15 October 2026

Southern Palladium presents to Australian Gold Conference

Southern Palladium (ASX:SPD and JSE:SDL), 'Southern Palladium' or 'the Company') is pleased to advise shareholders and investors that Executive Chairman Mr Roger Baxter will present at the Australian Gold Conference in Sydney at 12.00 midday on Thursday 15 October 2026.

This presentation highlights progress the Company is making with the development of the world-class Bengwenyama project in South Africa's Bushveld Complex and in particular, the material update in Project Value via the Company's Updated PFS (ASX/JSE Announcement 13 October 2026: "Southern Palladium: Material Update in Project Value via Updated PFS").

A copy of Mr Baxter's conference presentation is annexed hereto.

Disclaimer

The following disclaimer applies to this investor presentation (Presentation). You should read this disclaimer carefully before reading or making any other use of this Presentation or any information contained in this Presentation. By accepting this Presentation, you represent and warrant that you are entitled to receive this Presentation in accordance with the restrictions, and agree to be bound by the limitations, contained within it.
This presentation has been prepared by Southern Palladium Limited ACN 646 391 89 (Company) for the purposes of its presentation at the Australian Gold Conference, October 2026.
This Presentation contains summary information about the Company and its subsidiaries (Group) and their activities which is current only as at the date of this Presentation. The information in this Presentation is of a general nature and does not purport to be complete or comprise all the information which a prospective investor may require in evaluating a possible investment in the Company or that would be required in a prospectus or other disclosure document prepared in accordance with the requirements of the Corporations Act 2001 (Cth) (Corporations Act). The distribution of this Presentation (including an electronic copy) outside Australia may be restricted by law. If you come into possession of this Presentation, you should observe such restrictions and seek your own advice on such restrictions. Any non-compliance with these restrictions may contravene applicable securities laws.
The information contained in this Presentation is not financial product, investment, legal, taxation or other advice or any recommendation to acquire securities in the Company. No reliance may be placed for any purpose whatsoever on the information contained in this Presentation. This Presentation does not and will not form any part of any contract for the acquisition of securities in the Company. This Presentation has been prepared without taking into account your investment objectives, financial situation or particular needs. Before making an investment decision, you should make your own enquiries and investigations and consider whether it is a suitable investment for you in light of your own investment objectives, financial situation and particular needs, having regard to the merits or risks involved. An investment in securities in the Company is subject to investment and other known and unknown risks, some of which are beyond the control of the Group. The Company does not guarantee any particular rate of return or the performance of its securities, nor does it guarantee any particular tax treatment. You should carefully consider the risks outlined in this Presentation before making an investment decision.
This Presentation contains forward looking statements, including statements regarding the Company's intentions, beliefs or current expectations about the Group's business and operations, and market conditions. Forward looking statements can generally be identified using forward looking words such as, “expect”, “anticipate”, “likely”, “intend”, “should”, “could”, “may”, “predict”, “plan”, “propose”, “will”, “believe”, “forecast”, “estimate”, “target” and other similar expressions. Forward looking statements are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Forward looking statements involve known and unknown risks, uncertainties, assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends which are based on interpretations of current market conditions. Actual results, performance or achievements may vary materially from any forward-looking statements and the assumptions on which statements are based. Except as required by law or regulation, the Group disclaims all obligations to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise. Past performance information given in this Presentation is given for illustrative purposes only and should not be relied upon as an indication of future performance.
Certain market and industry data used in connection with this Presentation may have been obtained from research, surveys or studies conducted by third parties, including industry or general publications. Neither the Group nor its representatives have independently verified any such market or industry data provided by third parties or industry or general publications. No representation or warranty, express or implied, is made as to its fairness, accuracy, correctness, completeness or adequacy.
None of the Group's advisers, directors, officers, employees or agents have authorised, permitted or caused the issue, dispatch or provision of this Presentation nor, except to the extent referred to in this Presentation, made or purported to make any statement in this Presentation. To the maximum extent permitted by law, the Group and its advisers expressly disclaim all liabilities and responsibility in respect of any expenses, losses, damages or costs incurred by any recipient as a result of the use or reliance on anything contained in or omitted from the information in this Presentation, including, without limitation, any liability arising from fault or negligence or otherwise, and make no representation or warranty, express or implied, as to the fairness, currency, accuracy, reliability or completeness of the information contained in this Presentation.
This Presentation does not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States. Securities in the Company have not been, nor will be, registered under the U.S. Securities Act of 1933, as amended (U.S. Securities Act) or the securities laws of any state or other jurisdiction of the United States. Accordingly, the securities in the Company may not be offered or sold, directly or indirectly to, persons in the United States or persons who are acting for the account or benefit of a person in the United States unless they have been registered under the U.S. Securities Act (which the Company has no obligation to do so or procure) or in a transaction exempt from, or not subject to, the registration requirements of the U.S. Securities Act and any other applicable U.S. state securities laws.

Bengwenyama Investment Highlights

Scale, grade, co-product exposure and a staged development pathway in a world-class PGM district

Bengwenyama combines scale, high-grade PGMs, meaningful chrome exposure and a staged pathway to development.

World Class Bushveld Location	Prime PGM mining real estate: Eastern Limb; adjacent to established PGM operations and infrastructure.
Scale & Grade	>40 Moz 3PGE+Au resource base; UG2 and Merensky reef optionality; 33-year mine life.
Co-product Chrome	85.6% chromite recovery; ~1 Mtpa chrome concentrate at steady state; 17.2 Mt over life of mine.
High-quality PGM Concentrate	87.5% LOM 6E recovery; 7.7 Moz 6E recovered; premium 505.9 g/t 6E concentrate at 1.2% mass pull.
Lower-capital Path to Scale	Updated PFS: US$1.96bn post-tax NPV, 39.1% IRR; US$329m peak funding, with Stage 2 funded largely from Stage 1 cash flow.

South Africa: Reform as Gaining Momentum

A globally significant mining economy with improving infrastructure, policy execution and investor confidence

Challenges remain, but South Africa's investment environment is moving in the right direction.

Mining remains a **major economic pillar**

469,765 direct mining jobs | ~5.8% of GDP | ~R1.1tn industry turnover

Key constraints **are improving**

Electricity reliability has improved, logistics reform is underway and private participation is increasing. The Minerals Council itself highlights the continued absence of electricity curtailment and improving rail performance.

Reform is moving from **stabilisation to growth**

Business and government are working more closely on structural reform, with mining remaining a strategic priority.

Updated PFS: Project Value More Than Doubles

DFS-level metallurgy and a stronger price outlook lift post-tax NPV to US$1.96bn – almost six times peak funding

US$1.96bn

Post-tax NPV (8% real)

▲ 129% vs OPFS US$857m

39.1%

Post-tax IRR

▲ from 26.4% in OPFS

2.8 yrs

Payback period

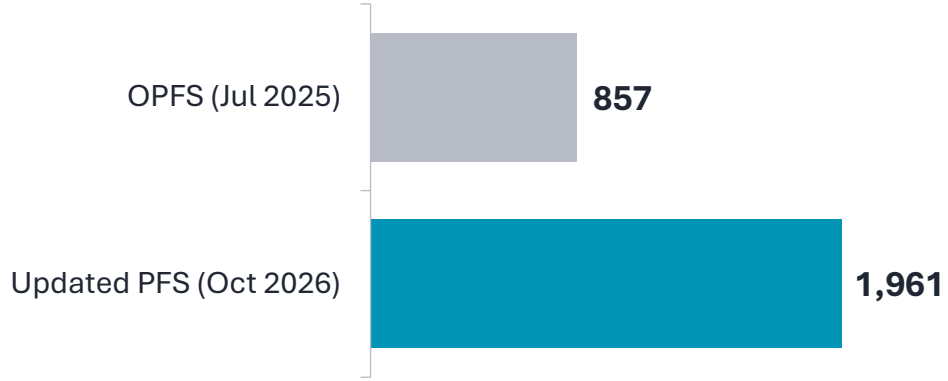

From first production (OPFS 3.8 yrs)

US$329m

Peak funding requirement

OPFS US$279m (+18%)

Post-tax NPV, US$m

Why it matters

~6x value to funding: US$1.96bn NPV against US$329m peak funding, up from ~3x in the OPFS.

Faster return of capital: 39.1% IRR and a 2.8-year payback from first production (OPFS: 3.8 years).

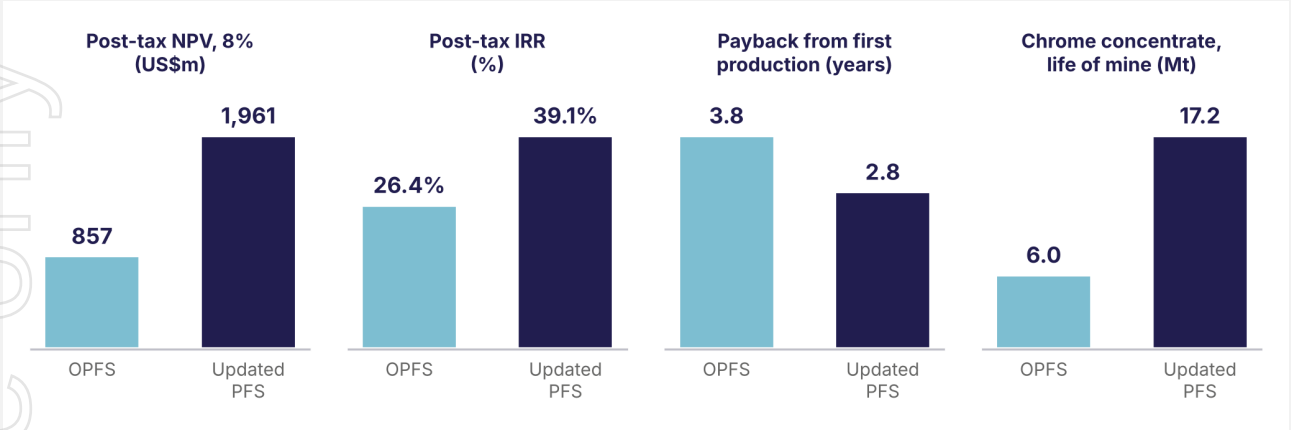

Same orebody, more value: life-of-mine plan (41.9 Mt at 6.54 g/t 6E) and Ore Reserve unchanged – the uplift comes from recoveries, a second product stream and prices.

Refer ASX Announcement 13 October 2026 – "Southern Palladium: Material Update in Project Value via Updated PFS". NPV on a 100% project basis, real terms, 8% discount rate. The production target includes ~30% Inferred Mineral Resources – refer Compliance Statement.

ersonal use only

Key Financial Outcomes

The Updated PFS delivers a step-change in value against the OPFS

Key outcomes, OPFS compared with Updated PFS.

Updated PFS life of mine			
Life of mine	33 years	Ore mined	41.9 Mt
6E grade delivered to plant	6.54 g/t	Steady-state 6E production	~200 koz pa rising to ~420 koz pa
Payback from first plant production	2.8 years		

Updated PFS life-of-mine physical and cost outcomes.

Metric	OPFS (July 2025)	Updated PFS	Change
Post-tax NPV, 8% real discount rate (US$m)	857	1,961	+129%
Post-tax IRR	26.4%	39.1%	+12.7 pp
Peak funding requirement (US$m)	279	329	+18%
Payback from first production (years)	3.8	2.8	–1 year
AISC incl. (US$/6E oz)	729	943	+29% note 1
Realised 6E basket price (US$/6E oz) note 2	1,406	2,210	+57%
Life-of-mine 6E recovery	85%	87.5%	+2.5 pp
6E ounces recovered (Moz)	7.50	7.72	+3%
Chrome concentrate, 42% Cr_2O_3, life of mine (Mt)	6.0	17.2	~2.8x

Updated PFS compared with the OPFS (Stage 1 and 2 case, ASX announcement 10 July 2025). NPV on a 100% project basis, in real terms.

personal use only

Higher Margins, Lower Net Costs and Strong Price Leverage

Chrome and base metal credits cut costs, while every 15% move in the basket price swings NPV by ~US$450m

57%

AISC incl. margin

OPFS 48%

US$496/oz

AISC incl. after by-product credits

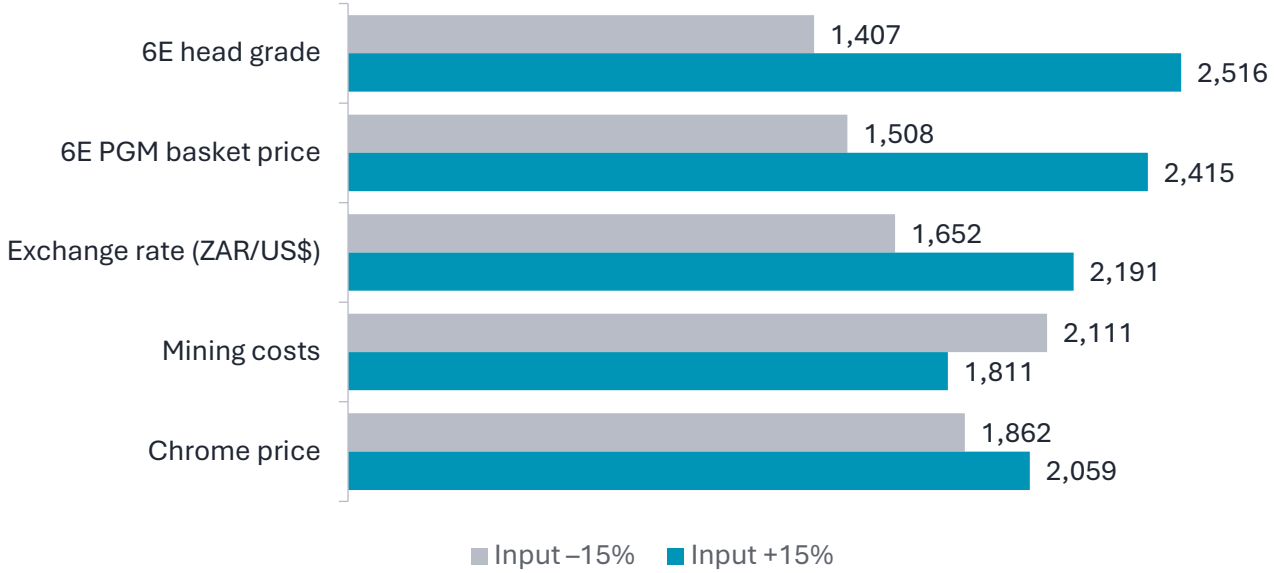

US$943/6E oz before credits

US$2,210/oz

Realised 6E basket (incl. by-products)

OPFS US$1,406/6E oz (+57%)

Post-tax NPV sensitivity to ±15% input change, US$m (base case 1,961)

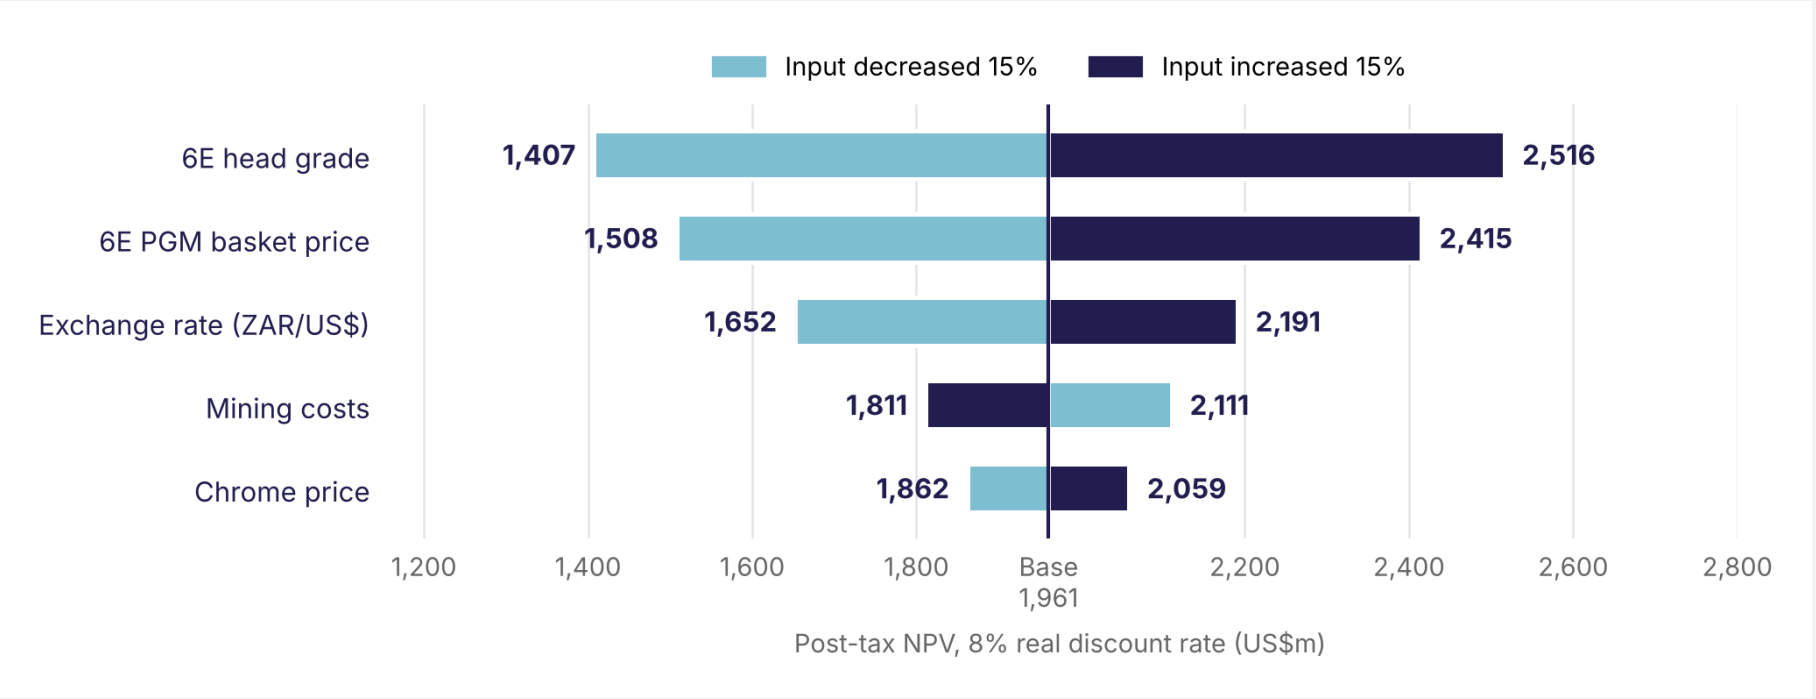

Leverage to PGM prices: a 15% increase in the 6E basket price adds ~US$454m to post-tax NPV (to US$2,415m), while a 15% decrease reduces it by ~US$453m (to US$1,508m).

Refer ASX Announcement 13 October 2026 – "Southern Palladium: Material Update in Project Value via Updated PFS". NPV on a 100% project basis, real terms, 8% discount rate. The production target includes ~30% Inferred Mineral Resources – refer Compliance Statement. A higher ZAR/US$ rate represents a weaker rand.

ersonal use only

Post Tax NPV sensitivity analysis:

- Commodity prices and exchange rates have been updated to September 2026 terms, based on a combination of Consensus Economics, Noah Capital, Minxcon and spot prices.
- The Project is highly leveraged to the exchange rate, grade and PGM prices, and least sensitive to base metal prices, capital costs and processing costs
- Sensitivity of post-tax NPV (US$m, 8% real discount rate) to ±15% changes in key inputs, holding all other inputs constant. A 15% increase in the basket price raises post tax NPV by US$454m.

The production target includes ~30% Inferred Mineral Resources – refer Compliance Statement. Life-of-mine plan (41.9 Mt at 6.54 g/t 6E) unchanged from the OPFS.

personal use only

Conventional Processing with Two Saleable Product Streams

Simple | Proven | Optimised for dual-product recovery

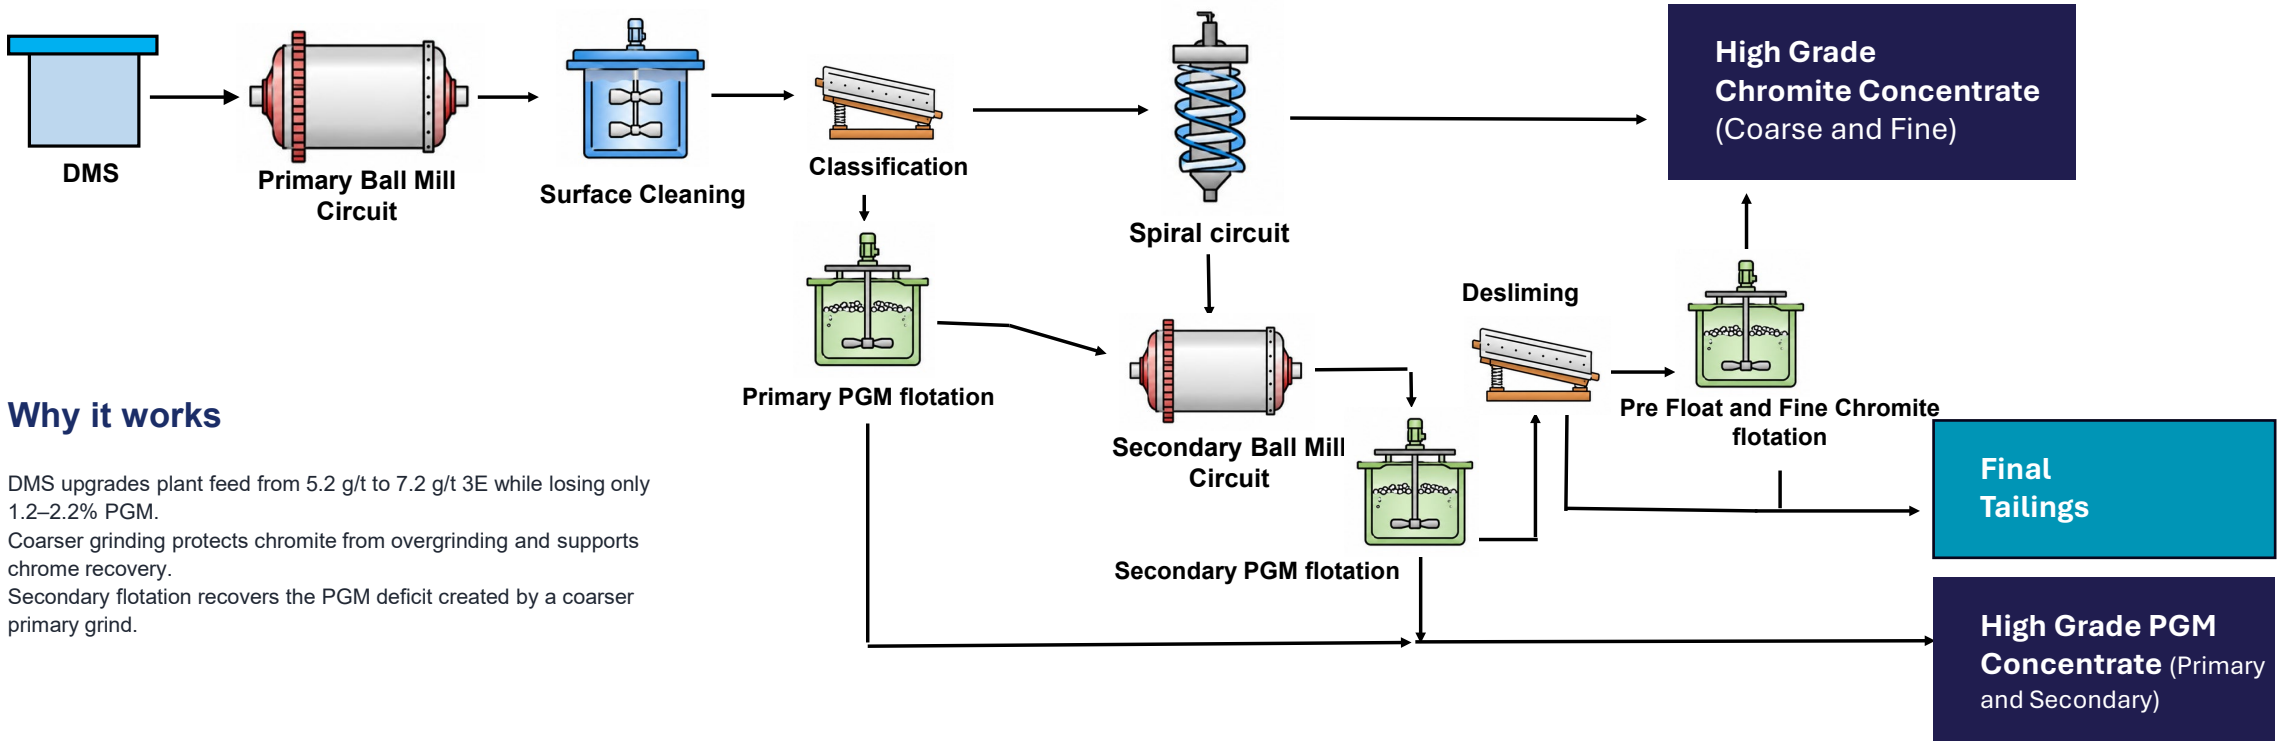

DMS pre-concentration
rejects waste before milling

Coarser primary grind
30% passing 75 µm

Interstage chrome
recovers liberated chromite

Staged flotation
primary + secondary MF2

Two saleable streams
PGM concentrate + chrome

Why it works

DMS upgrades plant feed from 5.2 g/t to 7.2 g/t 3E while losing only 1.2–2.2% PGM.
Coarser grinding protects chromite from overgrinding and supports chrome recovery.
Secondary flotation recovers the PGM deficit created by a coarser primary grind.

ersonal use only

DMS Pre-concentration Improves Feed Grade and Reduces Processing Load

Rejecting low-value material before milling supports lower capital intensity and operating costs

Run-of-mine feed	DMS	Upgraded Plant Feed	Concentrator
5.2 g/t	**24–31%**	**7.2 g/t**	**< half**
RoM 3E PGM feed grade	**mass rejected**	**upgraded 3E plant feed**	**feed reports to primary flotation**

Why it Matters?

Less material through milling and flotation → smaller equipment, lower energy use and reduced operating intensity

Only 1.2–2.2% PGM loss → strong trade-off between waste rejection and metal recovery

ersonal use only

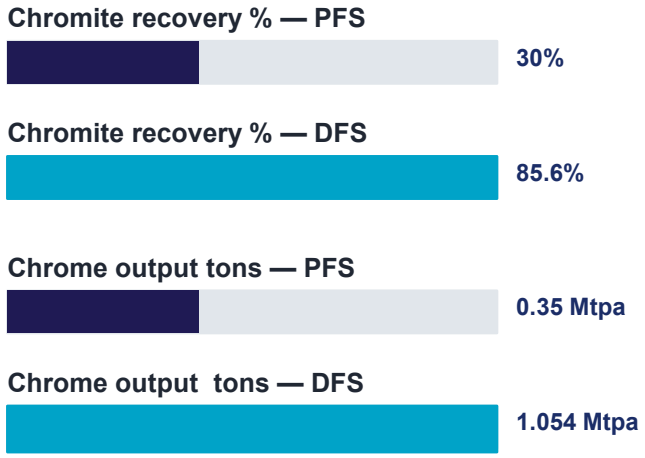

DFS vs PFS Metallurgy

DFS Metallurgy Materially Strengthens
The PGM-Chrome Value Proposition

Chrome recovery increases from **30% to 85.6%,** with potential concentrate output increasing ~3x

Metric	PFS / OPFS	DFS testwork	Change
Chromite recovery	30%	**85.6%**	**+55.6 pp**
Chromite conc. grade	42% Cr_2O_3	**42.2% Cr_2O_3**	**flat**
Chrome conc. @ 2.4 Mtpa RoM	0.35 Mtpa	**~1.054 Mtpa**	**~3×**
Overall PGM recovery	85.3%	**87.6%**	**+2.3 pp**
PGM conc. grade	100 g/t 4E	**443.6 g/t 4E**	**~4.4×**
Primary grind	60% <75 µm	**30% <75 µm**	**coarser**

Two numbers drive the reframe

High-level implication: chrome moves from credit to co-product scale.

Chrome is shifting from a secondary credit to a potentially meaningful **co-product revenue stream.**

From PGM project with chrome credit → **PGM–chrome co-product operation** → **DFS as the re-rating event**

ersonal use only

South Africa Dominates Global Chromite Supply

Source: USGS

Strategic relevance: Chromite is designated a critical mineral by major economies including the US, Japan, South Korea and Australia.

So What? Bengwenyama is located within the world's dominant chromite-producing jurisdiction, with the potential to participate in a strategically important global supply chain.

The information relating to Southern Palladium's resources above is extracted from the ASX Announcement entitled "Bengwenyama UG2 Mineral Resource Update: Measured Resource of 2.3 Moz at 10g/t (7E), Total Combined Resource now 35 Moz" created on 27 August 2024 and is available to view on www.southernpalladium.com . The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Compliance Statement

JORC Compliance Statement

The information in this presentation relating to:

- Resources is extracted from the report titled “Bengwenyama Mineral Resource Update: Total (UG2 & MR) Mineral Resource now 40.25Moz, Merensky Reef Indicated Resource +17% to 2.23Moz (7E) created on 23 October 2024;
- Reserves is extracted from the report titled “Prefeasibility Study Results: Project NPV8 of USD1.059bn Maiden JORC Ore Reserve of 6.29 million oz @ 6.17g/t PGM (6E) created on 28 October 2024 and;

These announcements are available to view on the Company’s website at https://www.southernpalladium.com/site/investor-centre/asx-announcements. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcement.

Updated Prefeasibility Study and Production Target

The production target and forecast financial information in this presentation are extracted from the ASX Announcement “Southern Palladium: Material Update in Project Value via Updated PFS” dated 13 October 2026, available on the Company’s website at https://www.southernpalladium.com/site/investor-centre/asx-announcements

The Company confirms that all material assumptions underpinning the production target, and the forecast financial information derived from the production target, in that announcement continue to apply and have not materially changed. The production target includes approximately 30% Inferred Mineral Resources. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised. References to the Optimised Prefeasibility Study (ASX Announcement 10 July 2025) are for comparison only; it has been superseded by the Updated PFS. Metallurgical test work results are extracted from the ASX Announcement “DFS metallurgical studies deliver outstanding PGM and Chromite recoveries” dated 9 July 2026.
