QUARTERLY ACTIVITIES UPDATE AND APPENDIX 4C

Period Ending 30 September 2024

Orbital Corporation Ltd ('Orbital UAV', 'the Company') presents its quarterly activities report for the period ended 30 September 2024.

PRODUCTION AND SHIPPING

After successfully completing production readiness reviews, Orbital UAV is now in production for three new engine lines servicing key clients in the USA, Singapore and Vietnam. Engine builds have commenced with initial deliveries completed within the quarter. Batch deliveries for all new production lines are scheduled for November and December, with steady state production expected from the beginning of the 2025 calendar year.

During the quarter, Orbital announced the execution of an option for additional engines by DSO National Laboratories, increasing the initial order size by an additional \$3.5m.

The pathway to productionisation encompassed significant engineering design and procurement activities that require investment from Orbital to develop, acquire and assemble systems. These activities require a higher cash utilisation in advance of customer deliveries and receipts in later periods. This is reflected in the operating cashflows described in the Appendix 4C.

ENGINEERING PROGRAMS

Orbital's engineering team supports in production test and calibration works in addition to its internal Research and Development programs. The FY25 period will see the design and prototyping of a larger capacity internal combustion engine to achieve heavier payload delivery and enhanced power to weight specifications. During the quarter, Orbital has completed its detailed design drawings for early prototype builds and is confident that this latest model exceeds the specifications required for UAS programmes in a Long Endurance, Class II – Class III range. Power outputs and endurance capabilities of the new engine will also meet design requirements for maritime settings that include logistical solutions for moving ships.

OTHER INCOMES & DEBT

Orbital UAV has successfully reached the milestones required for full repayment of the legacy WA government loan and anticipates a grant approval in December 2024 totalling \$2.4m. This will take Orbital into a debt free position from 1 January 2025.
