Vista Group Publishes Voluntary Climate Disclosures Report

Vista Group International Limited (NZX & ASX:VGL) advises that today it has published its first annual Climate-related Financial Disclosures Report, which seeks to provide stakeholders with an understanding of the potential financial implications of climate change on its business. The report has been prepared on a voluntary basis and consistent with the recommendations of the Taskforce on Climate-related Financial Disclosures (TCFD).

This year's report sets out Vista Group's governance of climate-related risks and opportunities and describes its processes for identifying, assessing and managing climate-related risks. The 2022 financial year saw Vista Group's greenhouse gas emissions inventory being measured for the first time and verified by Toitū Envirocare. Vista Group has reported on its Scope 1, Scope 2 and selected Scope 3 emissions. The Toitū carbonreduce certification means Vista Group has measured the operational emissions of its global organisation to ISO 14064-1:2018 and Toitū requirements.

Vista Group's Climate-related Financial Disclosure Report is available in the Investor Centre section of Vista Group's website at: vistagroup.co.nz/investor-centre.
