QUARTERLY REPORT
PT ANTAM (PERSERO) TBK
(*Unaudited*)

For the Nine-Month Period Ended September 30, 2026
ARBN - 087 423 998
Stock Codes: ASX: ATM, IDX: ANTM

ANTAM integrates environmental, social, and governance principles into responsible mining practices to create long-term value for all stakeholders.

HIGHLIGHTS

ANTAM recorded a 7% year-on-year (YoY) increase in gold production from the Company's mines in 9M26 to 634 kg (20,384 troy oz). In 9M26, gold sales totaled 25,217 kg (810,745 troy oz).

Nickel ore production in 9M26 reached 12.16 million wet metric tons (wmt). Nickel ore sales in 9M26 totaled 10.73 million wmt, all of which were absorbed by the domestic market.

Ferronickel sales in 9M26 increased 71% YoY to 13,971 tons of nickel in ferronickel (TNi), with all volume absorbed by export markets. Ferronickel production in 9M26 reached 11,638 TNi.

Bauxite sales in 9M26 increased 49% YoY to 1.64 million wmt, while bauxite production totaled 2 million wmt. Chemical Grade Alumina production and sales in 9M26 increased 14% and 9% YoY, respectively to 153,399 tons of alumina and 146,642 tons of alumina.

PRODUCTION AND SALES

During the nine months ended September 30, 2026 (January–September 2026, 9M26), ANTAM maintained solid production and sales performance amid mining industry dynamics, fluctuations in global commodity markets, and operational challenges, including weather conditions that affected activities at several operating sites.

ANTAM's performance in 9M26 was supported by the Company's efforts to maintain operational effectiveness and implement business strategies that adapt to evolving conditions and challenges. In addition, the Company pursues initiatives beyond operational excellence, anchored in five pillars: safety resilience, productivity and quality, low-cost operations, green mining industry, and continuous improvement.

Through responsible environmental management, the implementation of occupational health and safety practices, community empowerment, and strengthened good corporate governance, ANTAM continues to support business sustainability and long-term value creation. These efforts reflect the application of Environmental, Social, and Governance (ESG) principles in the Company's business activities.

GOLD

In the third quarter of 2026 (July–September 2026, 3Q26), gold production from the Company's mines reached 202 kg (6,494 troy oz), up 34% from gold production of 151 kg (4,855 troy oz) in the third quarter of 2025 (July–September 2025, 3Q25). In 9M26, ANTAM recorded total gold production of 634 kg (20,384 troy oz), up 7% from 590 kg (18,969 troy oz) in the first nine months of 2025 (January–September 2025, 9M25).

On the sales side, ANTAM recorded gold sales of 7,137 kg (229,460 troy oz) in 3Q26, bringing gold sales in 9M26 to 25,217 kg (810,745 troy oz).

ANTAM continues to develop its product portfolio, improve service quality, and expand distribution channels to meet evolving customer needs. These actions form part of the Company's efforts to expand market reach, enhance the customer experience, and strengthen the competitiveness of ANTAM's gold business.

To meet customer needs, ANTAM continues to strengthen the marketing of its Logam Mulia products through collaboration with domestic strategic partners. This initiative is expected to expand the use of domestic gold raw materials while supporting the development of the national gold industry ecosystem.

For personal use only

NICKEL ORE

In line with efforts to optimize mining activities and operational management, ANTAM recorded nickel ore production of 4.38 million wet metric tons (wmt) in 3Q26, up 27% from 3.45 million wmt in 3Q25. This achievement supported ANTAM's nickel ore production in 9M26, which reached 12.16 million wmt.

In 3Q26, ANTAM recorded nickel ore sales of 3.96 million wmt, up 29% from nickel ore sales of 3.06 million wmt in 3Q25. As a result, total nickel ore sales in 9M26 reached 10.73 million wmt.

All of ANTAM's nickel ore sales were directed to the domestic market, both to meet internal needs as raw material for the ferronickel plant and for sales to third parties, particularly domestic nickel smelters. This is part of the Company's strategy to support the strengthening of the national mineral downstream ecosystem through a reliable and sustainable supply of raw materials.

FERRONICKEL

In 3Q26, ANTAM's ferronickel production totaled 3,850 tons of nickel in ferronickel (TNi). Cumulatively, ANTAM's ferronickel production in 9M26 reached 11,638 TNi.

On the sales side, ANTAM recorded ferronickel sales of 6,367 TNi in 3Q26, up 163% from 2,419 TNi in 3Q25. Cumulatively, ferronickel sales in 9M26 totaled 13,971 TNi, up 71% from 8,182 TNi in 9M25.

In line with this growth, ANTAM continues to strengthen its marketing strategy while optimizing customer fulfilment to support sustainable business growth. All of ANTAM's ferronickel sales were directed to export markets, primarily China, India, and South Korea, which are strategic markets for the global stainless steel industry.

BAUXITE

ANTAM's bauxite production volume in 3Q26 reached 718,775 wmt. In addition, bauxite production in 9M26 totaled 2 million wmt. ANTAM continues to optimize mining activities and operational management to maintain supply sustainability and support raw material needs for the domestic bauxite processing industry.

ANTAM's bauxite production is used as raw material for the Chemical Grade Alumina (CGA) plant in Tayan, operated by PT Indonesia Chemical Alumina (PT ICA), and for sales to domestic customers.

On the sales side, bauxite sales in 3Q26 totaled 385,622 wmt, a significant increase of 398% from 77,482 wmt in 3Q25. Bauxite sales in 9M26 totaled 1.64 million wmt, up 49% from 1.10 million wmt in 9M25.

All of ANTAM's bauxite sales were absorbed by the domestic market, in line with the growing capacity of the national alumina processing industry, which is driving increased demand for bauxite raw materials.

CHEMICAL GRADE ALUMINA

In line with ANTAM's strategy to optimize the operations of the Company's CGA plant, PT ICA produced 53,142 tons of alumina in 3Q26, up 19% from 44,840 tons of alumina in 3Q25. Alumina production in 9M26 reached 153,399 tons of alumina, up 14% from 134,224 tons of alumina in 9M25.

Meanwhile, alumina sales in 3Q26 totaled 46,205 tons of alumina, up 6% from 43,660 tons of alumina in 3Q25. Growth in 3Q26 alumina sales brought alumina sales in 9M26 to 146,642 tons of alumina, up 9% from 134,768 tons of alumina in 9M25.

STRENGTHENING THE MINERAL DOWNSTREAM ECOSYSTEM FOR SUSTAINABLE BUSINESS GROWTH

In line with the Government's Asta Cita policy agenda to promote downstream processing and the industrialization of natural resources to create added value domestically, ANTAM continues to accelerate the integrated development of downstream mineral processing as part of its long-term strategy to strengthen competitiveness and create sustainable growth.

ANTAM's various strategic downstream projects form part of the Company's efforts to strengthen the national mineral industry and expand Indonesia's role in global supply chains. These initiatives are intended to foster a competitive and sustainable industrial ecosystem while delivering optimal economic benefits to the national economy.

In the gold segment, ANTAM is developing a precious metals manufacturing facility in the Java Integrated Industrial and Ports Estate (JIIPE) in Gresik, East Java, to increase manufacturing capacity, expand domestic market penetration, and maximize the added value of its precious metals business amid growing demand.

In the nickel segment, ANTAM has achieved several important milestones in its cooperation project to develop Indonesia's EV battery ecosystem with HKCBL (CATL Group), including the completion of preliminary work, permitting processes, and financing preparations to support timely completion of construction. The project entered the construction phase in East Halmahera, marked by the commencement of EPC construction activities in the fourth quarter of 2025 as part of the development of the national EV battery ecosystem.

ANTAM is also increasingly demonstrating its strategic role in accelerating the integrated national battery ecosystem through the development of a subsequent initiative with PT Industri Baterai Indonesia, or Indonesia Battery Corporation (IBC), and strategic partner HYD Investment Limited, a consortium led by global corporation Zhejiang Huayou Cobalt Co., Ltd.

ANTAM, IBC, and HYD signed a Framework Agreement on January 30, 2026, as an initial framework to accelerate the nickel downstream processing program and investment in an integrated battery ecosystem. The Framework Agreement serves as the basis for developing integrated investments from upstream to downstream, covering nickel resource management, processing and refining, and battery production.

Based on the resolutions of ANTAM's 2025 Annual General Meeting of Shareholders,

For personal use only

For personal use only

ANTAM received a special assignment from the Government in the nickel segment to accelerate the nickel downstream processing program and develop the national electric vehicle battery ecosystem. The assignment covers the development of an integrated, nickel-based battery ecosystem from upstream to downstream, including mining, the construction of RKEF/RKSBF plants, HPAL facilities, refineries, precursor and cathode facilities, battery cell production, and battery recycling facilities. This ecosystem is expected to increase the added value of national mineral resources, diversify the Company's revenue sources, strengthen long-term business resilience, and support sustainable growth for all stakeholders.

To strengthen downstream bauxite activities, ANTAM continues to promote the integration of Indonesia's aluminum industry through the commercial operation of the SGAR Mempawah Phase 1 Project, which began in February 2026 and has an SGA production capacity of 1 million tons of alumina per year. The project is operated by PT Borneo Alumina Indonesia (BAI), a joint venture between ANTAM and PT Indonesia Asahan Aluminium (Persero) (INALUM).

In line with these operations, ANTAM and its partners also held the groundbreaking ceremony for the SGAR Phase II Project in February 2026, with planned additional capacity of up to 1 million tons of alumina per year to be developed in stages. This development is intended to support the national downstream processing program and expand ANTAM's role in ensuring raw material availability for domestic manufacturing as part of strengthening the national industrial value chain.

EXPLORATION ACTIVITIES

As part of its efforts to ensure the availability of mineral resources and reserves to support sustainable business growth, ANTAM consistently conducts exploration activities across its principal commodities. The Company's exploration programs are focused on gold, nickel, and bauxite to support operational sustainability and future development projects. ANTAM's total exploration expenditure during 9M26 (preliminary, unaudited) amounted to Rp134.39 billion.

ANTAM through the Geomin Unit undertakes integrated mineral exploration activities which include area survey activities, geological exploration, geophysical exploration, geodesy survey, drilling, physical and chemical analysis, calculation of mineral reserves and resources. These activities are supported by an integrated Geographic Information System (GIS).

GOLD

In 9M26, ANTAM's gold exploration activities were conducted in Pongkor, West Java. Exploration activities in the Pongkor area focused on deep drilling, in-mine drilling, geological mapping, traverse surveying, drill core logging and sampling, rock sampling, sample preparation and laboratory analysis, as well as petrographic, mineragraphic, and fluid inclusion analysis, as required for evaluation purposes.

NICKEL

ANTAM's nickel exploration activities were conducted in North Konawe and Pomalaa in Southeast Sulawesi, as well as Marimoi, Lililef Sawai, and the Mining Business Permit (IUP) area of ANTAM's subsidiary, PT Sumberdaya Arindo (PT SDA), in Buli, North Maluku.

Exploration activities in North Konawe included single-tube drilling, geological mapping, grid surveying, stake installation, re-surveying of drill hole locations, establishment of Bench Mark (BM), drill core sampling, sample preparation, chemical analysis, and an Electrical

Resistivity Tomography (ERT) geophysical survey. In addition, exploration activities in Pomalaa included single-tube drilling, geological mapping, grid surveying, stake installation, re-surveying of drill hole locations, drill core longing and sampling, sample preparation, and chemical analysis.

For personal use only

As of 9M26, exploration activities in Marimoi included single-tube drilling, geological and laterite mapping, grid surveying, establishment of Bench Marks (BM), re-surveying of drill hole locations, drill core logging and sampling, sample preparation and chemical analysis, and also moisture content and density measurements.

Activities in the IUP area of PT SDA as of 9M26, focused on completing the forestry permitting process for exploration activities. In addition, exploration activities in Lililef Sawai remained in the preparation stage, in line with the required forestry permits and RKAB approval. Activities in the IUP areas of PT SDA and Lililef Sawai included the maintenance of drilling units and exploration support facilities.

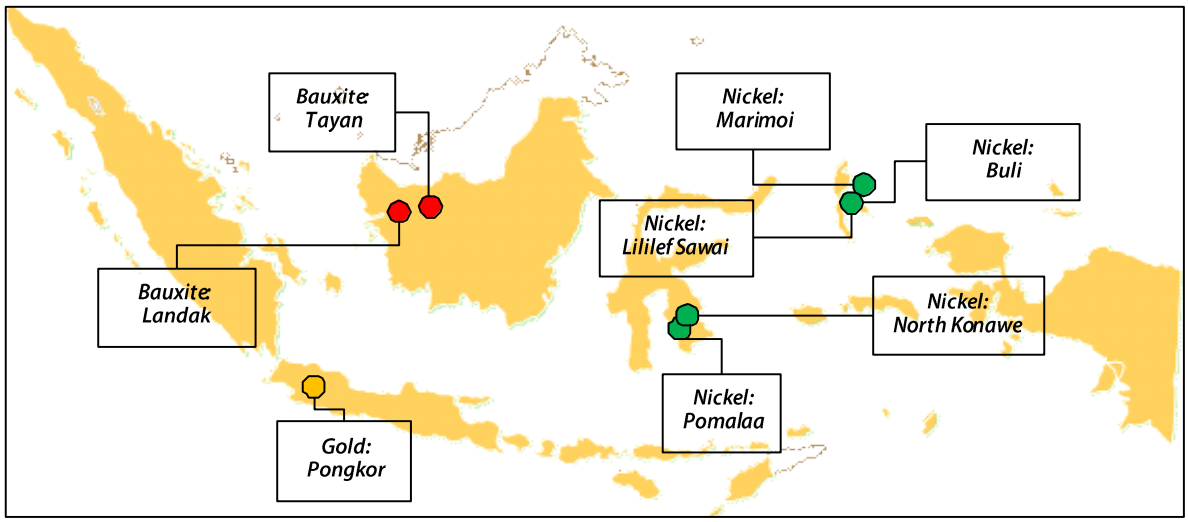

BAUXITE

As of 9M26, ANTAM's bauxite exploration activities were conducted in Tayan and Landak, West Kalimantan.

Exploration activities in Tayan included single-tube drilling, laterite profile logging and drill core sampling, sample washing, concretion factor and loose density of washed bauxite measurements, geological mapping, grid/polygon surveying, installation of Bench Mark, pre-drill and post-drill activities, sample preparation, and laboratory analysis.

Meanwhile, exploration activities in Landak included geological mapping, grid surveying and determination of drill hole locations, drilling and logging, sample collection and washing, sample preparation and laboratory analysis, as well as exploration data processing.

ANTAM'S EXPLORATION AREAS UNTIL SEPTEMBER 30, 2026

Information relating to the Exploration Results, Mineral Resources, or Ore Reserves contained in this report is based on information compiled by Mr. Bronto Sutopo, a Member of The Australasian Institute of Mining and Metallurgy. Mr. Bronto Sutopo is a permanent employee of the Company. Mr. Bronto Sutopo has sufficient experience relevant to the style of mineralization and type of deposit under consideration, and to the activity being undertaken, to qualify as a Competent Person in accordance with the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.' Mr. Bronto Sutopo consents to the inclusion in this report of matters relating to the Exploration Results, Mineral Resources, or Ore Reserves in the form and context in which the information appears.

CORPORATE NEWS

ANTAM AND BANK MUAMALAT ENTER INTO A STRATEGIC PARTNERSHIP TO STRENGTHEN THE NATIONAL GOLD ECOSYSTEM

On July 8, 2026, ANTAM and PT Bank Muamalat Indonesia Tbk (Bank Muamalat) have established a strategic partnership for the distribution of ANTAM's Precious Metals (Logam Mulia) through a wholesaler scheme. This collaboration is part of both companies efforts to strengthen the national gold ecosystem while expanding public access to gold ownership through Sharia-compliant gold financing services.

Through this partnership, ANTAM and Bank Muamalat will synergize the physical trading of ANTAM's Precious Metals across Bank Muamalat's branch network and digital channels. Furthermore, both companies will collaborate on various marketing, educational, and gold investment literacy programs for the public.

This synergy is expected to strengthen the national gold supply chain while expanding public access to safe, trusted, and Sharia-compliant gold investment, in line with efforts to develop the national gold ecosystem.

ANTAM DISTRIBUTES RP5.05 TRILLION IN DIVIDENDS, REINFORCING ITS COMMITMENT TO SUSTAINABLE VALUE CREATION

On July 10, 2026, ANTAM reaffirmed its commitment to creating value for shareholders through the distribution of Rp5.05 trillion in cash dividends for fiscal year 2025, up 38% from Rp3.65 trillion in cash dividends for fiscal year 2024. The cash dividends were paid in accordance with the resolutions of ANTAM's Annual General Meeting of Shareholders for fiscal year 2025.

The dividend distributed amounted to Rp209.98867 per share, or the equivalent of Rp1,049.94335 per CHESS Depositary Interest (CDI) for holders of the Company's CDIs on the Australian Securities Exchange (ASX). The Company's shares on the ASX are traded in the form of CDIs, or ASX depositary interests, where one CDI is equivalent to and/or may be exchanged for five ANTAM Series B ordinary shares.

The dividend payment emphasizes ANTAM's consistency in maintaining profitability and creating long-term value for shareholders. The total dividend distributed was equivalent to 70% of net income attributable to owners of the parent entity. The dividend distribution also reflects the Company's tangible contribution to national economic growth.

ANTAM RECEIVES AN EXCELLENT RATING AT THE INDONESIA ORIGINAL BRANDS AWARD 2026

On July 21, 2026, ANTAM received the 2026 Indonesia Original Brands Award (IOB Award 2026) with an “Excellent” rating in the Precious Metals (Gold Bars) category. The award was presented during the IOB Award 2026 Conference & Awarding Ceremony, organized by SWA Magazine in collaboration with Business Digest.

The IOB Award 2026 served as a platform to recognize authentic Indonesian brands that have demonstrated commitment, dedication, and performance in building quality, trust, and competitiveness in both the domestic and global markets.

The IOB Award 2026 further strengthens ANTAM’s track record as an authentic Indonesian brand that consistently receives recognition for product quality and customer trust. Since 2022, ANTAM has consecutively won the IOB Award in the Precious Metals (Gold Bars) category, including being named 1st

For personal use only

Winner – Excellent in 2025. These achievements reflect ANTAM's consistency in delivering high-quality products, strengthening customer loyalty, and enhancing the brand's competitiveness in the national market.

GERAK HIJAU 2026 UNITES THE GOVERNMENT, THE BUSINESS COMMUNITY, AND THE PUBLIC FOR CONCRETE ACTION TO PROTECT THE ENVIRONMENT

On July 26, 2026, Gerak Hijau, supported by ANTAM, encouraged the public to embrace healthy lifestyle while promoting environmental awareness. Organized by the Ministry of Environment/Environmental Control Agency (KLH/BPLH) with ANTAM as the main sponsor, Gerak Hijau brought together government institutions, businesses, communities, and the public under the spirit of "Moving Together, Greening Indonesia.

A variety of activities were held throughout the event, ranging from a Fun Walk, waste management education, Micro, Small and Medium Enterprises (MSME) bazaar, Junior Miners (a mining-themed playground for children), the distribution of free seedlings, to a campaign promoting sustainable lifestyles that can be applied in daily life.

As part of its support for the Gerak Hijau, ANTAM introduced various sustainability initiatives that encourage public participation, including an ANTAM booth for transactions and education, the Smart Waste Bank program to increase the economic value of waste through more modern management, the distribution of thousands of tree seedlings to the public, and the donation of 5,000 mangrove seedlings to support coastal ecosystem rehabilitation and climate change mitigation.

Through Gerak Hijau, the public is not only encouraged to exercise and enjoy public spaces but is also introduced to various simple practices they can incorporate into their daily lives ranging from sorting waste, supporting the circular economy, and planting trees to contributing to the conservation of coastal ecosystems.

Gerak Hijau is expected to become a sustainable movement capable of inspiring more people to take part in protecting the environment, while strengthening the synergy between the government, the business sector, communities, and the public in creating a greener and more sustainable Indonesia.

ANTAM SUPPORTS MINERAL DOWNSTREAM DEVELOPMENT THROUGH EXPORTS OF VALUE-ADDED ALUMINA PRODUCTS

On August 7, 2026, ANTAM together with MIND ID and the Government of the Republic of Indonesia, supported stronger national mineral downstream processing through the export shipment of value-added alumina products from Pontianak, West Kalimantan.

This step forms part of ANTAM's commitment to increasing the value added of Indonesia's mineral resources while strengthening the competitiveness of the national industry in global markets.

Through synergy with MIND ID and the Government of the Republic of Indonesia, ANTAM is committed to delivering sustainable, innovation-oriented mineral processing that provides tangible benefits for Indonesia's economic growth and public welfare.

For ANTAM, downstream processing is not merely about increasing the added value of minerals, it is also about building a more valuable future for Indonesia.

ANTAM INTRODUCES INDONESIA'S FIRST INDEPENDENCE GOLD PRODUCTS WITH THREE-DIMENSIONAL RELIEF

On August 10, 2026, to commemorate the 81st anniversary of the Independence of the Republic of Indonesia, ANTAM has launched Indonesia's first 2026 Independence Edition

For personal use only

Thematic Product featuring three-dimensional relief, produced in a limited edition. Consisting of a 17-gram Karapan Sapi Gold Bar and a 1 Troy Ounce (31.103 grams) Mount Bromo Silver Coin, the three-dimensional relief design depicts Indonesia's rich culture and natural beauty as symbols of the nation's struggle, unity, and pride.

This year, ANTAM is expanding its Independence-themed product portfolio by launching a line of gold bars and silver coins featuring designs and philosophies that reflect Indonesia. The Karapan Sapi from Madura embodies the values of courage, agility, discipline, and the determination to keep moving forward. These values resonate closely with the spirit passed down by our forebears. Mount Bromo, with all its beauty, stands as a symbol of resilience and harmony, reminding us that Indonesia's strength lies in its diversity.

These two designs demonstrate that ANTAM presents "Indonesia's Pride in Gold", precious metals that are not only valuable investments but also rich in local wisdom and a sense of pride in the cultural and natural heritage of the Indonesian archipelago.

The launch of these innovative products also aligns with ANTAM's commitment to implementing Environmental, Social, and Governance (ESG) principles through a supply chain that complies with London Bullion Market Association (LBMA) standards. This commitment is part of ANTAM's sustainability efforts and aims to provide gold and silver that hold value for both current and future generations.

ANTAM RECEIVES THE INDONESIA BEST CORPORATE SECRETARY FOR GOVERNANCE EXCELLENCE 2026 AWARD

On September 1, 2026, ANTAM received the Indonesia Best Corporate Secretary for Governance Excellence 2026 award at the Corporate Secretary Champion 2026 event.

The award recognizes ANTAM's commitment to strengthening corporate governance practices, transparency, and credible, sustainable corporate communication. Good governance is an important foundation for building trust and ensuring corporate sustainability.

This achievement further motivates ANTAM to continue delivering excellent corporate governance, strengthen the trust of all stakeholders, and create sustainable value.

ANTAM WINS 25 ENSIA 2026 AWARDS

On September 10, 2026, ANTAM once again received recognition at the Environmental and Social Innovation Awards (ENSIA) 2026. The awards are in line with ANTAM's commitment to delivering environmental, social, and sustainability innovation.

At the event, ANTAM's various business units won a total of 25 awards, including Gold Mining Business Emas, Kolaka Nickel Mining Business Unit, West Kalimantan Bauxite Mining Business Unit, North Maluku Nickel Mining Business Unit, and Precious Metals Processing and Refinery Business Unit.

The awards recognized a range of innovations in energy and water efficiency, emissions reduction, waste and solid waste management, biodiversity protection, and social innovation. ENSIA 2026 also honored a Local Hero a woman farmer from Kalong Liud Village who is part of Gold Mining Business Unit community development program. Her recognition demonstrates that sustainability also grows through inspiring individuals who create meaningful change in their communities.

For ANTAM, every innovation is intended to deliver tangible benefits for the environment, communities, and operational sustainability.

ANTAM PARTICIPATES IN PUBLIC EXPOSE LIVE 2026

On September 11, 2026, the Company once again participated in Public Expose Live 2026, organized by the Indonesia Stock Exchange (IDX).

At Public Expose 2026, ANTAM's management presented updates on operational and financial performance for the first half of 2026, as well as progress on development projects that form part of the Company's growth strategy.

ANTAM's Public Expose Live 2026 was attended by representatives of securities firms, analysts, investors, and the general public. Through its participation in Public Expose Live 2026, ANTAM continues to strengthen public disclosure while providing an overview of the Company's performance and future business direction.
