March Quarter 2026

Unlocking value to empower the future

29 April 2026

For personal use only

Important information

The information in this presentation is provided for general information regarding 29Metals Limited (the '**Company** ') and its subsidiaries (together with the Company, '**29Metals**'). Material information in this presentation has been derived from information publicly released by the Company to the ASX announcements platform. Details regarding the source information released to the ASX announcements platform is included in notes in this presentation.

Information presented is deemed representative at the time of its original release and 29Metals does not accept any responsibility to update the information presented. Readers should be aware that there may be changes to historical information presented in the future due to adjustments in accounting and reporting policies and standards, and that past results or performance are no guarantee of future results or performance.

This presentation is not a recommendation to invest in 29Metals. The information presented does not purport to include all of the information that a person may require in order to decide whether to invest in 29Metals. Prospective investors must seek their own legal or other professional advice.

Forward-looking statements

This document contains certain forward-looking statements and comments about future events, including in relation to 29Metals' businesses, plans and strategies and expected trends in the industry in which 29Metals currently operates. Forward-looking statements can generally be identified by the use of words such as, "expect", "anticipate", "likely", "intend", "should", "could", "may", "plan", "predict", "plan", "propose", "will", "believe", "forecast", "outlook", "estimate", "target" and other similar words. Indications of, and guidance or outlook on future earnings or financial position or performance are also forward-looking statements. Forward-looking statements involve inherent risks, assumptions and uncertainties, both general and specific, and there is a risk that predictions, forecasts, projections and other forward-looking statements will not be achieved. A number of important factors could cause 29Metals' actual results to differ materially from the plans, objectives, expectations, estimates, targets and intentions expressed in such forward-looking statements, and many of these factors are beyond the control of 29Metals, its Directors and Management. Statements or assumptions in this document may prove to be incorrect, and circumstances may change, and the contents of this document may become outdated as a result. This includes statements about market and industry trends, which are based on interpretations of current market conditions.

Forward-looking statements are based on 29Metals' good faith assumptions as to the financial, market, regulatory and other relevant environments that will exist and affect 29Metals' business and operations in the future. 29Metals does not give any assurance that the assumptions will prove to be correct. There may be other factors that could cause actual results or events not to be as anticipated, many of which are beyond 29Metals' reasonable control, and 29Metals does not give any assurance that the assumptions will prove to be correct.

Readers are cautioned not to place undue reliance on forward-looking statements.

Forward-looking statements speak only as of the date of this document, and except where required by law, 29Metals does not intend to update or revise any forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this document.

Nothing in this document is a promise or representation as to the future, and past performance is not a guarantee of future performance. 29Metals nor its Directors make any representation or warranty as to the accuracy of such statements or assumptions.

Mineral Resource and Ore Reserve estimates

In this announcement, all references to Mineral Resources and Ore Reserves estimates are references to those estimates contained in 29Metals' 31 December 2025 Mineral Resources and Ore Reserves estimates, including Competent Person's statements and JORC Code Table 1 disclosures, released to the ASX announcements platform on 26 February 2026.

29Metals confirms that it is not aware of any new information or data that materially affects the information included in those announcements and that all material assumptions and technical parameters underpinning the relevant Mineral Resource and Ore Reserve estimates in those announcements continue to apply and have not materially changed.

29Metals updates its Mineral Resources and Ore Reserves estimates annually. The next update to 29Metals' Mineral Resources and Ore Reserves estimates is planned to be published during the March Quarter 2027.

Non-IFRS financial information

29Metals' results are reported under IFRS. This document may include certain metrics, such as "Site Costs", "C1 Costs", "AISC", "total liquidity", "drawn debt", "net drawn debt", "site operating costs", "suspension operating costs", "suspension capital costs" and "EBITDA" that are not recognised under Australian Accounting Standards and are classified as "non-IFRS financial information" under ASIC Regulatory Guide 230: Disclosing non-IFRS financial information. 29Metals uses these non-IFRS financial information metrics to assess business performance and provide additional insights into the underlying performance of its assets.

The non-IFRS financial information metrics used in this document have been calculated by reference to information prepared in accordance with IFRS. However, these non-IFRS financial information metrics do not have a standardised meaning prescribed by IFRS and may be calculated differently by other companies.

The non-IFRS financial information metrics included in this document are used by 29Metals to assess the underlying performance of the business. The non-IFRS information has not been subject to audit by 29Metals' external auditor.

Non-IFRS financial information should be used in addition to, and not as a substitute for, information prepared in accordance with IFRS. Although 29Metals believes these non-IFRS financial information metrics provide useful information to investors and other market participants, readers are cautioned not to place undue reliance on any non-IFRS financial information presented. Refer to page 19 of the Company's Appendix 4E and Annual Financial Report for the year ended 31 December 2025.

Rounding

Certain figures, amounts, percentages, estimates, calculations of value and fractions presented are subject to the effect of rounding. Accordingly, the actual calculation of these figures may differ from the figures presented.

Summary Information

This presentation includes summary information relating to or derived from the March 2026 Quarterly Report ('Mar-Qtr Report') for 29Metals as released to the ASX announcements platform on 29 April 2026 which includes additional information and notes relating to unaudited drawn debt, unaudited cash and cash equivalents and unaudited available group liquidity (refer to relevant Endnotes in the Mar-Qtr Report).

This presentation should be read in conjunction with, not in replacement of, the Mar-Qtr Report.

Authorisation

This presentation has been approved for issue by, and enquiries regarding this presentation may be directed to James Palmer, 29Metals Chief Executive Officer - contactus@29metals.com

Why Invest In 29Metals

Copper – a critical future facing metal to enable the global transition towards electrification

Large copper endowments

2.3Mt Contained Copper + 2.2Mt Zinc, 1.2Moz Gold, 73Moz Silver in Group Mineral Resources estimates[2]

Long life assets

Resources to support 10+ year mine lives

Low risk jurisdiction

Australian based copper assets

Organic growth options

Golden Grove: Gossan Valley | Resource Expansion | Cervantes

Capricorn Copper: Production Restart | Resource Expansion

Exploration upside

History of both assets being highly responsive to step out drilling

1. Refer to 29Metals' ASX release entitled "Capricorn Copper – Suspension of Operations", released to the ASX announcements platform on 26 March 2024.
2. In this presentation, all references to Mineral Resources and Ore Reserves estimates are references to those estimates contained in 29Metals' 31 December 2025 Mineral Resources and Ore Reserves estimates, including Competent Person's statements and JORC Code Table 1 disclosures, released to the ASX announcements platform on 26 February 2026. Refer to the important information section on page 2 of this presentation for further information.

29Metals - Copper exposure for ASX investors

Uniquely positioned with two large copper metal endowments in a tier 1 jurisdiction – 2.3Mt contained copper in Mineral Resource estimates[1]

Production Snapshot

2025 Production (Golden Grove)

- 22kt Copper @ AISC US$3.55/lb Cu sold
- 35kt Zinc
- 15koz Gold
- 746koz Silver

2026 Guidance (Golden Grove)[2]

- 20 – 24kt Copper
- 5 – 25kt Zinc
- 6 – 14koz Gold
- 400 – 600koz Silver

Key Assets

Golden Grove

Mineral Resources[1]:
62.9Mt @ 1.7% Cu, 3.5% Zn, 0.6g/t Au, 24g/t Ag

Ore Reserves[1]:
18.2Mt @ 1.7% Cu, 4.0% Zn, 0.6g/t Au, 22g/t Ag

Location: Western Australia

Ownership: 100%

Status: Producing

Mill Capacity: up to 1.8Mtpa

Mine type: Underground

Cu Zn Au Ag

Capricorn Copper

Mineral Resources[1]:
64.2Mt @ 1.8% Cu, 9g/t Ag,

Ore Reserves[1]:
19.0Mt @ 1.7% Cu, 13g/t Ag

Location: Queensland

Ownership: 100%

Status: Brownfield restart project[3]

Mill Capacity: up to 2.0Mtpa

Mine type: Underground

Cu Ag

Key Points

Mar-Qtr-2026

Safety[1]

9.3

Group TRIF

(Dec-Qtr: 7.1)

0.0

Group LTIF

(Dec-Qtr: 0.0)

Golden Grove

Copper Production	Zinc Production	C1 Costs[2]
6.4kt	0.1kt	US$4.25/lb Cu

- Positive cash flow after capital expenditures of $10 million (Dec-Qtr: negative $23 million).
- Following ongoing geotechnical review of seismic impacts at Xantho Extended, additional works are planned to further reduce the risk of future production interruptions, with expected completion Dec-Qtr-2026.
- Alternate ore sources will be mined and milled whilst additional works are completed at Xantho Extended, with no change to full year copper production guidance.
- Evaluation of additional copper and gold ore sources to incorporate into the rest of year mine plan remains ongoing. Additional ore sources are planned to maximise mill throughput and production outcomes to partially offset lower by-product revenue from delayed recommencement of mining at Xantho Extended.
- Gossan Valley project remains on track for first ore by end 2026.
- Drilling results continue to highlight potential for mine life extensions in easily accessible areas of Gossan Hill.[3]

Capricorn Copper

- Excellent progress on water inventory reductions – water levels now substantially below the Maximum Operating Level[4] ('**MOL**') and no longer an impediment to a restart of production.
- Application for Tailings Storage Facility ('**TSF**') 3 progressing to plan - response to Request for Information ('**RFI**') on track for Sep-Qtr-2026.
- Definitive Feasibility Study ('**DFS**') commenced to accelerate restart of operations upon receipt of TSF 3 approval.
- A range of non-dilutive funding options are being considered across Capricorn Copper and Golden Grove to fully fund the restart of production at Capricorn Copper and, potentially, raise excess funds to accelerate growth options across the portfolio.

Corporate and other

- Guidance revised for zinc, gold and silver production and selling costs to reflect mine plan changes due to the additional geotechnical risk mitigation works at Xantho Extended – no change to copper production guidance.
- Equity Raising completed for gross proceeds of $150 million to support growth initiatives.
- Golden Grove is a relatively low diesel intensity operation - diesel represents approximately 3% of total Site Costs, at current prices. Diesel procurement is contracted with a major supplier who continues to fulfil obligations.
- Unaudited available group liquidity[5] at 31 March 2026 of $238 million (31 December 2025: $118 million).
- Considering various factors, it is expected that existing liquidity will be sufficient to fully fund the revised plan for 2026 and maintain growth investments at Gossan Valley and exploration.

1. Total Recordable Injury Frequency ("TRIF") and Lost Time Injury Frequency ("LTIF") metrics are reported as the 12-month moving average at the end of each quarter, reported on a per million work hours ('mwhrs') basis.
2. C1 Costs is the sum of mining costs (excluding capitalised development), processing costs, and G&A costs, concentrate transport, treatment and refining charges ("TCRCs"), stockpile movements, and by-product credits.
3. Refer to ASX release "High-Grade Copper and Zinc Intercepts at Golden Grove" dated 19-Jan-2026 and to ASX release "High-grade Resource Extension intercepts at Golden Grove" dated 28-Jan-2026.
4. References to 'Maximum Operating Level' in this presentation refer to combined estimated volume (GL) within regulated surface water storage structures (Esperanza Pit and Mill Creek Dam) at Maximum Operating Levels (mAHD).
5. Refer to Important Information on slide 2 of this presentation regarding summary information and Non-IFRS financial information.

Golden Grove

Mar-Qtr-2026: Operations Overview

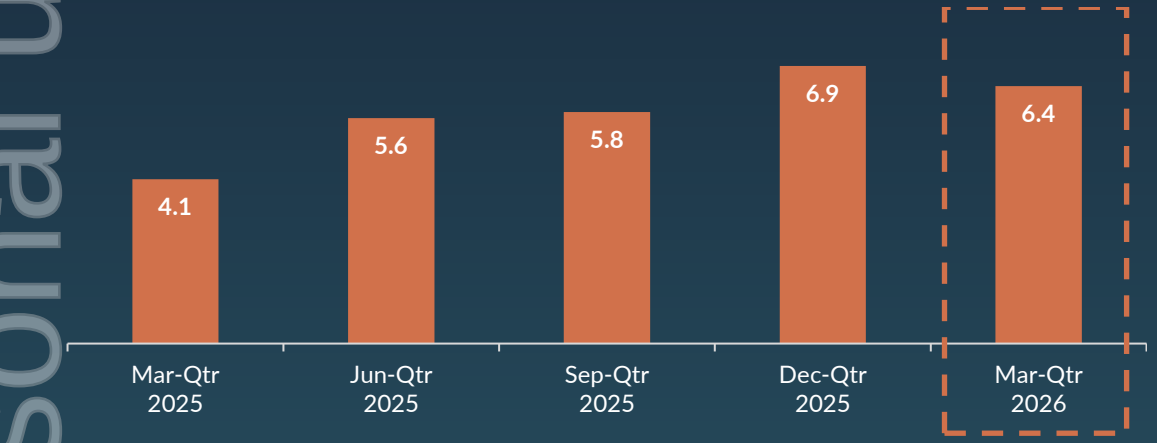

Ore mined contribution by source (%)

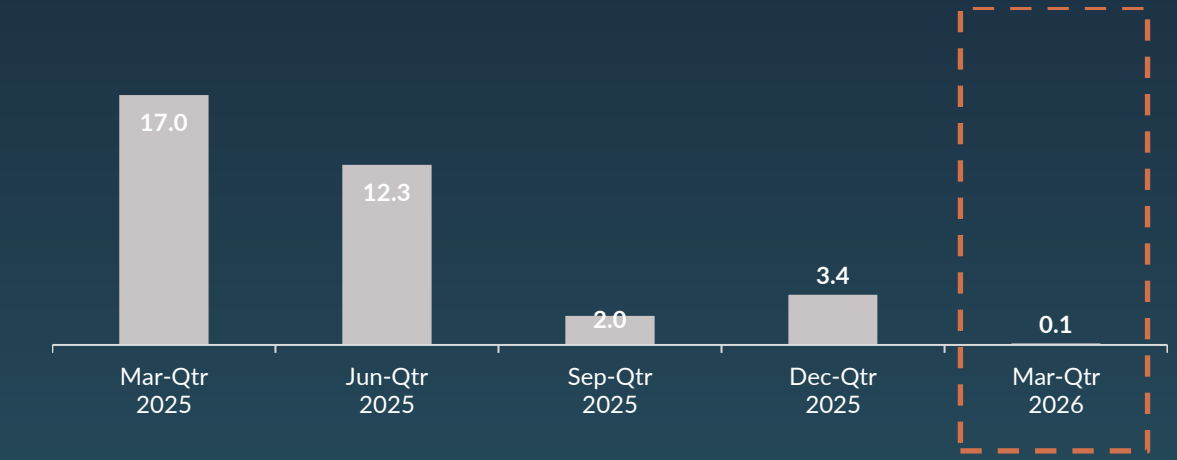

Comments

- TRIF[1] and LTIF[1] of 9.8 (Dec-Qtr: 7.4) and 0.0 (Dec-Qtr: 0.0), respectively.
- Ore mined 290kt (Dec-Qtr: 397kt).
- Ore milled 305kt (Dec-Qtr: 391kt).
- Ore milled was predominately copper ore (copper ore: 301kt copper vs zinc ore: 4kt) due to the temporary suspension of mining at Xantho Extended.
- Copper production of 6.4kt (Dec-Qtr: 6.9kt).
  - Grade milled 2.3% (Dec-Qtr: 2.0%); Recovery 92.9% (Dec-Qtr: 89.7%).
- Zinc production of 0.1kt (Dec-Qtr: 3.4kt) – primarily copper ore milled in Mar-Qtr.

Copper Production (kt)

Zinc Production (kt)

1. TRIF and LTIF metrics are reported as the 12-month moving average at the end of each quarter, reported on a per million work hours ('mwhrs') basis.

ersonal use only

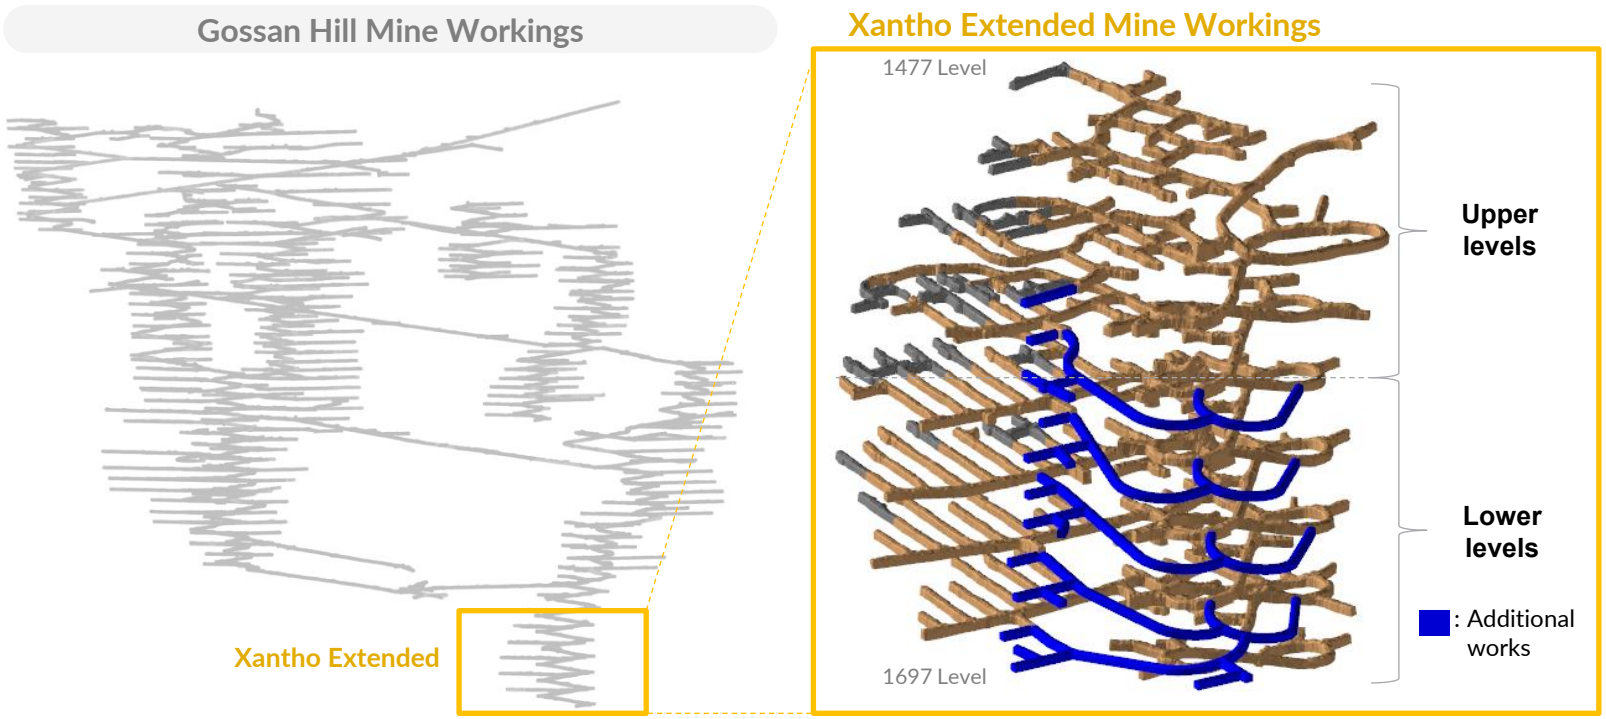

Xantho Extended

Additional works planned to provide greater production certainty from the end of 2026 and for the life of mine.

Comments

- As previously reported, mining at Xantho Extended was suspended whilst ground support upgrades were implemented, which were completed post quarter end as planned, to enabled re-entry to Xantho Extended decline and production levels.
- Following ongoing geotechnical review of seismic impacts at Xantho Extended, additional works are planned to further reduce the risk of future production interruptions. The additional works include alternate level access development to mitigate interactions with higher stress zones of the existing decline, which are expected to be completed during Dec-Qtr-2026.
- Recommencement of mining in parallel with completion of the additional works at Xantho Extended was considered. However, the deferred recommencement of mining is the preferred pathway as it allows for accelerated works via progression of multiple development fronts, without interruption or interaction with mining activities, and has lower overall geotechnical risk.
- Potential to accelerate recommencement of mining in the upper areas of Xantho Extended whilst additional works are competed is under review.
- Considering various factors, it is expected that existing liquidity will be sufficient to fully fund the revised plan for 2026 and maintain growth investments at Gossan Valley and exploration.

Additional planned works at Xantho Extended

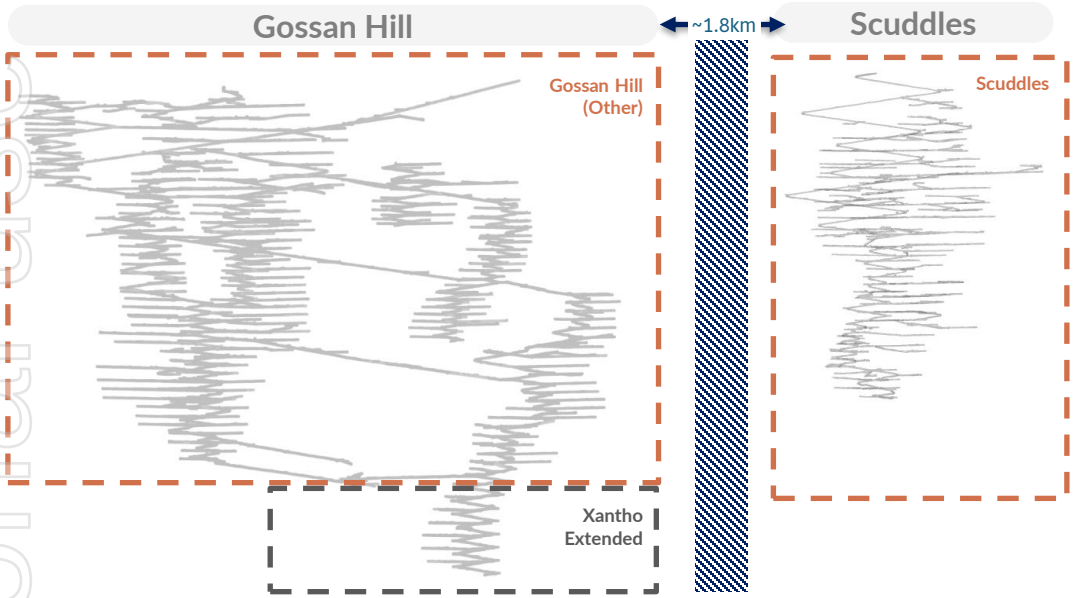

ersonal use only

Alternate ore sources are available whilst additional works are completed

Copper guidance maintained. Works are in progress to incorporate additional copper and gold ore sources into the rest of year mine plan to maximise mill throughput and production outcomes to partially offset lower by-product revenue from delayed recommencement of mining at Xantho Extended.

Ore Reserve[1] grades of active mining areas

	Ore Reserve[1] Grades			
	Copper	Zinc	Gold	Silver
Gossan Hill (Other)[2]	2.0%	1.3%	0.5g/t	17g/t
Scuddles[3]	1.4%	2.0%	0.4g/t	22g/t
Xantho Extended[4]	1.8%	6.8%	0.9g/t	28g/t

Revisions to Golden Grove 2026 Guidance

Golden Grove

Mar-Qtr-2026: Costs and Capital Overview

Site Costs ($ million)

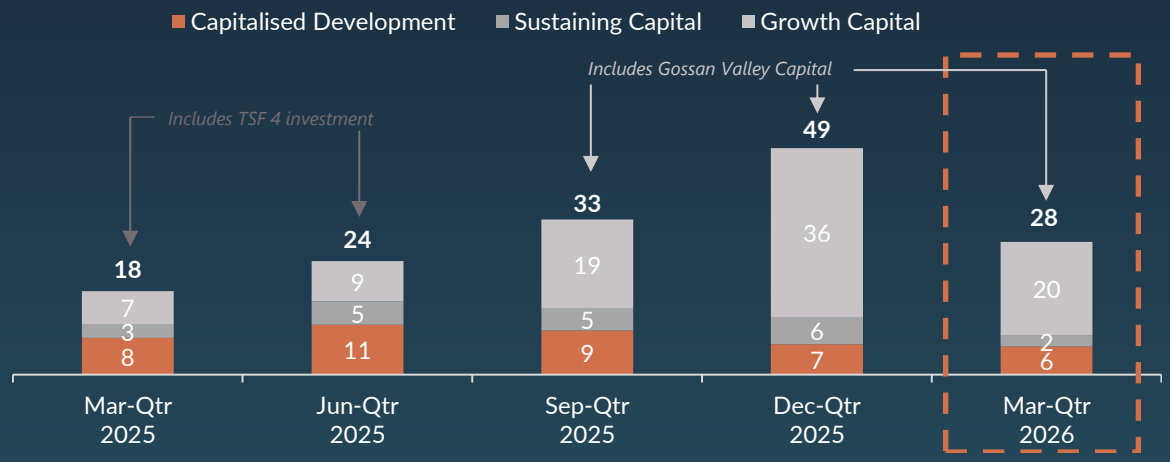

Unit Costs (US$/lb)

Comments

- C1 Costs[1] of US$4.25/lb copper sold (Dec-Qtr: US$2.46/lb copper sold).
- AISC[2] of US$5.08/lb copper sold (Dec-Qtr: US$3.52/lb copper sold).
- Higher C1 unit costs were primarily driven by a stockpile movement charge of $18 million (Dec-Qtr: $28 million credit), partially offset by higher by-product credits (Mar-Qtr: $40 million vs Dec-Qtr: $27 million), reflecting higher quarter-on-quarter zinc sales.
- As a high-grade underground operation connected to grid power, Golden Grove is a relatively low diesel use intensity operation. At current prices, 2026 diesel costs are expected to account for approximately 3% of total Site Costs. Diesel procurement is contracted with a major supplier who continue to fulfil obligations.

Capital ($ million)

1. C1 Costs is the sum of mining costs (excluding capitalised development), processing costs, and G&A costs, concentrate transport, treatment and refining charges (TCRCs), stockpile movements, and by-product credits.
2. All-in Sustaining Costs (AISC) is the sum of C1 Costs, sustaining capital and capitalised development.

Highlights:

Tryall Resource Extension drilling[2,4]:

- **12.3m @ 2.8% Cu, 1.4g/t Au, 17g/t Ag, including:**
  - 3.3m @ 9.2% Cu, 3.2g/t Au, 46g/t Ag
- **17.2m @ 2.6% Cu, 1.6% Zn, 0.4g/t Au, 19g/t Ag**
- **17.0m @ 2.0% Cu, 0.3g/t Au, 16g/t Ag, including:**
  - 7.0m @ 3.7% Cu, 0.4g/t Au, 25g/t Ag
- **14.7m @ 1.9% Cu, 0.3g/t Au, 10g/t Ag, including:**
  - 5.2m @ 2.9% Cu, 0.3g/t Au, 15g/t Ag
- **20.2m @ 1.7% Cu, 0.4g/t Au, 10g/t Ag, including:**
  - **5.8m @ 3.6% Cu, 0.6g/t Au, 23g/t Ag**

Hougoumont Extended & Oizon Resource Extension drilling[2,3]:

- **14.6m @ 2.6% Cu, 0.5g/t Au, 24g/t Ag, including:**
  - 7.0m @ 4.9% Cu, 1.0g/t Au, 45g/t Ag
- **13.4m @ 2.5% Cu, 0.7g/t Au, 24g/t Ag, including:**
  - 7.4m @ 3.2% Cu, 0.6g/t Au, 30g/t Ag
- **21.6m @ 0.3% Cu, 17.6% Zn, 1.6g/t Au, 49g/t Ag, 1.0% Pb**
  - 16.1m @ 0.2% Cu, 22.6% Zn, 1.6g/t Au, 58g/t Ag, 1.3% Pb

Cervantes Resource Extension drilling[2,4]:

- **17.8m @ 8.8% Zn, 0.1% Cu, 0.4g/t Au, 44g/t Ag**
- **48.2m @ 2.4% Cu, 0.2g/t Au, 12g/t Ag,** including:
  - 18.1m @ 3.8% Cu, 0.3g/t Au, 19g/t Ag
- **13.9m @ 7.4% Cu, 0.4g/t Au, 33g/t Ag, including:**
  - 9.2m @ 10.1% Cu, 0.5g/t Au, 41g/t Ag,

Cervantes Resource Conversion drilling[2]:

- **80.4m @ 3.9% Cu, 0.5g/t Au, 22g/t Ag,** including:
  - 51.8m @ 5.2% Cu, 0.7g/t Au, 30g/t Ag

A bright future at Golden Grove

Progressive ramp-up of mining from fresh ore sources to support metal production growth

Investment phase to enable mining of high-grade ore sources is nearing completion

- Reduction in capital expenditures expected post 2026.
- Harvest of the operational and financial benefits of investment phase planned from 2027.

Optimised mine plan

- High-grade ore sources to feed the mill from end of 2026 (Xantho Extended, Oizon and Gossan Valley).
- Gossan Valley to provide production flexibility from an independent and relatively shallow high-grade mining front.

Resource Extension exploration drilling ongoing

- 2026 targets informed by exploration success through 2025[1].
- Future drilling planned from underground drill platforms to test for extensions to existing Gossan Valley Mineral Resources estimates[2], which remain open at depth.

1. Refer ASX release "High-grade copper intercepts highlight Golden Grove growth potential" dated 9-Sep-2025, ASX release "High-Grade Copper Intercepts at Golden Grove" dated 4-Nov-2025, ASX release "High-Grade Copper and Zinc Intercepts at Golden Grove" dated 19-Jan-2026, and Refer to ASX release "High-grade Resource Extension intercepts at Golden Grove" dated 28-Jan-2026.

Water levels no longer an impediment to a restart of production

Approval for a long-term Tailings Storage Facility ('TSF') 3 is now the critical path imperative for a restart of production.

	Progress
Water inventory reductions	▪ Site water levels no longer an impediment to a restart of production. ▪ With total water inventory now significantly below the Maximum Operating Level[1] ('**MOL**'), approval for Tailings Storage Facility ('TSF') 3 becomes the critical path imperative for a restart of production.
Long-term tailings storage solution (On Track)	▪ Application for TSF 3 submitted in Sep-Qtr-2025. ▪ Request for Information ('RFI') from the Regulator in relation to TSF 3 application was received Dec-Qtr-2025, in line with normal process, with a response planned for submission in Sep-Qtr-2026.

Water inventory reductions:

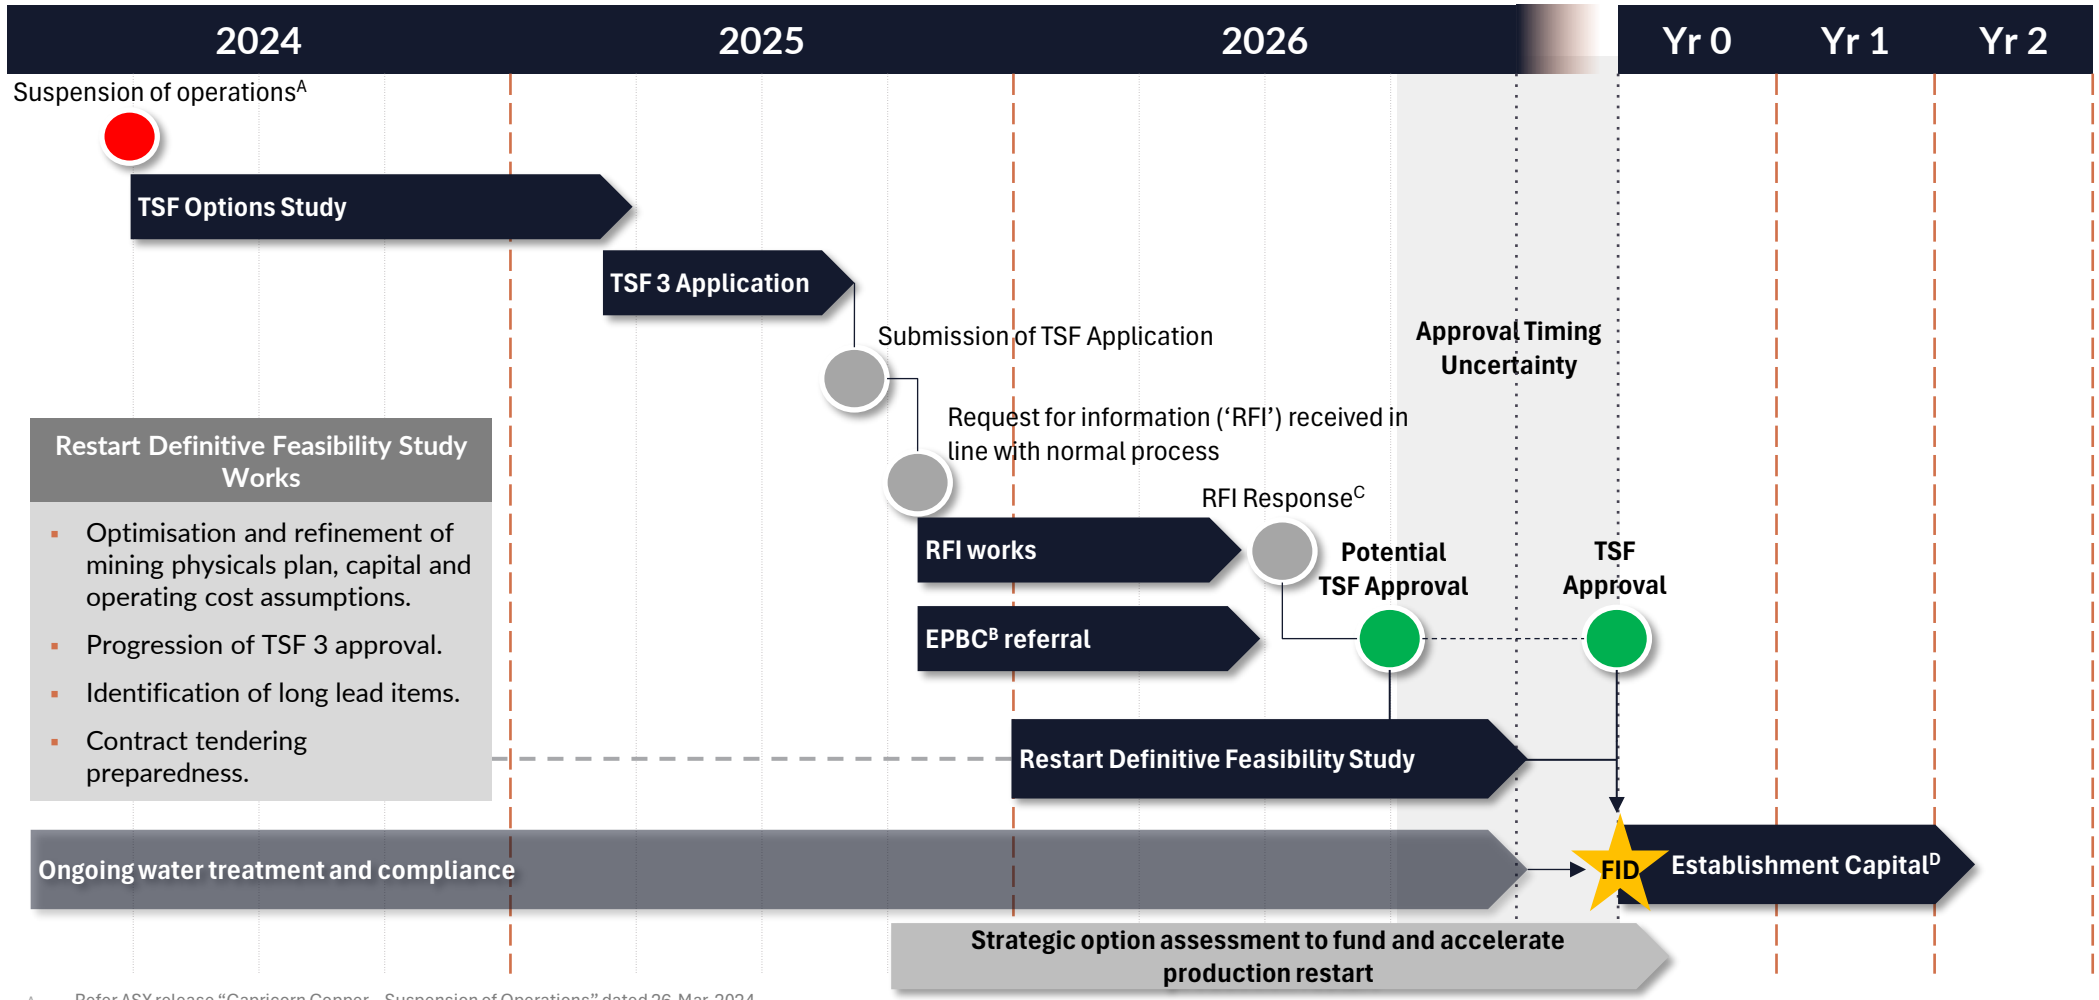

1. References to 'Maximum Operating Level' in this presentation refer to combined estimated volume (GL) within regulated surface water storage structures (Esperanza Pit and Mill Creek Dam) at Maximum Operating Levels (mAHD).
2. Refer ASX release "Capricorn Copper – Suspension of Operations" dated 26-Mar-2024.
3. Reflects combined approx. volume (GL) within regulated water storage structures, EPit and MCD, at 1 November 2022
4. Refer to: "Impact of Extreme Rainfall on Capricorn Copper Operations" released to the ASX announcements platform on 9 March 2023; "Capricorn Copper Operations Update" released to the ASX announcements platform on 15 March 2023; and "Strategic Update" released to the ASX announcements platform on 23 May 2023.

Personal use only

Tailings Storage Facility ('TSF') approval is the critical path item for a restart decision

Request for Information ('RFI') from the Regulator in relation to TSF 3 application was received Dec-Qtr-2025, in line with normal process, with a response planned for submission in Sep-Qtr-2026.

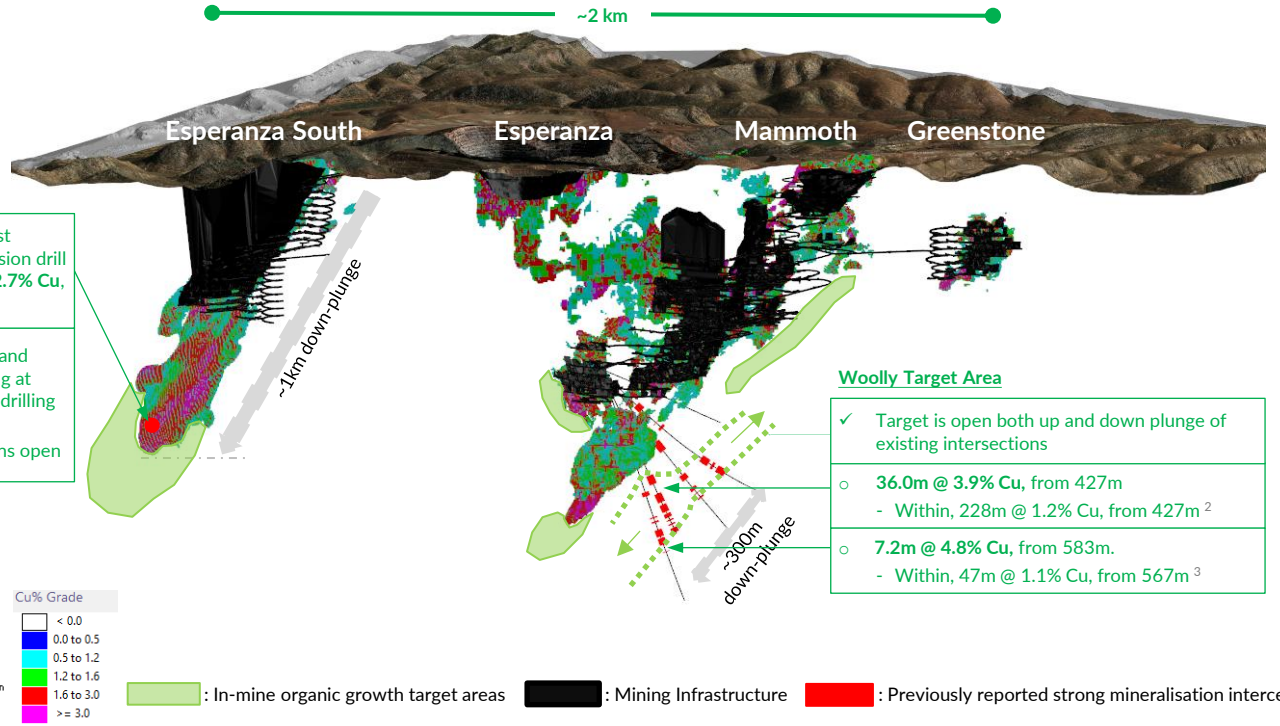

A. Refer ASX release "Capricorn Copper – Suspension of Operations" dated 26-Mar-2024.
B. Environment Protection and Biodiversity Conservation ('EPBC').
C. RFI in relation to TSF 3 application from Department of Environment, Tourism, Science and Innovation ('DETSI') allows 12-month period for response.
D. Establishment Capital: Total capital costs from FID to first production.

A bright future at Capricorn Copper

Substantial high-grade copper Mineral Resources[1] with pathway to production

Capricorn Copper Long Section[1]

Esperanza South

- ✓ Previous deepest Resource Extension drill hole: **48.1m @ 2.7% Cu**, from 878.9m [2]
- ✓ Orebody width and grades increasing at depth based on drilling to date
- ✓ Resource remains open

Woolly Target Area

- ✓ Target is open both up and down plunge of existing intersections
- ○ **36.0m @ 3.9% Cu,** from 427m
  - Within, 228m @ 1.2% Cu, from 427m [2]
- ○ **7.2m @ 4.8% Cu,** from 583m.
  - Within, 47m @ 1.1% Cu, from 567m [3]

: In-mine organic growth target areas : Mining Infrastructure : Previously reported strong mineralisation intercepts

1. In this presentation, all references to Mineral Resources and Ore Reserves estimates are references to those estimates contained in 29Metals' 31 December 2025 Mineral Resources and Ore Reserves estimates, including Competent Person's statements and JORC Code Table 1 disclosures, released to the ASX announcements platform on 26 February 2026. Refer to the important information section on page 2 of this presentation for further information.
2. Refer to ASX release "Exploration Update – Capricorn Copper" dated 12-Apr-2023 for further information regarding drilling results, including Competent Person's Statement and JORC Code Table 1 disclosures. Refer to Important Information on slide 2 of this presentation.
3. Refer to ASX release "High-grade Copper Drilling Results at Capricorn Copper" dated 22-Jul-2024 for further information regarding drilling results, including Competent Person's Statement and JORC Code Table 1 disclosures. Refer to Important Information on slide 2 of this presentation.

Tier 1 location

Large land position in prolific Mt. Isa Inlier in Queensland, Australia

Large copper metal endowment

Mineral Resource estimates[1]: 64Mt @ 1.8% Cu for 1.2 million tonnes of contained copper

Low capital intensity restart

Leveraging established surface and underground infrastructure

Throughput expansion optionality

Potential future plant expansion

Exploration upside potential

Prospective in-mine and near-mine extension targets and untested regional tenement package

personal use only

ersonal use only

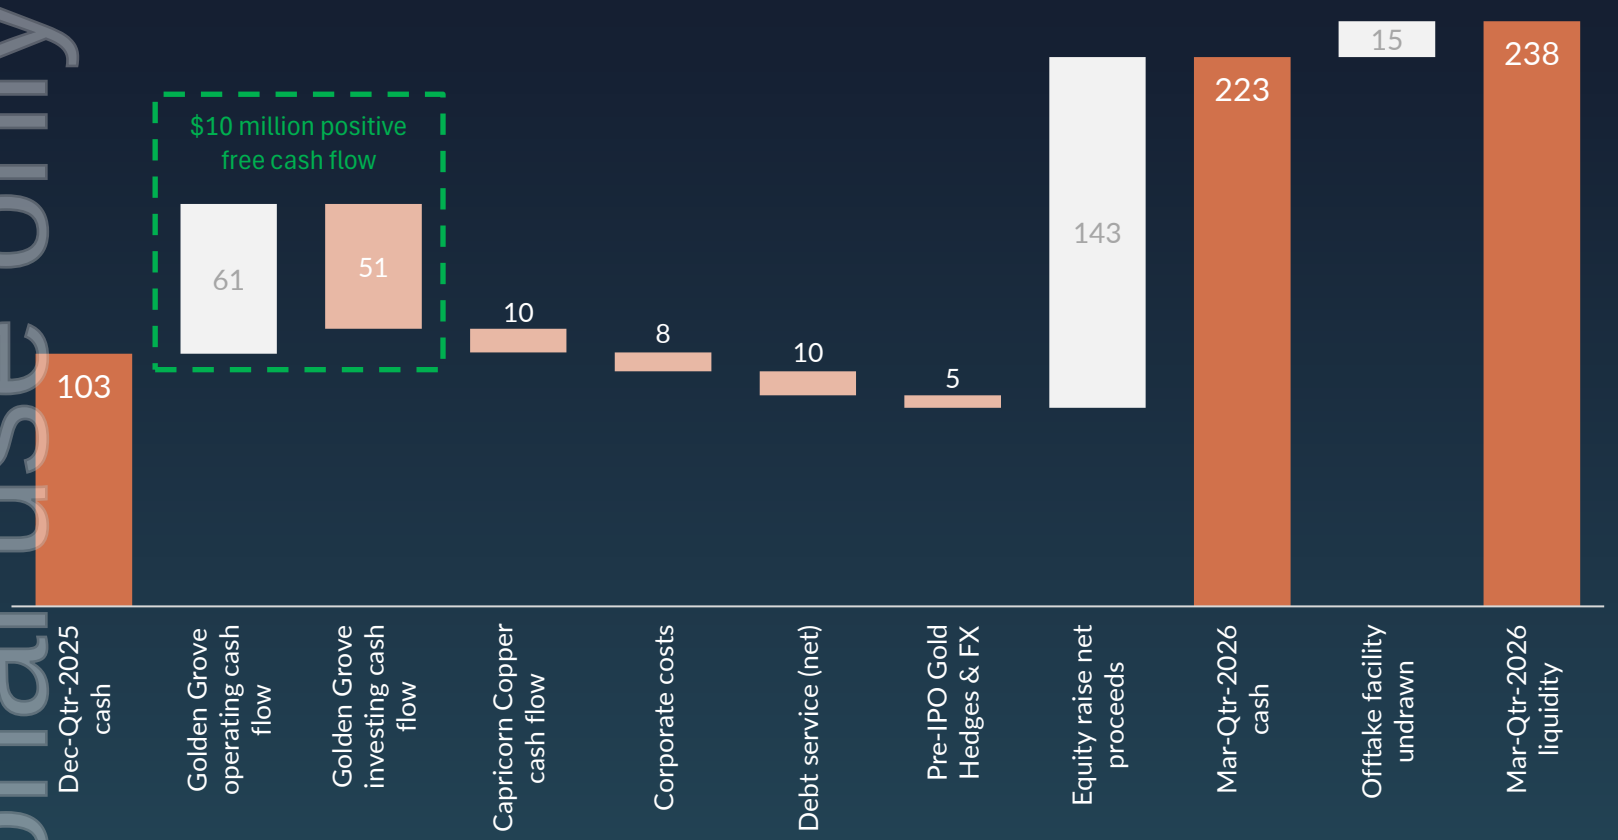

Corporate

Finance and Corporate

Balance sheet and cash flows

Unaudited group cash and cash equivalents, and available liquidity ($ million)[1]

Comments[1]

- Unaudited Group liquidity at 31 March 2026 was $238 million (31 December 2025: $118 million).
- Unaudited cash and cash equivalents at 31 March 2026 was $223 million (31 December 2025: $103 million)
- Unaudited drawn debt at 31 March 2026 was US$120 million (31 December 2025: US$125 million) .
- Group unaudited net cash at 31 March 2026 was $48 million (31 December 2025: net drawn debt $85 million).
- A fully underwritten 1 for 3.66 accelerated pro rata non-renounceable entitlement offer to raise net proceeds of $143 million to support growth initiatives was completed during the quarter.
- Considering various factors, it is expected that existing liquidity will be sufficient to fully fund the revised plan for 2026 and maintain growth investments at Gossan Valley and exploration.

Appendix: Group Mineral Resources and Ore Reserve Estimates

Mineral Resources estimates at the Group level are the aggregation of 31 December 2025 Mineral Resources estimates for Golden Grove, Capricorn Copper and Redhill, as reported in subsequent sections of this release. Mineral Resources estimates have been depleted for production to 31 December 2025 at Golden Grove. For Capricorn Copper, the Mineral Resources estimates have reduced due to the toll treatment of Surface Stockpiles throughout 2025 (and noting production at Capricorn Copper continued to be suspended throughout 2025). 29Metals suspended production at Capricorn Copper on 26 March 2024 and production continues to be suspended. See 29Metals announcement, "Capricorn Copper – Suspension of Operations" dated 26 March

Appendix: Golden Grove Mineral Resources and Ore Reserve Estimates

The 31 December 2025 Mineral Resources estimates for Golden Grove are set out in the table below and incorporate the results of resource conversion, resource extension and grade control drilling completed since the cut-off-date for the previous Mineral Resources estimates for Golden Grove (31 May 2024 to 31 May 2025 for estimates other than Amity and Gossan Valley, Scuddles, GG4-Tryall, Hougoumont and Oizon, Cervantes, and Europa. 31 May 2025 to 30 July 2025 for Amity and Gossan Valley, or 31 May 2024 to 09 September2025 for Scuddles, or 31 May 2024 to 20 September 2025 for GG4-Tryall, or 31 May 2024 to 10 October 2025 for Hougoumont and Oizon, or 31 May 2024 to 31 October for Cervantes, or 18 November 2024 to 3 November 2025 for Europa), depletion from production, updated resource modelling and geological interpretation, updates to the metallurgical and economic assumptions, and changes to cut-off values. The 31 December 2025 Ore Reserves estimates for Golden Grove are set out below and incorporate changes to the Golden Grove Mineral Resources estimates (refer above), depletion for production, design updates, and changes to cut-off values and other economic assumptions.

Appendix: Capricorn Copper Mineral Resources and Ore Reserve Estimates

29Metals suspended production at Capricorn Copper on 26 March 2024 and production continues to be suspended. See 29Metals announcement, "Capricorn Copper – Suspension of Operations" dated 26 March 2024. The Mineral Resources estimates for Capricorn Copper are set out in the table below. These Mineral Resources estimates were first reported 26 and 28 February 2025 and effective on 31 December 2024. There have been no material changes to the Mineral Resources estimated for Capricorn Copper since 31 December 2024. No further drilling was conducted at Capricorn Copper during 2025. The only update relates to the depletion and toll treatment of a surface stockpile throughout 2025. The 31 December 2025 Ore Reserves estimates for Capricorn Copper are set out below and incorporate changes to the Capricorn Copper Mineral Resources estimates (refer above), and changes to surface stockpiles.

Appendix: Redhill Mineral Resources Estimates

The Mineral Resources estimates for Redhill are set out in the table below. These Mineral Resources estimates were first reported and effective on 16 May 2016. There have been no material changes to the Mineral Resources estimated for Redhill since 16 May 2016. No further field work was conducted at Redhill during 2025.

The Redhill Mineral Resource estimates was previously released in 29Metals' ASX announcement titled 'December 2025 Mineral Resources & Ore Reserves estimates' on 26 February 2026 (a copy of which is available on 29Metals' website at https://www.29metals.com/assets/reserves-and-resources).

29Metals confirms that it is not aware of any new information or data that materially affects the information included in the ASX announcements noted above and that all material assumptions and technical parameters underpinning the Mineral Resource estimates for Redhill in the ASX announcement noted above continue to apply and have not materially changed. The form and context in which the Competent Person's findings are presented in the ASX announcement noted above have not been materially modified from the original ASX announcement.
