ASX Announcement

29 April 2026

QUARTERLY ACTIVITIES REPORT – MARCH 2026

For personal use only

HIGHLIGHTS

- **7 hole, 2,550m core drilling program completed at the Golconda Project, Arizona with results due in coming weeks**
- **Drilling successfully tested depth extensions to recent shallow high-grade gold and silver discovery**
- **Rapid transition into next phase of exploration with:**
  - **27-hole, 5,500m RC program commencing at Golconda, Arizona; and**
  - **6-hole, 2,300m core program commencing at White Caps, Nevada.**
- **Exploration focus remains on defining the size, grade and continuity of mineralisation at Golconda, with the objective of evaluating open-pit development potential while advancing regional targets across the broader structural corridor**
- **Gallium price increased circa 32% during the quarter to U$2,269.40 / kg from U$1,722.60 / kg**
- **Metallurgical test work demonstrates potential to concentrate a gallium-rich feedstock using proven, low-cost processing methods, supporting potential future development of a strategic domestic gallium supply for the USA**
- **Cash at bank as of 31 March was $5.157 million**

G50 Corp Limited (G50 Corp Limited or **the Company) (**ASX:**G50) (**OTCQX:**GFTYF)** is pleased to provide an update on activities during the March 2026 quarter for the Golconda project, Arizona and White Caps project, Nevada.

CORE DRILLING COMPLETED AT GOLCONDA, ARIZONA

The Company completed a 7-hole, 2,550 metre core drilling program at the Golconda Project in northwest Arizona. The program tested depth extensions to the Company's previously reported shallow high-grade gold and silver discovery and improved our understanding of the geometry and continuity of mineralisation within the broader Golconda system. An additional seventh hole was completed to further assess the mineralised system beyond the original planned program.

The program tested depth extensions to G50's previously reported shallow, high-grade gold and silver discovery[1]:

- **47.2m at 2.0g/t gold, 40.2g/t silver and 0.29% zinc, from 191 meters to End of Hole (EOH) in GRC22** including:
  - **16.8m at 5.19g/t gold, 100.2g/t silver and 0.57% zinc from 198m**
    - 77.7m at 0.76g/t gold, and 11g/t silver, from 184 meters to EOH in GRC21 including
  - **7.6m at 5.5g/t gold, 32.4g/t silver and 0.26% zinc from 205.7m and**
  - **6.1m at 1.1g/t gold, 8g/t silver from 256m to EOH**

G50 Corp Limited
Suite 1601, 213 Miller Street, North Sydney, NSW 2060
ABN: 18 645 022 233

- The mineralized intercepts are within and below the depth of oxidation (+60m) and can be characterized as **base and precious metal rich quartz-sulphide veins of mesothermal style**.
- The 2025 RC program confirmed that the **Tub Zone is a laterally and vertically continuous, wide, and well defined mineralized discovery** that **remains open along strike and at depth**.

A seventh hole (GDD09) was added to test mineralization up-plunge of the GRC06 intersection from 2023 RC drilling (23m at 5.2g/t gold and 5.9g/t silver)[2].

FURTHER DRILLING AT GOLCONDA

Following completion of the core drilling program, G50 moved rapidly into the next phase of exploration at Golconda, commencing a 27-hole reverse circulation drilling program for a further 5,500 metres. The program is targeting six areas across the project and is designed to test several near-surface targets while further defining the size, grade and continuity of the Tub Vein and Tub Footwall Zone mineralisation. The Company is aiming to complete this program by June 2026.

Recent diamond drilling along the Tub Vein and Tub Footwall zone confirmed a wide 50 metre to 95 metre structurally controlled mineralised zone characterised by sericite-illite alteration, quartz veining, hydrothermal brecciation and low to moderate sulphide content. These geological features support the Company's interpretation that exploration upside exists for bulk-tonnage mineralization along the tub fault and associated subparallel structures. Previous RC drilling in 2023 also demonstrated the presence of high-grade gold mineralisation in GRC 06, further highlighting the broader prospectivity of the Golconda structural corridor.

The current exploration focus at Golconda is to define the size, grade and continuity of the Tub Vein and Tub Footwall zone, while continuing to advance regional targets across the broader project area. Additional near-surface targets characterised by anomalous Au-Ag-Zn and pathfinder geochemistry in rock and channel samples, quartz-sulphide veining, sericite-illite alteration, and, disseminated sulphides have also been selected for drilling, including the Good Hope vein zone, the northern extension of the Mexican fault near its intersection with the Bronco Dike, and the northern continuation of the Tub fault towards the Gold Eagle area.

WHITE CAPS

At White Caps in Nevada, G50 commenced a 4 hole, 1,700 metre core drilling program during the period, with an option to add a further two holes for 600 metres. The program has been designed to test for the presence of a larger zoned mineral system extending beyond historically known gold mineralisation.

Historically, gold production at White Caps was dominantly limestone-hosted and shares similarities with Carlin-type deposits. High gold grades are interpreted to be controlled by the intersection of favourable calcareous units and north-northeast trending structures. The Company believes known gold mineralisation may represent part of a larger, as yet undiscovered mineral system.

The planned drilling is designed to test a system potentially zoned from a magnetic anomalous gold core, probably related to intrusive and skarn mineralisation, transitioning up-plunge into lower temperature

sediment-hosted gold mineralisation. This model provides an important basis for the current program and reflects the Company's strategy of testing for scale beyond the historically mined portions of the project.

Big Sky Drilling mobilised the core rig from Golconda to White Caps in mid-February, with the same rig and crew used to leverage operational efficiencies established during the Golconda drilling program, which operated double shifts. Drilling at White Caps is expected to be completed by June 2026.

Figure 3. Drill rigs on site at Golconda Project Arizona

METALLURGICAL TESTWORK SUMMARY

Exploratory metallurgical test work undertaken by SGS Lakefield assessed gallium, silver and gold recovery from unoxidized drill core and RC chips. Gallium and silver were concentrated in the fine fraction through screening and desliming, while flotation produced a separate gold / silver concentrate. The aim of the test work was to demonstrate gallium could be recovered and concentrated using proven, low-cost processing methods including crushing, screening and flotation.

- Gallium grades increased 150% to 200% from feedstock to bulk concentrate
- Strong recoveries:
  - Gallium up to 70%, via screening and flotation;
  - Silver up to 97%, via screening and flotation; and
  - Gold up to 82%, via flotation.

The Golconda testwork demonstrates the potential for gallium to be recovered as a stand-alone concentrate, supporting the development of a strategic domestic gallium supply source from Arizona, USA. The identified processing routes align simple, scalable and modular supply develpment, for sale into a strategically critical American domestic gallium market with buyers actively seeking to diversify and secure allied critical-minerals supply chains.

FINANCIAL

As of 31 March 2026, the Company had **$5.157 million** in cash.

PAYMENTS TO RELATED PARTIES

During the quarter $102,500 was paid to the Managing Director as a salary and $44,171 was paid as directors fees for Q3 FY2026.

EXPLORATION AND EVALUATION

A summary of the Company's expenditure for the quarter is provided below. Full details regarding the Company's cash movements during the quarter can be found in attached Appendix 5B.

Exploration	1,633,710
Lease Payments & Permitting	349
Patented and Unpatented Claims	-
Other	4,902
Total Exploration and Evaluation Spend	1,638,962

There were no substantive mining production or development activities during the quarter.

This announcement has been approved for release by the Board of G50

ABOUT G50 CORP

Map: Location of G50 Corp's Golconda Project in Arizona and White Caps Project in Nevada

G50 Corp is an exploration company progressing critical minerals and precious metals projects in the United States, including the Golconda Project in Arizona and the White Caps Project in Nevada.

GOLCONDA PROJECT, ARIZONA

The Golconda Project is located in NW Arizona, a well-established mining jurisdiction with a long history of base and precious metals production. The project comprises a historical zinc, lead, gold and silver mine and is proximal to the Mineral Park copper, molybdenum and silver mine. Exploration has identified high-grade gold and silver mineralisation and a gallium discovery, highlighting the project's potential for both precious and critical metals.

WHITE CAPS PROJECT, NEVADA

The White Caps Project is located in Nevada, a premier mining jurisdiction with a long history of gold production. The project is a historical gold mine that was previously drilled by Freeport McMoRan between 1982 to 1984. Exploration has identified gold and antimony mineralisation, and the project is located proximal to Scorpio Gold Corp's Manhattan Gold Project.

EXPLORATION INFORMATION EXTRACTED FROM ASX ANNOUNCEMENTS

This report contains information extracted from ASX market announcements reported in accordance with the JORC Code 2012. Further details, including 2012 JORC Code reporting tables where applicable, can be found in the following announcements lodged on the ASX by G50 Corp:

ASX ANNOUNCEMENT	DATE
Golconda Gallium Metallurgy Validated	8 April 2026
Half Yearly Report and Accounts	6 March 2026
Core Drilling Completed at Golconda Project	18 February 2026
Change of Directors Interest Notice – M Wallace	10 February 2026
Application for quotation of securities	9 February 2026

The Company confirms that it is not aware of any new information or data that materially affects the information included within these announcements.

7.5	**Unused financing facilities available at quarter end**	-

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(810)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(1,639)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(2,449)
8.4	Cash and cash equivalents at quarter end (item 4.6)	5,157
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	5,157
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	2.11

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

For personal use only

8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
Answer: N/A	

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: April 29, 2026

Authorised by: By the Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
