ASX ANNOUNCEMENT

September 9th 2026

AUSQUEST TO PRESENT AT THE RESOURCES RISING STARS GOLD COAST INVESTOR CONFERENCE

AusQuest Limited [ASX: AQD] is pleased to advise shareholders and investors that its Managing Director, Graeme Drew will present at the Resources Rising Stars Gold Coast Investor Conference, being held on Wednesday 9th September and Thursday 10th September 2026.

Graeme Drew will provide an update on the Company's activities and outlook.

The conference will be live-streamed and shareholders and investors can attend either in-person or virtually via the livestream. There is no charge to attend either the live-stream or in-person event for investors, however registration is essential.

Venue: RACV Royal Pines Resort, Ross St, Benowa QLD 4217
Register: RRS Investor

It is recommended that online investors pre-register prior to the commencement of the presentation.

A full Conference program can be downloaded from here.

Authorised for release by the AusQuest Limited Board of Directors.

MD PRESENTATION – RRS September 2026

ASX:AQD

DISCLAIMERS

For personal use only

Forward-Looking Statements

This presentation contains forward looking statements concerning the projects owned by AusQuest Limited. Statements concerning mining reserves and resources may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward looking statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on management's beliefs, opinions and estimates as of the dates the forward looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Data and amounts shown in this presentation relating to capital costs, operating costs and project timelines are internally generated best estimates only. All such information and data is currently under review as part of AusQuest Limited's ongoing development and feasibility studies. Accordingly, AusQuest Limited cannot guarantee the accuracy and/or completeness of the figures or data included in the presentation until the feasibility studies are completed.

Competent Person's Statement

The details contained in this report that pertain to exploration results are based upon information compiled by Mr Graeme Drew, a full-time employee of AusQuest Limited. Mr Drew is a Fellow of the Australasian Institute of Mining and Metallurgy (AUSIMM) and has sufficient experience in the activity which he is undertaking to qualify as a Competent Person as defined in the December 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Mr Drew consents to the inclusion in the report of the matters based upon his information in the form and context in which it appears.

JORC – Exploration Targets

It is common practice for a company to comment on and discuss its exploration in terms of target size and type. The information in this presentation relating to exploration targets should not be misunderstood or misconstrued as an estimate of Mineral Resources or Ore Reserves. Hence the terms Resource(s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature, since there has been insufficient work completed to define them beyond exploration targets and that it is uncertain if further exploration will result in the determination of a Mineral Resource.

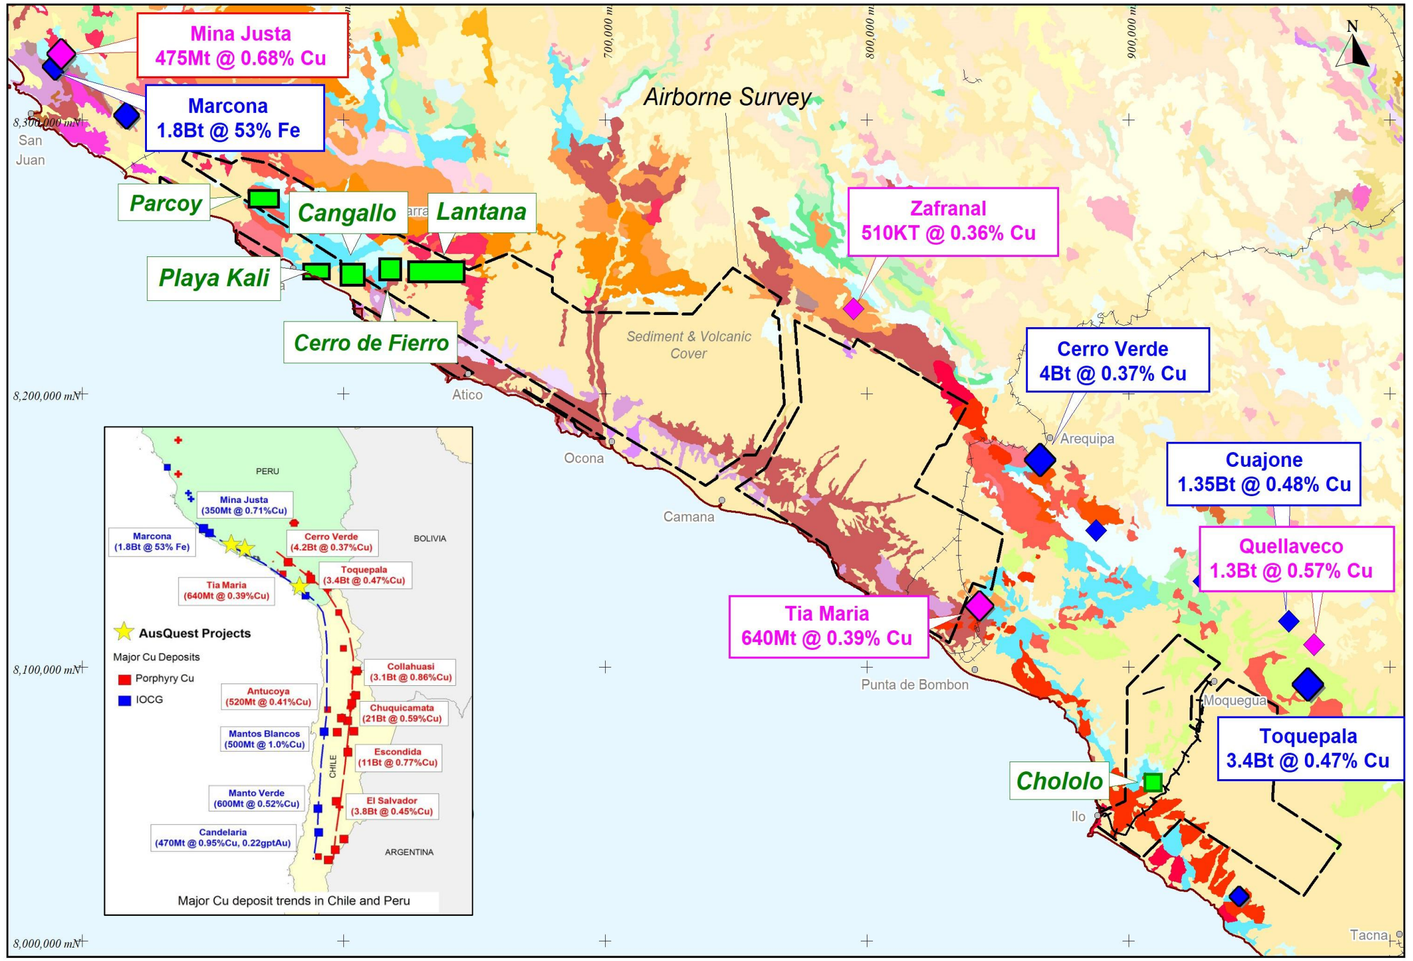

Currency

All dollar amounts shown in this presentation are in Australian dollars unless otherwise stated.

Peru – Copper Country

For personal use only

- Peru is the **third largest** copper producer globally
- Coastal Belt offers access to infrastructure and **lower cost** project settings
- AQD has large landholdings (**100% owned**) close to the coast
- **Major Deposits** along the coast include Mina Justa, Marcona, Tia Maria
- **Cangallo** first significant new greenfield porphyry copper discovery in 20 years
- Peru has **established mining jurisdiction** with multiple mine developments underway

Location – A Capex and Opex Advantage

For personal use only

- ***Low altitude (***~1,200m) improves Capex and Opex profile
- ***Close to the coast (~8km)*** – seawater access, freight & logistics
- ***No competing land-use***
- ***Multiple Power Options -*** *transmission lines* cross the prospect
- ***30km from Chala*** - ~10K people with strong ties to fishing & mining – potential work force
- ***Potential port site*** close to the prospect

For personal use only

CANGALLO DISCOVERY

Large Scale Porphyry System continues to grow

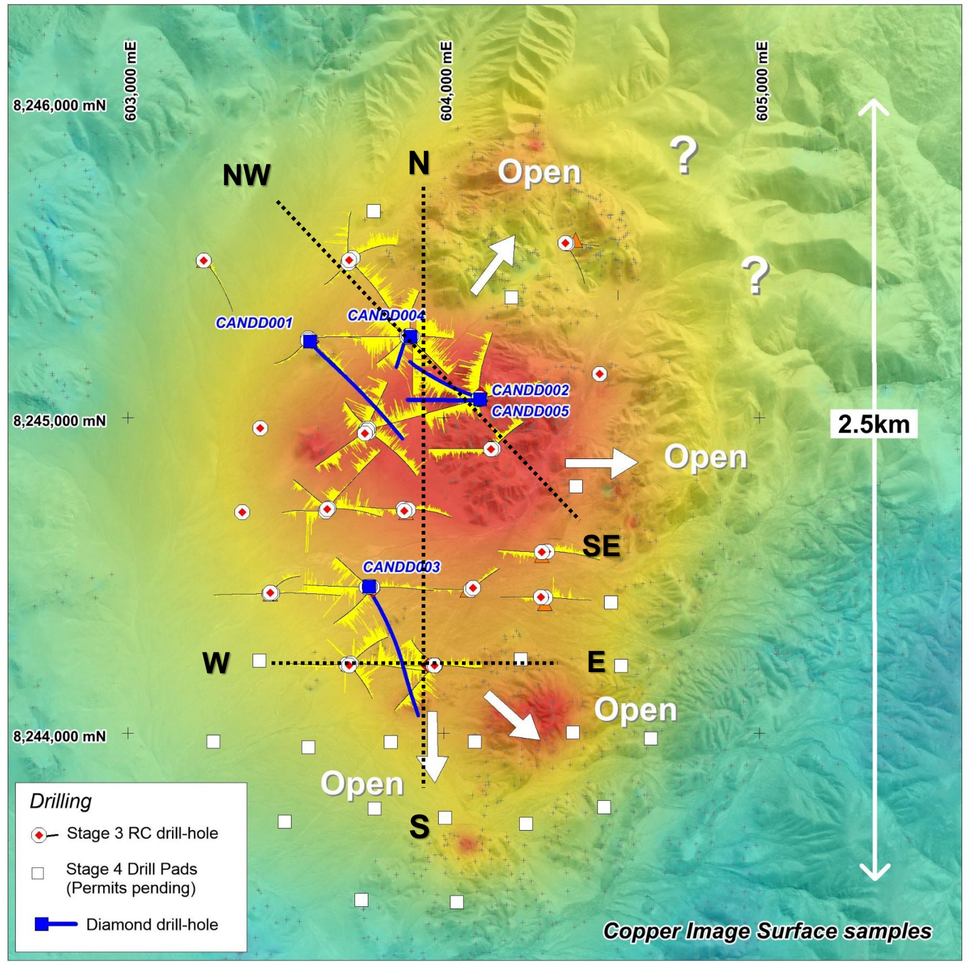

- The Cangallo **porphyry copper discovery** continues to grow with every new drill program (**54 RC holes, +5 DDH - 24,500m**)
- Mineralisation is continuous for **+1500m in length, 250 to 500m in width and to depths up to 800m**

  Copper occurs **from surface** as **oxides & secondary sulphides** to depths of **~300m**

  Near surface supergene copper is in part **acid soluble** potentially supporting **heap leach recovery** – a cheap processing option

- Significant **broad intersections** include:

  154m @ 0.37% Cu & 0.06 g/t Au (CANRC034)
  304m @ 0.30% Cu & 0.06 g/t Au (CANRC008)
  324m @ 0.30% Cu & 0.07 g/t Au (CANRC012)
  330m @ 0.30% Cu & 0.06 g/t Au (CANRC014)
  172m @ 0.33% Cu & 0.07 g/t Au (CANRC032)
  176m @ 0.38% Cu & 0.07 g/t Au (CANRC052)
  342m @ 0.27% Cu & 0.05 g/t Au (CANRC053)
  555m @ 0.26% Cu & 0.06 g/t Au (CANDD002)

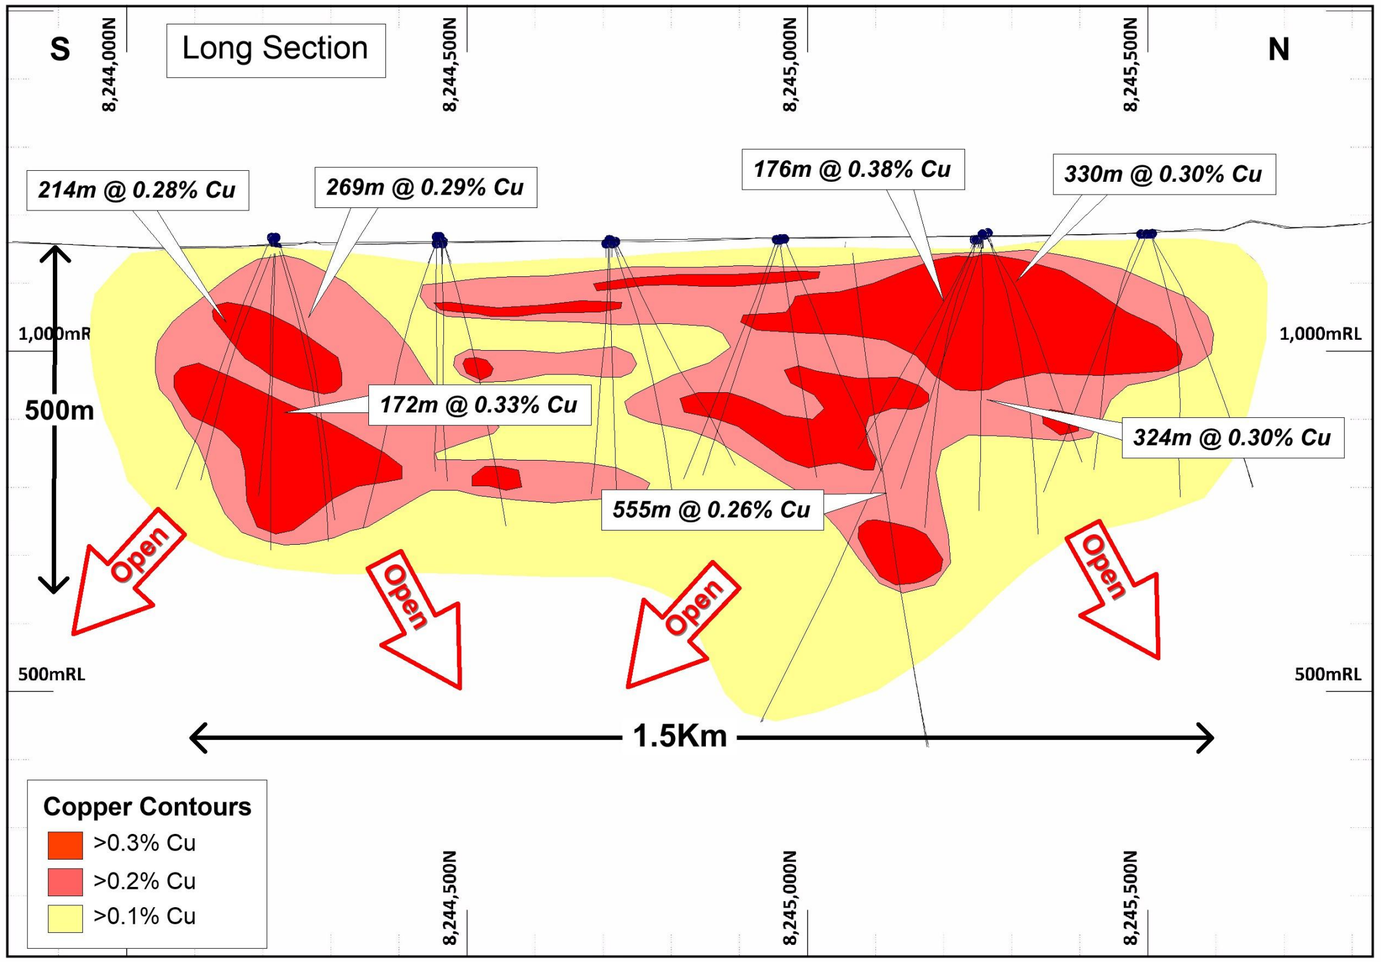

* Drilling and sampling results released to ASX on 23/01, 6/2, 5/3, 21/7, 28/8, 30/9 & 12/11 2025, 6/1, 11/2, 4/3, 6/5, 29/5, 22/7 & 3/9 2026 and Quarterly Reports

CANGALLO DISCOVERY

Long-Section (N-S) – Large Porphyry Cu-Au System Emerging

- Copper is continuous within a north - south corridor **extending over 1500 metres**
- Broad zones **(+200m)** of **+0.3% Cu** are common with multiple intercepts grading **+0.5% Cu**
- Hypogene mineralisation continues to **depths > 700 metres** – Diamond drilling ongoing
- **High copper (+0.5% Cu)** grades in north and south - mineralisation **open in all directions**
- Excellent **potential to grow the resource** & locate higher Cu grades near surface & at depth - **Stage 4 drill permits** are close

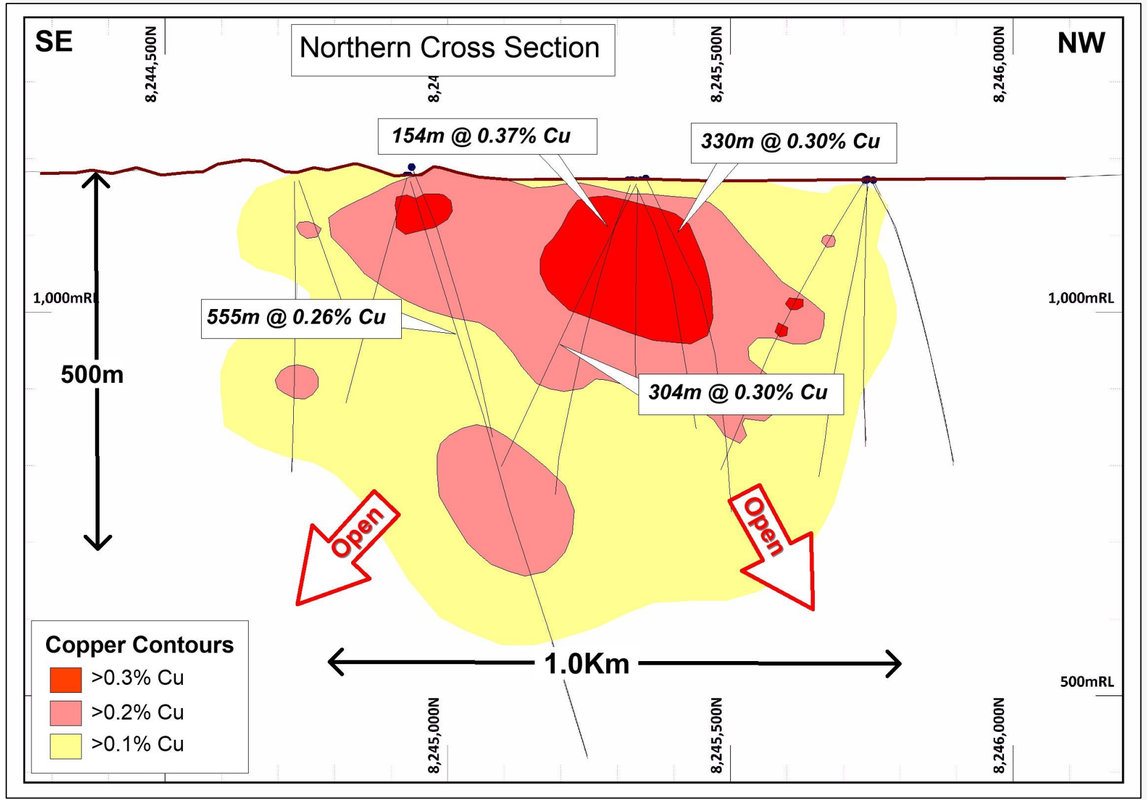

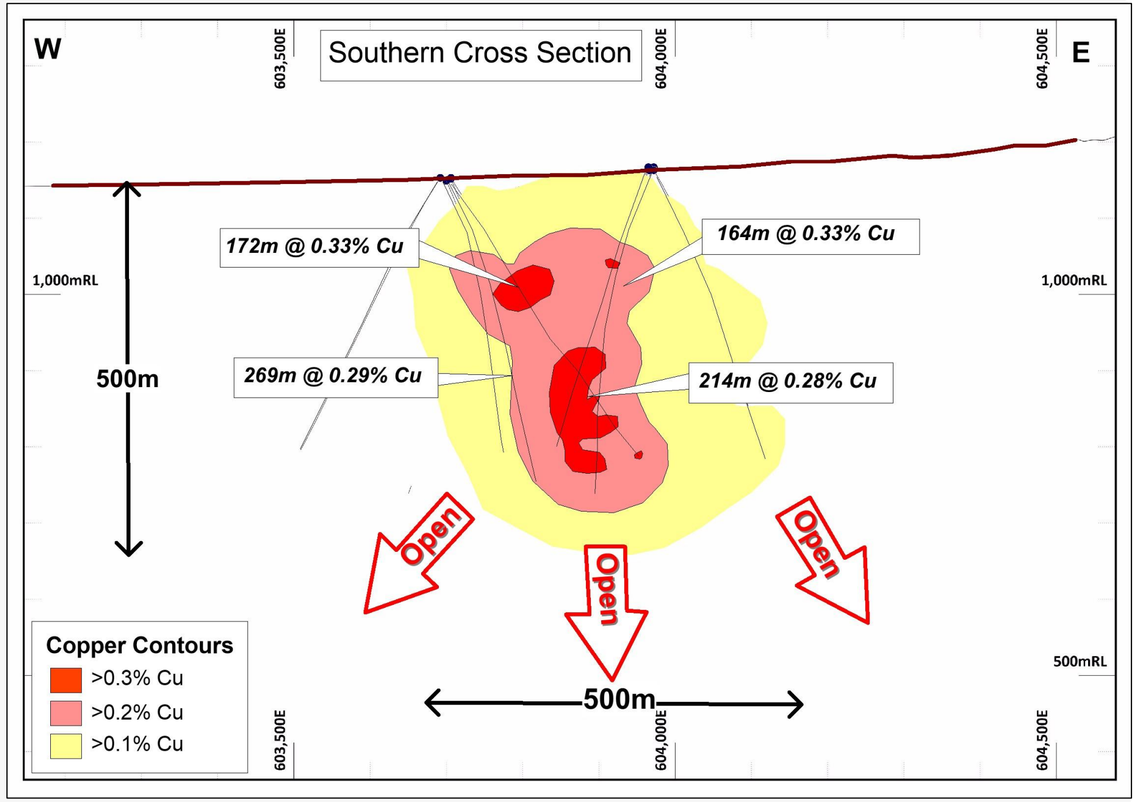

* Drilling and sampling results released to ASX on 23/1, 6/2, 5/3, 21/7, 28/8, 30/9 & 12/11 2025, 6/1, 11/2, 4/3, 6/5, 29/5, 22/7 & 3/9 2026. some drill-hole traces are projected onto the sections

For personal use only

CANGALLO DISCOVERY

Cross-Sections – Cu Open in Multiple Directions

- Potential south-easterly plunge to higher grade copper mineralisation in the north.
- Drilling to grow copper mineralisation in the south – Stage 4 drill permits are close

* Drilling and sampling results released to ASX on 23/1, 6/2, 5/3, 21/7, 28/8, 30/9 & 12/11 2025, 6/1, 11/2, 4/3, 6/5, 29/5, 22/7 & 3/9 2026. some drill-hole traces are projected onto the sections

Community Engagement and Support

- Regular communication with communities and Government authorities - active participation in Environment, Health and Education within local communities

- Training programmes at the local schools in recycling
- Sponsor annual beach clean-ups
- Regular support and training at local health clinics
- Donations to local schools - solar panels and shade cloth for playground

PERU

Forward Looking Program at Cangallo - News flow

- Stage 3 RC drilling completed – Cu still open in the south and east
- Stage 3 diamond drilling in progress to test depth extent & grade of Cu sulphides in areas highlighted by RC drill results
- Stage 4 permits available in Sept(?) to allow RC & diamond drilling of southern extensions to commence
- Metallurgical test-work on recovery profile across resource
- Permits for detailed infill drilling prepared

Cangallo Porphyry Copper-Gold Discovery - Recap

A New Copper Growth Story in a Tier 1 Environment

- *Large lateral & vertically extensive porphyry system under shallow cover*
- *Mineralisation open in all directions – potential for growth*
- *Consistent 0.3% Cu envelopes and higher grade 0.5-0.8% Cu zones*
- *Oxidised Cu (+250m) potentially amenable to heap leaching (low cost)*
- *Excellent location - favourable logistics & potential for lower Opex & Capex*
- *Diamond drilling to understand Cu distribution & locate porphyry centres*
