EAGLE MOUNTAIN MINING

Quarterly Activities Report for the period ended 30 September 2026

Eagle Mountain Mining Limited (ASX:EM2) (**Eagle Mountain** or the **Company**) is pleased to provide an operations overview for the quarter ended 30 September 2026 (**Quarter**).

Highlights:

- Oracle Ridge:
  - **Handover between the Company and Nittetsu completed** following the establishment of a Joint Venture in the previous quarter;
  - Commencement of a **6,000 metre drilling program** to test potential extensions proximal to the existing Mineral Resource Estimate. First results are expected in Q4 2026;
- Silver Mountain:
  - Minor field activities to maintain on-site infrastructure;
  - Exploration and strategic reassessment ongoing;
- Corporate:
  - Signing of a **Non-Binding Memorandum of Understanding with Nittetsu for the assessment and potential acquisition of new mineral projects.**
  - Ongoing **review of multiple project opportunities** complementing the existing projects and capable of adding value to the Company. Focus remains on base and precious metals opportunities in stable jurisdictions.
- Cash at the end of the Quarter of $2,582,000.

Eagle Mountain's Executive Director, Fabio Vergara, commented:

"During the Quarter, our focus shifted from the handover of responsibilities at Oracle Ridge to more intensive review of new project opportunities. In this context, the signing of the collaboration memorandum with Nittetsu is an important step forward: it solidifies the strong partnership between our companies and expands the scope of Eagle Mountain's search to include more advanced projects that we would not pursue independently. The two companies are building on the foundations laid with the Oracle Ridge transaction and we look forward to working with Nittetsu and their capable team in the future".

EXPLORATION ACTIVITIES

Oracle Ridge Project - Wedgetail Joint Venture

The Oracle Ridge Project ("Oracle Ridge") is an advanced exploration asset situated approximately 30 kilometres north of Tucson, Arizona, USA (Figure 1). Oracle Ridge was acquired in 2019 and, following several years of exploration and drilling by the Company, currently contains a Mineral Resource Estimate ("MRE") of 28.2Mt at 1.35% Cu, 11.06g/t Ag and 0.16g/t Au[1].

Earlier in 2026, Eagle Mountain entered a Joint Venture ("JV") with Nittetsu Mining Co., Ltd ("Nittetsu") regarding Oracle Ridge[2]. Following the transaction, Nittetsu controls 80% of Oracle Ridge and is the operator, with the Company retaining a 20% interest which is free-carried until total project expenditures reach US$20 million. Nittetsu is a mid-tier listed company with mining operations in Japan and Chile and exploration assets worldwide.

During the Quarter the JV partners worked collaboratively to complete a handover of responsibilities to Nittetsu. This included support in administrative and human resources matters while also transferring the Company's US-based employees and relevant assets to the JV structure. The process was essentially completed by early August 2026.

In mid-August, a 6,000 metre drilling program commenced at Oracle Ridge. Exploration is targeting potential mineralised extensions proximal to the existing MRE and is planned to last approximately six months. First assay results are expected in Q3 2026 and will be released to the market when received by the Company.

An Induced Polarization geophysical survey was completed in July 2026. Interpretation of the results is ongoing as the JV has prioritised the drilling program over all other exploration activities.

Silver Mountain Project

The Silver Mountain Project ("Silver Mountain") is located in Arizona, USA, approximately 80 kilometres north of Phoenix (Figure 1). The Project lies within the Laramide Arc, a northwest-southeast trending geological feature that hosts world-class porphyry copper mines and deposits such as Bagdad, Miami-Globe and Resolution. Due to this unique geological setting, Silver Mountain is highly prospective for both porphyry copper and volcanigenic massive sulphide mineralisation.

Geophysical surveys undertaken by the Company in 2024 have identified prospective porphyry targets at the Scarlett prospect underlying an area of surface mineralisation and alteration (Figure 2).

During the Quarter, Eagle Mountain completed minor site activities to maintain the water well established in 2018. The water well was instrumental in supplying water during the 2018-2019 drilling program and adds significant value to the patented mining claims (i.e. private property) held by the Company.

Over the last three months the Company continued its reassessment of Silver Mountain following recent developments at Oracle Ridge and the current strong interest for copper and precious metals assets in the USA. Eagle Mountain will keep the market informed on future exploration and corporate activities at Silver Mountain.

Corporate

During the Quarter, the Company announced the signing of a Non-Binding Memorandum of Understanding with Nittetsu[3]. The two companies have agreed to collaborate in identifying and reviewing new opportunities to determine whether to proceed towards a potential transaction. Projects with the following characteristics are being reviewed:

- Commodity: copper, zinc, lead, gold, silver, nickel and lithium. Other commodities may also be considered;
- Jurisdiction: Australia and North America. Other jurisdictions may also be considered; and
- Status: early stage to advanced exploration, pre-development and production.

New Opportunities

The Company continues to review new potential acquisitions of mineral projects with a focus on base and precious metals assets in stable jurisdictions. Several opportunities were reviewed during the Quarter. Eagle Mountain will keep the market updated should any of these opportunities progress to a binding agreement stage.

Cash

The Company held cash balances at 30 September 2026 of $2,582,000 in both Australian and US denominations.

Tenements acquired or disposed

No tenements were acquired or disposed of by the Company during the Quarter.

Other

In accordance with the reporting requirements of ASX Listing Rule 5.3, the Company spent $163,000 on exploration and evaluation activities during the Quarter. Expenditure predominantly related to fieldwork and tenement administration at Silver Mountain, handover at Oracle Ridge and due diligence costs for the assessment of new opportunities.

There were no mining development or production activities conducted during the Quarter.

During the Quarter, the Company made payments to related parties of $103,000 as fees payable to Directors.

This ASX announcement was authorised for release by the Board of Eagle Mountain Mining Limited.

ABOUT EAGLE MOUNTAIN MINING

Eagle Mountain is a copper-gold explorer focused on exploration and development of the Oracle Ridge and Silver Mountain Projects. Both projects are in Arizona, USA, the heart of America's mining industry and home to some of the world's largest copper discoveries such as Bagdad, Miami and Resolution.

Oracle Ridge is an advanced exploration asset with a Mineral Resource Estimate of 28.2 Mt at 1.35% Cu, 11.06 g/t Ag and 0.16 g/t Au for approximately 380,000t of contained copper metal (Table 1). The project was mined in the 1990s and benefits from significant underground and surface infrastructure.

In April 2026 the Company entered a Joint Venture with Nittetsu Mining Co, Ltd. of Japan ("Nittetsu") regarding the Oracle Ridge Project. Nittetsu is 80% owner and operator of the Joint Venture. Eagle Mountain retains a 20% interest, free-carried until a US$20 million expenditure milestone is met. Nittetsu is a base metals and limestone producer with operations in Chile, Peru and Japan, including an interest in the Hibi copper smelter.

Silver Mountain is an exploration opportunity with potential to host base and precious metals mineralisation with porphyry and volcanogenic massive sulphide affinity.

The Company is also pursuing the acquisition of new assets complementing its project portfolio.
