Market Release

19 October 2026

First quarter update

- Challenger Assets Under Management (AUM) $31.9 billion, up 5% for the quarter
- Total sales $4.4 billion, up 52%[1]
    - Fixed term sales $2.2 billion, up 103%
    - Offshore reinsurance sales $320 million, up 30%
    - Lifetime sales $314 million[2], down 2%
- Net annuity flows $1.1 billion or 6.3% annuity book growth for the quarter[3]

Challenger Limited (ASX:CGF) today reported its first quarter AUM, annuity sales and net flows.

Managing Director and Chief Executive Officer, Nick Hamilton said:

"We have started the year strongly, with continued momentum across our retirement business driven by growing customer demand, new distribution channels, and execution of our growth strategy.

"Sales momentum was strong across both domestic and offshore annuities, supported by demand for guaranteed income solutions in Australia and Japan.

"Innovation remains a key driver of our future growth. In July, we launched the $6 billion Challenger Annuity-Backed Notes (CABN) program, creating a new channel to support annuity book growth and diversify our funding sources. Strong investor demand for the inaugural issuance of a $750 million AUD-denominated wholesale three-year note highlights the attractiveness of the solution and provides the opportunity to expand future issuances across a range of tenors. The RBA's recent approval of repurchase agreement eligibility further enhances the attractiveness of the CABN.

"Our strategy has seen us expand the channels across which we distribute, enlarging our addressable market and supporting faster growth. Our capital position, unique capabilities and growing demand for yield is shifting our growth trajectory.

"We are progressing the proposed merger of Fidante and Channel Capital and expect the transaction to complete later this half. This will create a scaled investment management platform and a more focused Challenger centred on retirement income.

"With APRA's new capital standards for insurers of longevity products coming into effect 1 July 2026, Challenger is now a more resilient and capital-efficient business, capturing the significant opportunity for guaranteed income."

challenger

AUM and sales

Challenger's AUM increased 5% for the quarter to $31.9 billion reflecting book growth, partially offset by capital returned to shareholders. Challenger investment assets comprised Insurance investment assets of $27.7 billion and third-party AUM of $4.2 billion.

Total sales increased 52% to $4.4 billion driven by record annuity sales and strong Index Plus sales.

Net annuity flows were $1.1 billion, with annuity book growth of 6.3%[3] for the quarter. Total net flows, including Index Plus and LiFTS, were $1.8 billion representing total book growth of 7.7%[3] for the quarter.

Annuity sales increased by 72% to $2.8 billion driven by strong fixed term sales and offshore reinsurance annuity sales. Maturities for the quarter were 8%[4] of opening period annuity liability reflecting prior period sales. As previously announced, the FY27 maturity rate is expected to be ~26%.

Fixed term sales were up 103% to $2.2 billion driven by the inaugural issuance of a $750 million AUD-denominated 3-year CABN in July and very strong demand for fixed term annuities greater than 2-years in tenor supported by the higher rate environment and demand for yield.

Lifetime sales were $314 million[2], supported by continued demand for lifetime income solutions.

Offshore reinsurance sales continued their strong momentum increasing 30% to $320 million driven by strong demand for Yen-denominated annuities in Japan.

The tenor of new business annuity sales[5] was 5 years, which continues to have a positive effect on overall book composition.

Challenger Index Plus and LiFTS sales increased by 27% to $1.6 billion, benefiting from new Index Plus client sales and a $115 million wholesale note issuance that builds on the existing LiFTS programme. Challenger has been successful in extending the tenor of Index Plus business being written in the quarter, with the tenor of new business sales increasing to 4 years compared to 2 years in the first quarter of 2026.

Fidante

In June 2026, Challenger announced the merger of its multi-affiliate funds management business, Fidante, with Channel Capital. The transaction remains on track for completion later this half, subject to regulatory approvals and separation activities. At completion of the transaction, Challenger will own 45% of the merged entity's equity. The merger ensures Challenger remains the strategic holder of a more diversified active funds management platform with a global footprint, and market leading capabilities across public and private strategies.

Fidante's FUM was $85 billion, a decrease of $4.5 billion or 5% for the quarter and included net outflows of $3.3 billion, client distributions of $0.7 billion and negative market movements of $0.5 billion. Net outflows primarily related to equity strategies ($4.6 billion), partially offset by inflows in alternative strategies ($1.3 billion).

Supplementary disclosures
