MONTHLY SUMMARY

During October the major market influences were the Hamas/Israeli war, ongoing increases in 10-year bond yields, an incredibly strong US 3Q GDP growth number (over 8% nominal) and the bulk of quarterly company result releases. Investors are oscillating between the risks of tighter financial conditions with sustained high interest rates and the possibilities of resilient, albeit slower, economic growth while inflation falls sufficiently to allow an easing of financial conditions. We continue to see evidence of slowing discretionary spending and slowing inflation, while results revealed the early evidence of the surge in spend and usage associated with AI.

In October, the portfolio rose, benefiting from good underlying company performances and an AUD fall of 1.9%. Price gains were led by Microsoft, Chipotle Mexican Grill and Amazon, with each company reporting excellent quarterly results and strong outlooks. Price declines were widespread in markets across all regions. In the portfolio, falls between 5% and 10% in the month were seen in Booking, Lowe's and HCA Healthcare. Booking and Lowe's both fell on no specific news, with quarterly results due in November, as investors worried about discretionary spending slowing as consumers are affected by rising interest rates and perhaps a labour market deterioration ahead. HCA Healthcare reported solid results but shed light on a modest but unexpected loss from a recent acquisition. We saw small earnings cuts to capture this, and we expect management will offset through pricing actions and cost efficiencies in coming quarters. With the AUD/USD exchange rate dropping below 63c, we added a small currency hedge to moderate the potential drag to performance of a reversal.

Index movements and stock contributors/detractors are based in local currency terms unless stated otherwise.

⁵ Sectors are internally defined. Geographical exposure is calculated on a look through basis based on underlying revenue exposure of individual companies held within the portfolio. Exposures may not sum to 100% due to rounding.

⁶ Shows how much the stock has contributed to the trust's gross return for the period in AUD. Excludes non-disclosed positions established in the latest quarter.
