Quarterly Report

Period Ending 31 March 2026

Release Date: 30 April 2026

For personal use only

Highlights

$40 Million Funding to Accelerate Growth & Development of Costa Fuego

- A$40 million private placement during the quarter received strong demand from Australian, Canadian and overseas institutional investors, as well as the Company's three largest shareholders (Glencore, Blue Spec and GS Group).
- The Company is now set to deliver strong growth and development milestones for its Costa Fuego copper-gold (Cu-Au) project (Costa Fuego) located in coastal Chile, including:
  - Delivery of a maiden Mineral Resource at La Verde;
  - Integration of La Verde into an expanded mine plan;
  - Completion and submission of an Environmental Impact Assessment (EIA); and
  - Continuation of Feasibility studies.

Global Engineering Firm Ausenco Appointed for Feasibility Study

Major High-Grade Extensions Continue at La Verde

- Drilling at the Company's La Verde copper-gold (Cu-Au) porphyry discovery in Chile accelerated during the quarter, with a second drill rig commencing in February
- **Widest drill result to date at La Verde, confirms a major extension to the deposits' rapidly growing high-grade core:**

  DKD0039 recorded **725 m grading 0.42% CuEq** (0.36% Cu, 0.07 g/t Au) **from 18 m depth** down-hole, including:
  - **22 m grading 0.71% CuEq** (0.67% Cu, 0.03 g/t Au) from 42 m depth
  - **46 m grading 0.65% CuEq** (0.54% Cu, 0.12 g/t Au) from 249 m depth
  - **51 m grading 0.62% CuEq** (0.51% Cu, 0.10 g/t Au) from 433 m depth
  - **62 m grading 1.03% CuEq** (0.90% Cu, 0.18 g/t Au) from 671 m depth
- **Assays pending for thrirteen drill holes** (seven diamond and six Reverse Circulation (RC)).

Higher-Grade Starter Pit Emerging

- Assay results underpin an emerging, shallow zone of higher-grade Cu-Au mineralisation, outlining a potential higher-grade starter pit for Costa Fuego
- **Thirteen significant drill intersections now delineate +0.6% CuEq zone from surface to 250 m depth,** demonstrating strong continuity of higher-grade material.
- Additional significant intersections recorded from surface this quarter, included:

  DKD036 recorded **150 m grading 0.52% CuEq**[2] (0.37% Cu, 0.21 g/t Au) from **30 m depth**
  - Including **38 m grading 0.70% CuEq** (0.55% Cu, 0.21 g/t Au) from 117 m

  DKD035 recorded **220 m grading 0.47% CuEq** (0.37% Cu, 0.14 g/t Au) from **38 m depth**
  - Including **68 m grading 0.64% CuEq** (0.52% Cu, 0.15 g/t Au) from 187 m

Strong Cash Position of A$35.2M

Cautionary Statement – JORC Code (2012)

The Costa Fuego Copper-Gold Project is currently at the Pre-Feasibility Study ("PFS") stage. The production targets and forecast financial information contained in this report are based on technical and economic assessments that are preliminary in nature. While the PFS incorporates Indicated and Inferred Mineral Resources, there is a lower level of geological confidence associated with Inferred Mineral Resources, and no certainty that further exploration or development will result in the conversion of Inferred Mineral Resources to Indicated or Measured categories.

The PFS is not a definitive study and is based on a number of assumptions, including commodity prices, capital and operating costs, metallurgical recoveries, permitting, and other factors, which are subject to change. The outcomes of the PFS should not be used as the basis for a final investment decision. Further work, including additional drilling, metallurgical testing, and detailed engineering, is required before the Company can make a decision to proceed to development.

Of the Mineral Resources scheduled for extraction in the PFS production plan, more than 99% are classified as Indicated, with the remaining <1% as Inferred. The Company has concluded that it has reasonable grounds for disclosing a production target which includes a small amount of Inferred Mineral Resources, as permitted under the JORC Code. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised. The viability of the development scenario envisaged in the PFS does not depend on the inclusion of Inferred Mineral Resources. However, it is reasonably expected that the majority of Inferred Mineral Resources could be upgraded to Measured or Indicated Mineral Resource with continued drilling.

The Mineral Resources underpinning the production target in the PFS have been prepared by a Competent Person in accordance with the requirements of the JORC 2012. For full details on the Mineral Resource estimate, please refer to the ASX announcement of 27 March 2025.

To achieve the outcomes indicated in the PFS, including reaching Definitive Feasibility Study ("DFS"), mine construction and production stages, funding in the order of US$1.27 Billion will be required, including pre-production and working capital and assumed financing charges. Investors should note that there is no certainty that Hot Chili will be able to raise that amount of funding when needed. One of the key assumptions is that the funding for the Project will be available when required and on acceptable terms. It is also possible that such funding may only be available on terms that may be dilutive to, or otherwise affect the value of, Hot Chili's existing shares. It is also possible that Hot Chili could pursue other value realisation strategies such as debt financing, a sale or partial sale of its interest in the Costa Fuego Copper Project and/or Huasco Water, sale of further royalties and/or streaming rights, sale of non-committed offtake rights, and sale of non-core assets.

The Company cautions that there is no certainty that the results or estimates contained in the PFS will be realised.

This Report contains forward-looking statements. Hot Chili has concluded that it has a reasonable basis for providing these forward-looking statements and believes it has a reasonable basis to expect it will be able to fund development of the Costa Fuego Copper Project. However, a number of factors could cause actual results or expectations to differ materially from the results expressed or implied in the forward-looking statements. Given the uncertainties involved, investors should not make any investment decisions based solely of the results of the PFS.

SUMMARY OF OPERATIONAL ACTIVITIES

Major High-Grade Extensions Continue at La Verde

Phase two diamond drilling continued during the quarter at the Company's La Verde copper-gold (Cu-Au) porphyry discovery in Chile (La Verde). Drilling focused on continuing to expand the mineralised discovery footprint

Results were stronger than anticipated, with the depth extent doubling to 800 m from surface - significantly expanding the high-grade core laterally and up to surface.

A standout significant intersection of **725 m grading 0.42% CuEq[1] from 18 m depth** has been recorded in diamond drill hole DKD039, which was collared on the western extent of La Verde's discovery footprint (Figure 1), and intersected multiple wide zones of +0.6% CuEq[1] mineralisation from near surface (Figure 2 and 3).

As the most significant result to date at La Verde, importantly, DKD039 achieved two key objectives:

- Further extended near-surface higher-grade mineralisation by approximately 60 m to the west - recording **22 m grading 0.71% CuEq[1]** from 42 m depth within a wider intersection of 48 m grading 0.55% CuEq (0.50% Cu, 0.03 g/t Au) from 18 m depth, located immediately beneath shallow gravel cover, and

- Confirmed a significant 200 m down-dip extension of La Verde's high-grade core - recording **61 m grading 1.03% CuEq[1]** (0.90% Cu, 0.18 g/t Au, 1.81g/t Ag) from 671 m in association with high Cu/Au, A+B vein abundances >5% and massive and disseminated chalcopyrite (Figure 2).

Continued expansion and integration of La Verde's high-grade core into Costa Fuego's resource base and mining inventory is a priority this year.

Higher-Grade Cu-Au Starter Pit Emerging

Diamond drilling at La Verde has continued to test the shallow up-dip potential of La Verde's high-grade core, with significant intersections returned from drill holes DKD035, DKD036, DKD037 and DKD038.

A 450 m x 400 m higher-grade, near-surface copper-gold zone has been defined by thirteen significant intersection +0.6% CuEq at La Verde (Figure 4), including most recently:

- DKD036 recorded **150 m grading 0.52% CuEq** (0.37% Cu, 0.21 g/t Au) from 30 m depth
  - Including 38 m grading 0.70% CuEq (0.55% Cu, 0.21 g/t Au) from 117 m, and
- DKD035 recorded **220 m grading 0.47% CuEq** (0.37% Cu, 0.14 g/t Au) from 38 m depth
  - Including 68 m grading 0.64% CuEq (0.52% Cu, 0.15 g/t Au) from 187 m

Similar to previous near-surface drill intersections, these latest significant results commence immediately beneath shallow gravel cover, indicating the potential for simple, cost-effective overburden removal in a future open pit development.

These results have the potential to contribute to a higher-grade starter pit for the Costa Fuego mine schedule, significantly reducing payback and positively impacting key financial metrics of Hot Chili's March 2025 Pre-Feasibility Study.

Confirming Bulk Tonnage Continuity

Further assay results reported during the quarter continue to confirm continuity of bulk tonnage mineralisation at La Verde, including:

- DKD037 recorded 184 m grading 0.42% CuEq[1] (0.32% Cu, 0.12 g/t Au) from 105 m depth

For personal use only

- including 22 m grading 0.60% CuEq (0.48% Cu, 0.15 g/t Au) from 203 m
- DKD038 recorded 221 m grading 0.37% CuEq[1] (0.29% Cu, 0.11 g/t Au) from 48 m depth
  - including 45 m grading 0.51% CuEq (0.37% Cu, 0.19 g/t Au) from 53 m

Drill hole DKD037 was designed to target a gap between two higher-grade zones, with assay results now confirming expansion and continuity of mineralisation across this zone (Figure 2). The significant intersection from DKD038 also commences immediately beneath shallow gravel cover (Figure 3).

La Verde Footprint Expands Further

During the quarter the diamond drill rig also completed four diamond drill tails, extending the mineralisation footprint reached by the RC drilling in Phase 1, which ended in mineralisation.

Assay results from diamond drill tail DKP009D extended La Verde's Cu-Au mineralisation footprint along the eastern flank of the discovery in the north (Figures 1 and 3). The drill hole was a 200 m diamond tail to earlier RC drill hole DKP009 and reported 68 m grading 0.42% CuEq (0.33% Cu, 0.11 g/t Au) from 354 m depth, extending mineralisation downhole of DKP009.

Similarly, diamond drill tail DKP012D extended the mineralisation footprint along the northern flank of the discovery. The drill hole was a 284 m diamond tail to earlier RC drill hole DKP012 and reported 132 m grading 0.36% CuEq (0.26% Cu, 0.05 g/t Au) from 306 m depth extending mineralisation downhole of DKP012. Several higher-grade zones were intercepted in the tail, confirming the system is still open and mineralised to the north and will be followed up with additional drilling along the interpreted NNE-trending structural corridor (Figure 2 and 4).

DKP006D and DKP021D extended the mineralisation along the eastern flank of the discovery in the south, with DKD021D recording an additional 54 m grading 0.42% CuEq (0.34% Cu, 0.11 g/t Au) from 593 m depth, including 19 m grading 0.66% CuEq (0.51% Cu, 0.21 g/t Au) from 593 m depth.

Including the new diamond tail extensions:

- DKP009D now records **388 m grading 0.41% CuEq** (0.32% Cu, 0.12 g/t Au) from 34 m
- DKP012D now records **394 m grading 0.46% CuEq** (0.35% Cu, 0.11g/t Au) from 44 m
- DKP021D now records **194 m grading 0.32% CuEq** (0.26% Cu, 0.06 g/t Au) from 284 m
- DKP006D now records **110 m grading 0.39% CuEq** (0.27% Cu, 0.15 g/t Au) from 76 m

Diamond drilling has been instrumental in development of an early "4D litho-structural model" by the Company, with the interpretation of multiple intrusive phases optimising drill target design. Hot Chili geologists are applying the same targeting strategies that proved successful at the Company's nearby Cortadera Cu-Au porphyry Resource and anticipate these methods will continue to drive growth at La Verde.

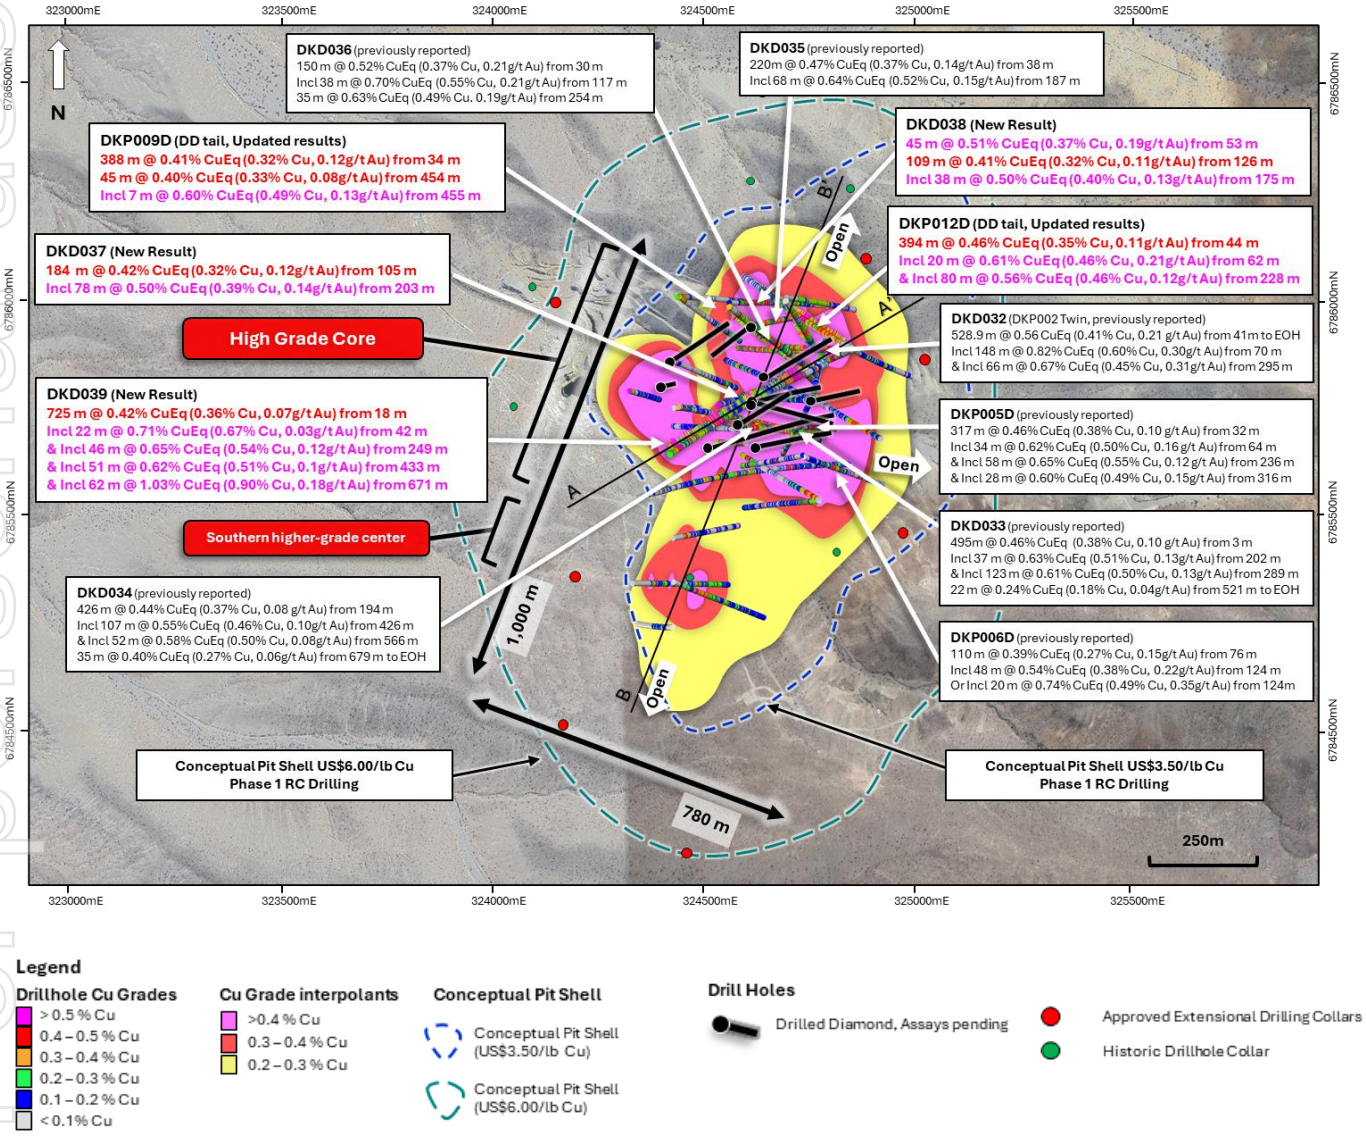

[1] Copper Equivalent (CuEq) reported for the drill hole intersections were calculated using the following formula: CuEq% = ((Cu% × Cu price 1% per tonne × Cu_recovery) + (Mo ppm × Mo price per g/t × Mo_recovery) + (Au ppm × Au price per g/t × Au_recovery) + (Ag ppm × Ag price per g/t × Ag_recovery)) / (Cu price 1% per tonne × Cu_recovery). The Metal Prices applied in the calculation were: Cu=4.50 USD/lb, Au=3,150 USD/oz, Mo=20 USD/lb, and Ag=30 USD/oz. The entirety of the intersection is assumed as fresh. The recovery and copper equivalent formula for La Verde uses Cortadera as a proxy, which is considered reasonable given both the similar mineralisation style and amenability testwork completed thus far at La Verde – Recoveries of 83% Cu, 56% Au, 83% Mo and 37% Ag. CuEq (%) = Cu(%) + 0.69 x Au(g/t) + 0.00044 x Mo(ppm) + 0.0043 x Ag(g/t).

Development Studies Progressing

Global engineering firm Ausenco – with offices in Chile and Australia – has been appointed as the lead engineering group to progress the Feasibility Study for the Costa Fuego project. The appointment follows a review of major engineering groups in Chile, with Ausenco's impressive execution of engineering, procurement, construction and ramp-up of the nearby, similar-scale, coastal project Mantoverde, a key factor in the decision.

Figure 1. Plan view map of La Verde showing returned diamond drilling compared with updated +0.2% copper (yellow), +0.3% copper (red), +0.4% copper (magenta) mineralisation interpolants. Drilled holes with pending assays are shown in black. Position of A – A' cross section (Figure 3) and B – B' long section (Figure 4) annotated in black. Conceptual open pit shells[1] displayed for $US3.50/lb Cu (blue) and $US6.00/lb Cu (green) displayed as dashed lines. Results reported including CuEq[2].

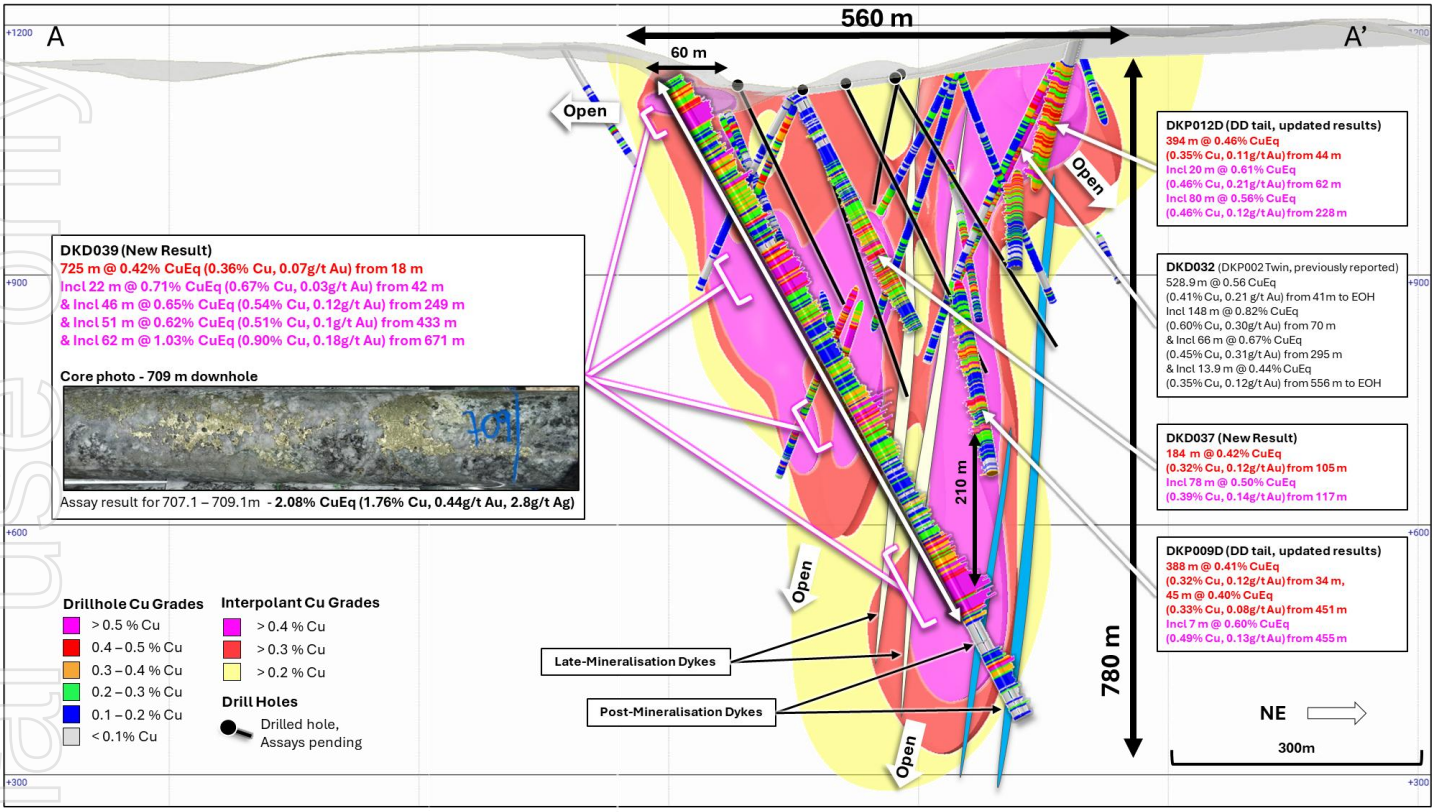

[1] See Page 23 of this announcement for detail on the US$3.50 Cu and US$6.00 Cu conceptual open pit shells (Exploration Targets). Any potential tonnage and grade of the Exploration Target shown is conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource within the target area, and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

[2] Copper Equivalent (CuEq) reported for the drill hole intersections were calculated using the following formula: CuEq% = ((Cu% × Cu price 1% per tonne × Cu_recovery) + (Mo ppm × Mo price per g/t × Mo_recovery) + (Au ppm × Au price per g/t × Au_recovery) + (Ag ppm × Ag price per g/t × Ag_recovery)) / (Cu price 1% per tonne × Cu_recovery). The Metal Prices applied in the calculation were: Cu=4.50 USD/lb, Au=3,150 USD/oz, Mo=20 USD/lb, and Ag=30 USD/oz. The entirety of the intersection is assumed as fresh. The recovery and copper equivalent formula for La Verde uses Cortadera as a proxy, which is considered reasonable given both the similar mineralisation style and amenability testwork completed thus far at La Verde – Recoveries of 83% Cu, 56% Au, 83% Mo and 37% Ag. CuEq (%) = Cu(%) + 0.69 x Au(g/t) + 0.00044 x Mo(ppm) + 0.0043 x Ag(g/t).

Notes to Table 1: Significant intercepts for La Verde are reported above a nominal cut-off grade of 0.20% Cu. Reported intersections may include internal dilution (intervals below 0.20% Cu), including zones exceeding 30 m downhole width, where the overall weighted average grade of the intersection remains above the cut-off grade. Significant intersections are separated where zones of internal dilution result in discrete intervals that do not meet the reporting criteria. The selection of a 0.20% Cu cut-off grade is aligned with a marginal economic cut-off for bulk tonnage polymetallic copper deposits of comparable grade in Chile and globally. Significant intersection widths (interval) have been rounded to the nearest metre.

[1] Copper Equivalent (CuEq) reported for the drill hole intersections were calculated using the following formula: CuEq% = ((Cu% × Cu price 1% per tonne × Cu_recovery) + (Mo ppm × Mo price per g/t × Mo_recovery) + (Au ppm × Au price per g/t × Au_recovery) + (Ag ppm × Ag price per g/t × Ag_recovery)) / (Cu price 1% per tonne × Cu_recovery). The Metal Prices applied in the calculation were: Cu=4.50 USD/lb, Au=3,150 USD/oz, Mo=20 USD/lb, and Ag=30 USD/oz. The entirety of the intersection is assumed as fresh. The recovery and copper equivalent formula for La Verde uses Cortadera as a proxy, which is considered reasonable given both the similar mineralisation style and amenability testwork completed thus far at La Verde – Recoveries of 83% Cu, 56% Au, 83% Mo and 37% Ag. CuEq (%) = Cu(%) + 0.69 x Au(g/t) + 0.00044 x Mo(ppm) + 0.0043 x Ag(g/t).

SUMMARY OF CORPORATE ACTIVITIES

Strategic Partnering Process Update

Hot Chili continues to advance its asset-level strategic Partnering Process, aimed at introducing one or more qualified partners with the financial, technical and operational capability to assist in funding and delivery of the projects.

During the quarter, engagement levels remained strong, with additional parties entering the Partnering Process, with several advancing through due diligence, including site visits. The Company has received further non-binding, indicative, incomplete and conditional proposals in relation to potential transactions for the Projects and remains actively engaged in assessing these alongside existing proposals.

The Partnering Process may result in a range of transactions for the Projects. Investors are cautioned that there is no certainty the Partnering Process will result in a transaction or binding agreement.

BMO Capital Markets continues to act as financial adviser in connection with the Partnering Process.

The Company will continue to update the market in accordance with its continuous disclosure obligations.

Successful Closing of A$40 Million Funding

In February 2026, the Company closed a A$40 million (before costs) private placement to institutional, professional and other investors. The placement is intended to support Costa Fuego's position as one of the few globally significant copper projects not controlled by major mining companies, with the potential to contribute substantially to new copper supply this decade.

Hot Chili issued a total of 24,242,425 shares made up of 13,209,698 ordinary fully paid shares at A$1.65 on the ASX and 11,032,727 ordinary fully paid shares at CAD$1.56 on the TSXV. Additionally, 1,212,121 broker options were issued at an exercise price of A$2.145 with an expiry date of 12 August 2028 to complete the capital raising transaction.

Proceeds will be used to accelerate drilling across the La Verde Cu-Au discovery to establish a maiden mineral resource and further define the potential size, scale and grade of a higher-grade starter pit for the Costa Fuego Project, development of the Company's Huasco Water Project, commencement of the Costa Fuego Feasibility Study, completion and submission of the Costa Fuego EIA, ongoing exploration, strategic funding activities and for general working capital purposes.

Cash Position

As of 31 March 2026, the Company had cash of A$35.2 million and no debt.

The operating expenditure for quarter ended 31 March 2026 included payments for staff costs of A$0.7 million and administration and corporate costs of A$1.7 million.

The investing expenditure for quarter ended 31 March 2026 included payments for tenements of A$2.3 million, including payments for US$1.0 million for the Dominoceros Purchase Option Agreement and US$0.3 million AMSA Purchase Option and payments for exploration and evaluation of A$3.1 million relating to activities across the La Verde copper-gold porphyry discovery, value engineering works and EIA submission activities.

Capital Structure

The following summarises the Company's securities on issue:

- 177,561,814 ordinary fully paid shares
- 1,914,000 options at AUD $1.50 expiring 24 July 2026

For personal use only

- 1,212,121 options at AUD $2.145 expiring 12 August 2028
- 1,176,563 service and performance rights

Additional ASX Disclosure Information

ASX Listing Rule 5.3.2: There was no substantive mining production and development activities during the quarter.

ASX Listing Rule 5.3.3 - Schedule of Mineral Tenements as of 31 March 2026.

The schedule of Mineral Tenements and changes in interests is appended at the end of this activities report.

ASX Listing Rule 5.3.4: Reporting under a use of funds statement in a Prospectus does not apply to the Company currently.

ASX Listing Rule 5.3.5: Payments to related parties of the Company and their associates during the quarter per Section 6.1 of the Appendix 5B totalled $234,000. This is comprised of directors' salaries and superannuation of $234,000.

Health, Safety, Environment and Quality

Field operations during the quarter included geological reconnaissance activities, diamond drilling, field mapping, and sampling exercises across the Company's Costa Fuego project landholdings, focused on La Verde. Activities on new tenements are run at the Productora or Cortadera operations centers and their safety statistics are included under the figures for all projects.

There was a single Lost Time Injury (LTI) during the quarter, where accidental contact with a damaged core tray injured a worker's hand.

Hot Chili's sustainability framework ensures an emphasis on business processes that target long-term economic, environmental and social value. The Company is dedicated to continual monitoring and improvement of health, safety and the environmental systems. There is no greater importance than ensuring the safety of our people and their families.

Tenement Changes During the Quarter

During the Quarter, the following mining exploration concessions have expired upon reaching their expiration date (March 30): Solar 1, Solar 3, Solar 5, Solar 7, Solar 9 Soledad 2 and Soledad 4.

In addition, the following exploitation concessions in process of being granted have been abandoned, as they do not hold priority rights over the overlapping area: Suerte 1/7, Suerte II 1/15, Domeyko I 1/12 and Domeyko II 1/40.

The Company's existing tenements are detailed in the table below.

Qualifying Statements

The scientific and technical information relating to the Company's Costa Fuego project in this report has been derived from or is based on the Costa Fuego Copper project pre-feasibility study (the "Costa Fuego PFS" or 2025 PFS), which has been prepared in accordance with Canadian regulatory requirements set out in National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") and Joint Ore Reserves Committee of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves prepared by the Joint Ore Reserves Committee of the Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia (the "JORC Code") and reviewed and approved by the "Qualified Persons" as defined under NI 43-101 and "Competent Persons" as defined under the JORC Code, as set out below. The 2025 PFS was compiled by the Qualified Persons and Competent Persons listed below based on information available up to the effective date of the PFS. Additional details of responsibilities are provided at page 48 of presentation "Costa Fuego Preliminary Feasibility Study March 2025" released on March 27, 2025.

Conceptual Open Pit Shells

Conceptual open pit shells represent Exploration Targets as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code). They are based on completed exploration activities reported in the announcement released 19 May 2025 ('Hot Chili Announces Latest Drill Results for La Verde, Doubling Porphyry Discovery Footprint').

The conceptual open pit shells were generated using copper (Cu) prices of US$3.50/lb Cu and US$6.00/lb Cu on a series of nested Cu grade shells. Other input parameters informing the conceptual open-pit shells (pit slope angles, mining cost, processing cost, etc.) were derived from values reported in the March 2025 Costa Fuego Pre-feasibility Study and are considered appropriate for the style of mineralisation encountered at the La Verde Cu-Au porphyry discovery.

Any potential quantity and grade of the Exploration Target shown is conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource within the target area, and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

Further exploration activities are detailed in this announcement and include (but may not necessarily be limited to) a program of diamond drill holes aiming to extend the mineralised footprint at La Verde. Drilling commenced on 22 September 2025, with the length of the program dependent on a number of considerations including (but not limited to) the results of the exploration activities and regulatory applications and approvals.

PFS Technical Report

For readers to fully understand the information in this report, they should read the PFS Technical Report available on SEDAR+ (www.sedarplus.ca) and at www.hotchili.net.au in its entirety titled "Costa Fuego Project, Chile, Preliminary Feasibility Study NI 43-101 Technical Report" dated May 9 2025 with an effective date of March 27 2025, including all qualifications, assumptions, limitations and exclusions. The PFS Technical Report is intended to be read as a whole, and sections should not be read or relied upon out of context. The technical information in this report is subject to the assumptions and qualifications to be contained in the PFS Technical Report. The PFS Technical Report replaces and supersedes the technical report titled "Costa Fuego Copper Project – NI 43-101 Technical Report Mineral Resource Estimate Update" dated April 8, 2024, with an effective date of February 26, 2024 (the "2024 PEA").

Qualified Persons – NI 43-101

The PFS was compiled by Wood Australia Pty Ltd with contributions from a team of independent "Qualified Persons" within the meaning of NI 43 -101. The scientific and technical information contained in this report pertaining to Costa Fuego has been reviewed and verified by the following independent qualified persons within the meaning of NI 43-101:

- Ms Elizabeth Haren (FAUSIMM (CP) & MAIG) of Haren Consulting – Mineral Resource Estimate
- Mr Dean David (FAUSIMM (CP)) of Wood Pty Ltd – Metallurgy
- Mr Piers Wendlandt (PE) of Wood Pty Ltd – Market Studies and Contracts, Economic Analysis
- Mr David Cuello (MAUSIMM) of GMT Servicios de Ingeniería – Geotechnical
- Mr Jeffrey Stevens (Pr. Eng, MSAIMM) of Wood Pty Ltd – Infrastructure and Capital Cost
- Mr Luis Bernal (Comisión Minera (PC) Registered Member) of Process Mineral Consulting – Leaching
- Mr Anton von Wielligh (FAUSIMM) of ABGM Consulting Pty Ltd – Mine Planning and Scheduling
- Mr Edmundo LaPorte (PE, PEng, CPEng, SME Registered Member) of High River Services - Environmental

Lehman Brothers

The above independent Qualified Persons have verified the information disclosed herein, including the sampling, preparation, security, and analytical procedures underlying such information.

Competent Persons – JORC

The information in this report that relates to Mineral Resources, Exploration Results, and Ore Reserves for the Costa Fuego Project is based on information compiled by:

- Ms Elizabeth Haren (FAUSIMM (CP) & MAIG) who is a full-time employee of Haren Consulting – Mineral Resource Estimate
- Mr Dean David (FAUSIMM (CP)) who is a full-time employee of Wood Pty Ltd – Metallurgy
- Mr Piers Wendlandt (PE) who is a full-time employee of Wood Pty Ltd – Market Studies and Contracts, Economic Analysis
- Mr David Cuello (MAUSIMM) who is a full-time employee of GMT Servicios de Ingeniería – Geotechnical
- Mr Jeffrey Stevens (Pr. Eng, MSAIMM) who is a full-time employee of Wood Pty Ltd – Infrastructure and Capital Cost
- Mr Luis Bernal (Comisión Minera (PC) Registered Member) who is a full-time employee of Process Mineral Consulting – Leaching
- Mr Anton von Wielligh (FAUSIMM) who is a full-time employee of ABGM Consulting Pty Ltd – Mine Planning and Scheduling
- Mr Edmundo LaPorte (PE, PEng, CPEng, SME Registered Member) who is a full-time employee of High River Services – Environmental
- Mr Christian Easterday (MAIG), who is the Managing Director and is a full-time employee of Hot Chili Limited – Exploration Results

Ms Haren, Mr David, Mr Wendlandt, Mr Cuello, Mr Stevens, Mr Bernal, Mr LaPorte, Mr Easterday, and Mr von Wielligh each have sufficient experience, which is relevant to the style of mineralisation and types of deposits under consideration and to the activities undertaken, to qualify as a Competent Person as defined in the JORC Code and as Qualified Persons under NI43-101.

Disclaimer

This report has been prepared by management of Hot Chili Limited ("Hot Chili" or the "Company") and does not represent a recommendation to buy or sell securities of the Company. Investors should always consult their investment advisors prior to making any investment decisions. This report does not purport to be complete or contain all of the information that may be material to the current or future business, operations, financial condition or prospects of the Company and Hot Chili makes no representation or warranty, express or implied, as to the accuracy or completeness of the information contained in this report. Certain information contained herein is based on, or derived from, information obtained from independent third-party sources, publicly available reports and other trade and industry sources. Hot Chili believes that such information is accurate and that the sources from which it has been obtained are reliable; however, Hot Chili has not independently verified such information and does not assume any responsibility for the accuracy or completeness of such information. Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.

Cautionary Note for U.S. Investors Concerning Mineral Resources

NI 43-101 is a rule of the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning material mineral projects. Technical disclosure contained in this report has been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Classification System. These standards differ from the requirements of the U.S. Securities and Exchange Commission ("SEC") and technical information contained in this report may not be comparable to similar information disclosed by domestic United States companies subject to the SEC's reporting and disclosure requirements.

All amounts in this report are in U.S. dollars unless otherwise noted.

Forward Looking Statements

Statements in this report that are not historical facts are "forward-looking information" or "forward-looking statements" within the meaning of Canadian securities legislation and Australian securities legislation (each, a "forward-looking statement"). The use of any of the words, "estimate", "expect", "may", "might", "opportunity", "plan", "potential", "project", "proposed", "should", "will", "would" and similar expressions are intended to identify forward-looking statements. Statements concerning mineral resource and mineral reserve estimates may also be deemed to constitute forward-looking statements to the extent that they involve estimates of the mineralisation that may be encountered if the Costa Fuego Project is developed.

For personal use only

In this report, forward-looking statements relate, among other things, to: the potential of the La Verde discovery; regulatory applications and approvals; and the Company's future exploration and other business plans.

Forward-looking statements involve known and unknown risks, uncertainties, and other factors, which may cause the actual results, performance, or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. A number of factors could cause actual results to differ materially from a conclusion, forecast or projection contained in the forward-looking statements in this announcement, including, but not limited to, the following material factors: the ability of drilling and other exploration activities to accurately predict mineralisation; operational risks; risks related to the cost estimates of exploration; sovereign risks associated with the Company's operations in Chile; changes in estimates of mineral resources or mineral reserves of properties where the Company holds interests; recruiting qualified personnel and retaining key personnel; future financial needs and availability of adequate financing; fluctuations in mineral prices; market volatility; exchange rate fluctuations; ability to exploit successful discoveries; the production at or performance of properties where the Company holds interests; ability to retain title to mining concessions; environmental risks; financial failure or default of joint venture partners, contractors or service providers; competition risks; economic and market conditions; and other risks and uncertainties described elsewhere in this announcement and elsewhere in the Company's public disclosure record.

Although the forward-looking statements contained in this report are based upon assumptions which the Company believes to be reasonable, the Company cannot assure investors that actual results will be consistent with these forward-looking statements. With respect to forward-looking statements contained in this announcement, the Company has made assumptions regarding: future commodity prices and demand; availability of skilled labour; timing and amount of capital expenditures; future currency exchange and interest rates; the impact of increasing competition; general conditions in economic and financial markets; availability of drilling and related equipment; effects of regulation by governmental agencies; future tax rates; future operating costs; availability of future sources of funding; ability to obtain financing; and assumptions underlying estimates related to adjusted funds from operations. The Company has included the above summary of assumptions and risks related to forward-looking information provided in this announcement to provide investors with a more complete perspective on the Company's future operations, and such information may not be appropriate for other purposes. The Company's actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what benefits the Company will derive therefrom.

For additional information with respect to these and other factors and assumptions underlying the forward-looking statements made herein, please refer to the public disclosure record of the Company, including the Company's most recent Annual Report, which is available on SEDAR+ (www.sedarplus.ca) under the Company's issuer profile. New factors emerge from time to time, and it is not possible for management to predict all those factors or to assess in advance the impact of each such factor on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statement.

The forward-looking statements contained in this announcement are expressly qualified by the foregoing cautionary statements and are made as of the date of this announcement. Except as may be required by applicable securities laws, the Company does not undertake any obligation to publicly update or revise any forward-looking statement to reflect events or circumstances after the date of this announcement or to reflect the occurrence of unanticipated events, whether as a result of new information, future events or results, or otherwise. Investors should read this entire announcement and consult their own professional advisors to ascertain and assess the income tax and legal risks and other aspects of an investment in the Company.

1 Mineral Resources are reported on a 100% Basis - combining Mineral Resource Estimates for the Cortadera, Productora, Alice and San Antonio deposits. All figures are rounded, reported to appropriate significant figures and reported in accordance with the Joint Ore Reserves Committee Code (2012) and NI 43-101. Mineral Resource estimation practices are in accordance with CIM Estimation of Mineral Resource and Mineral Reserve Best Practice Guidelines (29 November 2019) and reported in accordance CIM Definition Standards for Mineral Resources and Mineral Reserves (10 May 2014) that are incorporated by reference into NI 43-101.

2 Mineral Resources are inclusive of the Mineral Reserve

3 The Productora deposit is 100% owned by Chilean incorporated company Sociedad Minera El Aguila SpA (SMEA). SMEA is a joint venture (JV) company – 80% owned by Sociedad Minera El Corazón SpA (a 100% subsidiary of Hot Chili), and 20% owned by Compañía Minera del Pacífico S.A (CMP).

4 The Cortadera deposit is controlled by a Chilean incorporated company Sociedad Minera La Frontera SpA (Frontera). Frontera is a subsidiary company – 100% owned by Sociedad Minera El Corazón SpA, which is a 100% subsidiary of Hot Chili.

5 The San Antonio deposit is controlled through Frontera (100% owned by Sociedad Minera El Corazón SpA, which is a 100% subsidiary of Hot Chili Limited) and Frontera is party to an Option Agreement pursuant to which it can earn a 100% interest in the property.

6 The Mineral Resource Estimates (MRE) in the tables above form coherent bodies of mineralisation that are considered amenable to a combination of open pit and underground extraction methods based on the following parameters: Base Case Metal Prices: Copper US$ 3.00/lb, Gold US$ 1,700/oz, Molybdenum US$ 14/lb, and Silver US$20/oz.

7 All MRE were assessed for Reasonable Prospects of Eventual Economic Extraction (RPEEE) using both Open Pit and Block Cave Extraction mining methods at Cortadera and Open Pit mining methods at the Productora, Alice and San Antonio deposits.

8 Metallurgical recovery averages for each deposit consider Indicated + Inferred material and are weighted to combine sulphide flotation and oxide leaching performance. Process recoveries: Cortadera – Weighted recoveries of 82% Cu, 55% Au, 81% Mo and 36% Ag. CuEq(%) = Cu(%) + 0.55 x Au(g/t) + 0.00046 x Mo(ppm) + 0.0043 x Ag(g/t). San Antonio - Weighted recoveries of 85% Cu, 66% Au, 80% Mo and 63% Ag. CuEq(%) = Cu(%) + 0.64 x Au(g/t) + 0.00044 x Mo(ppm) + 0.0072 x Ag(g/t) Alice - Weighted recoveries of 81% Cu, 47% Au, 52% Mo and 37% Ag. CuEq(%) = Cu(%) + 0.48 x Au(g/t) + 0.00030 x Mo(ppm) + 0.0044 x Ag(g/t). Productora – Weighted recoveries of 84% Cu, 47% Au, 48% Mo and 18% Ag. CuEq(%) = Cu(%) + 0.46 x Au(g/t) + 0.00026 x Mo(ppm) + 0.0021 x Ag(g/t). Costa Fuego – Recoveries of 83% Cu, 53% Au, 71% Mo and 26% Ag. CuEq(%) = Cu(%) + 0.53 x Au(g/t) + 0.00040 x Mo(ppm) + 0.0030 x Ag(g/t)

9 Copper Equivalent (CuEq) grades are calculated based on the formula: CuEq% = ((Cu% × Cu price 1% per tonne × Cu_recovery) + (Mo ppm × Mo price per g/t × Mo_recovery) + (Au ppm × Au price per g/t × Au_recovery) + (Ag ppm × Ag price per g/t × Ag_recovery)) / (Cu price 1% per tonne × Cu recovery). The base case cut-off grade for Mineral Resources considered amenable to open pit extraction methods at the Cortadera, Productora, Alice and San Antonio deposits is 0.20% CuEq, while the cut-off grade for Mineral Resources considered amenable to underground extraction methods at the Cortadera deposit is 0.27% CuEq. It is the Company's opinion that all the elements included in the CuEq calculation have a reasonable potential to be recovered and sold.

10 Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. The MRE include Inferred Mineral Resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorised as Mineral Reserves. It is reasonably expected that the majority of Inferred mineral resources could be upgraded to Measured or Indicated Mineral Resources with continued exploration.

11 The effective date of the MRE is 26 February 2024. The MRE was previously reported in the 2024 PEA. Hot Chili Limited confirms it is not aware of any new information or data that materially affects the information included in the 2024 PEA and all material assumptions and technical parameters stated for the MRE in the 2024 PEA continue to apply and have not materially changed.

12 Hot Chili Limited is not aware of political, environmental, or other risks that could materially affect the potential development of the Mineral Resources other than as disclosed in the 2025 PFS. A detailed list of Costa Fuego Project risks is included in Chapter 25 of the 2025 PFS Technical Report titled "Costa Fuego Copper Project NI43-101 Technical Report Preliminary Feasibility Study" and dated 9 May 2025 (effective 27 March 2025), is available on SEDAR+ (www.sedarplus.ca) and the Company's website (www.hotchili.net.au).

1 Mineral Reserves are reported on a 100% Basis - combining Mineral Reserve estimates for the Cortadera, Productora, Alice and San Antonio deposits, and have an effective date of 27 March 2025.

2 An Ore Reserve (declared in accordance with JORC Code 2012) was previously reported at Productora, a component of Costa Fuego, on 2nd March 2016 on the ASX. The Company was not subject to the requirements of NI 43-101 at that time.

3 Mineral Reserve estimation practices are in accordance with CIM Estimation of Mineral Resource and Mineral Reserve Best Practice Guidelines (29 November 2019) and reported in accordance CIM Definition Standards for Mineral Resources and Mineral Reserves (10 May 2014) that are incorporated by reference into NI 43-101. Mineral Reserve estimates are in accordance with the JORC Code. References to "Mineral Reserves" mean "Ore Reserves" as defined in the JORC Code and references to "Proven Mineral Reserves" mean "Proved Ore Reserves" as defined in the JORC Code.

4 The Mineral Reserve reported above was not additive to the Mineral Resource. The Mineral Reserve is based on the 26 February 2024 Mineral Resource.

5 Tonnages and grades are rounded to two significant figures. All figures are rounded, reported to appropriate significant figures and reported in accordance with the Joint Ore Reserves Committee Code (2012) and NI 43-101. As each number is rounded individually, the table may show apparent inconsistencies between the sum of rounded components and the corresponding rounded total.

6 Mineral Reserves are reported using long-term metal prices of US$4.30/lb Cu, US$2,280/oz Au, US$27/oz Ag, US$20/lb Mo.

7 The Mineral Reserve tonnages and grades are estimated and reported as delivered to plant (the point where material is delivered to the processing facility) and is therefore inclusive of ore loss and dilution.

8 The Productora deposit is 100% owned by Chilean incorporated company Sociedad Minera El Aguila SpA (SMEA). SMEA is a joint venture (JV) company – 80% owned by Sociedad Minera El Corazón SpA (a 100% subsidiary of Hot Chili), and 20% owned by Compañía Minera del Pacífico S.A (CMP).

9 The Cortadera deposit is controlled by a Chilean incorporated company Sociedad Minera La Frontera SpA (Frontera). Frontera is a subsidiary company – 100% owned by Sociedad Minera El Corazón SpA, which is a 100% subsidiary of Hot Chili.

10 The San Antonio deposit is controlled through Frontera (100% owned by Sociedad Minera El Corazón SpA, which is a 100% subsidiary of Hot Chili) and Frontera is party to an Option Agreement pursuant to which it can earn a 100% interest in the property.

11 The Mineral Reserve Estimate as of 27 March 2025 for Costa Fuego was prepared by Anton von Wielligh, Fellow with the AUSIMM (FAUSIMM). Mr. von Wielligh fulfils the requirements to be a "Qualified Person" within the meaning of NI 43-101 and is the Competent Person under JORC for the Mineral Reserve.

12 Hot Chili Limited is not aware of political, environmental, or other risks that could materially affect the potential development of the Mineral Reserves other than as disclosed in the 2025 PFS. A detailed list of Costa Fuego Project risks is included in Chapter 25 of the 2025 PFS Technical Report titled “Costa Fuego Copper Project NI43-101 Technical Report Preliminary Feasibility Study” and dated 9 May 2025 (effective 27 March 2025), is available on SEDAR+ (www.sedarplus.ca) and the Company’s website (www.hotchili.net.au).

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name of entity	
Hot Chili Limited	
ABN	Quarter ended ("current quarter")
91 130 955 725	**31 March 2026**

Consolidated statement of cash flows		**Current quarter $A'000**	**Year to date (9 months) $A'000**
1.	**Cash flows from operating activities**		
1.1	Receipts from customers	-	-
1.2	Payments for		
	(a) exploration & evaluation	-	-
	(a) development	-	-
	(b) production	-	-
	(c) staff costs	(745)	(1,968)
	(d) administration and corporate costs	(1,726)	(4,553)
1.3	Dividends received (see note 3)	-	-
1.4	Interest received	62	159
1.5	Interest and other costs of finance paid	-	-
1.6	Income taxes paid	-	-
1.7	Government grants and tax incentives	-	-
1.8	Other (provide details if material)	-	-
1.9	**Net cash from / (used in) operating activities**	**(2,409)**	**(6,362)**
2.	**Cash flows from investing activities**		
2.1	Payments to acquire or for:		
	(a) entities	-	-
	(b) tenements	(2,373)	(4,019)
	(c) property, plant and equipment	(27)	(68)
	(d) exploration & evaluation	(3,069)	(11,543)
	(e) investments	-	-
	(f) other non-current assets	-	-
2.2	Proceeds from the disposal of:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-

For personal use only

Consolidated statement of cash flows		Current quarter $A'000	Year to date (9 months) $A'000
	(d) investments	-	-
	(e) other non-current assets	-	-
2.3	Cash flows from loans to other entities	-	-
2.4	Dividends received (see note 3)	-	-
2.5	Other (CMP recoup)	1,292	1,292
2.6	**Net cash from / (used in) investing activities**	**(4,177)**	**(14,338)**

3.	**Cash flows from financing activities**		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)	40,000	54,189
3.2	Proceeds from issue of convertible debt securities	-	-
3.3	Proceeds from exercise of options	-	-
3.4	Transaction costs related to issues of equity securities or convertible debt securities	(3,064)	(3,672)
3.5	Proceeds from borrowings	-	-
3.6	Repayment of borrowings	-	-
3.7	Transaction costs related to loans and borrowings	-	-
3.8	Dividends paid	-	-
3.9	Other (provide details if material)	-	-
3.10	**Net cash from / (used in) financing activities**	**36,936**	**50,517**

4.	**Net increase / (decrease) in cash and cash equivalents for the period**		
4.1	Cash and cash equivalents at beginning of period	4,624	5,189
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(2,409)	(6,362)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(4,177)	(14,338)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	36,936	50,517
4.5	Effect of movement in exchange rates on cash held	246	214
4.6	**Cash and cash equivalents at end of period**	**35,220**	**35,220**

For personal use only

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter $A'000	Previous quarter $A'000
5.1	Bank balances	5,428	124
5.2	Call deposits	29,792	4,500
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	**Cash and cash equivalents at end of quarter (should equal item 4.6 above)**	**35,220**	**4,624**

6.	Payments to related parties of the entity and their associates	Current quarter $A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	234
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

7.	Financing facilities *Note: the term "facility' includes all forms of financing arrangements available to the entity.* *Add notes as necessary for an understanding of the sources of finance available to the entity.*	Total facility amount at quarter end $A'000	Amount drawn at quarter end $A'000
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	**Total financing facilities**	-	-

7.5	**Unused financing facilities available at quarter end**	-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	

For personal use only

8.	Estimated cash available for future operating activities	$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(2,409)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(3,069)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	**(5,478)**
8.4	Cash and cash equivalents at quarter end (item 4.6)	35,220
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	**35,220**
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	6.43

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

N/A

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 30 April 2026

Authorised by: By the Board

(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
