

ASX ANNOUNCEMENT **1 October 2026**

VANADIUM PROCESSING FACILITY PLANNING MILESTONE

Planning pathway progresses for key component of the Australian Vanadium Project

KEY POINTS

- **Western Australian Planning Commission resolves to vary conditions for AVL's previously approved Tenindewa vanadium processing facility.**
- **The revised conditions reflect practical considerations in developing the Australian Vanadium Project.**

Australian Vanadium Limited (ASX: AVL, Company or AVL) advises that the Western Australian Planning Commission (WAPC) has resolved to vary certain conditions applying to the development approval for AVL's proposed vanadium processing facility at Tenindewa, located approximately 65km east of Geraldton in Western Australia's Mid West Region.

The WAPC originally approved the development application for the Tenindewa facility on 31 July 2025, subject to conditions.[1] AVL subsequently sought review of certain conditions of that approval.

The WAPC has resolved to vary the relevant conditions in accordance with the recommendation before it. Formal written notification of the WAPC's decision is expected to follow in due course. The reconsideration did not involve any change to the approved built form, land use or operational characteristics of the Tenindewa facility.

Chief Executive Officer, Graham Arvidson, comments, "*We appreciate the time and input of the WAPC, relevant agencies and local stakeholders throughout this process. AVL remains committed to developing the Project responsibly and to working constructively with the local community as we progress the next stages of development.*"

The Tenindewa processing facility is a central component of the Australian Vanadium Project, together with the proposed mine and concentrator at Gabanintha near Meekatharra. AVL is progressing the Project through its current study, approvals and development activities.

ABOUT AUSTRALIAN VANADIUM LTD

AVL is a resource company focused on vanadium, seeking to offer investors a unique exposure to all aspects of the vanadium value chain – from resource through to steel and energy storage opportunities. AVL is advancing the development of its world-class Australian Vanadium Project at Gabanintha. The Australian Vanadium Project is one of the most advanced vanadium projects being developed globally, with 395.4Mt at 0.77% vanadium pentoxide (V_2O_5), containing a high-grade zone of 173.2Mt at 1.09% V_2O_5, reported in compliance with the JORC Code 2012 (see ASX announcement dated 7 May 2024 *'39% Increase in High Grade Measured and Indicated Mineral Resource'*).

VSUN Energy is AVL's 100% owned renewable energy and energy storage subsidiary which is focused on developing the Australian market for vanadium flow batteries for long duration energy storage. VSUN Energy was set up in 2016 and is widely respected for its expertise. AVL's vertical integration strategy incorporates processing vanadium to high purity, manufacturing vanadium electrolyte and working with VSUN Energy as it develops projects based on renewable energy generation and VFB energy storage.

ASX CHAPTER 5 COMPLIANCE AND CAUTIONARY AND FORWARD-LOOKING STATEMENTS

ASX Listing Rule 5.23

The information in this announcement relating to mineral resource estimates for the Australian Vanadium Project is extracted from the announcement entitled '39% Increase in High Grade Measured and Indicated Mineral Resource' released to the ASX on 7 May 2024. The relevant announcement is available on the Company's website www.avl.au.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements, and that all material assumptions and technical parameters underpinning the estimates in the original market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the competent person's findings are presented have not been materially modified from the original market announcements.

Forward-Looking Statements

This release may contain certain forward-looking statements with respect to matters including but not limited to the financial condition, results of operations and business of AVL and certain of the plans and objectives of AVL with respect to these items.

These forward-looking statements are not historical facts but rather are based on AVL's current expectations, estimates and projections about the industry in which AVL operates and its beliefs and assumptions.

Words such as "anticipates," "considers," "expects," "intends," "plans," "believes," "seeks," "estimates", "guidance" and similar expressions are intended to identify forward looking statements and should be considered an at-risk statement. Such statements are subject to certain risks and uncertainties, particularly those risks or uncertainties inherent in the industry in which AVL operates.

These statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties, and other factors, some of which are beyond the control of AVL, are difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Such risks include, but are not limited to resource risk, metal price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks in the countries and states in which we sell our product to, and government regulation and judicial outcomes. For more detailed discussion of such risks and other factors, see the Company's Annual Reports, as well as the Company's other filings.

AVL cautions shareholders and prospective shareholders not to place undue reliance on these forward-looking statements, which reflect the view of AVL only as of the date of this release.

The forward-looking statements made in this announcement relate only to events as of the date on which the statements are made.

AVL will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this announcement except as required by law or by any appropriate regulatory authority.
