Disclaimer

Certain statements in this announcement are forward-looking statements. Forward-looking statements can generally be identified by the use of words such as “anticipate”, “estimate”, “expect”, “project”, “intend”, “plan”, “believe”, “target”, “may”, “assume” and words of similar import.

These forward-looking statements speak only as at the date of this announcement. These statements are based on current expectations and beliefs and, by their nature, are subject to a number of known and unknown risks and uncertainties that could cause the actual results, performances and achievements to differ materially from any expected future results, performance or achievements expressed or implied by such forward-looking statements.

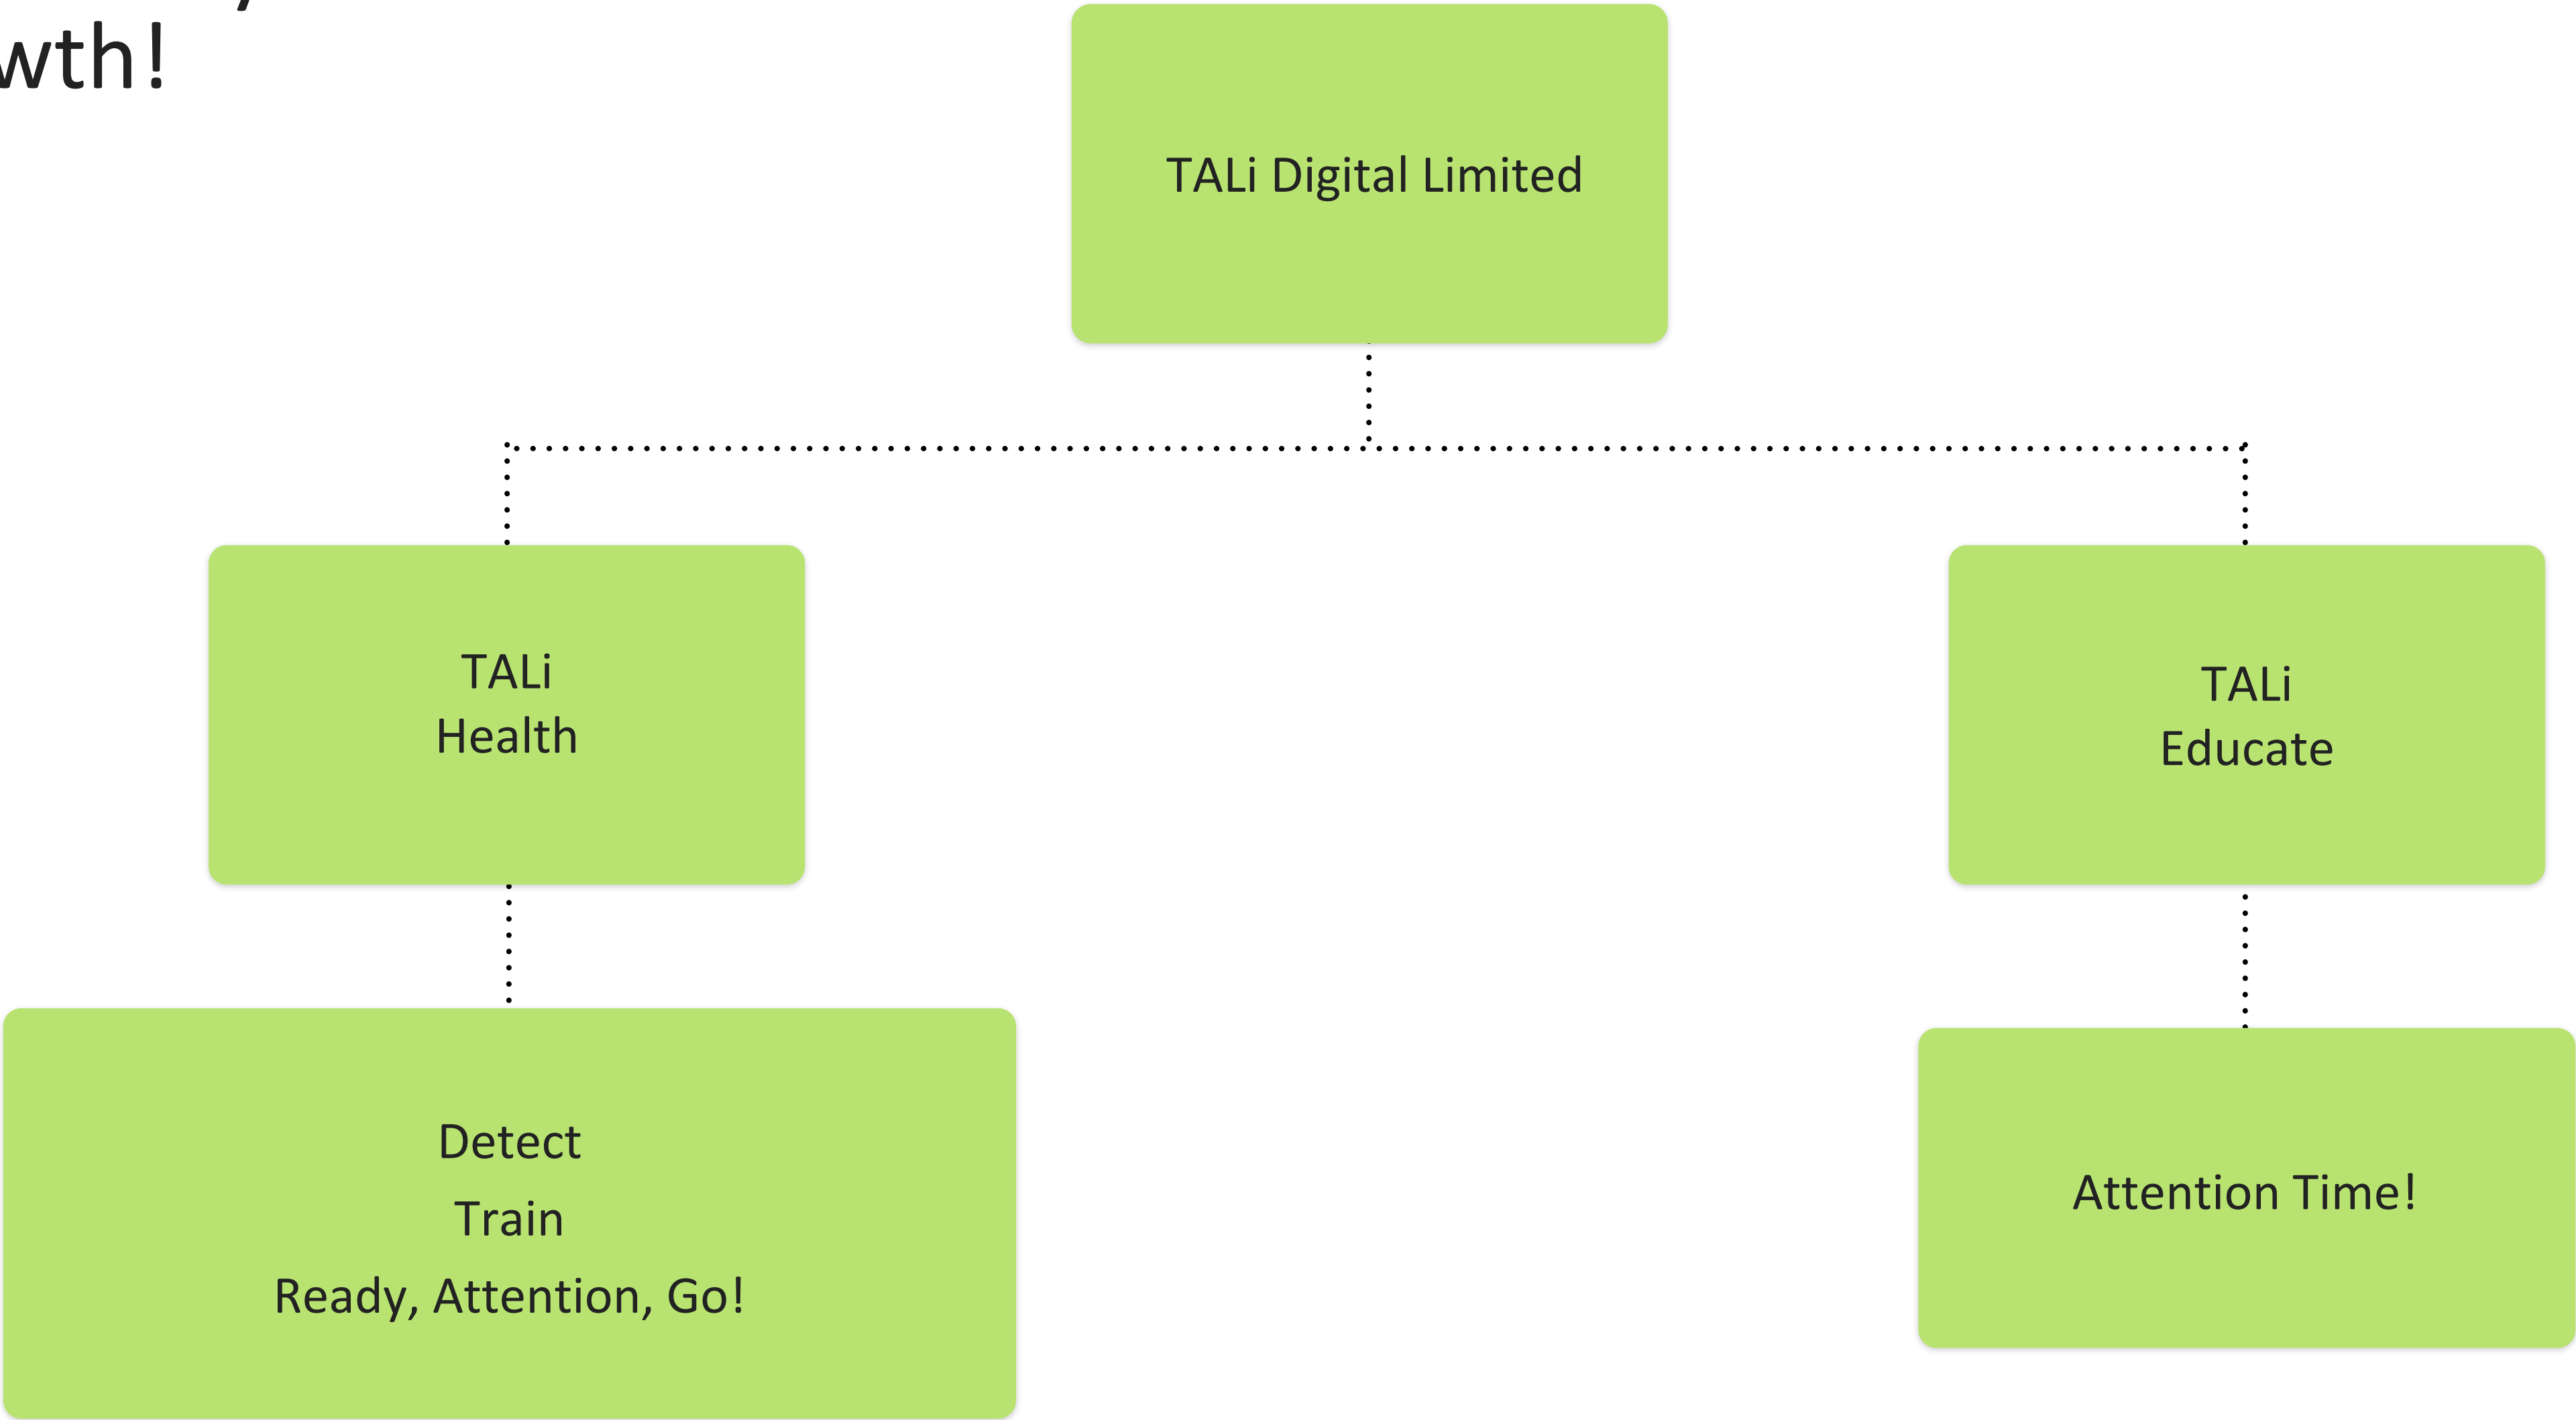

No representation, warranty or assurance (express or implied) is given or made by the Company that the forward-looking statements contained in this announcement are accurate, complete, reliable or adequate or that they will be achieved or prove to be correct. Except for any statutory liability which cannot be excluded, the Company and its respective officers, employees and advisers expressly disclaim any responsibility for the accuracy or completeness of the forward-looking statements and exclude all liability whatsoever (including negligence) for any direct or indirect loss or damage which may be suffered by any person as a consequence of any information in this announcement or any error or omission therefrom.

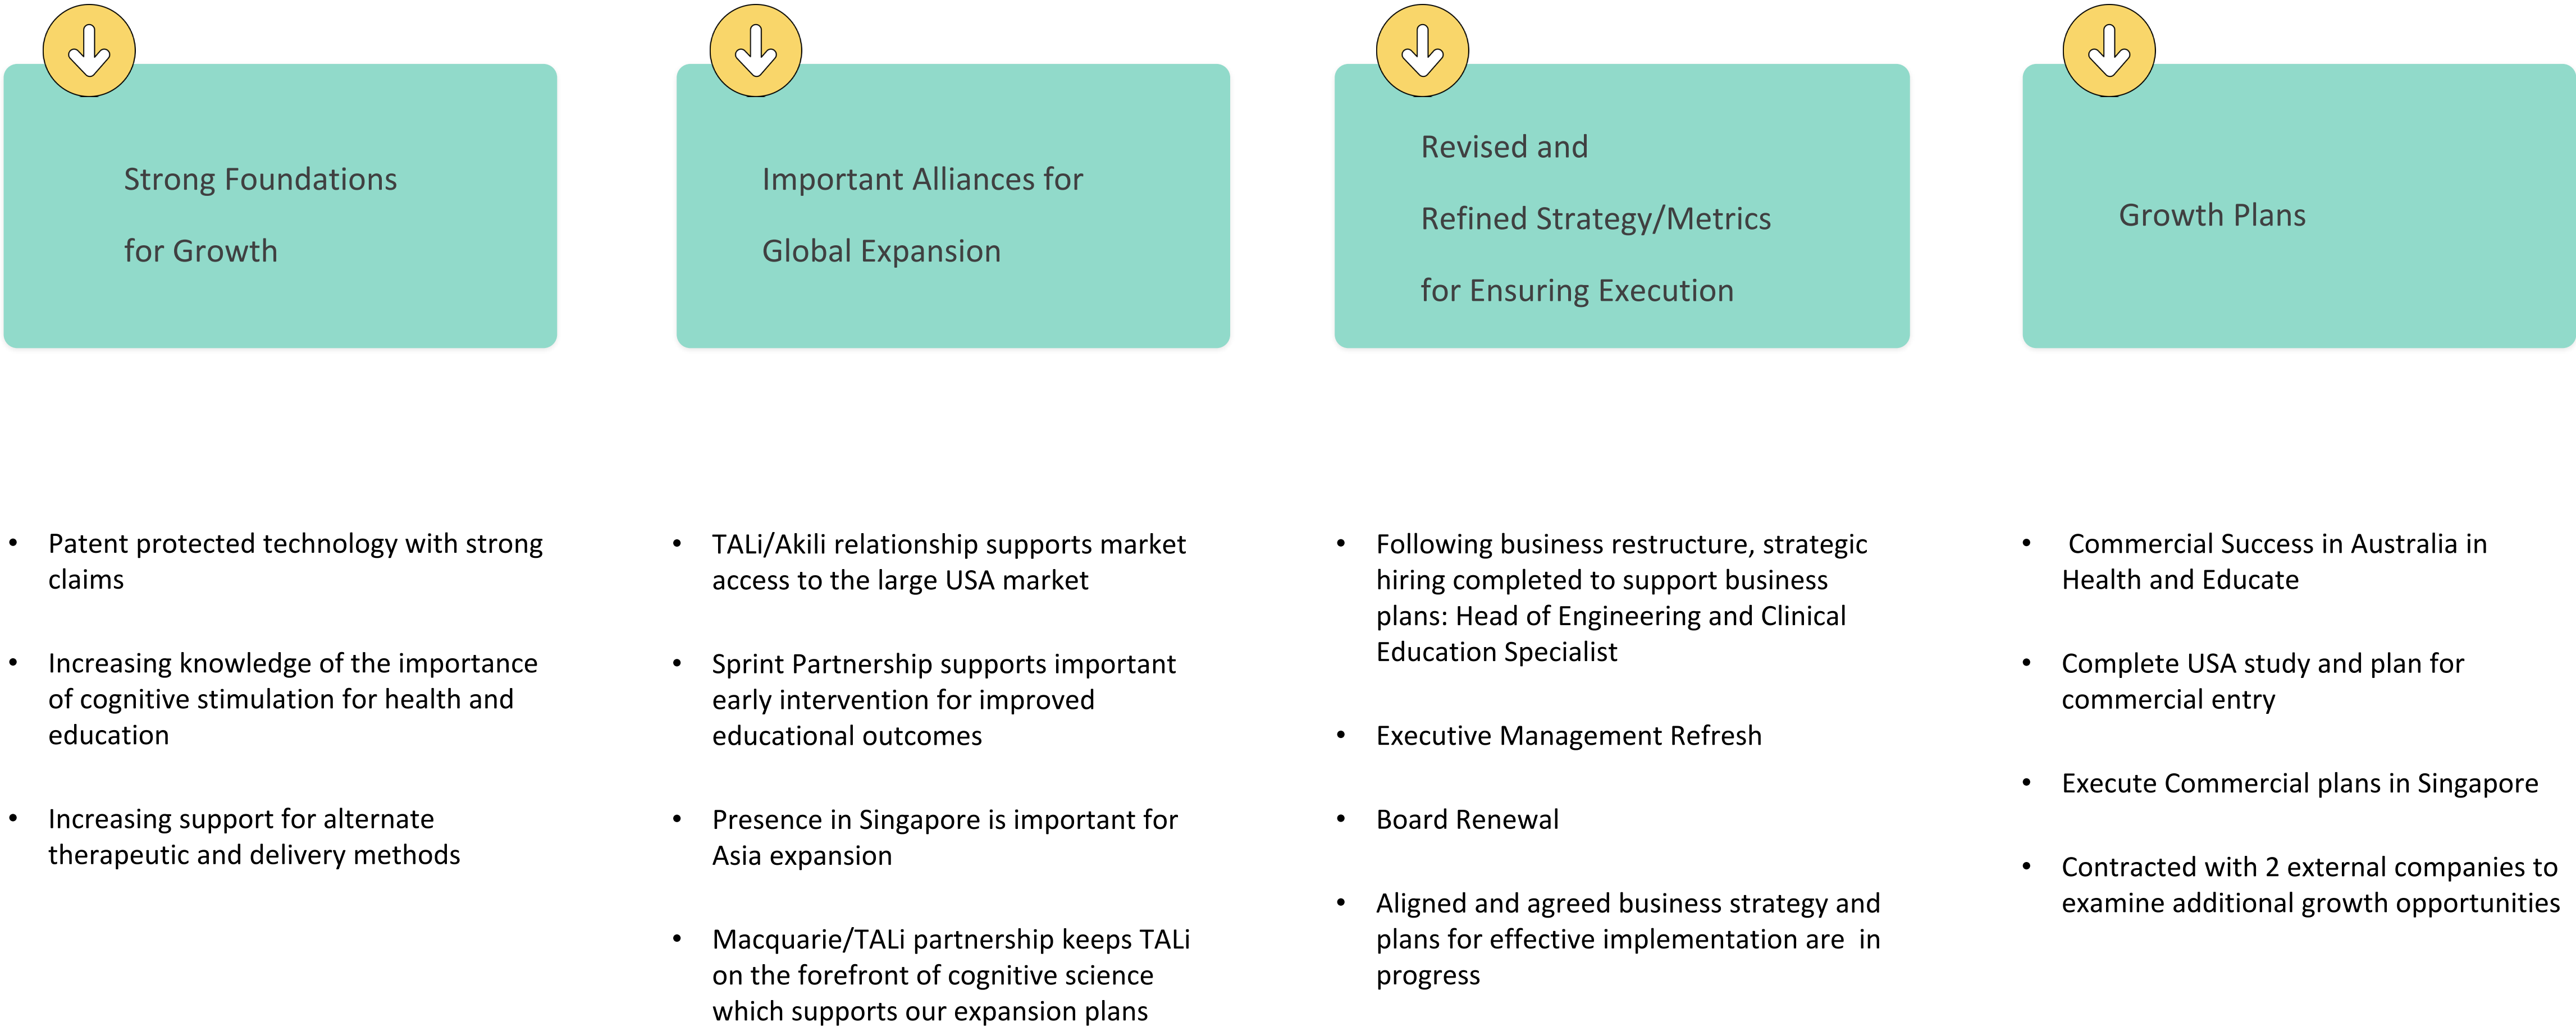

Subject to any continuing obligation under applicable law or relevant listing rules of the ASX, the Company disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements in these materials to reflect any change in expectations in relation to any forward-looking statements or any change in events, conditions or circumstances on which any statement is based. Nothing in these materials shall under any circumstances create an implication that there has been no change in the affairs of the Company since the date of the announcement.

TALi Today- focussed on Growth!

Business At A Glance

Pioneering cognitive training for 3 to 10 year olds

TALi Health is a pioneering cognitive training program for 3 to 10 year olds. Developed as a series of video games, the algorithm has been scientifically validated to improve attention skills of young children.

Our program has been shown to:

Improve attention and numeracy

Reduce impulsive and hyperactive behaviour

TALi is a registered NDIS provider. As a digital therapy, the app is available on iPad and Android devices from your app store.

TALi is for:

TALi for Parents

TALi Health provides pioneering digital therapies that help parents to support their children's cognition at home

TALi for Healthcare Practitioners

Healthcare Practitioner can tap into digital early interventions for their practice, improving access for families while providing important insights into children at home

TALi for Investors

Investing in the future of digital therapeutics and innovation.

Tali

We're on a mission to strengthen
the attention of children globally

talihealth.com

A growth opportunity... at home first!

In Australia.

In Australia, there are more than 1,000,000 children between the ages of 4-8.

*By age 4, at least more than 30% of children have concerning attention issues

Across Australia, there are 4,800 pediatric occupational therapists seeing ~25 children per week.

Of these children seeing an occupational therapist, at least 60-90% are likely to have attention-related concerns.

Current options allow only in-clinic care and support.

TALi will partner with occupational therapists/psychologists to capture 10-25% of those children with attention issues in Australia via allied health pathway.

Introducing Ready, Attention, GO!

Controlled Market Release: January
2023

5 Centres
9 children

Same patented algorithm!

Launching at the Disability Expo
2023
25-26 March

TALi Educate

TALi Educate

The partnership with Genius Childcare will allow early access for educators and families looking to support important cognitive development activities. The fun TALi learning games can be completed at school as part of an enhanced curriculum.

TALi Games are fun!
Enhancing cognitive skills can be entertaining for children!

Evidenced Based
Attention is a cognitive skill that can be improved by training*
TALi tools can enhance reading, math and general learning

Earlier is better!
TALi tools are focused on young children. Research supports better outcomes when training is earlier.* Partnering with Genius Childcare (Parent company Sprint Capital) ensures early access for children.

*Peng, P., & Miller, A. C. (2016). Does attention training work? A selective meta-analysis to explore the effects of attention training and moderators. Learning and Individual Differences, 45, 77–87. <https://doi.org/10.1016/j.lindif.2015.11.012>
