About Latitude 66

Latitude 66 Limited (ASX:LAT) is a mineral exploration and development company focused on advancing gold and critical mineral projects within the Tier 1 jurisdictions of Finland and Western Australia.

The Company's flagship asset is the Kuusamo Schist Belt (KSB) Project in Northern Finland, an advanced gold-cobalt development project with a Mineral Resource Estimate of 7.3Mt at 2.7g/t Au for 650koz gold and 0.08% Co for 5,840t cobalt (~90% Indicated, ~10% Inferred). Backed by a highly economic Scoping Study and a clear permitting pathway, Latitude 66 is advancing development activities at the KSB Project, which is strategically positioned to supply the critical mineral cobalt to the European market.

In Western Australia, Latitude 66 is advancing a portfolio of assets led by its primary focus on the Laverton Gold Project. Located within a world-class gold district, this near-term development opportunity encompasses the advanced Red Dog and Tin Dog Prospects with a combined Mineral Resource Estimate of 10.7Mt at 1.0g/t Au for 339koz gold (~40% Indicated, ~60% Inferred). The Project benefits from granted mining leases, extensive historical drilling, and proximity to multiple operating plants and established haul road networks.
