About Splitit

Splitit powers the next generation of commerce innovation through its merchant-branded Instalments-as-a-Service platform. Splitit is solving the challenges businesses face with legacy Buy Now, Pay Later (BNPL) providers while unlocking commerce innovation at the point of sale for card networks, issuers, and acquirers all through a single network API. Splitit's Instalments-as-a-Service platform mitigates issues with legacy BNPL like the declining conversion funnel, clutter at the checkout, and a lack of control of the merchant's customer experience while putting the power back in the hands of merchants to nurture and retain customers, drive conversion, and increase average order value. Splitit's white-label solution is the easiest instalment option for merchants to adopt, integrate, and operate while delivering an uncluttered, simplified experience embedded into their existing purchase flow. Headquartered in Atlanta, Splitit has an R&D centre in Israel and offices in London and Australia. For more information, please visit [Splitit.com](https://splitit.com).
