Executive Chairman, Joshua Pitt, said:

"The achievement of nameplate capacity at the Onslow Iron Project generated $28.8 million in royalty income for FY26. The 22.4 cents per share of dividends for FY26 reflects our policy of paying 50% the $28.8 million of royalty income during the reporting period. With $62.77 million in cash at year end and ongoing royalty income, Red Hill is well positioned to continue to pay dividends, to fund its exploration programs and to pursue further royalty acquisitions. During the year we carried out our first drill programs on the exciting Curnamona Project which straddles the SA-NSW border and continued our efforts on our West Pilbara Project. I thank our team for its efforts and our shareholders for their continued support."
