About Kuniko

Kuniko Limited (ASX: KNI) is a mineral exploration company advancing its high-grade gold and silver Commonwealth Project in the Lachlan Fold Belt in New South Wales, Australia, and its copper, nickel and cobalt projects focused on the energy transition in Southern Norway. The Company's operations are in Tier 1 mining jurisdictions and the Company remains committed to high ethical and environmental standards for all company activities.

Key assets include:

- **Commonwealth Gold-Silver Project (NSW, Australia):** Binding earn-in and JV with Impact Minerals (ASX: IPT) to earn up to 70% of a VMS/epithermal gold-silver system in the Lachlan Fold Belt, hosting JORC (2012) Inferred Mineral Resource Estimates at Commonwealth and Silica Hill.
- **Ertelien Nickel-Copper-Cobalt Project** located in Southern Norway, Ertelien hosts a JORC (2012) Mineral Resource Estimate reported by Kuniko of 40Mt @ 0.25% NiEq, including 22Mt of Indicated and 18Mt of Inferred resources (Refer: ASX release dated 12 December 2024)*.
- **Ringerike Battery Metals Project:** a license package hosting multiple Ni-Cu-Co-PGE targets across a 20km mineralised trend, anchored by the Ertelien deposit.
- **Skuterud Cobalt Project:** has had over 1 million tonnes of cobalt ore mined historically and was once the world's largest cobalt producer. Kuniko's drill programs have seen multiple cobalt intercepts, including high grade from shallow depths, at the priority "Middagshvile" target.
- **Vågå Copper Project:** A VMS-style copper project with large-scale geophysical anomalies and near-surface targets, including a prospective horizon with a known strike extent of ~9km. A further shallow conductor can also be traced for several kilometres.

** Note: The individual average grades are 0.18% nickel, 0.12% copper, and 0.014% cobalt. Nickel equivalent (NiEq) was calculated using the formula: NiEq (%) = Ni% + (Cu% × 0.4091) + (Co% × 1.8182), based on metal prices of US$22,000/t Ni, US$9,000/t Cu, and US$40,000/t Co. Preliminary metallurgical test work conducted at SGS Canada indicates potential nickel recoveries of 70–75% and copper recoveries of up to 90%. The company believes, based on this work and comparison with similar deposits, that all metals used in the NiEq calculation have a reasonable potential to be recovered and sold.*

Forward Looking Statements

Certain information in this document refers to the intentions of Kuniko, however these are not intended to be forecasts, forward looking statements, or statements about the future matters for the purposes of the Corporations Act or any other applicable law. Statements regarding plans with respect to Kuniko's projects are forward looking statements and can generally be identified using words such as 'project', 'foresee', 'plan', 'expect', 'aim', 'intend', 'anticipate', 'believe', 'estimate', 'may', 'should', 'will' or similar expressions. There can be no assurance that the Kuniko's plans for its projects will proceed as expected and there can be no assurance of future events which are subject to risk, uncertainties and other actions that may cause Kuniko's actual results, performance, or achievements to differ from those referred to in this document. While the information contained in this document has been prepared in good faith, there can be given no assurance or guarantee that the occurrence of these events referred to in the document will occur as contemplated. Accordingly, to the maximum extent permitted by law, Kuniko and any of its affiliates and their directors, officers, employees, agents and advisors disclaim any liability whether direct

or indirect, express or limited, contractual, tortuous, statutory or otherwise, in respect of, the accuracy, reliability or completeness of the information in this document, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement; and do not make any representation or warranty, express or implied, as to the accuracy, reliability or completeness of the information in this document, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement; and disclaim all responsibility and liability for these forward-looking statements (including, without limitation, liability for negligence).

No new information

Except where explicitly stated, this announcement contains references to prior exploration results, all of which have been cross-referenced to previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements.

This announcement includes historical assay results that are now released by Kuniko under Listing Rule 5.7. The Company confirms that it is not aware of any new information that materially affects the historical results as originally reported.

The information in this report relating to the Mineral Resource estimate for the Ertelien Project is extracted from the Company's ASX announcements dated 12 December 2024. KNI confirms that it is not aware of any new information or data that materially affects the information included in the original announcement and that all material assumptions and technical parameters underpinning the Mineral Resource estimate continue to apply.
