

Equity Trustees Limited (ABN 46 004 031 298, AFSL 240975) (the **Responsible Entity**) established the distribution reinvestment plan rules (**DRP Rules**) on 26 September 2018 under which unit holders may elect to receive additional units instead of cash distributions.

Unit holders may elect by electronic **DRP** election to join the **DRP** or vary the level of participation in the **DRP**. The last date for electing into the **DRP** in respect of a distribution is 5.00pm (Sydney time) on the first business day after the record date.

The Responsible Entity makes distributions on a monthly basis. In accordance with the **DRP Rules**, units are issued at the net asset value of a unit or other unit application price determined under the Fund's Constitution, on the record date. The record date is the 2nd business day of each month.

Distributions (cents per unit)	4.83	4.18

Significant changes in the state of affairs

In the opinion of the directors, there were no significant changes in the state of affairs of the Fund that occurred during the half-year ended 31 December 2021.

COVID-19

In March 2020, the COVID-19 outbreak was declared a pandemic by the World Health Organization. The outbreak and the response of Governments in dealing with the pandemic has continued to evolve over the course of time as new variants of COVID-19 emerge. There continues to be increased financial market volatility and corresponding fluctuations in the fair value of the Fund's investment portfolio. There is still uncertainty around the continued impact of COVID, the potential for further outbreaks both in Australia and around the world.

The Responsible Entity and Investment Manager continue to monitor the situation closely, noting that with the ongoing developments, there is still a degree of uncertainty; therefore it is not possible at this time to predict the extent and nature of the overall impact on the Fund. The Investment Manager however, actively manages the financial risks that the Fund is exposed to, and the Net Asset Values of the Fund continue to be valued in accordance with the frequency set out in the Fund's Product Disclosure Statement, applying valuation policies reflective of the prevailing market conditions.

Matters subsequent to the end of the half-year

Mr Philip Gentry resigned as a Company Secretary of Equity Trustees Limited, the Responsible Entity of NB Global Corporate Income Trust, effective 5 January 2022. Ms Samantha Einhart was appointed as Company Secretary at the same date.

On 5 January 2022, Directors announced an estimated distribution of 0.8049 cents per ordinary unit. The record date was 5 January 2022, and payment date was 12 January 2022.

On 2 February 2022, Directors announced an estimated distribution of 0.8049 cents per ordinary unit. The record date was 2 February 2022, and payment date was 9 February 2022.

On 22 February 2022, Directors announced an estimated monthly distribution of 0.8049 cents per ordinary unit. The record date will be 2 March 2022

At the time of signing these financial statements, there is an increased level of global uncertainty associated with the conflict in Ukraine. The impacts of the Ukraine conflict are not yet known but are likely to result in increased market and economic volatility, which may in turn have an impact on the Fund

No other matters or circumstances have arisen since 31 December 2021 that have significantly affected, or may have a significant effect on:

- (i) the operations of the Fund in future financial years; or
- (ii) the results of those operations in future financial years; or
- (iii) the state of affairs of the Fund in future financial years.

Rounding of amounts to the nearest thousand dollars

Amounts in the Directors' report have been rounded to the nearest thousand dollars in accordance with *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191*, unless otherwise indicated.

Auditor's independence declaration

A copy of the Auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out on page 6.

This report is made in accordance with a resolution of the directors of Equity Trustees Limited.

Investment Manager's Report**PORTFOLIO MANAGERS:** Russ Covode, Joe Lind, Simon Matthews, Nish Papat, Jennifer Gorgoll**Performance Highlights**

Over the six months ended December 31, 2021 the Strategy's net return was -0.16%.

Summary

During the six months ended December 31, 2021, security selection within Basic Industry, Media and Leisure was the most beneficial to performance. In contrast, security selection within Insurance and Retail were the largest detractors. Within our ratings' positioning, security selection within the Strategy's BB and B rated issuers were the most beneficial to performance while security selection within CCC and below rated issuers was the largest detractor. The negative performance attribution in CCC and below was primarily driven by distressed issuers not held in the portfolio. These distressed names—which did not meet our disciplined credit underwriting standards—rallied materially over the period.

From a sector perspective, over the period, we increased our exposure to the Services and Telecommunication sectors and reduced our positioning within the Leisure and Capital Groups sectors.

From a ratings perspective, over the period, we increased our exposure to BBB and Above and CCC and Below through reductions in BB on relative value considerations.

Market Context

- Global real growth lost some momentum in the second half of the year compared to the first half, weighed down by a lingering pandemic, supply bottlenecks, higher than expected inflation and labour supply constraints. More recent economic data are mixed across regions and by sector, but they suggest that the global recovery continues at above long-term trend growth rates, with some softening in the third and fourth quarters as some segments of the services sector are prone to setbacks due to the rising COVID cases of Delta earlier in the period and then Omicron in the final weeks of the year. Meanwhile, even with corporate fundamentals improving and default rates continuing to decline, global high yield spreads widened over the period.
- Inflation has increased dramatically in the United States and some emerging market economies. As restrictions had been relaxed, demand accelerated, but supply was slower to respond. Commodity prices have also risen significantly from their low levels of last year. Despite the increasing inflation pressures, the yield on the bellwether longer-dated government bonds remained in a fairly narrow range in the second half of the year. This is not likely to persist as central banks have either begun removing the massive stimulus, raised rates or admitted they might be behind the curve when it comes to inflation. Evidence of this can be seen in the very negative real yields in most developed economies.
- The global high yield market's yield to worst ended the year at 4.60% with the spread to worst at 388 basis points.
- The U.S. high yield LTM default rate¹, at 0.27% as of December 2021, came down materially over the reporting period and is well below the long-run average.

Performance Highlights

- Top contributors to relative returns during the period included Petroleos Mexicanos within Energy, APX Group within Services and Vedanta Resources within Basic Industry.
- Top detractors from relative returns included Kaisa Group Holdings within Real Estate, a zero weight to Iceland Bondco Plc within Retail and Electricite de France SA within Utilities.

Portfolio Strategy & Activity

- The Strategy invests in non-investment grade corporate bonds with a current target distribution rate of 4.75%. The yield to worst as of the end of December was 5.27%.
- The Strategy currently has larger exposure to securities rated B with lower exposure to bonds rated single BB. This is primarily on relative valuation considerations and based on bottom-up credit selection. The average credit rating for the Strategy is B.
- The Strategy has more exposure to Healthcare and Services as well as those positioned to benefit from the reopening of the economy and normalization of activities such as Leisure and Capital Goods. The Strategy has lower weightings to sectors that have done well in a COVID environment where valuations are no longer compelling.
- The Strategy currently has larger positions to bonds from the US, Brazil, UK, Luxembourg and France and less to Italian, Chinese and Spanish bonds.

Outlook

Spreads widened over the period despite improving fundamentals and we believe current valuations are more than compensating investors for the increasingly benign default outlook. While the persistence of inflation has been acknowledged by central banks, the trajectory of real GDP growth and improved pricing power should remain supportive of issuer fundamentals. Strong consumer balance sheets, growing nominal wages, businesses working to rebuild inventories and rehire plus more clarity on central bank tapering and rate hike timelines should continue to be supportive of economic activity and financial conditions going forward. Our global research team continues to monitor the investment thesis for each issuer in the portfolio given the uncertainty around supply chain disruptions, labor supply constraints and Omicron's potential impact on demand in certain consumer-facing sectors such as travel, lodging, leisure and entertainment. Even with the uncertainty of the pandemic, higher inflation and potential political risk which could result in pockets of short-term volatility, we believe our bottom-up, fundamental credit research process focused on security selection while seeking to avoid credit deterioration and putting only our "best ideas" into portfolios, position us well to take advantage of any volatility.

1 General information

These condensed financial statements cover NB Global Corporate Income Trust (the "Fund") as an individual entity. The Fund is an Australian registered managed investment scheme, which was constituted on 4 July 2018, registered with Australian Securities and Investment Commission on 17 July 2018 and commenced investment operations on 26 September 2018. The Fund will terminate in accordance with the provisions of the Fund's Constitution or by Law.

The Fund was listed on the Australian Securities Exchange (ASX) on 26 September 2018 and is quoted under ticker code: NBI.

The Responsible Entity of the Fund is Equity Trustees Limited (ABN 46 004 031 298) (AFSL 240975) (the "Responsible Entity"). The Responsible Entity's registered office is Level 1, 575 Bourke Street, Melbourne, VIC 3000. The condensed financial statements are presented in the Australian currency unless otherwise noted.

The Fund invests in corporate debt securities managed by Neuberger Berman Australia Limited, in accordance with the Product Disclosure Statement and the provisions of the Fund's Constitution. The Fund also uses derivatives for hedging purposes.

In March 2020, the COVID-19 outbreak was declared a pandemic by the World Health Organization. The outbreak and the response of Governments in dealing with the pandemic has continued to evolve over the course of time as new variants of COVID-19 emerge. There continues to be increased financial market volatility and corresponding fluctuations in the fair value of the Fund's investment portfolio. There is still uncertainty around the continued impact of COVID, the potential for further outbreaks both in Australia and around the world.

The Responsible Entity and Investment Manager continue to monitor the situation closely, noting that with the ongoing developments, there is still a degree of uncertainty; therefore it is not possible at this time to predict the extent and nature of the overall impact on the Fund. The Investment Manager however, actively manages the financial risks that the Fund is exposed to, and the Net Asset Values of the Fund continue to be valued in accordance with the frequency set out in the Fund's Product Disclosure Statement, applying valuation policies reflective of the prevailing market conditions.

The condensed financial statements were authorised for issue by the directors on the date the Directors' declaration was signed. The directors of the Responsible Entity have the power to amend and reissue the condensed financial statements.

2 Basis of preparation

These condensed financial statements have been prepared in accordance with Australian Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 *Interim Financial Reporting*.

These condensed financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these condensed financial statements are to be read in conjunction with the annual financial statements for the year ended 30 June 2021 and any public announcements made in respect of the Fund during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

The directors are satisfied that the Fund has sufficient resources to continue in operation for the foreseeable future, a period of not less than 12 months from the date of this report. Accordingly, they continue to adopt the going concern basis in preparing these condensed financial statements.

Significant accounting policies

The accounting policies applied in these condensed financial statements are the same as those applied to the Fund's financial statements for the year ended 30 June 2021.

(i) New and amended standards adopted by the Fund

There are no standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning 1 July 2021 that have a material impact on the amounts recognised in the prior periods or will affect the current or future periods.

(ii) New standards and interpretations not yet adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2022 and have not been early adopted in preparing these condensed financial statements.

None of these are expected to have a material effect on the condensed financial statements of the Fund.

3 Fair value measurement

The Fund measures and recognises financial assets and liabilities at fair value through profit or loss on a recurring basis.

- Financial assets/liabilities at fair value through profit or loss (see Note 4 and Note 5)
- Derivative financial instruments (see Note 8)

The Fund has no assets or liabilities measured at fair value on a non-recurring basis in the current reporting period.

AASB 13 *Fair Value Measurement* requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2); and
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The Fund values its investments in accordance with the accounting policies set out in Note 2 to the condensed financial statements.

(a) Fair value in an inactive or unquoted market (level 2)

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the end of the reporting period applicable for an instrument with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the reporting period.

The fair value of derivatives that are not exchange traded is estimated at the amount that the Fund would receive or pay to terminate the contract at the end of the reporting period taking into account current market conditions (volatility and appropriate yield curve) and the current creditworthiness of the counterparties. Forward currency contracts are valued at the prevailing last price at the end of each reporting period.

Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions. The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Fund holds. Valuations are therefore adjusted, where appropriate, to allow for additional factors including liquidity risk and counterparty risk.

(b) Recognised fair value measurements

The table below presents the Fund's financial assets and financial liabilities measured and recognised at fair value as at 31 December 2021 and 30 June 2021.

(c) Transfer between levels

Management's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

There were no transfers between levels in the fair value hierarchy at the end of the reporting period (30 June 2021: nil).

(d) Financial instruments not carried at fair value

The carrying value of cash and cash equivalents, receivables and payables approximate their fair values due to their short-term nature.

6 Net assets attributable to unit holders – equity

Under AASB 132 *Financial Instruments: Presentation*, puttable financial instruments meet the definition of a financial instrument to be classified as equity where certain strict criteria are met. The Fund shall classify a financial instrument as an equity instrument from the date when the instrument has all the features and meets the conditions.

Movements in the number of units and net assets attributable to unit holders during the half-year were as follows:

	Half-year ended		Half-year ended	
	31 December 2021	31 December 2021	31 December 2020	31 December 2020
	Units '000	\$'000	Units '000	\$'000

8 Derivative financial instruments

In the normal course of business, the Fund enters into transactions in various derivative financial instruments which have certain risks. A derivative is a financial instrument or other contract which is settled at a future date and whose value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variables.

Derivative financial instruments require no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.

Derivative transactions include many different instruments such as forwards, futures and options. Derivatives are considered to be part of the investment process and the use of derivatives is an essential part of the Fund's portfolio management. Derivatives are not managed in isolation. Consequently, the use of derivatives is multifaceted and includes:

- hedging to protect an asset or liability of the Fund against a fluctuation in market values, foreign exchange risk or to reduce volatility;
- a substitution for trading of physical securities; and
- adjusting asset exposures within the parameters set in the investment strategy, and adjusting the duration of fixed interest portfolios or the weighted average maturity of cash portfolios.

While derivatives are used for trading purposes, they are not used to gear (leverage) a portfolio. Gearing a portfolio would occur if the level of exposure to the markets exceeds the underlying value of the Fund.

8 Derivative financial instruments (continued)

The Fund holds the following derivative instruments:

Forward currency contracts

Forward currency contracts are primarily used by the Fund to economically hedge against foreign currency exchange rate risks on its non-Australian dollar denominated securities. The Fund agrees to receive or deliver a fixed quantity of foreign currency for an agreed upon price on an agreed future date. Forward currency contracts are valued at the prevailing last price at the end of each reporting period. The Fund recognises a gain or loss equal to the change in fair value at the end of each reporting period.

The Fund's derivative financial instruments at period end are detailed below:

As at 31 December 2021	Contractual/notional \$'000	Assets \$'000	Liabilities \$'000

Independent auditor's review report to the unitholder of NB Global Corporate Income Trust

Report on the half-year financial report

Conclusion

We have reviewed the half-year financial report of NB Global Corporate Income Trust (the Fund) which comprises the condensed statement of financial position as at 31 December 2021, the condensed statement of comprehensive income, condensed statement of changes in equity and condensed statement of cash flows for the half-year ended on that date, significant accounting policies and explanatory notes and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of NB Global Corporate Income Trust does not comply with the *Corporations Act 2001* including:

1. giving a true and fair view of the Fund's financial position as at 31 December 2021 and of its performance for the half-year ended on that date
2. complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity* (ASRE 2410). Our responsibilities are further described in the *Auditor's responsibilities for the review of the half-year financial report* section of our report.

We are independent of the Fund in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional & Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to the audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Responsibilities of the directors of the responsible entity for the half-year financial report

The directors of Equity Trustees Limited (the Responsible Entity), the responsible entity of the Fund, are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement whether due to fraud or error.

Auditor's responsibilities for the review of the half-year financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Fund's financial position as at 31 December 2021 and of its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
