ASX ANNOUNCEMENT ASX:PRX

20 August 2026

ANNUAL MINERAL RESOURCE STATEMENT

Prodigy Gold NL ("Prodigy Gold" or the "Company") is pleased to provide this annual review and summary of Prodigy Gold's Mineral Resource Estimates as at 30 June 2026 for the Tregony, Hyperion, Buccaneer and Old Pirate deposits.

The Company's Mineral Resource Estimates are reported in accordance with the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "2012 JORC Code") and are based on documentation compiled by a Competent Person as defined by the 2012 JORC Code. All information compiled in this statement has previously been released to the ASX, with the Company's last Annual Mineral Resource Statement reported to the ASX on 19 August 2025. No updates to the Old Pirate, Buccaneer or Tregony Mineral Resource Estimates have occurred since the last annual Mineral Resource Statement. Exploration undertaken during the financial year 2025/2026 ("FY26") resulted in the update of the Hyperion Mineral Resource Estimate being completed and reported in March 2026.

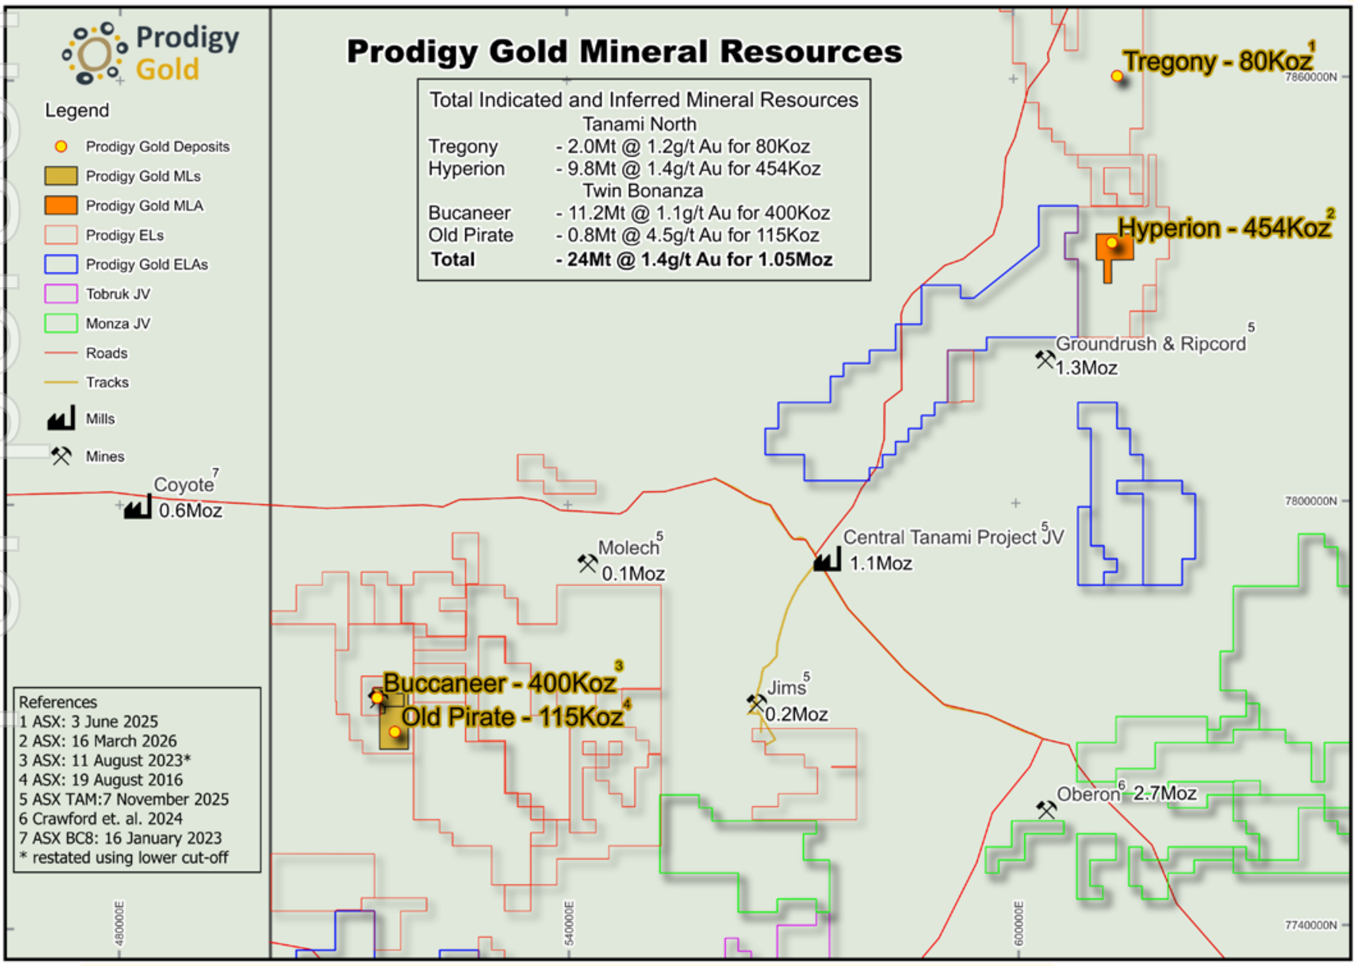

Figure 1 Location of Prodigy Gold's Mineral Resources in the Tanami region of the Northern Territory

Consolidated Resource

Prodigy Gold's Mineral Resources are located ~600km to the northwest of Alice Springs in the Tanami Region of the Northern Territory. As at the date of this report Mineral Resources are estimated to total 23.8Mt at 1.4g/t Au for 1.05Moz of gold, with Indicated and Inferred Mineral Resources reported from the Tanami North project (Tregony and Hyperion) and the Twin Bonanza project (Buccaneer and Old Pirate).

The current Mineral Resources reported highlight an increase from those previously reported as at 30 June 2025 due to the re-estimation of the Hyperion Mineral Resource, following the completion of drilling at this deposit by the Company during FY26. A reduction in the lower cut-off grades used at Hyperion in the fresh material from 0.6g/t to 0.5g/t Au has also added to the overall inventory with the Mineral Resources. This reduction in lower cut-off grade has been possible due to the significant increase in gold values over the past 12 months with longer term forecasts now higher than in previous years and also due to the review of the metallurigcal testwork results.

Mineral Resources include consideration of all resource definition drilling up to 30 June 2026. Resource definition drilling was completed during FY26 at the Tregony and Hyperion deposits, and drilling is planned to continue during the FY27 period.

Table 1 Prodigy Gold Mineral Resource Summary as at 20 August 2026.

			Indicated			Inferred			Total		
Project	Date	Cut-off (g/t Au)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)
Tanami North Project											
Tregony	3-Jun-25	0.5/0.6	0.5	1.8	30	1.5	1.0	50	2.0	1.2	80
Hyperion	16-Mar-26	0.5	4.1	1.6	212	5.7	1.3	242	9.8	1.4	454
Sub-Total			**4.6**	**1.6**	**242**	**7.2**	**1.3**	**292**	**11.9**	**1.4**	**534**
Twin Bonanza Project											
Buccaneer	11-Aug-23	0.6	4.8	1.1	174	6.4	1.1	225	11.2	1.1	400
Old Pirate	19-Aug-16	1.0	0.04	4.7	6	0.8	4.5	109	0.8	4.5	115
Sub-Total			**4.8**	**1.2**	**181**	**7.2**	**1.5**	**334**	**12.0**	**1.3**	**515**
Total Resource			**9.5**	**1.4**	**423**	**14.4**	**1.4**	**626**	**23.8**	**1.4**	**1,049**

Notes:

- *All Mineral Resources are reported in accordance with the 2012 JORC Code*
- *Mineral Resource Estimates are not precise calculations, being dependent on the interpretation of limited information on the location, shape and continuity of the occurrence and on the available sampling results. The quantities contained in the above table have been rounded to one significant figure to reflect the relative uncertainty of the estimate for tonnes and grade. Rounding may cause values in the table to appear to have errors.*
- *Competent Persons and Authors are noted as Prodigy Gold (Mark Edwards) for the Tregony, Hyperion and Buccaneer Mineral Resources and CSA Global for the Old Pirate Mineral Resources*
- *Tonnes are reported as dry metric tonnes*
- *The are no Ore Reserves reported for any of Prodigy Gold's projects*
- *All projects are owned 100% by Prodigy Gold*
- *Buccaneer Mineral Resources were determined using an optimised pit shell created in 2023 with these parameters;*
  - *Gold price of A$2,960/oz which represents a 120% factoring of the 3-year forecast of gold price based on data from* Consensus Economics Inc, 2023 *at US$1,832/oz and exchange rate of $0.74 dated June 2023.*
  - *Mining, processing and G&A costs of around $56/ore tonne mined*
  - *Recoveries used were 95.1% for oxide, 96.7% transitional and 84.6% for fresh based on metallurgical testwork completed by metallurgical consultants IMO Pty Ltd in 2023*
  - *Pit wall angles of 45º in oxide and 39º in fresh and transitional (from vertical) and are based on geotechnical work completed on the 2021 diamond drilling.*
- *Buccaneer Mineral Resources have been re-stated using the optimised pit shell as outlined above at a lower cut-off grade of 0.6g/t Au.*
- *Tregony Mineral Resources are determined to be within 100m of surface using a lower cut-off grade of 0.5g/t Au in oxide material and 0.6g/t Au in transitional and fresh material based on metallurgical recoveries of 95% in oxide and 90% in transitional and fresh material.*
- *Hyperion Mineral Resources are determined to be within 180m of surface using a lower cut-off grade of 0.5g/t Au based on metallurgical recoveries of 95% in oxide and transitional and 90% in fresh material based on metallurgical testwork completed by metallurgical consultants IMO Pty Ltd in 2025.*
- *Lower cut-off grades calculated for Tregony and the restated Buccaneer use a forecast exchange rate of $0.64, US gold price of $2,826/oz ($Aus4,395/oz) determined using the Consensus Economics March 2025 newsletter. Lower cut-off grades calculated for Hyperion use an exchange rate of $0.69, US gold price of $3,273/oz ($Aus4,743/oz) determined using the Consensus Economics February 2026 newsletter*

The Company confirms that it is not aware of any new information or data that materially affects the reported Mineral Resources for Hyperion, Buccaneer, Tregony and Old Pirate and the assumptions and technical parameters underpinning the estimates reported on the 3 June 2025 (Tregony)[1], 16 March 2026 (Hyperion)[2], 11 August 2023 (Buccaneer)[3] and 19 August 2016 (Old Pirate)[4] continue to apply and have not materially changed.

The Buccaneer Mineral Resource has been subjected to a high-level economic assessment with the resources being constrained within a Whittle generated optimised pit shell based on a gold price of $US2,960/oz to limit the inventory reported to align with the future prospects of eventual economic open pit extraction. For the Tregony and Hyperion Mineral Resources the inventories were limited to a vertical depth below surface of 100m for Tregony and 180m for Hyperion. These depths were based on depths generated from earlier pit optimisation studies that were used to determine Mineral Resources in the FY23 report.

Resource Review

A further review of the Old Pirate project has been been completed over the course the year and compared to the 2025 Annual Mineral Resource Statement (ASX: 19 August 2025), with the global Mineral Resource ounce inventory remaining the same. No drilling has been completed on the project over the past +10 years and an update is required on the deposit reflecting changes in the potential metodology of future mining to include small-scale open pit mining. Previous models have focused on the higher grade nature of the mineralisation, which may have reduced the amount of lower grade material that could be included in the estimation. An update is currently planned to be undertaken during FY27 with the deposit being re-wireframed to include some of the lower grade material. Resuts of the update wil be released to the ASX once available.

Prodigy Gold believes the use of cut-off grades of 1.0g/t gold for Old Pirate are appropriate and could potentially be extracted through selective underground or open pit mining and processing through a conventional carbon in leach ("CIL") plant. Prodigy Gold also believes the use cut-off grades of 0.6g/t gold for the Buccaneer and 0.5 and 0.6g/t gold for the Tregony deposit and 0.5g/t Au for the Hyperion deposit as reported are appropriate and could potentially be mined by a selective open pit method and processed through a CIL plant. The cut-off grades reflect the current longer term consensus forecast gold price consistent with industry reporting practices.

For Buccaneer, Hyperion and Tregony the reporting cut-off parameters were selected based on calculated economic cut-off grades for oxide, transitional and fresh material – an overall cut-off grade of between 0.5g/t Au and 0.6g/t Au has been selected as a close proximity to those calculated. A review of the lower cut-off grade was based on a gold price of AUD$4,400/oz (or $141.50/gm), which represents the long-term forecast of gold at US$3,212.65/oz and exchange rate of $0.73 (Consensus Economics Inc, 2026). Total mining and processing costs of $70/ore tonne was used (consistent with the latest Prodigy Gold Annual Mineral Resource Statement) . The cut-off parameter used for the Old Pirate deposit remains consistent with what was used in the 2025 Mineral Resource Statement at 1.0g/t Au.

A Scoping Study has been completed for the Hyperion Mineral Resource based on the latest estimate completed in March 2026[5]. The Scoping Study used a Australian gold price of $4,250/oz and estimated a production target of 4.2Mt @ 1.9g/t Au for 260koz of gold, mined over 4 years and processed over 5 years, producing around 230koz of gold.

The Scoping Study outlines an open pit development scenario to a depth of approximately 180m, supported by favourable geometry and mineralisation continuity. Metallurgical testwork confirms the deposit is amenable to conventional carbon-in-leach ("CIL") processing, with excellent recoveries from oxide and transitional material. Recoveries from fresh material are solid, improving if a floatation circuit is added to the process stream. The Scoping Study was completed to a 40% level of accuracy and mining is estimated to potentially commence in early 2028 pending required approvals and the completion of a processing agreement.

[1] ASX: 3 June 2025
[2] ASX: 16 March 2026
[3] ASX: 11 August 2023* restated 19 August 2025
[4] ASX: 19 August 2016
[5] ASX: 27 May 2026

Table 2 Scoping Study Results for the Hyperion Deposit.

Hyperion Gold Deposit - Result of Scoping Study - Prodiction Target May - 2026									
Material Type	Indicated			Inferred			Total		
	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)
Oxidised	1.0	1.7	50	0.3	1.4	20	1.3	1.6	70
Transitional	0.7	1.7	40	0.2	1.9	10	0.9	1.7	50
Fresh	1.0	1.9	60	1.0	2.6	80	2.0	2.2	140
Total	**2.7**	**1.8**	**150**	**1.5**	**2.2**	**110**	**4.2**	**1.9**	**260**

No detailed open pit mine planning or economic evaluation studies have been undertaken for any of the other Mineral Resource Estimates, outside the review of the cut-off grades, to a standard where results can be reported in accordance with ASX Listing Rules and the 2012 JORC Code. The optimised shells and depth limitations used in calculating the Mineral Resources for this statement fulfil reasonable prospects for eventual economic extraction requirements as outlined within the 2012 JORC Code.

Governance Controls

All Mineral Resource Estimates are prepared by qualified professionals adhering to the principles of the 2012 JORC Code and follow standard industry methodology for drilling, sampling, assaying, geological interpretation, 3-dimensional modelling and grade interpolation techniques. The Mineral Resource Estimates have been calculated by a suitably qualified consultant and overseen by a suitably qualified Prodigy Gold employee (Buccaneer and Old Pirate) or have been calculated by a suitably qualified employee of Prodigy Gold (Tregony and Hyperion).

Tanami North Project Area

The Tanami North project area covers the two deposits located around the Suplejack Shear Zone and lie between the Central Tanami Project Joint Venture managed Crusade and Groundrush deposits. The Tanami North project area is shown in Figure 1 and includes the Tregony and Hyperion Mineral Resources, which have both been updated during the past year based on the drilling results completed by the Company in FY25 and FY26.

The Tanami North project covers several exploration tenements with the Mineral Resources located on EL31331 (Tregony) and EL9250 (Hyperion). Several other exploration targets are located on this project including the Brokenwood, Boco and Mark's Rise prospects. During 2024[6] Prodigy Gold placed an application with the NT Government Department of Mines and Energy for a new Mineral Lease (ML34047) around the Hyperion deposit on EL9250. The Company continues to advance the application process with a submission under Section 46 of the *Aboriginal Land Rights (Northern Territory) Act (1976)* to the Central Land Council, as part of the negotations for a mining agreement with the Traditional Owners, which is required for the granting of the Mineral Lease.

Tregony Mineral Resource

The Tregony deposit is located with the Killi Killi Formation ("KKFm") of the regional Granites-Tanami Group. The mineralisation style is described as a stacked vein array, striking roughly north south and dipping gently to steeply to the west. The local geology consists of siltstones and sandstones of the KKFm and higher gold grades are noted within quartz veins through the system. The Tregony system is located in the hanging wall of the regional Suplejack Shear Zone ("SSZ"). There are over 50 mineralised lodes defined in the project area ranging in thickness from 2m to 15m.

During FY26 the Company completed a detailed drilling campaign covering the previously released Tregony Mineral Resource. The current Tregony Mineral Resource Estimation remains the same as reported in the previous statement and is reported in the Indicated and Inferred categories based on around 16,715m of RC drilling in 152 holes and 3,770m of diamond (or RC with diamond tails) drilling from 17 holes. This drilling was completed by several companies between 1996 and 2025. Of this total, Prodigy Gold completed 8 RC holes for 762m during the past year, the Company has not updated the Mineral Resources incorporating FY26 drilling.

[6] ASX: 4 December 2024

The current Mineral Resource Estimation totals 2.01Mt at 1.2g/t Au for 80koz of gold within both the Indicated and Inferred categories.

All Mineral Resources for the Tregony deposit are quoted above a 0.5g/t gold for oxide material and 0.6g/t gold cut-off grade for transitional and fresh material and are only reported to a depth of 100m below surface, so as to align with the future prospects of eventual economic open pit extraction. The 100m depth was determined when comparing against the previously generated optimised pit shell, which was around 100 to 110m deep.

The Company currently has no plans to continue drilling the Tregony deposit while the focus remains on the development of the Hyperion deposit to the south.

Table 3 Tregony Mineral Resource Estimate

Tregony Gold Deposit - Mineral Resource Estimate June - 2025										
Material Type	Cut-off (g/t Au)	Indicated			Inferred			Total		
		Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)
Oxidised	0.5	0.17	1.7	9.4	0.79	0.9	24.1	0.96	1.1	33.5
Transitional	0.6	0.14	1.6	7.0	0.37	1.2	15.0	0.51	1.3	22.0
Fresh	0.6	0.23	1.9	13.7	0.32	1.0	10.7	0.55	1.4	24.5
Total		**0.53**	**1.8**	**30.1**	**1.48**	**1.0**	**49.8**	**2.01**	**1.2**	**80.0**

Note: Reported above 0.5g/t Au and 0.6g/t Au cut-off grades and to a maximum depth of 100m below surface. Totals may vary due to rounding. The above Mineral Resource Estimate was first announced in 2025 (ASX: 3 June 2025).

Hyperion Mineral Resources

The mineralisation at the Hyperion, Tethys and Hyperion South lodes strikes east-west and is associated with a structural break between regional north-south trending thrust faults. At the Hyperion lodes, this is a shear zone hosted in differentiated dolerite, which is typically intruded by granitic dykes. These granitic intrusions are absent at Tethys. The shear zone generally trends at approximately 286 degrees and dips towards the south at 60-80 degrees. The structure is typically between 4m and 30m thick, with an average of approximately 10m true width. The Seuss structure strikes north-south and demonstrates silica-sericite-pyrite alteration with quartz-carbonate-pyrite veining and sulphide laminations. Some mineralisation occurs within horizontal stacked veins that develop within or proximal to the intersection of the north-northwest striking Seuss structure and a north-south trending mafic sediment. The mineralisation is typically 10m-50m thick with an average of approximately 20m true width.

The 2026 Mineral Resource Estimation totals 9.8Mt at 1.4g/t Au for 454koz of gold. This differs from the previously reported result of 9.7Mt at 1.4g/t Au for 435koz of gold. Resources are quoted above a 0.5g/t gold and to a maximum depth below surface of 180m, so as to align with the future prospects of eventual economic open pit extraction.

The Mineral Resource Estimate was updated in 2026 following the incorporation of drilling completed by the Company in FY26, which totaled 21 RC holes for 2,495m and 6 diamond holes for 1,013m. Further drilling is planned on the deposit during the current year with the aim to provide another Mineral Resource update once results are available.

Table 4 Hyperion Mineral Resource Estimate

Hyperion Gold Deposit - Mineral Resource Estimate March - 2026										
Material Type	Cut-off (g/t Au)	Indicated			Inferred			Total		
		Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)
Oxidised	0.5	1.2	1.6	59	0.6	1.3	26	1.8	1.5	85
Transitional	0.5	1.2	1.6	62	0.7	1.2	29	1.9	1.5	91
Fresh	0.5	1.8	1.6	91	4.4	1.3	187	6.1	1.4	279
Total		**4.1**	**1.6**	**212**	**5.7**	**1.3**	**242**	**9.8**	**1.4**	**454**

Reported above 0.5g/t Au cut-off and constrained to a maximum depth of 180m below surface. Resources may not sum to equal totals due to rounding. The above Mineral Resource Estimate was first announced in 2026 (ASX: 16 March 2026).

Twin Bonanza Project Area

The Twin Bonanza project area covers the two deposits situated within the previously mined project area, west of Newmont's Tanami Operation. The Twin Bonanza project area is shown in Figure 1 and includes the Buccaneer and Old Pirate Mineral Resources, which have not seen active exploration work over the past year.

The Twin Bonanza project is located on two Mineral Leases with the Mineral Resources located on ML29882 (Buccaneer) and ML33459 (Old Pirate). Previous mining has occurred at Old Pirate, with no mining occuring since 2016. Prodigy Gold is currently assessing the Old Pirate project for future mining development, with a review of required approvals currently underway.

Buccaneer Mineral Resource

Gold mineralisation at Buccaneer is disseminated within a monzogranite porphyry and typically associated with quartz stockwork veining. Free gold is often observed in the quartz veining. Mineralisation extends from near-surface to a depth of over 500m and has been defined in several zones over an area of 2,200m by 800m. Mineralisation is often up to 150m thick with intervals of 20 to 40m wide at 1 to 5g/t gold. The deposit remains open at depth, and AC and RAB drilling suggest the potential for further strike extensions.

Work planned for FY27 includes the review and inclusion of all recent testwork in a mining study to determine the most efficient method to extract the Buccaneer Mineral Resources, this will include the development of an open pit mining plan which will include several processing options while a more detailed understanding of how to process the deposit is determined. At this time no further drilling is planned for the deposit until a suitable development plan is defined for the Twin Bonanza project.

Table 5 Buccaneer Mineral Resource Estimate

Buccaneer Gold Deposit - Mineral Resource Estimate August - 2023 - restated August - 2025									
Material Type	Indicated			Inferred			Total		
	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Mt)	Grade (g/t Au)	Metal (Koz)
Oxidised	0.34	1.2	14	0.57	1.2	22	0.92	1.2	36
Transitional	2.14	1.1	76	1.70	1.0	54	3.84	1.1	130
Fresh	2.29	1.2	85	4.12	1.1	149	6.41	1.1	234
Total	**4.77**	**1.1**	**174**	**6.40**	**1.1**	**225**	**11.17**	**1.1**	**400**

Note: Reported above 0.6g/t Au cut-off and above Whittle generated shell. Totals may vary due to rounding. The above Mineral Resource Estimate was first announced in 2023 using a 0.7g/t Au cut-off grade (ASX: 11 August 2023).

Old Pirate Mineral Resource

Old Pirate is a coarse gold-bearing quartz-vein system hosted by a sequence of intercalated sandstone and shale horizons (turbidite sequence). Quartz veins, ranging from 20cm to 6m in width, host the gold mineralisation. The mineralised quartz veins preferentially follow key shale horizons within the turbidite package. The key shale horizons are generally thicker shales, with some up to 25m thick.

No drilling was completed at the Old Pirate project in FY26. The Mineral Resource has been reviewed and at this time has not been updated as no new information is available to warrant the process. During a previous review of the originally reported Mineral Resource some minor errors were identified. This correction was not seen as material and relates to how the tonnes and grades were allocated to each domain when calculated using the Micromine software, compared to what was originally reported in 2016. It has been determined that the Mineral Resource estimation processes followed in 2016 is deemed appropriate for this style of mineralisation and will therefore remain as has previously been reported until such time as the estimation can be updated.

Table 6 Old Pirate Mineral Resource Estimate

Old Pirate Gold Deposit - Mineral Resource Estimate August -2016									
Domain	Indicated			Inferred			Total		
	Tonnes (Kt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Kt)	Grade (g/t Au)	Metal (Koz)	Tonnes (Kt)	Grade (g/t Au)	Metal (Koz)
Western Limb	12	7.6	3	305	5.3	52	317	5.4	55
Central	23	3.0	2	436	3.8	54	459	3.8	56
East	2	7.4	1	10	5.9	2	12	6.2	2
Golden Hind	4	3.5	1	6	4.5	1	10	4.1	1
Total	**42**	**4.7**	**6**	**756**	**4.5**	**109**	**798**	**4.5**	**115**

Note: Totals may vary due to rounding. The above Mineral Resource Estimate was first reported in 2016 (ASX: 19 August 2016).

Work planned for FY27 includes the first drilling on the Old Pirate deposit in over a decade. A small program to test the mineralisation below the current mine pits is planned with all approvals now in place. The program will include the drilling of an RC pre-collar with a diamond tail to better test the narrow higher grade veins that make up the mineralisation at the Old Pirate deposit. Work is also underway to obtain all neccesary approvals to re-commence mining at the project, which could potentially be completed in the first half of 2027.

Competent Person's Statement for the Mineral Resources

The information in this announcement relating to Mineral Resources from Buccaneer, Tregony, Hyperion and Old Pirate is based on information reviewed and checked by Mr. Mark Edwards. Mr. Edwards is a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM – Membership number 220787) and Member of the Australian Institute of Geoscientists (MAIG – Membership number 3655) and has sufficient experience relevant to the style of mineralisation and type of deposits under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "2012 JORC Code"). Mr. Edwards is a full-time employee of the Company in the position of Managing Director and consents to the inclusion of the Mineral Resources in the form and context in which they appear. Mr. Edwards also visited each project site during September-2024, October 2025 and May 2026.

The Company confirms that it is not aware of any new information or data that materially affects the Mineral Resources as reported on the 16 March 2026, 3 June 2025, 11 August 2023 and 19 August 2016, and the assumptions and technical parameters underpinning the estimates in the 16 March 2026, 3 June 2025, 11 August 2023 and 19 August 2016 releases continue to apply and have not materially changed.

The information in this report that relates to Mineral Resources for Hyperion was previously released to the ASX on the 16 March 2026 – Hyperion Gold deposit Mineral Resource Update. This document can be found at www.asx.com.au (Stock Code: PRX) and at www.prodigygold.com.au. The 16 March 2026 release fairly represents information compiled by Mr. Shaun Searle who is a Member of the Australasian Institute of Geoscientists and reviewed by Mr. Mark Edwards who is a Fellow of the Australasian Institute of Mining and Metallurgy and Member of the Australian Institute of Geoscientists. Mr. Edwards is the Mineral Resource Competent Person for this estimate. At this time of publication Mr. Edwards was a full-time employee of Prodigy Gold and Mr. Searle is a full-time employee of Ashmore Advisory Pty Ltd. Mr. Edwards and Mr. Searle had previously provided written consent for the 16 March 2026 release.

The information in this report that relates to Mineral Resources for Tregony was previously released to the ASX on the 3 June 2025 – Updated Mineral Resource for Tregony Gold deposit. This document can be found at www.asx.com.au (Stock Code: PRX) and at www.prodigygold.com.au. The 3 June 2025 release fairly represents data, geological modelling, grade estimation and Mineral Resource estimates completed by Mr. Mark Edwards who is a Fellow of the Australasian Institute of Mining and Metallurgy and Member of the Australian Institute of Geoscientists. At the time of the 3 June 2025 release Mr. Edwards was a full-time employee of Prodigy Gold. Mr. Edwards has previously provided written consent for the 3 June 2025 release.

The information in this report that relates to the Mineral Resources for Buccaneer was previously released to the ASX on the 11 August 2023 – Buccaneer Mineral Resource Update. This document can be found at www.asx.com.au (Stock Code: PRX) and at www.prodigygold.com.au. It fairly represents information compiled by Mr. Shaun Searle who is a Member of the Australasian Institute of Geoscientists and reviewed by Mr. Mark Edwards who is a Fellow of the Australasian Institute of Mining and Metallurgy and Member of the Australian Institute of Geoscientists. Mr. Edwards is the Mineral Resource Competent Person for this estimate. At this time of publication Mr. Edwards was a full-time employee of Prodigy Gold and Mr. Searle was a full-time employee of Ashmore Advisory Pty Ltd. Mr. Edwards and Mr. Searle had previously provided written consent for the 11 August 2023 release.

The information in this report that relates to Mineral Resources for Old Pirate was previously released to the ASX on the 19 August 2016 – Old Pirate Updated Mineral Resource Estimate. This document can be found at www.asx.com.au (Stock Code: PRX) and at www.prodigygold.com.au. The 19 August 2016 release fairly represents information reviewed by Mr. David Williams, a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy. At the time of the 19 August 2016 release Mr. Williams was a full-time employee of CSA Global Pty Ltd. Mr. Williams has previously provided written consent for the 19 August 2016 release.

Competent Person's Statement for Exploration Results

The information in this announcement relating to the Hyperion deposit, and exploration results from the Tanami North project, such as results from the Tregony and Hyperion deposits, is based on information reviewed and checked by Mr. Mark Edwards, FAusIMM, MAIG. Mr. Edwards is a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM) and a Member of the Australasian Institute of Geoscientists (AIG) and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The "JORC Code"). Mr. Edwards is a full-time employee of the Company in the position of Managing Director and consents to the inclusion of the exploration results in the form and context in which they appear.

Past Exploration results reported in this announcement have been previously prepared and disclosed by Prodigy Gold in accordance with JORC 2012, these releases can be found and reviewed on the Company website, (www.prodigygold.com.au). The Company confirms that it is not aware of any new information or data that materially affects the information included in these market announcements. The Company confirms that the form and content in which the Competent Person's findings are presented here have not been materially modified from the original market announcements. Refer to www.prodigygold.com.au for details on past exploration results.

The information in this report that relates to prior exploration results and Mineral Resources is extracted from the following ASX announcements:

Announcement Date	Announcement Title	Competent Person	At the time of release full-time employee of	Membership	Membership status
