About Atomic Eagle

Atomic Eagle Limited (ASX: AEU) is an ASX-listed uranium development company focused on advancing a portfolio of uranium assets in Africa.

The Company's flagship asset is the 100%-owned Muntanga Uranium Project in Zambia, which contains a JORC Mineral Resource of 58.8Mlbs at 309ppm U_3O_8 and is the subject of ongoing resource growth and optimisation programs aimed at supporting a larger-scale development opportunity.

Atomic Eagle also holds a 60% interest in the Madaouela Uranium Project in Niger, a large uranium development project supported by extensive historical drilling, feasibility-level studies and an established Mining Convention with the Republic of Niger. Madaouela hosts a Mineral Resource of 116.5Mlbs at 1,282ppm U_3O_8 reported as a foreign estimate in accordance with ASX Listing Rules.

Cautionary Statement: The Mineral Resource Estimate at Madaouela is a foreign estimate prepared in accordance with Canadian National Instrument 43-101 ("NI 43-101") and is not reported in accordance with the 2012 Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves ("JORC Code"). A competent person has not done sufficient work to classify the foreign estimate as a Mineral Resource in accordance with the JORC Code, and it is uncertain that following evaluation and/or further exploration work that the foreign estimate will be able to be reported as a Mineral Resource in accordance with the JORC Code.

With advanced uranium projects in two of Africa's most prospective uranium jurisdictions, Atomic Eagle is focused on expanding and optimising its resource base, advancing development studies and pursuing opportunities to maximise shareholder value as global demand for nuclear fuel continues to grow.
