Important information

This presentation contains general information current as at 16 February 2024 (unless otherwise stated) and is not a recommendation or advice in relation to any product or service offered by Insurance Australia Group Limited or its subsidiaries (IAG or the Group). It presents financial information on both a statutory basis (prepared in accordance with Australian Accounting Standards which comply with International Financial Reporting Standards (IFRS)) and non-IFRS basis. This presentation is not an invitation, solicitation, recommendation or offer to buy, issue or sell securities or other financial products in any jurisdiction.

The presentation should not be relied upon as advice as it does not take into account the financial situation, investment objectives or particular needs of any person. The presentation should be read in conjunction with IAG's other periodic and continuous disclosure announcements filed with the Australian Securities Exchange (available at www.asx.com.au) and investors should consult with their own professional advisers.

No representation or warranty, express or implied, is made as to the accuracy, adequacy, completeness or reliability of any statements (including forward-looking statements or forecasts), estimates or opinions, or the accuracy or reliability of the assumptions on which they are based.

Any forward-looking statements, opinions and estimates in this report are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. This includes statements regarding IAG's strategy, targets, goals, ambitions, intent, belief, objectives, commitments and current expectations regarding IAG's business, results, financial condition, capital adequacy, risk management practices and market conditions.

Forward-looking statements may generally be identified by the use of words such as "should", "would", "could", "will", "may", "expect", "intend", "plan", "forecast", "aim", "anticipate", "believe", "outlook", "estimate", "project", "target", "goal", "ambition", "continue", "guidance", "aspiration", "commit" or other similar words. Guidance on future earnings or performance are also forward looking statements. While IAG believes the forward-looking statements to be reasonable, such statements involve risks (both known and unknown) and assumptions, many of which are beyond IAG's control (including adverse natural peril events causing losses to exceed forecasts, and uncertainties in the Australian and global economic

environment). This may cause actual results, outcomes, conditions or circumstances to differ from those expressed, anticipated or implied in such statements. For further information on some of IAG's key risks see 'Note 3.1 Risk and Capital Management' in IAG's FY23 Annual Report.

In addition, there are particular risks and uncertainties associated with implementation of IAG's strategy and related targets, ambitions and goals. As the targets, ambitions and goals span a number of years, they are subject to assumptions and dependencies which have greater levels of uncertainty than guidance given for FY24. IAG's ability to execute its strategy and realise its targets, ambitions and goals will depend upon its ability to respond and adjust its business plans (as and when developed) to any changes in such assumptions and dependencies, including disruptions or events that are beyond IAG's control.

Neither IAG, nor any other person, gives any representation, assurance or guarantee that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur and undue reliance should not be placed upon such statements. IAG assumes no obligation to update such information (except as required by law). Past performance is no guarantee or indication of future performance.

To the maximum extent permitted by law, IAG and each of its directors, officers, employees, agents and advisers disclaim all liability and responsibility for any direct or indirect loss, costs or damage which may be suffered by any recipient through use of or reliance on anything contained in, implied by or omitted from this presentation.

References to currency are to Australian dollars, unless otherwise specified. Prevailing exchange rates have been used to convert local currency amounts into Australian dollars, where appropriate.

Direct Insurance Australia

Key highlights

- Strong GWP growth driven by Motor (14%) and Home (16%)
 - Short-tail volumes broadly flat, with some growth in RACV in Victoria
 - CTP volume growth in NSW and SA
- Earnix pricing engine deployment resulting in improved pricing capabilities
- Increase in reported insurance margin to 11.9% (1H23: 8.9%) and underlying insurance margin to 15.9% (1H23: 13.2%) reflecting an improvement in underlying claims ratio:
 - Improving motor claims trends, with reducing second-hand car prices
 - Expanded network capacity
- Reserve strengthening due to short-tail working claims and late reporting of prior period peril claims

Intermediated Insurance Australia

Key highlights

- Reported profit of \$162m and on track to deliver on target of at least \$250m in FY24 insurance profit
- Improvement in reported insurance margin to 11.4% (1H23: 3.6%) and underlying insurance margin to 9.5% (1H23: 5.7%)
- Continued disciplined approach to portfolio management plan, with targeted rate increases having some impact on retention
- Successful commencement of ANZ distribution partnership with ~\$100m GWP contribution
- Long-tail reserve release and reversal of onerous contract

New Zealand

Key highlights

- Strong NZ\$ GWP growth of 18.8%
 - Local underlying currency growth of ~16%
 - A\$ GWP growth of 21.1%
- Strong turnaround in profitability due to underlying insurance margin improvement and benign perils outcome
- Improvement in reported insurance margin to 20.8% (1H23: 15.2%) and underlying insurance margin to 14.9% (1H23: 13.2%):
 - Benefit of ~10% NEP growth
 - Lower administration ratio, partially offset by
 - Ongoing inflationary environment
- Continued roll-out of Enterprise Platform, with State first direct brand expected to go live in March, followed by AMI later in the financial year

Strong top-line growth

Reported GWP growth of 12.5%:

- Strong premium increases reflecting claims inflation, higher reinsurance costs and increased perils allowance
- Strong retention rates across direct distribution
- Overall moderate volume reduction
 - Flat outcome in DIA
 - Slight reduction in New Zealand
 - IIA retention down following strict underwriting discipline

Gross Earned Premium 1H24 growth 10.2%, expected to increase in 2H24

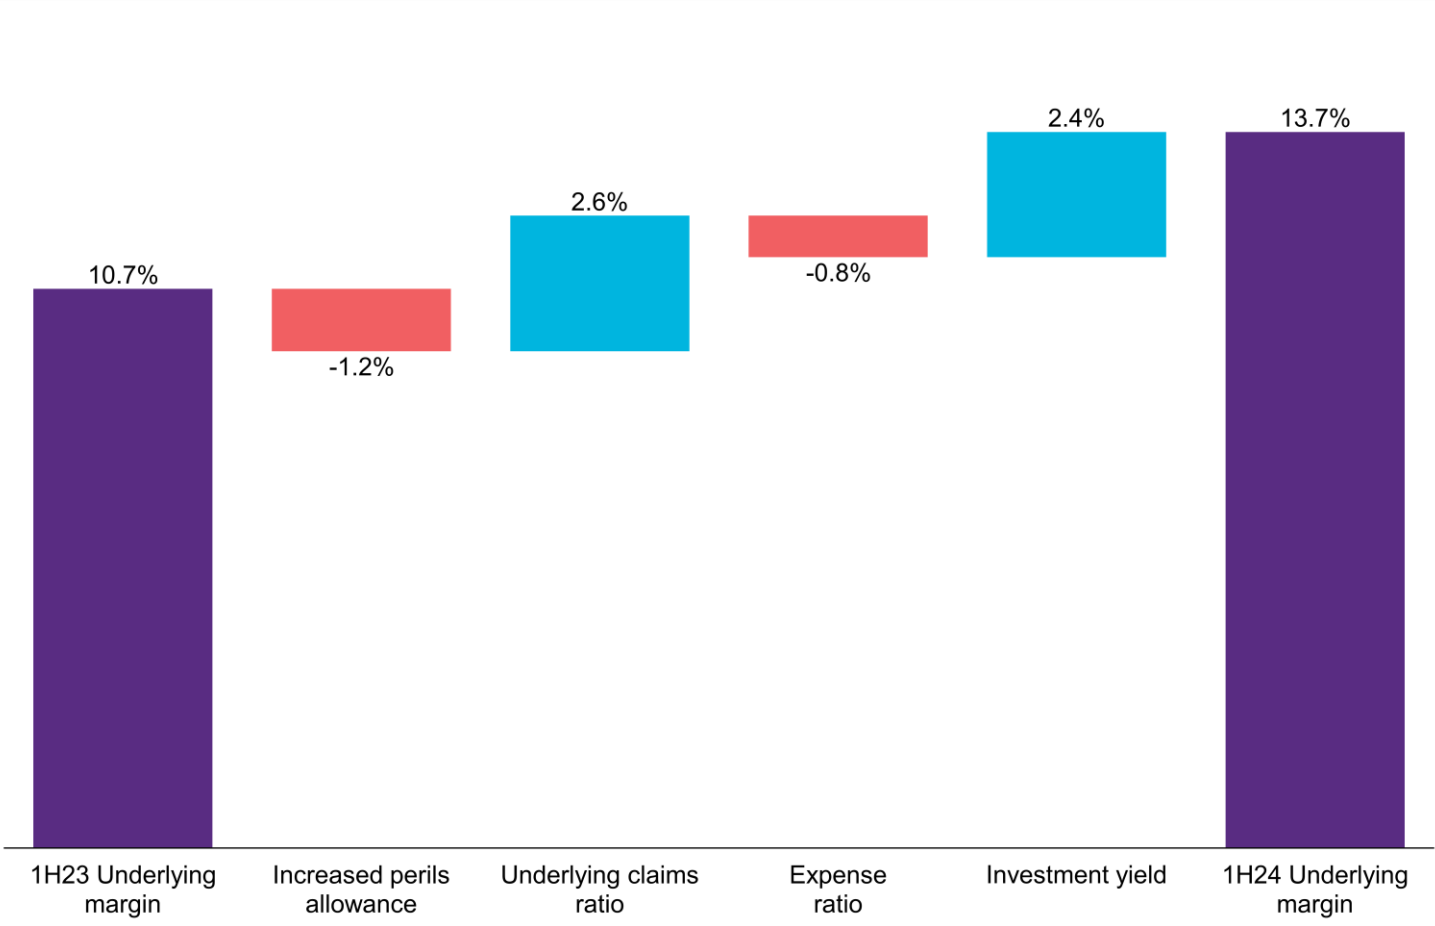

Group GWP vs GEP growth

Underlying insurance margin

Strong NEP growth of 9.3% drives improvement in underlying insurance margin to 13.7% (1H23: 10.7%):

- Increased perils allowance to \$549m (1H23: \$454m)
- 260bps claims ratio improvement;
- Expense ratio increase to 23.7% (1H23: 22.9%), driven by higher levies and commissions
- Higher investment yield

Improvement in underlying claims ratio

Rate increases implemented over the last year continuing to earn through

Decline in second-hand car prices and expanded network capacity assisting improvement in DIA

Portfolio management initiatives in IIA, partially offset by adverse large loss experience

Inflationary environment remains elevated in New Zealand, with signs this has stabilised in recent months

Underlying claims ratio

Strong reinsurance protection for calendar 2024

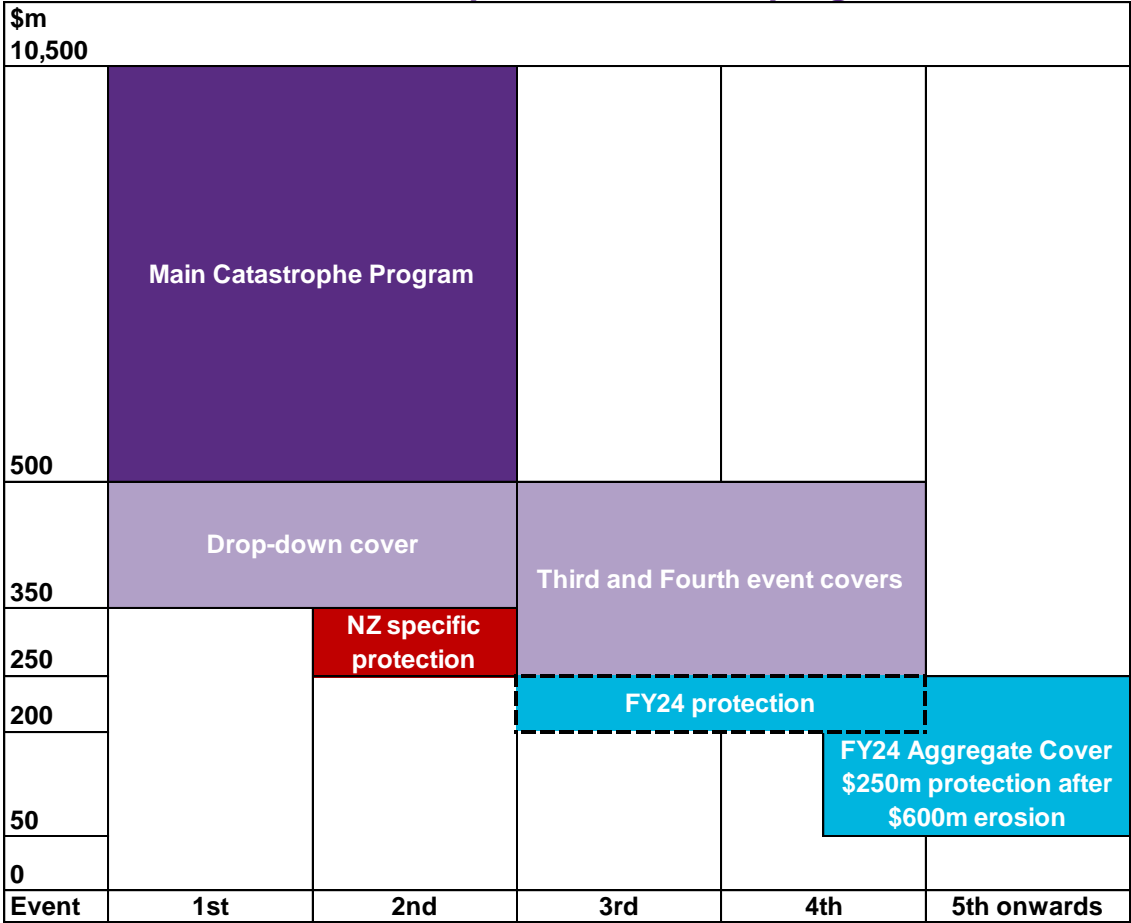

2024 catastrophe reinsurance program

- Greater reinsurance protection than originally anticipated
- Maximum event retention for first event of \$236m (67.5% of \$350m)

FY24 reinsurance covers

- Third and fourth events at lower retention
- Aggregate cover deductible eroded by ~\$250m as at 31 December 2023

Gross catastrophe reinsurance program

Favourable perils experience with revised FY24 allowance

\$521m net perils, \$28m below revised 1H24 allowance

- Relatively benign until November, December storm and floods across East Coast of Australia
- Absence of large perils events in NZ

FY24 allowance revised lower by \$49m

- Reduced risk exposure – entry into Cyclone Reinsurance Pool
- Greater protection – additional 2024 catastrophe reinsurance

Natural perils vs allowance

Expenses

10bps increase in admin ratio ex-levies as we invest for the future

- Increased technology spend including associated amortisation
 - Enterprise Platform rollout
 - Commercial enablement in IIA
- Additional regulatory and compliance spend
- Ratio flat excluding the impact of one-off reinsurance reinstatement costs

Expected reduction in ratio in 2H24 from level in 1H24

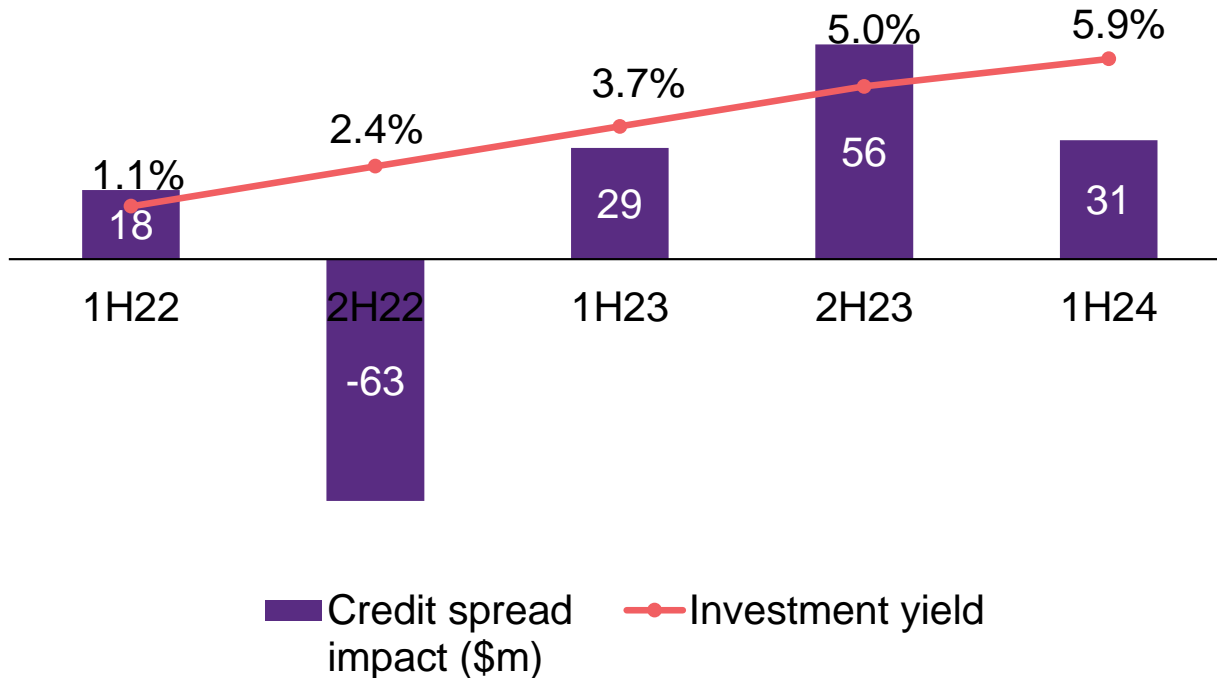

- Expenses growing proportionally less than NEP growth

Administration expenses ex-levies

Ongoing improvement in investment yields

Investment yield on technical reserves

~\$12.4bn Investment Portfolio

\$7bn **technical reserves** invested in fixed interest & cash

- Gain of \$290m driven by the higher investment yield and narrowing of credit spreads
- ~220bps investment yield improvement in 1H24 (5.9%) vs 1H23 (3.7%)

\$5.4bn **shareholders' funds** with growth asset weighting of ~24%

- Gain of \$147m with positive performance across both growth and defensive assets

Appendix 1: FY24 Guidance and Outlook

IAG's financial performance in the first six months of FY24 and confidence in the strength of its underlying business is reflected in FY24 guidance which remains:

- GWP growth of 'low double digits'. This will be primarily rate driven to cover claims inflation, higher reinsurance costs and an increased natural peril allowance; and
- Reported insurance margin guidance of 13.5% to 15.5% which assumes:
 - Continued momentum in the underlying performance of IAG's businesses, supported by increased investment yields;
 - A revised natural peril expectation of \$1,098 million;
 - No material prior period reserve releases or strengthening for the second half of FY24; and
 - No material movement in macro-economic conditions including foreign exchange rates or investment markets.

Following the 13.7% reported insurance margin recorded in 1H24, which included the impact of prior period reserve development and additional reinsurance reinstatement costs, IAG expects an improved second half which will benefit from the earn-through of the strong GWP growth.

The FY24 guidance aligns to IAG's aspirational goals to deliver a 15% insurance margin and a reported ROE of 13% to 14% on a 'through the cycle' basis. As previously outlined, IAG also has ambitions of:

- One million additional direct customers;
- An IIA insurance profit of at least \$250 million in FY24;
- \$400 million in value from DIA claims and supply chain cost reductions on a run-rate basis from FY26; and
- Further simplification and efficiencies to reduce the Group's administration ratio.

These goals and ambitions are subject to assumptions and dependencies, including that there are no material adverse developments in macro-economic conditions and disruptions or events beyond IAG's control (for example, natural perils events in excess of IAG's allowances). As they span a number of years, these assumptions and dependencies have a greater level of uncertainty than the FY24 guidance. Refer to the Important Information disclaimer on page 2 of this presentation for further detail.
