ASX: SRJ

SRJ penetrates Middle Eastern Asset Integrity Market, securing a significant BoltEx® order for Offshore Energy major

For personal use only

Highlights:

- **US$301k (A$430k) BoltEx® order secured** - SRJ has received a purchase order for its proprietary BoltEx® flange integrity technology for deployment by a major Middle Eastern offshore energy operator.
- **First significant Middle East BoltEx® deployment -** Establishes an important regional technology reference, supporting wider adoption across offshore and onshore energy infrastructure.
- **Payment security** - The purchase order provides for 100% of the contract value to be payable in advance of delivery to the end operator, comprising a 30% advance payment and the remaining 70% to be paid immediately upon custody transfer.
- **International strategy progressing** - The award further expands SRJ's regional customer references and supports its strategy to build an international Asset Integrity Maintenance business.

SRJ Technologies Group Plc (ASX: SRJ) ("SRJ" or the "Company") is pleased to announce that it has secured a purchase order valued at approximately US$301k (A$430k) from an established Middle Eastern procurement services company for the supply of its proprietary BoltEx® flange integrity technology for the sole use by a major regional offshore energy operator.

The counterparty is an established Middle Eastern engineering and procurement services business operating within a diversified regional group with a longstanding presence in the energy sector.

The award represents SRJ's first significant BoltEx® deployment in the Middle East and establishes an important regional technology reference as the Company seeks to expand adoption of its proprietary solutions across offshore and onshore energy infrastructure.

BoltEx® supports the integrity of critical bolted flange connections within pressure containment systems, contributing to safe and reliable operations and the management of mechanical integrity across operating facilities.

The purchase order provides for 100% of the contract value to be payable in advance of delivery to the end operator, comprising a 30% advance payment and the remaining 70% payable immediately upon custody transfer, evidenced by an Inspection Release Note (IRN). Payment is therefore not dependent on delivery to the end operator or subsequent installation and commissioning. The order otherwise contains customary commercial terms applicable to the supply and delivery of the technology.

Advancing SRJ's International Asset Integrity Strategy

The award represents further progress in SRJ's Middle East expansion strategy, announced on 1 May 2026. Alongside the Company's recently announced commencement of field operations under its multi-year Dubai Petroleum agreement, the order demonstrates continued progress in expanding SRJ's regional asset integrity activities.

The deployment provides an important regional reference for SRJ's proprietary technology, which the Company intends to leverage to pursue further BoltEx® opportunities across Middle Eastern offshore and onshore energy infrastructure.

Commenting on the award, **George Gourlay, Non-Executive Chair of SRJ**, said:

"T*his order represents an important commercial reference for BoltEx® in the Middle East. It demonstrates our ability to combine SRJ's regional asset integrity capability with proprietary technology and gives us a platform from which to pursue further deployments across the region."*

The identities of the procurement counterparty, end operator and deployment location have been withheld for commercial confidentiality reasons.

The Company does not consider the identities of the counterparty or end operator, or the specific deployment location, to be information that a reasonable person would expect to have a material effect on the price or value of the Company's securities.

The Company considers that these details are not material to investors' assessment of the award, with the contract value, scope, payment arrangements and strategic significance disclosed above.

– Ends –

This announcement has been authorised for release by the Board.

ABOUT SRJ TECHNOLOGIES

SRJ delivers integrated asset integrity maintenance, engineering and technology-enabled services to the energy, industrial and maritime industries. Asset integrity maintenance involves the provision of embedded site-based maintenance, advanced inspection, predictive monitoring and repair solutions designed to prevent asset failures and extend asset life. The services are focused on maintaining and assuring the integrity of critical mechanical and pressure containment systems, supporting safe, reliable and compliant operations across operating facilities. SRJ's asset integrity and maintenance services support asset owners in the development, implementation and execution of long-term lifecycle integrity strategies, including regulatory compliance requirements applicable to critical mechanical and pressure containment systems.

Remote inspection services are provided utilising advanced robotics and custom UAV technologies. SRJ's range of containment management solutions enable customers to assure the integrity of new and ageing assets subject to ever more demanding regulatory pressures.

By providing advanced robotic and UAV systems, ACE (an SRJ Group company) is revolutionising asset inspection in terms of minimising human risk and providing accurate and repeatable inspection data. ACE can inspect the previously un-inspectable, delivering asset integrity assurance and management to the Energy and Marine industries. ACE has achieved accreditation with all the major Marine Class Societies.

SRJ's range of asset integrity products and solutions have gained industry approval across the energy sector and are now in use across the world. SRJ's products are designed to maintain and assure the integrity of pressure containment systems and therefore play an important role in the overall integrity of operating facilities.
