No forecast is made of what prices Shares may trade at in the future.

Subscription for New Shares is a speculative investment and the market price of Shares may change from time to time. Accordingly, the value of New Shares applied for may rise or fall.

There is a risk that the market price of the Shares may change between the date of the Offer and the date when the New Shares are issued to Eligible Shareholders pursuant to the Offer. - (g) the date the Company received the payment of Application Monies; and
- (h) any other such criteria as determined by the Directors in their absolute discretion.

If there is a scale back, you may not receive all the New Shares for which you have applied. If a scale back produces a fractional number when applied to the number of New Shares for which you have applied, the number of New Shares issued to you will be rounded to the nearest whole number of New Shares.

If there is a scale back, the difference between the Application Monies received from you, and the number of New Shares issued to you multiplied by the Issue Price, will be refunded to you (in A\$, without interest and at your sole risk).

The Directors reserve their right (in their absolute discretion) to refuse an application (in whole or in part) if they consider that:

- (a) it is reasonable and prudent to do so;
- (b) the applicant is not an Eligible Shareholder;
- (c) the issue of those New Shares may contravene any applicable law, rule or regulation in any jurisdiction (including without limitation the Corporations Act or the ASX Listing Rules) or the requirements of any regulatory or governmental body or may require further action to be taken

by the Company including, without limitation, registration of Shares or the preparation of a prospectus in any jurisdiction; or

- (d) the applicant has not otherwise complied with these Terms and Conditions.

If your application is refused in whole or in part, the relevant Application Monies will be returned to you (in A\$, without interest and at your sole risk).

No refund will be made by the Company for an amount of less than A\$2.00.

The decisions of the Directors in respect to any scale back or refusal of an application are final.

11 Shortfall

The Offer is not underwritten.

Subject to the ASX Listing Rules (including ASX Listing Rule 7.1), to the extent there is a shortfall in the subscription of New Shares under the Offer, the Directors reserve the right to issue the New Shares that comprise the shortfall to institutional, sophisticated and professional investors at their absolute discretion.

12 Risk Factors

Before deciding whether to accept the Offer, you should (without limitation) refer to the current market price of the Shares, which can be obtained from your stockbroker, your financial adviser or the ASX.

Investment in the securities of the Company (including the New Shares) is considered a speculative form of investments. The future price of Shares may rise or fall. Shareholders should be aware that there is a risk that the market price of the Shares may change between the date of this Offer (or the date the Offer is accepted) and the date on which the New Shares are issued. Accordingly, the value of New Shares applied for is likely to fluctuate.

Shareholders should note that the Offer is not made under a prospectus or other disclosure document and does not require the type of disclosure required under the Corporations Act for a disclosure document. Shareholders must rely on their own knowledge of the Company and disclosures made by the Company on the ASX. The contents of this document have not been reviewed by ASIC, ASX or any other any regulatory authority in any jurisdiction.

There are a number of general and specific risks which may affect the future operating and financial performance and financial position of the Company along with the trading price of the Shares. These risks are detailed in paragraphs 13 and 14 below.

These risks are associated with an investment in Shares but are not an exhaustive list. As a Shareholder, you will continue to be exposed to such risks. There may also be additional risks and uncertainties not currently known which may have an adverse effect on the Company's business and the value of the Shares. Certain risks relate to matters that are outside the control of the Company, and there can be no assurance that any steps that the Company takes will successfully protect it from any particular risk.

The risks detailed in paragraphs 13 and 14 below do not take into account the investment objectives, financial situation, tax position or other circumstances of any particular Shareholder. Shareholders should have regard to their own investment objectives and financial circumstances and seek professional advice from their legal, financial or other independent adviser before determining whether or not to accept the Offer and participate in the SPP.

13 Risks specific to the Company

(a) Arrangements with Delta

On 6 February 2025, as amended and restated on 14 May 2025, Mt Ida AU Pty Ltd (ACN 664 555 873) (being, a wholly owned subsidiary of the Company) (**Mt Ida AU**) entered into the mineral rights deed (**Mineral Rights Deed**) with Mt Ida Lithium Pty Ltd (ACN 106 608 986) (**Mt Ida Lithium**), Delta Lithium Limited (ACN 107 244 039) (**Delta**) and the Company pursuant to which Mt Ida Lithium granted Mt Ida AU the rights, entitlement and interests conferred by certain tenements which form part of Delta's Mt Ida Lithium Project, insofar as they relate to gold

(including, the rights to explore and mine for gold on the area of land covered by those tenements from time to time) (**Gold Asset**).

The arrangements with Delta under the Mineral Rights Deed are complex and contain extensive notification rights (as summarised in section 7.1(b) of the Company's IPO Prospectus dated 30 May 2025). If Mt Ida AU breaches any of its obligations under the Mineral Rights Deed or becomes subject to an insolvency event, or if there is any breakdown of relationship between the Company and Delta, this could result in the termination of the arrangements with Mt Ida Lithium, loss of access to the Mt Ida Gold Project, disputes and/or litigation, all of which could have a material adverse effect on the Company's financial position, operations, activities or prospects. The ability of the Company to achieve its stated objectives will depend on the continued performance by the counterparties to the Mineral Rights Deed of their contractual obligations.

(b) **Tenure and title to properties**

The Gold Asset is subject to the Western Australian mining regime. The Company's exploration program is dependent upon the maintenance (including renewal) of the tenements, including exploration licences and mining leases. Maintenance of the tenements is primarily dependent on the tenement holder's ability to meet the licence conditions imposed by the relevant authorities, which, in turn, is dependent on the tenement holder being sufficiently funded to meet those expenditure requirements. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements.

The Company's interest in the Gold Asset is held pursuant to the Mineral Rights Deed pursuant to which the Company has contractual rights to explore for and mine for gold on the tenements underpinning the Gold Asset (**Tenements**). Given that the Company is not the registered holder of the Tenements, the Company will rely on Mt Ida Lithium and Delta to comply with their various obligations under the Mineral Rights Deed to keep the Tenements in good standing and free from forfeiture. If any of these contractual obligations are not complied with when due, in addition to any other remedies that may be available to the Company (including, Mt Ida AU's rights to step in to remedy tenement breaches), this could result in the reduction or forfeiture of the Company's interest in the Gold Asset if any Tenements are forfeited or extinguished due to any non-compliance with the tenement conditions.

If Mt Ida AU successfully delineates mineral deposits on any of the exploration licences or prospective licences over the Gold Asset, it will need to apply for a mining lease to be able to develop any mining project. Mt Ida AU may apply to become the registered holder of one or more mining leases over Tenements that are exploration licences or prospecting licences provided Mt Ida AU complies with the procedures detailed in the Mineral Rights Deed.

If the Company (either directly or through Mt Ida AU) applies for additional mining tenements in its own capacity, there is no assurance that such mining tenements will be granted at all or in their entirety, or with favorable conditions that the Company or Mt Ida AU (as applicable) will be able to satisfy. Conditions may include increased expenditure and work commitments or compulsory relinquishment of important areas of the mining tenement.

If Mt Ida Lithium as the registered holder of the Tenements, or the Company or Mt Ida AU (as applicable) in respect of any additional tenements applied for by the Company or Mt Ida AU (as applicable), fails to comply with the conditions of any relevant mining tenement, this may adversely affect the operations, financial position, performance and/or prospects of the Company. Mining tenements are also subject to periodic renewal. In some cases, they may only be renewed or extended a limited number of times for a limited period of time. There is no guarantee that tenements will be renewed (nor that tenement applications will be granted).

The Company also cannot give any assurance that title to the Tenements, or any future mining tenements that it or Mt Ida AU applies for, will not be challenged, cancelled or impugned for various reasons, including that they may be subject to prior unregistered agreements or transfers or title may be affected by undetected defects.

There is also a risk of an inability to access the land required for the Company's mining activities and operations. This may, for example, be as a result of weather, environmental restraints, native title, landholder activities, regulatory or third-party objections or other factors. Such difficulties may cause delays and cost overruns.

(c) **Future capital requirements**

The Company has no operating revenue and is unlikely to generate any operating revenue unless and until the Gold Asset (or any future project acquired by the Company) is successfully developed and production commences.

The Company's growth through its proposed and future exploration will require additional expenditure. The Company's cash reserves together with the funds raised from the Placement and SPP may not be sufficient to successfully achieve the long-term objectives of the Company's overall business strategy. After exhaustion of the funds raised from the Placement and SPP, the Company may not be able to use debt or equity to fund further exploration.

Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favorable to the Company. In addition, the Company's ability to raise new equity capital at an appropriate price will be significantly impacted by the Company's operating performance, market conditions and the capital raising environment at the time.

If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration and development programs (as the case may be).

(d) **Land access risk**

Mining tenements are a limited form of tenure which can co-exist with, and overlap, other land interests and rights, including private land, pastoral leases, Crown land interests, public reserves, State forests and conservation areas. The Company's ability to access areas of the Tenements is governed by the Mineral Rights Deed. The Company's access to the Tenements (or any future mining tenement) may overlap other land interests or rights and may require some form of consent or agreement, which may or may not be given or may be given on conditions. This can cause delays and/or increased costs for the Company. The Company will need to manage this access on an ongoing basis.

Compensation may be payable to third parties in some instances, particularly in relation to carrying out activities on private land and pastoral leases.

Any inability to obtain, or delays or costs in respect of obtaining necessary landowner or government costs or agreements, or delays or costs in resolving conflicting third-party rights and compensation obligations, may adversely impact the Company's ability to carry out exploration or mining activities within the affected areas.

(e) **Commodity price volatility**

As future revenues will primarily be derived from the sale of gold delineated from the Gold Asset, any future earnings will be closely related to the sale of gold. Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. The various factors affecting the prevailing gold price include, but are not limited to, the strength of the US dollar (which is the currency in which gold trades internationally), speculative positions taken by investors or traders in gold, changes in global demand for gold, global and regional recessions or reduced economic activity and/or inflationary expectations, financial market expectations regarding the rate of inflation, gold hedging and de-hedging by gold producers, decisions made by central banks and multilateral organisations to purchase, hold or sell portions of their gold reserves, changes in production costs in major gold producing regions and domestic or international political or geopolitical events, unrest or hostilities. Historically, the gold price has fluctuated widely.

Some of the possible adverse consequences of a future decline in the gold price include, but are not limited to, the Company's operations becoming uneconomic as projected future revenues no longer justify the costs of operation or development, the value of the Company's assets declining, and the restatement of the Company's Mineral Resources for gold. All of these circumstances could have an adverse impact on the Company's operations, business and financial performance.

A declining gold price can also impact operations by requiring a reassessment of the feasibility of mine plans and certain projects and initiatives. The commencement of development projects and the ongoing commitment to exploration projects can be potentially impacted by a decline in the prevailing gold price. Even if a project is ultimately determined to be economically viable, the need to conduct such a reassessment could potentially cause substantial delays and/or may interrupt operations, which may have a material adverse effect on the Company's operations and financial condition.

(f) **Operational**

The operations of the Company may be affected by factors that are beyond the control of the Company, including (without limitation) failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration or mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages, delays in procuring, or increases in the costs of consumables, spare parts, plant and equipment, fire, explosions and other incidents beyond the control of the Company.

These risks and hazards could also result in damage to, or destruction of, production facilities, personal injury, environmental damage, business interruption, monetary losses and possible legal liability. While the Company currently intends to maintain insurance within ranges of coverage consistent with industry practice, no assurance can be given that the Company will be able to obtain such insurance coverage at reasonable rates (or at all), or that any coverage it obtains will be adequate and available to cover any such claims.

(g) **Environmental regulation risk**

The Gold Asset is subject to Western Australian and Federal laws and regulations on environmental matters, including rehabilitation. Governments and other authorities that administer and enforce environmental laws and regulations determine these requirements. As with all exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly, if the Company's activities result in mine development. The Company intends to conduct its activities in an environmentally responsible manner and in accordance with applicable laws.

The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits. There are also risks that the Company may breach environmental laws and regulations, with consequential adverse effects on the financial position and performance of the Company.

Further, the Company may require additional approvals from the relevant authorities before it can undertake activities that are likely to impact the environment. Failure to obtain such approvals will prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company to incur significant expenses and undertake significant investments which could have a material adverse effect on the Company's business, financial condition and results of operations.

(h) **Environmental liabilities risk**

The Company's activities are subject to potential risks and liabilities associated with (without limitation) the potential pollution of the environment and the necessary disposal of mining waste products resulting from mineral exploration and production. Insurance against environmental risk (including potential liability for pollution or other hazards as a result of the disposal of waste products occurring from exploration and production) is not generally available to the Company (or to other companies in the minerals industry) at a reasonable price. To the extent that the Company becomes subject to environmental liabilities, the satisfaction of any such liabilities

would reduce funds otherwise available to the Company and could have a material adverse effect on the Company. Laws and regulations intended to ensure the protection of the environment are constantly changing and are generally becoming more restrictive.

(i) **Climate change risk**

There are a number of climate-related factors that may affect the operations and financial position of the Company. Climate change or prolonged periods of adverse weather and climatic conditions (including rising sea levels, floods, hail, drought, water, scarcity, temperature extremes and earthquakes) may have an adverse effect on the Company's operations and/or the Company's future financial performance.

Changes in policy, technological innovation and/or consumer/investor preferences may also adversely impact the operations and financial position of the Company or may result in less favorable pricing for its product, particularly in the event of a transition to a lower carbon economy.

(j) **Reliance on key personnel**

The Company is reliant on a number of key personnel. The loss of one or more of its key personnel could have an adverse impact on the business of the Company.

Furthermore, it may be particularly difficult for the Company to attract and retain suitably qualified and experienced people, given the current high demand in the industry and relatively small size of the Company, compared with other industry participants.

(k) **New assets and acquisitions**

The Company may make acquisitions in the future as part of future growth plans (although no such new projects have been identified as at the date of this document). There can be no guarantee any new project acquisition or investment will eventuate from these pursuits, or that any acquisitions will result in a return for Shareholders.

Such acquisitions may result in the use of the Company's cash resources, the issuance of equity securities (which will dilute Shareholders) or debt funding (which may restrict the Company's financing or operating activities).

(l) **Regulatory risk**

The Company's operations are subject to various federal, state and local laws, including those relating to mining, prospecting, development permit and licence requirements, industrial relations, environment, land use, royalties, water, native title, cultural heritage, mine safety, mine rehabilitation following closures and occupational health. Approvals, licences and permits required to comply with such rules are subject to the discretion of the applicable government officials. No assurance can be given that the Company will be successful in obtaining any or all of the various approvals, licences and permits or maintaining such authorisations in full force and effect without modification or revocation.

To the extent such approvals are required and not retained or obtained in a timely manner or at all, the Company may be curtailed or prohibited from continuing or proceeding with exploration and production.

(m) **Nature of mineral exploration and mining**

The business of mineral exploration, development and production is subject to risk by its nature. Mineral exploration requires large amounts of expenditure over extended periods of time with no guarantee of revenue and exploration and development activities may be impeded by circumstances and factors beyond the Company's control.

The Gold Asset is at a relatively early stage of exploration and potential investors should understand that mineral exploration, development and mining are high-risk enterprises, only occasionally providing high rewards.

The success of the Company depends, among other things, on successful exploration and/or acquisition of reserves, securing and maintaining title to tenements and consents, successful

design, construction, commissioning and operating of mining and processing facilities, successful development and production in accordance with forecasts and successful management of the operations. Exploration and mining activities may also be hampered by force majeure circumstances, land claims and unforeseen mining problems.

There is no assurance that exploration and development of the mineral interests owned by the Company, or any other projects that may be acquired in the future, will result in the discovery of mineral deposits which are capable of being exploited economically. Even if an apparently viable deposit is identified, there is no guarantee that it can be profitably exploited. If such commercial viability is never attained, the Company may seek to transfer its property interests or otherwise realise value, or the Company may even be required to abandon its business and fail as a "going concern".

Whether a mineral deposit will be commercially viable depends on a number of factors, which include, without limitation, the particular attributes of the deposit, such as size, grade and proximity to infrastructure, metal prices, which fluctuate widely, and government regulations, including, without limitation, regulations relating to prices, taxes, royalties, land tenure, land use, exporting of minerals and environmental protection. The combination of these factors may result in the Company expending significant resources (financial and otherwise) on tenements without receiving a return. There is no certainty that expenditures made by the Company towards the search and evaluation of mineral deposits will result in discoveries of an economically viable mineral deposit.

The Company has relied on and may continue to rely on consultants and others for mineral exploration and exploitation expertise. The Company believes that those consultants and others are competent and that they have carried out their work in accordance with internationally recognised industry standards. However, if the work conducted by those consultants or others is ultimately found to be incorrect or inadequate in any material respect, the Company may experience delays or increased costs in exploring or developing the Gold Asset.

(n) **Results of studies**

The Company intends to undertake drilling programs, and subject to the results of any future exploration and testing programs, the Company may progressively undertake a number of studies in respect to the Gold Asset or any new projects. These studies may include scoping studies, pre-feasibility studies and bankable feasibility studies.

These studies may not occur, but if they are completed, they would be prepared within certain parameters designed to determine the economic feasibility of the relevant project within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Gold Asset or the results of other studies undertaken by the Company (e.g. the results of a feasibility study may materially differ to the results of a scoping study).

Any proposed development of the Gold Asset may also exceed the currently envisaged timeframe or cost for a variety of reasons out of the control of the Company. These reasons may include delays in obtaining land use and mining activity approvals or in construction of mine infrastructure or the handling and preparation plant. In addition, the contractual terms for the procurement and delivery of the various components of construction are unknown. These could also have an impact on the cost of construction. There are many milestones which need to be met first for production to commence in accordance with any proposed mine plan and there is a risk that circumstances (including unforeseen circumstances) may cause a delay, resulting in the receipt of revenue at a later date than expected or not at all.

(o) **Resource and Reserve estimates**

Ore Reserve and Mineral Resource estimates (as those terms are defined in the JORC Code) are expressions of judgment based on drilling results, past experience with mining properties, knowledge, experience, industry practice and many other factors. Estimates which are valid when made may change substantially when new information becomes available. Mineral Resource and Ore Reserve estimation is an interpretive process based on available data and interpretations and thus estimations may prove to be inaccurate. The Company has no Ore Reserves. Further, there is no guarantee that the Gold Asset will become feasible and consequently no forecast is made of whether or not any Ore Reserve will be defined in future.

The actual quality and characteristics of ore deposits cannot be known until mining takes place and will almost always differ from the assumptions used to develop resources. Further, Ore Reserves are valued based on future costs and future prices and, consequently, the actual Ore Reserves and Mineral Resources may differ from those estimated, which may result in either a positive or negative effect on operations.

Should the Company encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations.

(p) **Metallurgy**

Metal or mineral recoveries are dependent upon the metallurgical process, and by its nature processing contains elements of significant risk such as:

- identifying a metallurgical process through test work to produce a saleable metal or concentrate;
- developing an economic process route to produce a metal or concentrate; and
- changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project.

No assurance can be given that any particular level of recovery from Mineral Resources or Ore Reserves will in fact be realised or that an identified mineral resource will ever qualify as commercially viable which can be legally and economically exploited.

(q) **Mine development**

Possible future development of mining operations at the Gold Asset is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favorable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

If the Company commences production on the Gold Asset or any future projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Company, such as weather patterns, unanticipated technical and operational difficulties encountered in exploration, development, extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services. No assurance can be given that the Company will achieve commercial viability through the development of the Gold Asset or any future projects.

(r) **Native title, cultural heritage and sacred sites**

Mining tenements in Australia are subject to native title laws and may be subject to future native title applications. Native title may preclude or delay granting of exploration and mining tenements or the ability of the Company to explore, develop and/or commercialise the Gold Asset. Considerable expenses may be incurred negotiating and resolving issues, including any compensation agreements reached in settling native title claims lodged over any of the Tenements held by Mt Ida Lithium or mining tenements acquired in the future by the Company.

The presence of Aboriginal sacred sites and cultural heritage artefacts on mining tenements is protected by Western Australian and Commonwealth laws. Any destruction or harming of such sites and artefacts may result in the Company incurring significant fines and court injunctions. The existence of such sites may limit or preclude exploration or mining activities on those sites, which may cause delays and additional expenses for the Company in obtaining clearances.

(s) **Occupational Health and Safety Risk**

The Company is committed to providing a healthy and safe environment for its personnel, contractors and visitors. However, mining activities have inherent risks and hazards. While the Company provides appropriate instructions, equipment, preventative measures, first aid information and training to all stakeholders through its occupational, health and safety management systems, health and safety incidents may nevertheless occur. Any illness, personal injury, death or damage to property resulting from the Company's activities may lead to a claim against the Company, which may not be covered, or may be inadequately covered, by the Company's insurance policies. Additionally, any accidents or injuries that occur at the Company's operations could result in delays or stoppages to operations and activities.

Any changes to the occupational health and safety laws and regulations in the jurisdictions in which the Company operates may result in increased costs of, or uncertainties in relation to, compliance with such laws and regulations.

(t) **Insurances**

Insurance of all risks associated with exploration and production is not always available and, where it is available, the cost may be high. The Company will have insurance in place considered appropriate for the Company's needs.

The business of the Company is subject to a number of risks and hazards generally, including adverse environmental conditions, industrial accidents, labour disputes, unusual or unexpected geological conditions, ground or slope failures, cave-ins, changes in the regulatory environment and natural phenomena such as inclement weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties or production facilities, personal injury or death, environmental damage to properties of the Company or others, delays in mining, monetary losses and possible legal liability.

Although the Company maintains insurance to protect against certain risks in such amounts as it considers to be reasonable, its insurance will not cover all the potential risks associated with its operations and insurance coverage may not continue to be available or may not be adequate to cover any resulting liability, particularly if the Company is seeking to acquire new projects which are located in other jurisdictions or involve a new commodity.

It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks because of high premiums or other reasons. Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration and production is not generally available to the Company or to other companies in the mining industry on acceptable terms. Losses from these events may cause the Company to incur significant costs that could have a material adverse effect upon its financial performance and results of operations.

(u) **Dilution**

In certain circumstances, the Directors may issue equity securities in accordance with the constitution, the Corporations Act and the ASX Listing Rules, without any vote or action by Shareholders. If the Company were to issue any equity securities the percentage ownership of the Shareholders may be reduced and diluted.

(v) **Competition**

Like many industries, the resources industry is subject to domestic and global competition. While the Company intends to undertake all reasonable due diligence in its business decisions and operations, the Company has no influence or control over the activities or actions of its competitors and these activities or actions may positively or negatively affect the operating and financial performance of the Company's Gold Asset and business.

Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce minerals, but also carry out refining operations and produce other products on a worldwide basis. There can be no assurance that the Company can compete effectively with these companies.

(w) **Dividend and distribution risk**

As an early-stage exploration company, the Company has no source of revenue or profits and makes no forecast of whether it will generate revenue or profits in the future. Accordingly, the Directors do not in the near future expect to, or intend to, pay or declare dividends or other distributions. Accordingly, any investment in the Shares may not carry with it income returns in the form of dividends or other distributions and any returns will be limited to any capital growth arising from any increase in the price of the Shares.

(x) **Litigation risk**

Legal proceedings may arise from time to time in the course of the Company's activities. Legal proceedings brought by third parties including but not limited to joint venture partners or employees could negatively impact the Company in the case where the impact of such litigation is greater than or outside the scope of the Company's insurance. As at the date of this document, there are no material legal proceedings affecting the Company and the Directors are not aware of any legal proceedings pending or threatened against or affecting the Company.

(y) **Unforeseen expenses**

While the Company is not aware of any expenses that may need to be incurred that have not been taken into account, if such expenses were subsequently incurred, the expenditure proposals of the Company may be adversely affected.

(z) **Taxation risk**

The acquisition and disposal of Shares will have tax consequences, which will differ for each investor depending on their individual financial circumstances. All potential investors in the Company are urged to obtain independent financial advice regarding the tax and other consequences of acquiring Shares. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability or responsibility with respect to any tax consequences of applying for Shares under the Placement and SPP.

(aa) **Accounting standards**

Changes to any applicable accounting standards or to any assumptions, estimates or judgments applied by management in connection with complex accounting matters may adversely impact the Company's financial statements, results or condition.

(bb) **Non-underwritten risk**

The Placement and the SPP are not underwritten, and there is no guarantee that the funds sought will be received or that the Placement or the SPP will complete. There is the risk the Capital Raising does not proceed or does not raise the full funds contemplated to be raised under the Capital Raising. Given that no component of the Capital Raising is underwritten, if the Placement or the SPP does not complete or fail to raise the funds sought, there is the risk that the Company would be required to find alternative funding which could have an adverse effect on the Company's share price. In those circumstances, there is no guarantee that alternative funding could be sourced in the time required or at all or that the Company would be able to successfully negotiate the terms of any debt or equity funding arrangements in those circumstances. There is also a risk that certain transaction costs in relation to the Placement and SPP, such as legal and advisory fees, may still be payable by the Company.

14 General risks

(a) **Legislative changes**

There is a risk that the elected government will introduce new policies and legislation that relate to the mining industry (such as a resource or carbon tax). It is possible that any such policies or legislation will have a negative impact on the mining industry generally and this could, in turn, have an adverse effect on the Company's operations and results.

(b) **Force majeure**

Force majeure is a term used to refer to an event beyond the control of a party claiming that the event has occurred. These include, but are not limited to, acts of God, fire, flood, earthquakes, war and strikes. To the extent that force majeure events occur, they may adversely affect the Company's financial performance, the value and price of Shares and the Company's ability to operate.

(c) **Equity market conditions**

Market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. These can be affected by many factors such as:

- (i) general economic outlook;
- (ii) interest rates and inflation rates;
- (iii) currency fluctuations;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) demand for, and supply of capital; and
- (vi) terrorism or other hostilities.

15 Custodian Certification

If, on the Record Date, you are a Custodian and hold Shares on behalf of one or more persons each of whom is an Eligible Shareholder (each, a **Participating Beneficiary**), the Offer is made to you and you have the discretion whether to extend the Offer to the Participating Beneficiaries. You may apply for up to a maximum of A\$30,000 worth of New Shares pursuant to the Offer for each Participating Beneficiary.

In any consecutive 12-month period, the Company can only issue Shares to a Custodian up to the value of A\$30,000, unless the Custodian certifies in writing (**Custodian Certificate**):

- (a) either or both of the following:
 - (i) that the Custodian holds Shares on behalf of one or more Participating Beneficiaries that are not Custodians; and
 - (ii) that another Custodian (**Downstream Custodian**) holds beneficial interests in Shares on behalf of one or more Participating Beneficiaries, and the Custodian holds the Shares to which those beneficial interests relate on behalf of the Downstream Custodian or another Custodian,on the Record Date and that each Participating Beneficiary has subsequently instructed the following persons:
 - (iii) where paragraph 15(a)(i) applies – the Custodian; and
 - (iv) where paragraph 15(a)(ii) applies – the Downstream Custodian,to apply for New Shares on their behalf under the Offer;
- (b) the number of Participating Beneficiaries;
- (c) the name and address of each Participating Beneficiary;
- (d) in respect of each Participating Beneficiary:
 - (i) where paragraph 15(a)(i) applies, the number of Shares that the Custodian holds on their behalf; and
 - (ii) where paragraph 15(a)(ii) applies, the number of Shares to which the beneficial interests relate;
- (e) in respect of each Participating Beneficiary:

- (i) where paragraph 15(a)(i) applies, the number or the dollar amount of New Shares they instructed the Custodian to apply for on their behalf; and
- (ii) where paragraph 15(a)(ii) applies, the number or the dollar amount of New Shares they instructed the Downstream Custodian to apply for on their behalf;
