

ASX ANNOUNCEMENT

15 October 2026

NON-EXECUTIVE DIRECTOR RESIGNATION

Bannerman Energy Ltd (**ASX:BMN**, **OTCQX:BNNLF**, **NSX:BMN**) (**Bannerman** or the **Company**) advises that non-executive director, Mr Danny Goeman, has regrettably tendered his resignation from the Bannerman Board and Product Offtake Committee due to additional time demands associated with a health issue within his family.

Bannerman Executive Chairman, Brandon Munro, commented:

"We accept Danny's resignation from the Board with deep understanding. He has been a truly outstanding contributor to Bannerman, both in the role of Chair of our Product Offtake Committee since May 2025 and as a non-executive director since March 2026. While he will be sorely missed, we look forward to Danny remaining a long-term friend of the business and the team."

As a result of Mr Goeman's resignation, Bannerman is also withdrawing Resolutions 2 and 7 from consideration at its upcoming Annual General Meeting on Thursday, 5 November 2026 (refer Bannerman ASX release dated 6 October 2026, *Notice of Annual General Meeting*).

This ASX release was approved and authorised by Brandon Munro, Executive Chairman.

ABOUT BANNERMAN ENERGY (ASX:BMN, NSX:BMN, OTCQX:BNNLF)

Bannerman Energy Ltd is a uranium development business listed on the Australian and Namibian stock exchanges and traded on the OTCQX Market in the US. Its flagship asset is the advanced Etango Uranium Project located in the Erongo Region of Namibia.

Etango has benefited from extensive exploration and feasibility activity over the past 15 years. The Etango tenement possesses a globally large-scale uranium mineral resource¹. In December 2022, a Definitive Feasibility Study (DFS)² was completed on the Etango-8 Project, confirming to a definitive-level the strong technical and economic viability of conventional open pit mining and heap leach processing of the Etango deposit at 8Mtpa throughput (for average annual output of 3.5 Mlbs U₃O₈). In March 2024, a scoping study³ demonstrated the capacity to expand annual production to 6.7 Mlbs U₃O₈.

Etango's advanced credentials are further highlighted by the construction and multi-year operation of the Etango Heap Leach Demonstration Plant, which comprehensively de-risked the conventional acid heap leach process to be utilised on the Etango ore. All environmental approvals have been received for the proposed Etango mine and external mine infrastructure, based on a 12-year environmental baseline. Bannerman was awarded the Mining Licence for Etango in December 2023. All key project workstreams are advancing towards a targeted positive Final Investment Decision (FID), in conjunction with joint venture partner, CNNC Overseas Limited, during Q4 2026.

Namibia is a premier uranium investment jurisdiction, with a 45-year history of uranium production and export, excellent infrastructure and support for uranium mining from both government and community. As the world's third largest producer of uranium, Namibia is an ideal development jurisdiction boasting political stability, security, a strong rule of law and an assertive development agenda. The Bannerman team has ample direct experience in the development, construction and operation of uranium projects in Namibia, as well as extensive links into the downstream nuclear power industry.

Bannerman has long established itself as an Environmental, Social and Governance (ESG) leader in the uranium and nuclear energy sector. It is also a leader within Namibia on social development and community engagement and exercises best-practice governance in all aspects of its business. This was recognised with receipt of the 2023 African Mining Indaba's ESG Award for Community Engagement.

1 and 2. Refer to Bannerman's ASX release dated 6 December 2022, *Etango-8 Definitive Feasibility Study*. Bannerman confirms that it is not aware of any new information or data that materially affects the information included in that release. All material assumptions and technical parameters underpinning the estimates in that ASX release continue to apply and have not materially changed.

3. Refer to Bannerman's ASX release dated 18 March 2024, *Etango-XP and Etango-XT Scoping Study*.
