ASX ANNOUNCEMENT 29 October 2026

SEPTEMBER 2026 QUARTERLY ACTIVITY REPORT

High-grade gold discovered both to south AND north of Greenewood

- **Stage 3 drilling completed: over 32,000m of new RC drilling**
- **High-grade contiguous gold discovered to the SOUTH (Mainwood zone)**
- **High-grade contiguous gold discovered to NORTH and to depth**
- **Strike of high-grade gold zones DOUBLES IN SIZE**
- **Results to feed into Gawler Gold scoping study currently in progress**

Gawler Gold Project, South Australia

Greenewood expands south AND north

Stage 3 of the maiden drilling program at Greenewood (over 32,000m of RC drilling) was completed by mid-October [see ASX:MEU 20 July 2026, 3 Sept 2026, 12 Oct 2026], including the first drilling ever by Marmota to the south of Greenewood (aka the Mainwood zone).

Stage 3 drilling targeted major extensions both to the south and to the north of Greenewood. Both the new south zone and the new north zone yielded contiguous high-grade gold.

Marmota's maiden program at Greenewood is yielding some of the best gold results in the Gawler Craton since the discovery of the Challenger deposit in 1995.

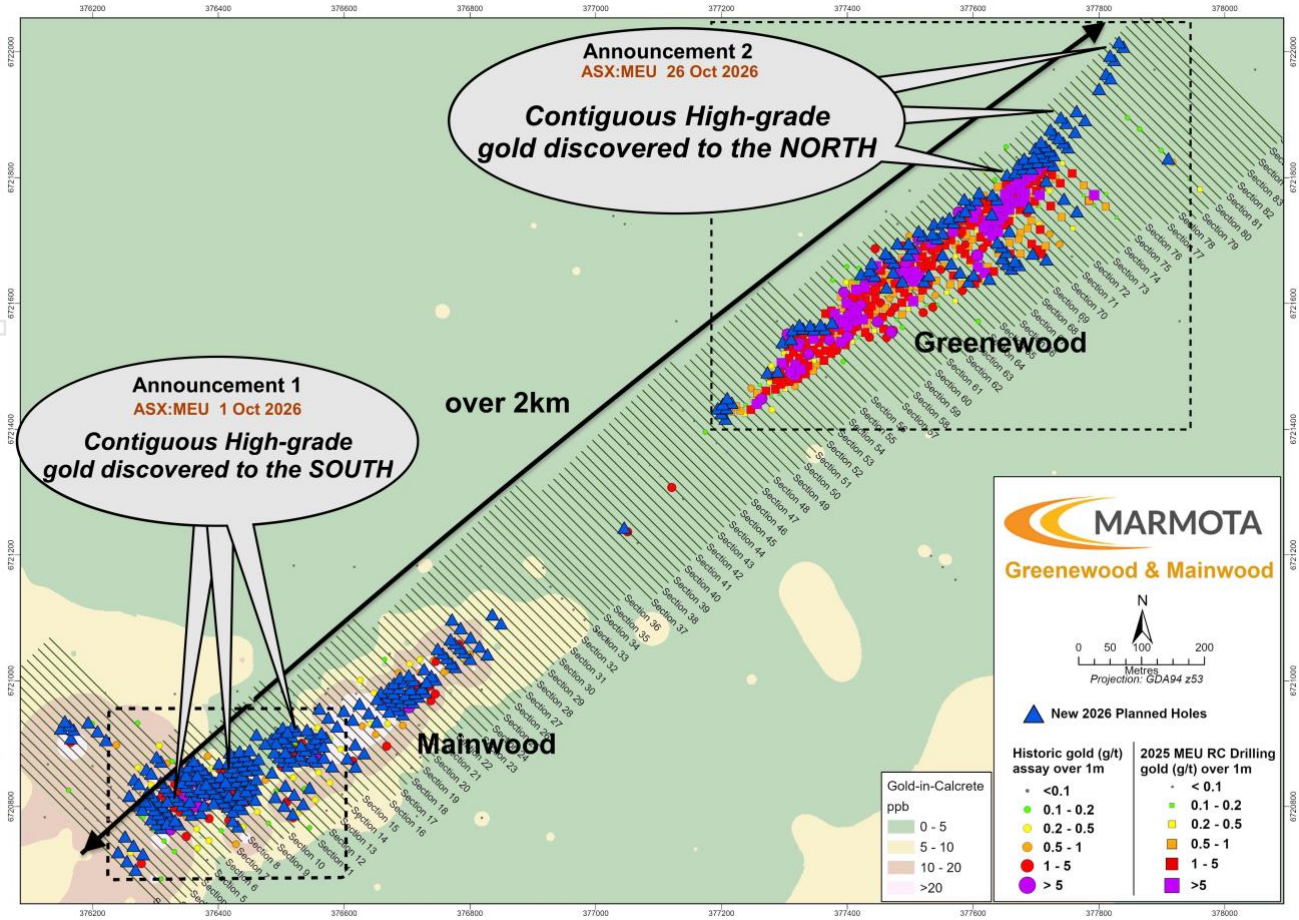

Figure 1: Contiguous high-grade gold discovered to both SOUTH [ASX:MEU 1 Oct 2026] **and NORTH** [ASX:MEU 26 Oct 2026]

2026 drilling yields massive extension to known high-grade strike

Plan view (collar) [see also Figures 2 and 3]

South extensions (aka Mainwood zone)

Per ASX:MEU 1 Oct 2026, Marmota announced that the Company's maiden drilling program to the south of the Greenewood gold discovery (Mainwood zone) is **yielding outstanding gold assays, featuring the discovery of contiguous high-grade gold, starting close to surface, featuring thick wide intercepts that extend deeper to fresh rock**.

The first assay results, from sections 1 to 15 (out of 83 sections), yielded **multiple contiguous high-grade gold intersections**, including: [all results are initial 4m composite assays]

- **4m @ 15 g/t gold** (from 24m downhole) in Hole 26MWRC177 [Part of **16m @ 4.2 g/t Au** from 24m]
- **4m @ 14 g/t gold** (from 32m downhole) in Hole 26MWRC014 [Part of **20m @ 3.1 g/t Au** from 32m]
- **4m @ 13 g/t gold** (from 28m downhole) in Hole 26MWRC013
- **4m @ 9.4 g/t gold** (from 64m downhole) in Hole 26MWRC173 [Part of **16m @ 2.7 g/t Au** from 56m]
- **4m @ 8.8 g/t gold** (from 32m downhole) in Hole 26MWRC144
- **4m @ 8.2 g/t gold** (from 24m downhole) in Hole 26MWRC051 [Part of **16m @ 2.2 g/t Au** from 24m]
- **4m @ 7.8 g/t gold** (from 28m downhole) in Hole 26MWRC059 [Part of **12m @ 2.7 g/t Au** from 28m]
- **4m @ 6.5 g/t gold** (from 32m downhole) in Hole 26MWRC067 [Part of **16m @ 2.2 g/t Au** from 28m]
- **4m @ 6.4 g/t gold** (from 36m downhole) in Hole 26MWRC142 [Part of **16m @ 2.1 g/t Au** from 28m]
- **4m @ 5.8 g/t gold** (from 28m downhole) in Hole 26MWRC131 [Part of **12m @ 2.2 g/t Au** from 28m]
- **4m @ 5.7 g/t gold** (from 28m downhole) in Hole 26MWRC117 [Part of **12m @ 2.1 g/t Au** from 28m]
- **4m @ 5.3 g/t gold** (from 32m downhole) in Hole 26MWRC132 [Part of **12m @ 2.0 g/t Au** from 32m]
- **8m @ 5.2 g/t gold** (from 32m downhole) in Hole 26MWRC141 [Part of **24m @ 2.1 g/t Au** from 24m]
- **4m @ 5.2 g/t gold** (from 48m downhole) in Hole 26MWRC168 [Part of **12m @ 2.3 g/t Au** from 44m]
- **8m @ 5.0 g/t gold** (from 48m downhole) in Hole 26MWRC149 [Part of **28m @ 2.1 g/t Au** from 36m]

Greenewood zone goes North

Per ASX:MEU 26 Oct 2026, Marmota **announced the discovery of contiguous high-grade gold at the extreme opposite end of the deposit**, dramatically extending the Greenewood zone to the north and to depth for the first time [Figures 5 & 6]. The discovery of high-grade contiguous gold both to the south AND north represents a **massive extension to the high-grade strike of the Greenewood gold discovery** [ASX:MEU 28 May 2026], together **doubling the known strike of identified high-grade gold zones**.

- **The program encountered high-grade gold in the majority of extensional holes along strike to the NE** [see Figures 5 & 6].
- The high-grade ore-body just keeps on going: it was extended out by 20 section lines along strike, encountered outstanding intersections such as **8m** @ **11.5 g/t gold** (incl 4m @ **15 g/t Au**) [Hole 26GWRC035] and **8m** @ **10 g/t gold** (incl 4m @ **18 g/t Au**) [26GWRC034] – see ASX:MEU 26 Oct 2026]. The high-grade ore body remains open ... with no sign yet of it diminishing or stopping.
- Marmota has now tracked high-grade gold, almost contiguously, from within 16m of surface, along strike, to a depth of 240m [see Figure 6].
- The deposit shows remarkable geological continuity and predictability.
- Multiple holes feature intersections containing over 40 gram-metres (product of Au g/t and intercept width): see page 6.
- The strike of Greenewood/Mainwood now extends over 2km in length, and it remains abundantly open.

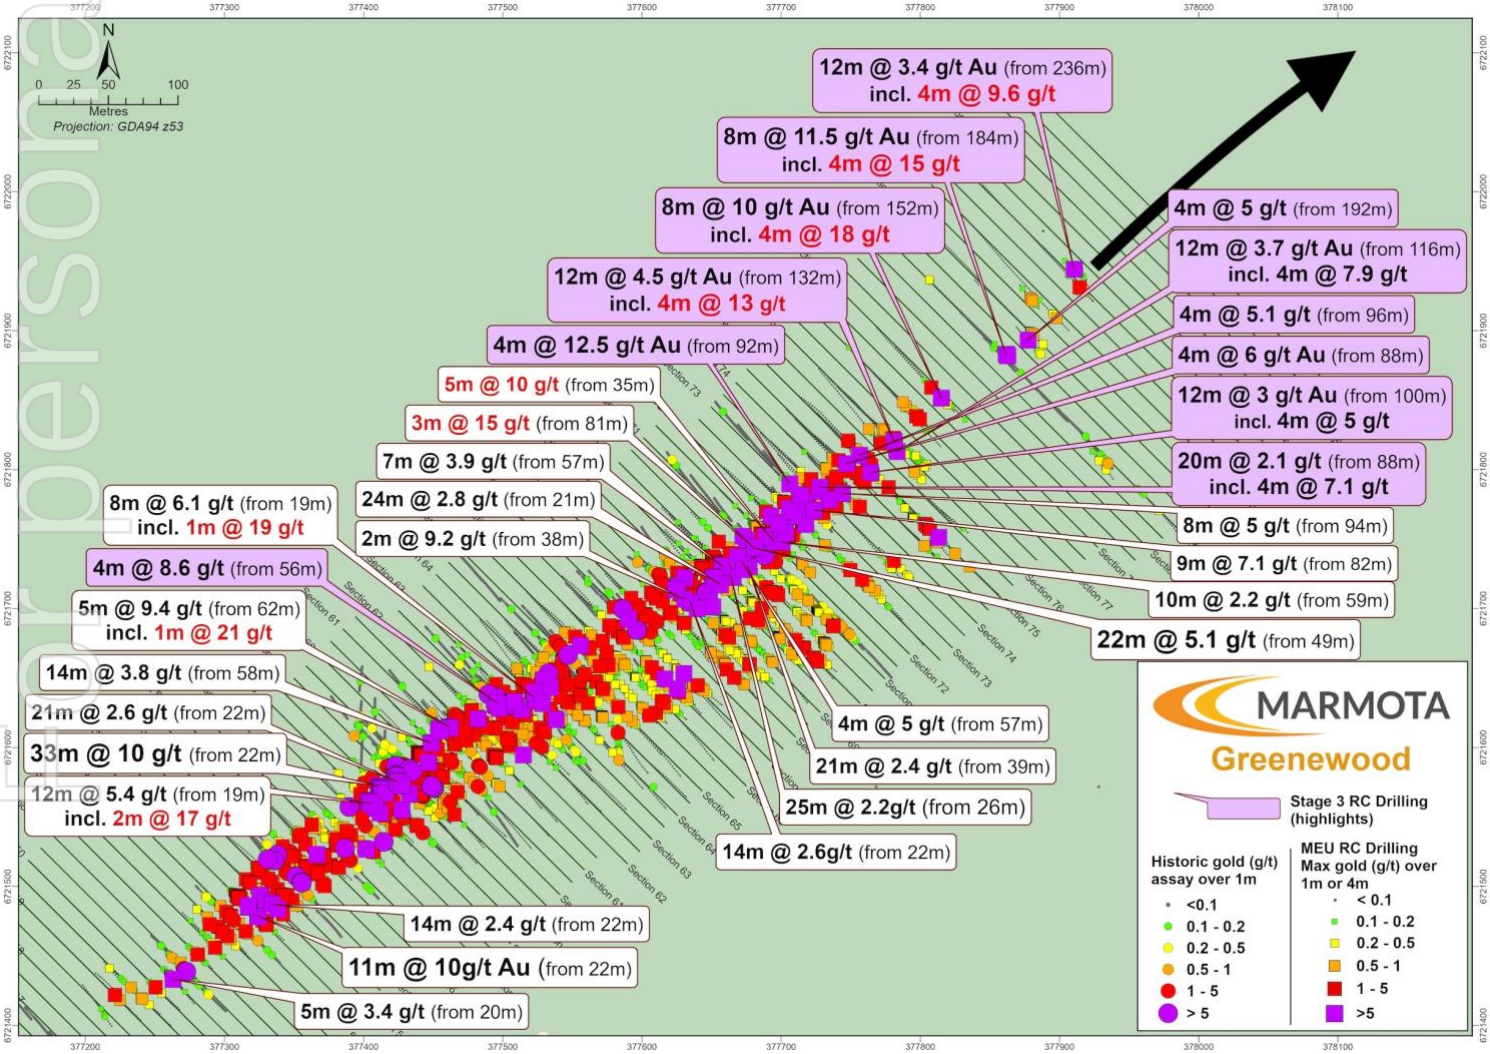

Figure 5: Contiguous high-grade gold strike extends north … and just keeps going

A video of drilling the Greenewood zone is available to view here:

https://youtu.be/uOOFp04uLiA

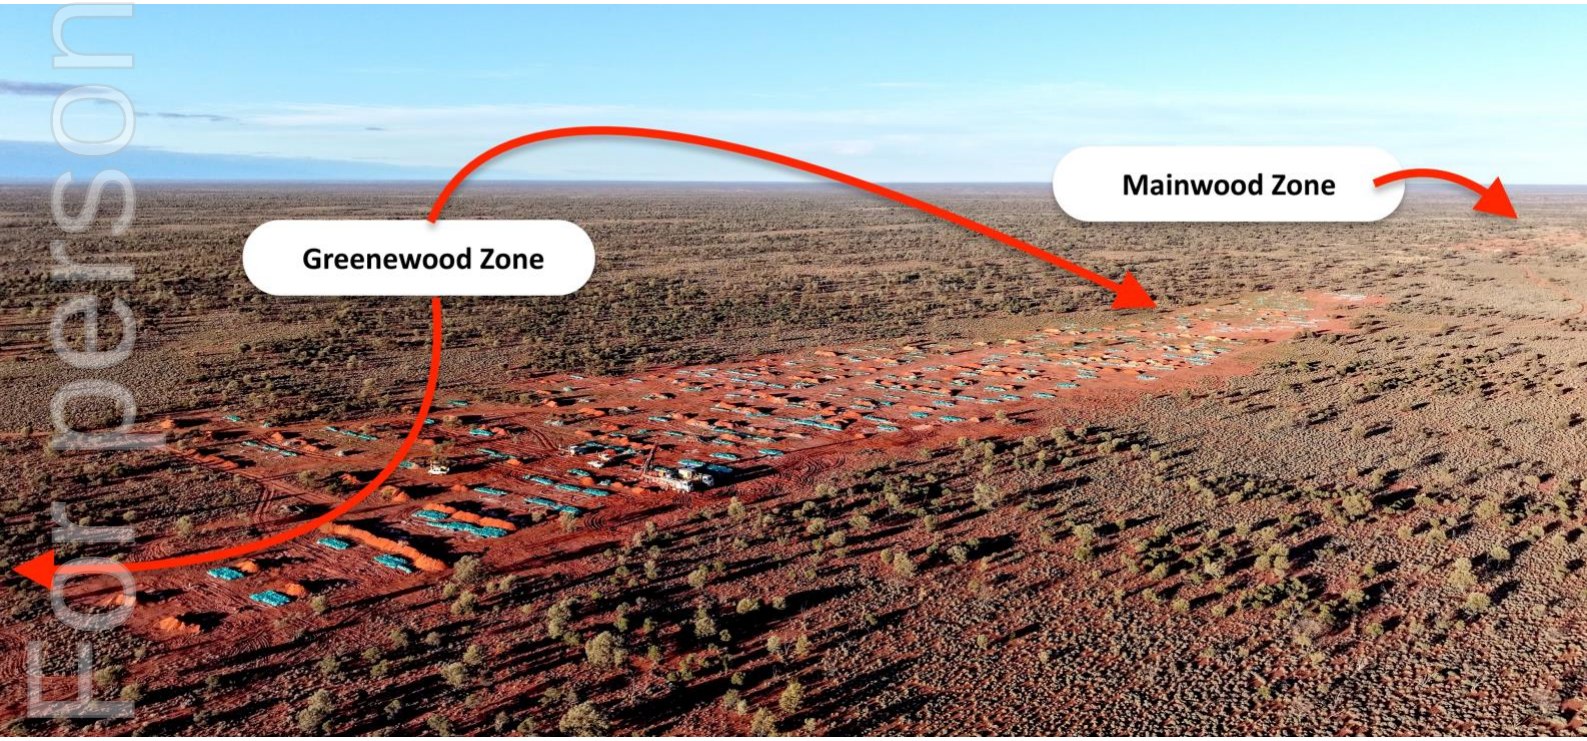

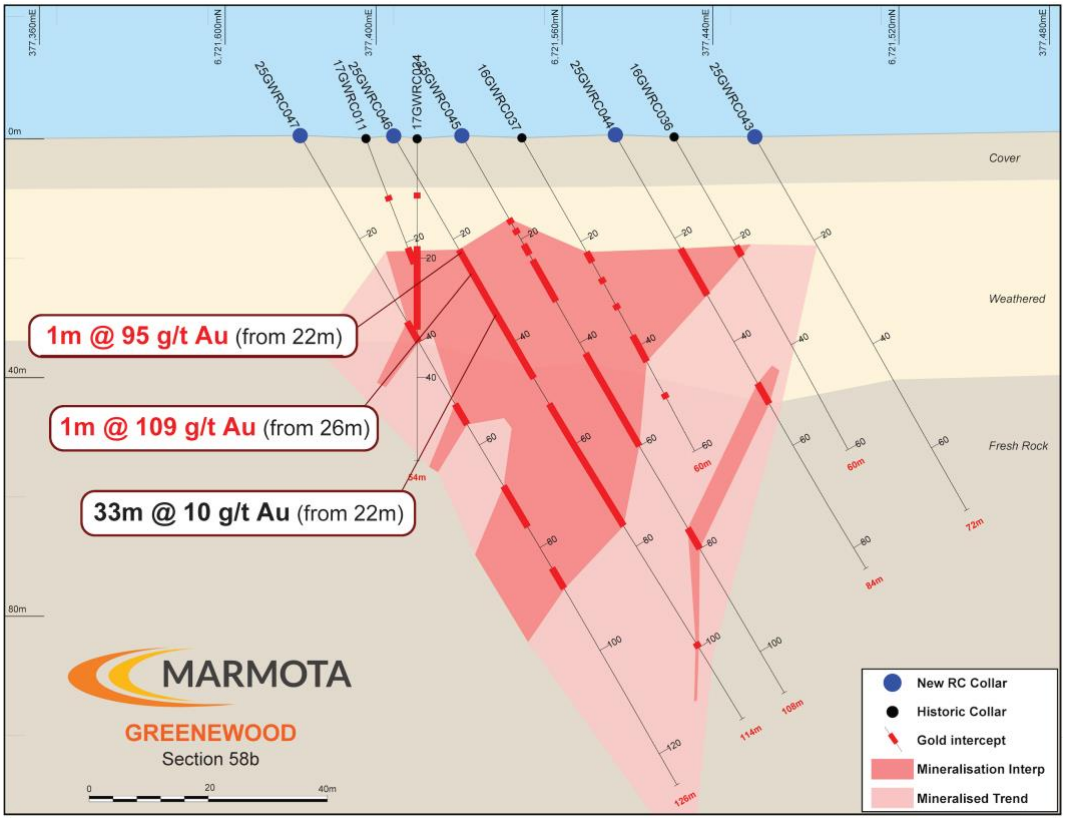

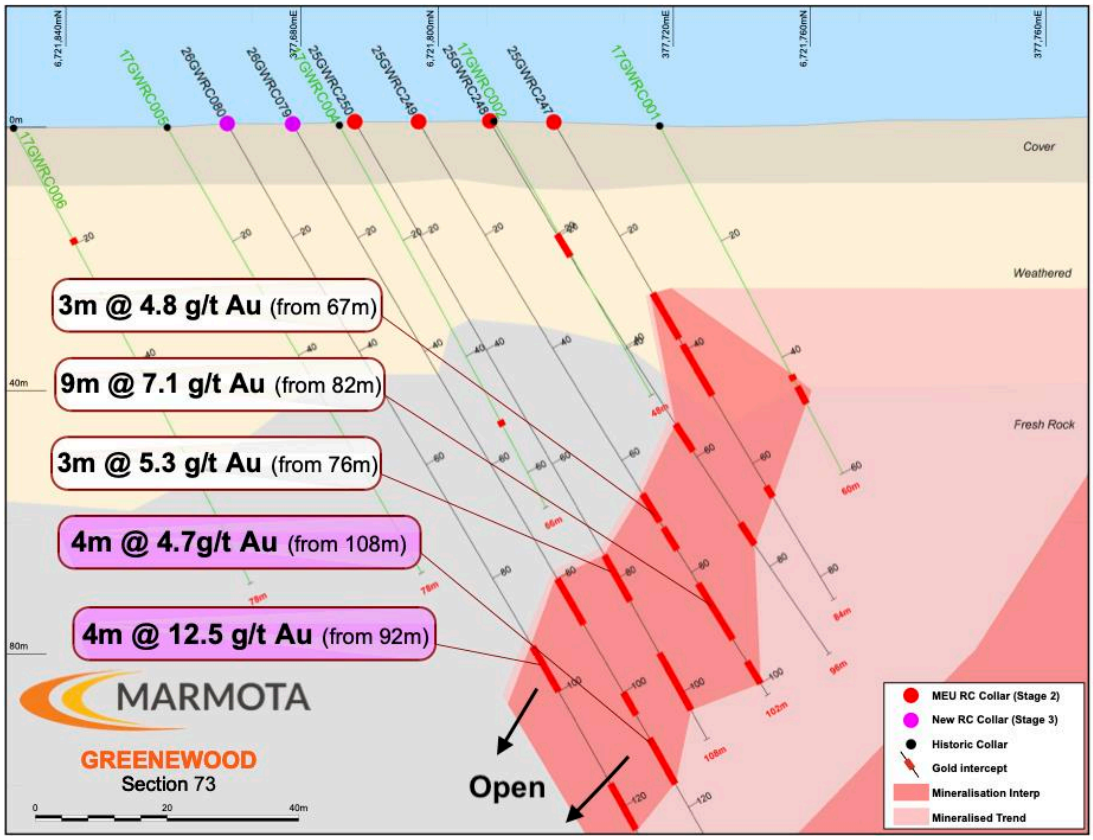

Figure 7: Greenewood Zone: Aerial view of part of Greenewood, looking from NE to SW.

The new extensions to the south (Mainwood) can be seen at the top of the diagram

Cross-section 58b

Cross-section 73

Figure 8: Sectional views

Mineralisation in the Greenewood zone features bonanza grade intersections, close to surface, including high grades at both sides of the deposit (cross-sections 58b and 73).

The results (see also Figure 5 and 6) show the continuity of the high grades across the deposit.

For personal use only

Key Points

- Greenewood and its extension to the south (known as Mainwood) is located ~35km NW of Marmota's flagship Aurora Tank gold deposit and ~ 30km NE of the Challenger Gold Mine [see Figures 9 and 10].

- Greenewood/Mainwood are part of the Golden Moon JV. Marmota has 90% ownership (via its 100% owned subsidiary Half Moon Pty Ltd). Ministerial Consent was granted in June 2025 [ASX:MEU 23 June 2025].

- Greenewood only had ~ 7,000 metres of RC drilling since its discovery, prior to Marmota's maiden program in July/August 2025 that established it to be a spectacular discovery.

- Mainwood historical drilling: There has been even less historical RC drilling in the Mainwood zone: only ~ 3,700m of RC drilling in the Mainwood zone since discovery for 53 holes with an average depth of 70m.[1]

- This was Marmota's maiden drilling program in the Mainwood zone and also represents the first drilling at Mainwood since 2018.

- The Mainwood zone was originally discovered through traditional regional calcrete sampling techniques – the same technique that was also used to discover Challenger in 1995 and other deposits in 'the Arc of Gold' in the Gawler Gold Project. Unlike the other deposits, Greenewood does not have a surface expression of calcrete (see the background green image in Figure 5) and so does not have a surface gold-in-calcrete anomaly.

- The discovery of Greenewood is thus an important milestone in the Gawler Gold discovery history as it identifies significant potential for further gold discoveries within the project area where traditional regional scale calcrete sampling is not a suitable tool to define a gold target and would have missed it.

- The proximity of Greenewood/Mainwood to Marmota's flagship Aurora Tank gold discovery (100% owned) creates obvious economies of scope and scale that are patently attractive [see Figure 9].

- Marmota's Aurora Tank gold discovery features outstanding gold intersections including multiple bonanza gold grades close to surface, superb recoveries in metallurgical testwork [ASX:MEU 28 April 2025], with excellent potential for low-cost, low capex open pit heap leach gold production.

For personal use only

[1] There have also been 24 AC and 134 RAB historical holes at Mainwood. However, the AC and RAB holes appear to have been too short, with an average depth of ~48m.

GAWLER GOLD

An Arc of gold deposits featuring bonanza grades

Marmota's Gawler gold project comprises an arc of gold deposits along the flanks of the major 'Y'-shaped gravity anomaly in the NW Gawler Craton. The '***Arc of gold***' deposits include (from east to west: see Fig. 9 and 10):

- Aurora Tank gold deposit
- Golf Bore
- Campfire Bore
- Greenewood
- Mainwood
- The Challenger Mine (which produced over a million ounces of gold: see Fig. 10)
- Monsoon and Typhoon (see Fig. 10)

Marmota owns all of the unmined gold deposits (either 100% or 90%).

The **maiden scoping study** for MEU Gawler Gold recently commenced: ASX:MEU 18 Nov 2025 . Drilling success from the maiden program and new Greenewood/Mainwood extensions will all be fed into the scoping study, to reflect the new discoveries, as rapidly as possible.

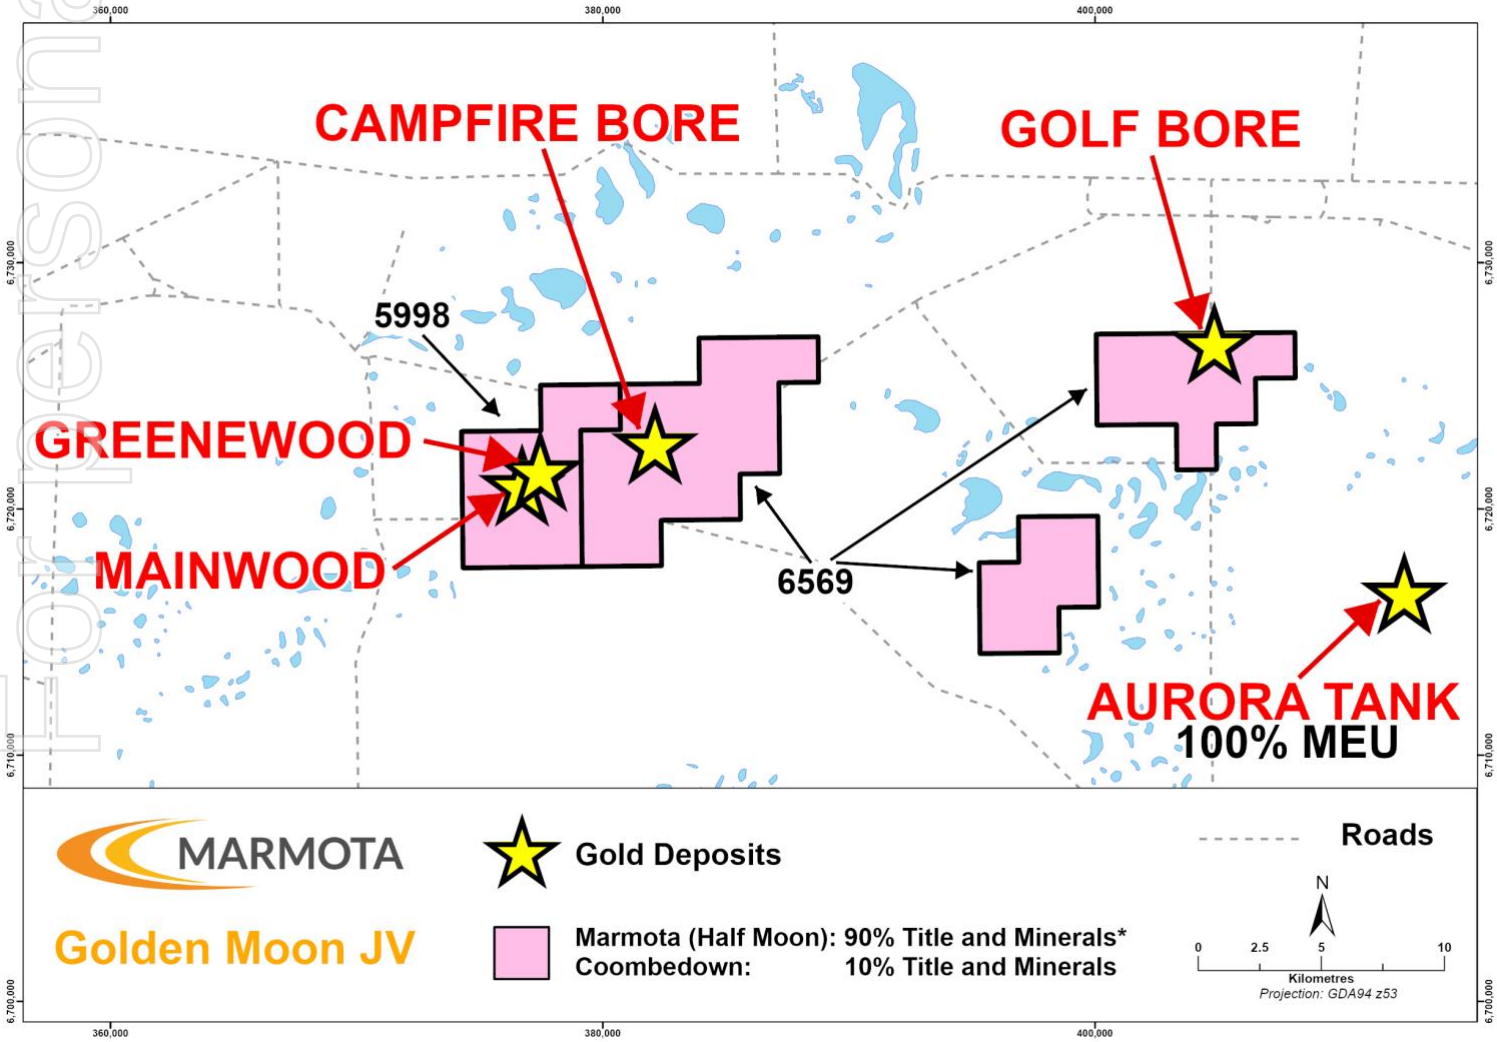

Figure 9: Location of Greenewood and Golden Moon JV deposits adjacent to Marmota's Aurora Tank gold deposit

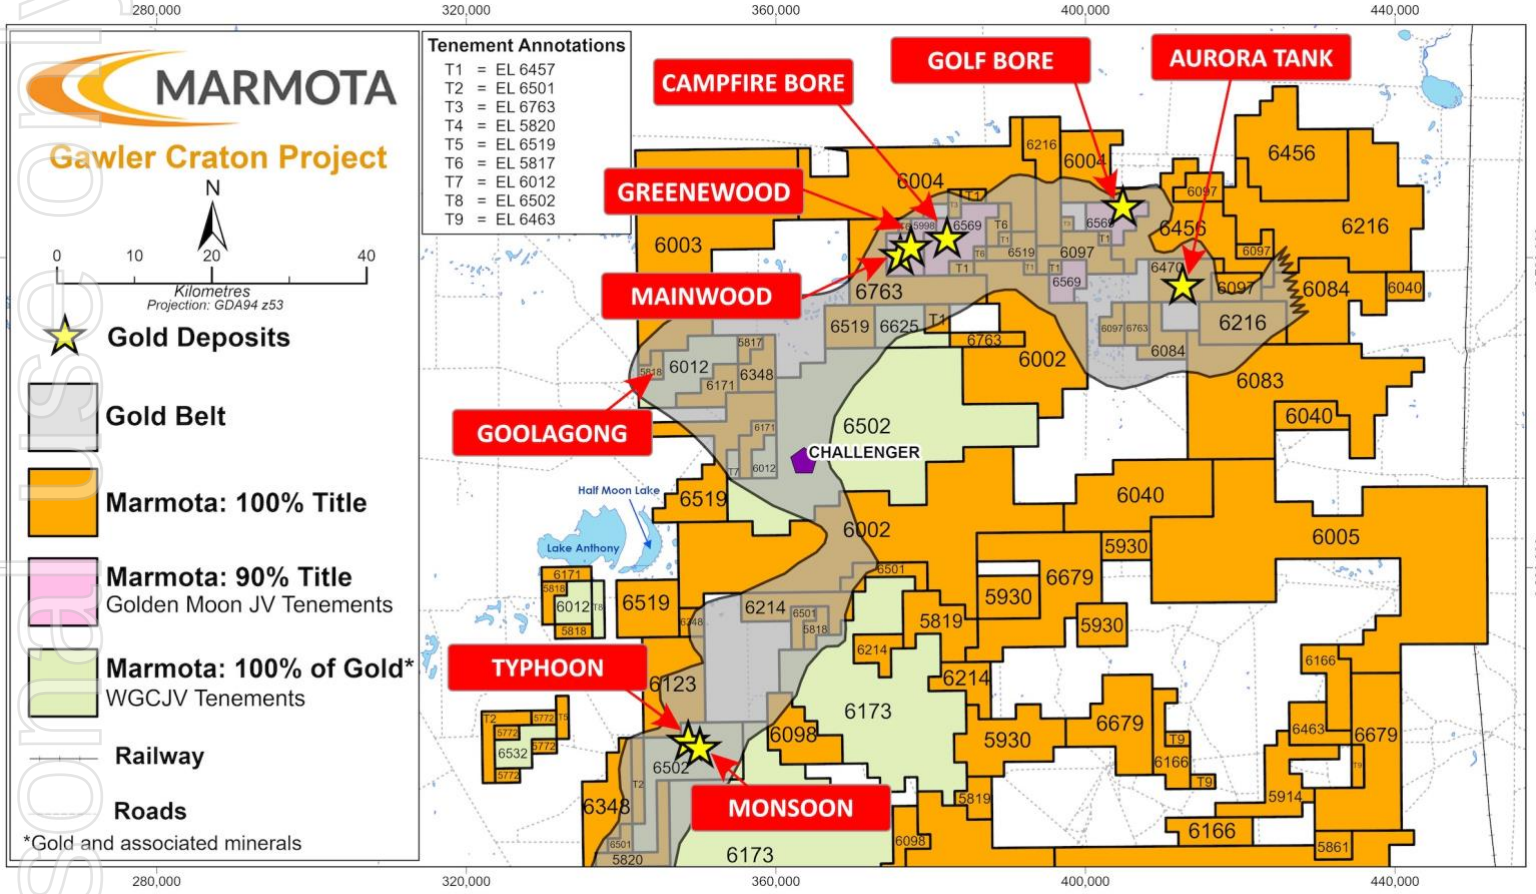

Figure 10: **Location of Greenewood/Mainwood, the Gawler Gold Belt and Marmota's gold deposits**

For personal use only

URANIUM

Marmota recently completed the drill program design for the Junction Dam re-start program consisting of 4 defined target areas [ASX:MEU 25 March 2026]. The program for Targets 1 to 3 were previously announced. The final 'Target 4' is known as Jasons and is located at the NW corner of Marmota's Junction Dam tenement immediately adjacent to Boss Energy's (ASX:BOE) Jason's resource. This recent work completes both the review and drill program design for the uranium re-start program.

For personal use only

Key Points

- The Target 4 review and program design has been completed using state gravity imagery to identify a potential **NE trending extension of the Yarramba Palaeovalley** that has **never been tested,** which has potential to contain a continuation of the uranium-carrying Jason's Palaeochannel, which transects the NW of the Marmota Junction Dam tenement EL6530 [see Figure 11].
- The adjacent Boss Energy owned Jason's Uranium Resource has a newly revised inferred resource of 13.3 Mlb at an average grade of 410ppm U_3O_8 [see ASX:BOE 19 Mar 2026].
- Most excitingly, the interpreted palaeochannel extension within Marmota's tenement remains untested and could be up to 3.7 kilometres in strike length.

DRILL PROGRAM DETAILS

- **24 Drill holes have been planned to test the Priority Palaeochannel Target located within the Yarramba Palaeovalley** which has been interpreted from state gravity to extend from Boss Energy's Jason Uranium resource and transect the NW of Marmota's tenement.
- **15 drill holes planned to test an area of interest** which has a series of untested depressions (**dark blue/ purple** in Figure 12) in the state gravity image which have similar geophysical outputs as the known Palaeovalleys located within the broader region on the Junction Dam project area.
- The drill program on the Marmota side of Jason's has been designed by uranium expert Mark Couzens based on the stratigraphic and mineralisation review [ASX:MEU 5 Feb 2024, 7 May 2024, 15 May 2024].
- Planned holes are to be tested using a Rotary Mud drill rig with downhole geophysical probes suitable for Uranium exploration.
- Drilling has been designed to test uranium mineralisation associated with sands of the lower Eyre Formation, which is known to be amenable to In-Situ Recovery (ISR) mining.
- Each completed drill hole will be geophysically logged using a gamma tool as well as resistivity down the length of the drill hole to determine:

1) lithology and correlating stratigraphy
2) identification of mineralised intervals to allow for the calculation of eU_3O_8 grades.

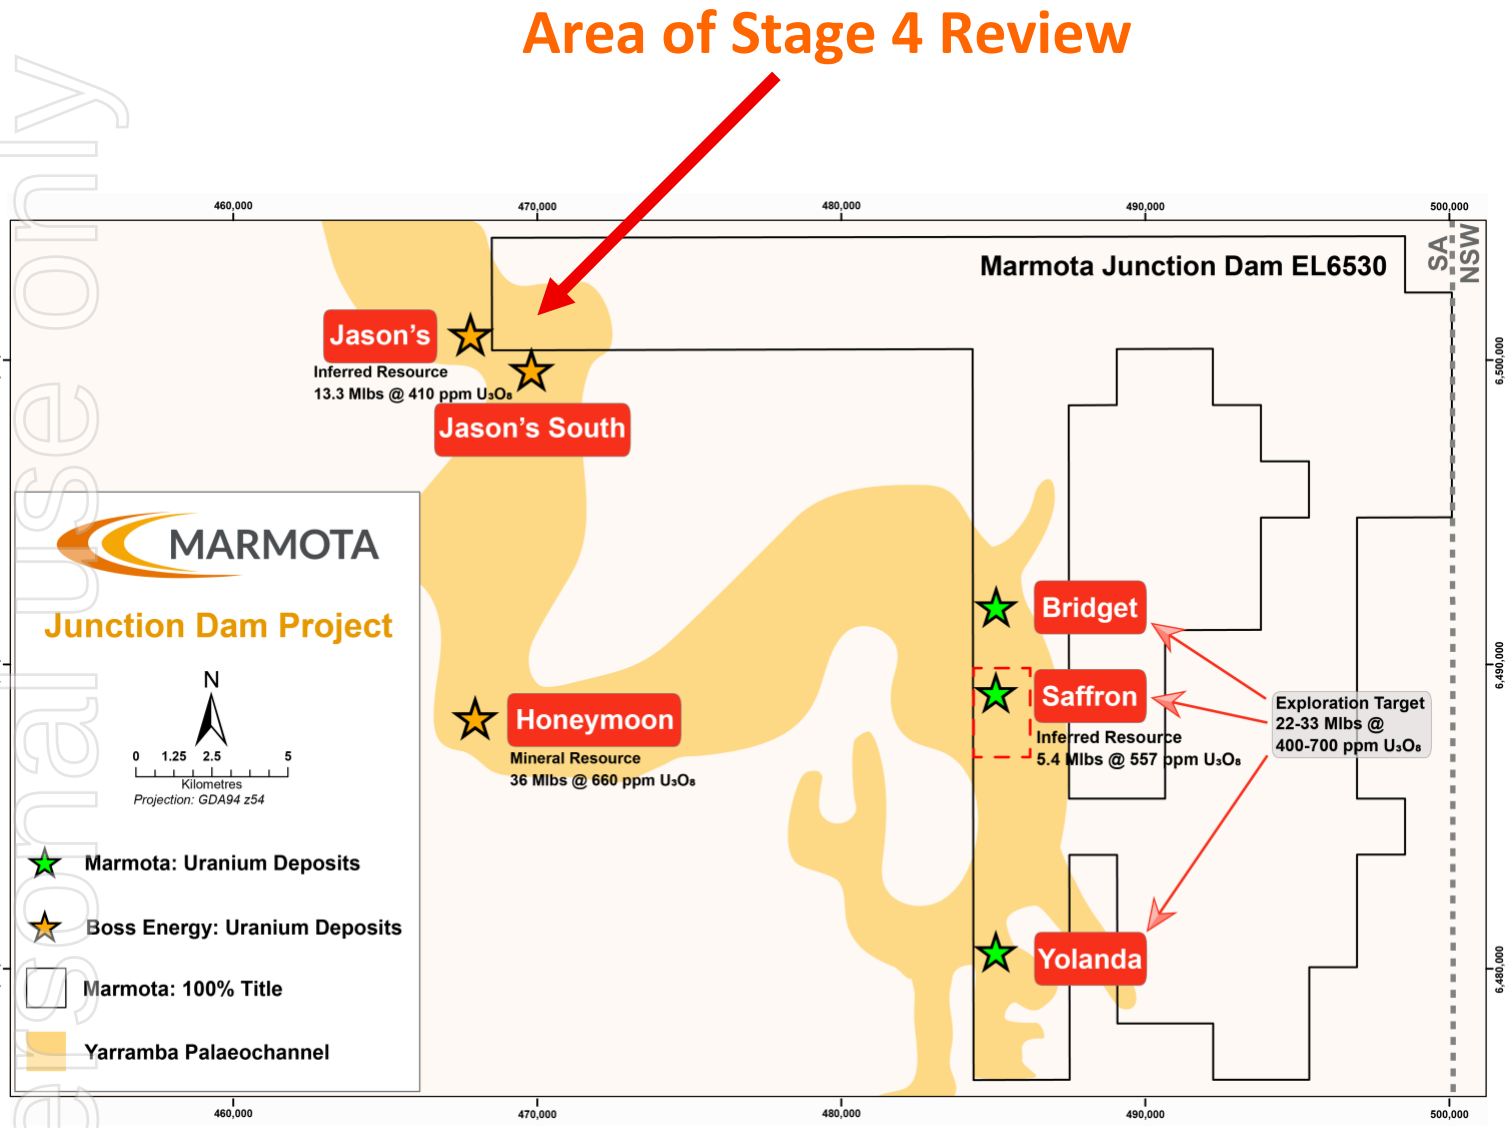

Figure 11: The Junction Dam uranium tenement (100% MEU) bookends both sides of the palaeochannel of the Boss Energy Ltd (ASX:BOE) Honeymoon uranium plant

Cautionary statement: The exploration target is that over the Saffron deposit with Bridget and Yolanda prospects: see ASX:MEU 20 Feb 2012, 9 July 2012, 17 July 2013. The potential quantity and grade of an Exploration Target is conceptual in nature. The estimates of Exploration Targets should not be misunderstood or misconstrued as estimates of Mineral Resources. There has been insufficient exploration to estimate a Mineral Resource (other than that already defined). It is uncertain if further exploration will result in the estimation of a Mineral Resource (other than that already defined).

AGM in Adelaide

The AGM will be held in Adelaide,
at 3pm (Adelaide time) on:

Thursday 19 November 2026 at:
BDO Level 19
30 Pirie Street
Adelaide SA 5000

For full detail, please see the **Notice of Meeting** [ASX:MEU 16 Oct 2026].
Shareholders are very warmly welcomed to attend the AGM.

What is next?

Gawler Gold

- **Greenewood gold: Stage 3 program of over 32,000m RC drilling completed after the quarter ended in mid-October**
- **4m composite results for any remaining holes still being processed**
- **First detailed 1m splits from the south (Mainwood zone), and the far north (Greenewood zone)**
- **Results to feed into Gawler Gold Scoping study**

Titanium

- **Heavy Mineral (HM) mineral assemblages**
- **Project attracting significant industry interest**

Uranium

- **Program fully designed + fully funded: MEU raring to go**
- **Awaiting Native Title clearances**

For personal use only

ASX Listing Rule 5.3

Pursuant to ASX Listing Rule 5.3, the Company's expenditure during the quarter was focused on exploration and evaluation activities ($1,632K on exploration). Details are provided in the attached Appendix 5B. During the quarter, related party expenses were: executive directors salaries ($58K), non-executive director fees ($9K) and superannuation ($8K).

Competent Persons Statement

Information in this Release relating to Exploration Targets, Exploration Results and Mineral Resources is based on information compiled by Aaron Brown who is a Member of The Australian Institute of Geoscientists and Executive Director of Exploration at Marmota. He has sufficient experience relevant to the styles of mineralisation and types of deposits under consideration and to the activities being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves." Mr Brown consents to the inclusion in this report of the matters based on this information in the form and context in which they appear.

Where results from previous announcements are quoted, Marmota confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

For the purpose of ASX Listing Rule 15.5, the Board has authorised for this announcement to be released.

About Marmota Limited

Marmota Limited (ASX: MEU) is a South Australian mining exploration company focused on gold, titanium and uranium. The Company's flagship gold project, Gawler Gold, is yielding outstanding results in the highly prospective Gawler Craton in the Woomera Prohibited Defence Area. The Company's flagship uranium resource is at Junction Dam adjacent to the Honeymoon mine.

7.5	**Unused financing facilities available at quarter end**	
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	67
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(1,632)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(1,565)
8.4	Cash and cash equivalents at quarter end (item 4.6)	13,259
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	13,259
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	8.5

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: Not applicable

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: Not applicable

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Not applicable

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 29 October 2026

Authorised by: LN Askham-Levy

Lisa Askham-Levy: CFO and Company Secretary

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
