HIGHLIGHTS FROM SEPTEMBER 2026 QUARTER

ZOPKHITO ANTIMONY-GOLD PROJECT

- Diamond drilling and underground coring continue as exploration advances the Zopkhito Antimony-Gold Project towards a maiden JORC-compliant resource
- Results from two batches of assays confirm high-grade antimony and gold mineralisation, with significant intersections from surface drilling including:
- DD26ZOP006: **5.61m @ 3.31g/t Au and 4.28% Sb** from 74.33m, including **3.89m @ 6.12% Sb from 75.05m**
- DD26ZOP001: **1.8m @ 11.09g/t Au and 3.56% Sb** from 52.6m, including **1.15m @ 10.86g/t Au and 5.51% Sb**
- DD26ZOP002: **2.83m @ 3.26g/t Au and 5.72%** Sb from 43.99m, including **1.59m @ 5.0g/t Au** from 45.23m and **0.61m @ 15.3% Sb** from 44.62m
- DD26ZOP004: **6.74m @ 4.71g/t Au and 0.88% Sb** from 74.42m, including **2.68m @ 7.06g/t Au and 1.41% Sb,** and **0.76m @ 11.65g/t Au and 2.65% Sb** from 80.4m
- Additional sampling identified a previously unrecorded gold-bearing zone interpreted as a mineralised fault, including **1.29m @ 7.11g/t Au** from 44.78m
- Underground drilling returned significant mineralisation at Vein 50, which sits outside the historic foreign resource estimate. Results included **4.38m @ 3.54g/t Au** and **1.91m @ 3.84g/t Au and 1.18% Sb**
- A second surface rig commenced post-quarter to accelerate resource definition drilling
- Metallurgical sample collection commenced, with optimisation test work scheduled to begin in Q4 2026
- Ongoing drilling, geological modelling and independent technical reviews to support preparation of a maiden JORC-compliant Mineral Resource Estimate (**MRE**)

CORPORATE

- Funds raised during the quarter from two placements, comprising:
  - July 2026 - $1.6 million at $0.004 per new share with one-for-four free attaching option
  - August 2026 - $2.4 million at $0.006 per new share with one-for-four free attaching unlisted option, anchored by a $1.8m investment from a Hong Kong based investor
- Cash on hand at end of quarter is $2.03M.

Krakatoa Resources Limited (**ASX: KTA**) ("**Krakatoa**" or "**the Company**") is pleased to provide the following summary of activities for the three-month period to 30 September 2026.

During the quarter, surface and underground drilling advanced at the Zopkhito Antimony-Gold Project, with results received from the first two batches of assays which confirmed high-grade antimony and gold mineralisation. Work is progressing to support preparation of a maiden JORC-compliant Mineral Resource Estimate.

ZOPKHITO ANTIMONY-GOLD PROJECT

Zopkhito contains a **Foreign Resource Estimate of 225Kt @ 11.6% Sb for a contained 26,000 tonnes of antimony and 7.26Mt @ 3.7g/t for 815,119oz of gold**[1]. The Project benefits from extensive historical exploration, including approximately 27km of underground exploration adits, more than 15,000 historical channel and geochemical samples, and prior LiDAR and IP geophysical surveys.

2026 Exploration Program

During the quarter, the Phase 2 exploration program advanced targeting known antimony and gold veins within the historical workings. The 2026 resource definition drilling program is focused on five of the 17 known mineralised veins (see Figure 1), integrating historical datasets with new drilling to support geological modelling, validate historical high-grade mineralisation, define the extent of the quartz-stibnite and gold system, and progress a maiden JORC-compliant Mineral Resource Estimate while identifying opportunities for future resource growth.

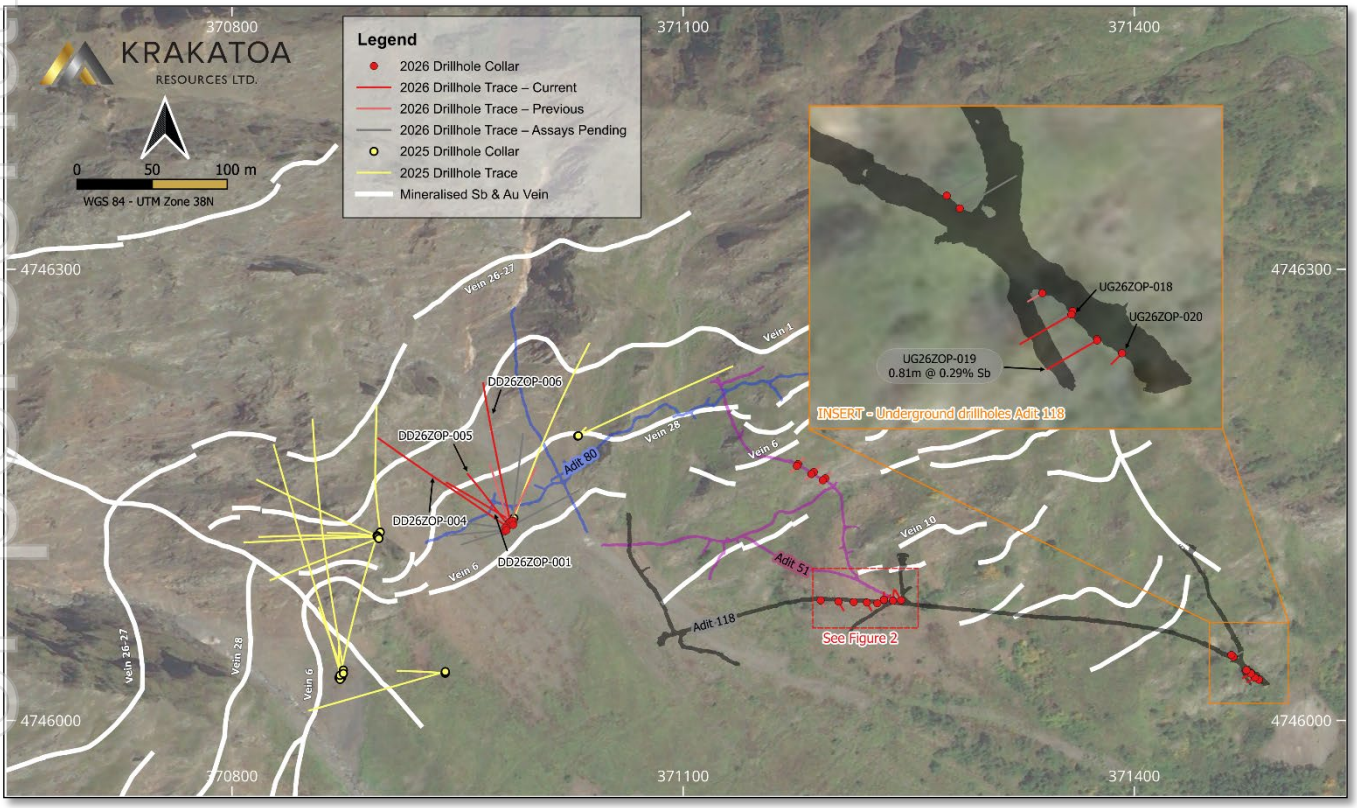

Figure 1 *Plan view showing the location of the drill holes and mapped surface mineralised quartz antimony veins*

[1] Cautionary statement: The foreign estimate and foreign exploration results in this announcement were first released by the Company in an announcement titled "Option to Acquire Major Antimony and Gold Project" on 9 December 2024 ("Announcement") and are not reported in accordance with the JORC Code 2012. A competent person has not done sufficient work to classify the foreign estimate as a Mineral Resource, or disclose the foreign exploration results, in accordance with the JORC Code 2012. It is uncertain that following evaluation and/or further exploration work the foreign estimate will be able to be reported in accordance with the JORC Code 2012, and it is possible that following further evaluation and/or exploration work that the confidence in the reported foreign exploration results may be reduced when reported under the JORC Code 2012. The Company confirms that the supporting information provided in the Announcement continues to apply and has not materially changed.

For personal use only

Exploration Results

During the quarter, the Company released results from the first two batches of assays from the 2026 Exploration Program. Full results can be found in the ASX releases dated September 8 2026 and September 29 2026.

Surface Drilling

Surface diamond drilling targeted the shallow dipping, high grade Vein 6 that is generally flat lying with a NE-SW strike. It is historically recognised as one of the more mineralised veins in the 60 plus veins in the Zopkhito system. The first two assay batches confirmed high-grade gold and antimony mineralisation, with individual samples returning up to 17.1g/t Au and 15.3% Sb.

Key intercepts from the first two batches of assays (Figure 2) from surface drilling include:

- DD26ZOP006: **5.61m @ 3.31g/t Au and 4.28% Sb** from 74.33m, including **3.89m @ 6.12% Sb** from 75.05m (Figure 3)
- DD26ZOP001: **1.8m @ 11.09g/t Au and 3.56% Sb** from 52.6m, including **1.15m @ 10.86g/t Au and 5.51% Sb**
- DD26ZOP002: **2.83m @ 3.26g/t Au and 5.72%** Sb from 43.99m, including **1.59m @ 5.0g/t Au** from 45.23m and **0.61m @ 15.3% Sb** from 44.62m
- DD26ZOP004: **6.74m @ 4.71g/t Au and 0.88% Sb** from 74.42m, including **2.68m @ 7.06g/t Au and 1.41% Sb,** and **0.76m @ 11.65g/t Au and 2.65% Sb** from 80.4m

In addition to V6, a previously unrecorded gold enriched vein was discovered within drill holes DD26ZOP001 and DD26ZOP004. This system is interpreted as a fault plane which has been enriched with gold (Figure 2).

- DD26ZOP004: **1.29m @ 7.11g/t Au** from 44.78m
- DD26ZOP001: **1.2m @ 2.3g/t Au** from 39.65m

During the quarter, surface drilling expanded to a two-shift (24-hour) operation, with a second surface rig commencing post-quarter to accelerate the drilling program.

Surface drilling has moved to the West zone, with at least eight holes planned to test a series of four to six stacked near-vertical veins. These veins form part of the historical foreign resource model and have not been drill tested previously by Krakatoa.

Underground Drilling

During the quarter, underground coring tested the lower extent of Vein 10 from Adit 51 and Veins 50 and 61 from Adit 118 on the lower eastern flank of the system. Veins 50 and 61 are not included in the historical foreign resource estimate, providing targets for potential resource growth.

The first assay batch covered seven holes from Adit 51 and three from Adit 118, while the second batch covered nine additional holes from Adit 118. Samples were selected from geologically identified stibnite, quartz and associated sulphide veining, with sample lengths ranging from 0.2m to 1.5m according to geological boundaries and vein characteristics.

Figure 4 *Photograph of 44cm long drill core from hole DD26ZOP-002 (interval 44.62 – 45.23m) which assayed at 15.3% Sb and 0.9g/t Au*

Underground drilling returned significant gold and antimony mineralisation at Vein 50 (Figure 5), with standout intersections:

- UG26ZOP015: **4.38m @ 3.54g/t Au** from 2.99m, including
  0.5m @ 13.75g/t Au and 2.85% Sb from 3.94m
- UG26ZOP012: **1.91m @ 3.84g/t Au and 1.18% Sb** from 4.69m, including
  0.27m @ 8.26g/t Au and 7.49% Sb from 4.69m
- UG26ZOP009: **1.60m @ 1.18g/t Au and 1.45% Sb** from 0.84m

For personal use only

Vein 10 returned gold mineralisation with intermittent antimony, with best results including:

- UG26ZOP005: **0.67m @ 4.51g/t Au** from 7.60m
- UG26ZOP003: **0.67m @ 3.18g/t Au** from 6.02m
- UG26ZOP001: **1.66m @ 1.09g/t Au** from 3.86m

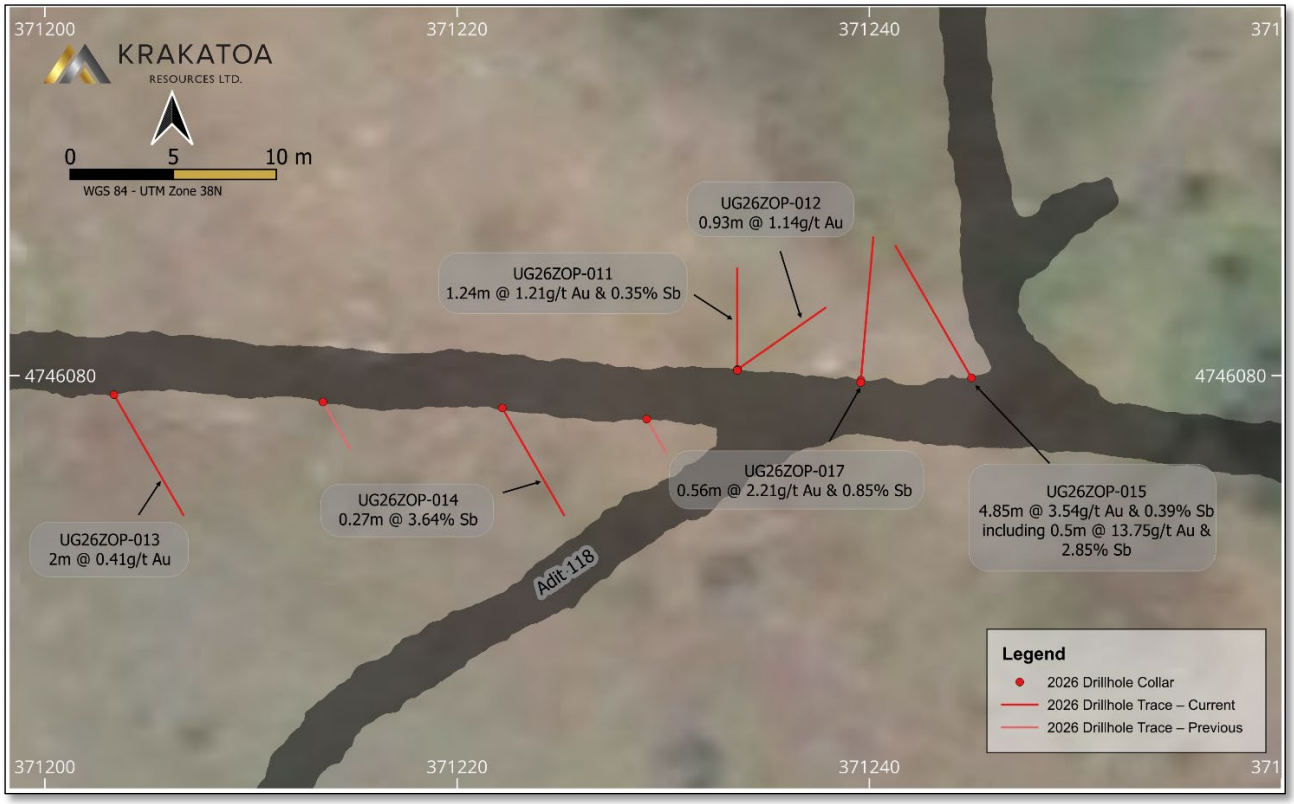

Figure 5 *Map of UG drill holes with significant grades – adit 118 V50 zone*

Independent Review

Specialist mining and resource consultants were onsite in July, completing a detailed review of drill core, the historical core library and underground workings (see Figures 6 and 7), with findings to support geological interpretation, resource modelling, drill planning and future mine development studies.

Technical Programs

During the quarter, metallurgical sample collection commenced for planned sensor based ore sorting evaluation and flotation optimisation work for antimony and gold recovery studies, as part of the broader development strategy for Zopkhito.

Environmental baseline studies and permitting activities continue concurrently, to provide further support for future project advancement.

The Company is also undertaking a review of historical exploration datasets beyond the current foreign resource estimate to identify opportunities for future drill testing.

Future Plans

Surface and underground coring continue with a focus on expanding coverage over the vein system. The third, fourth and fifth batches have been received by the laboratory with further results expected in November.

With multiple workstreams advancing, assays pending from underground and surface drilling, metallurgical programs and technical studies progressing, the Company expects a steady pipeline of operational updates and technical milestones from Zopkhito throughout the remainder of 2026 and into 2027.

Background

The Zopkhito Antimony-Gold Project covers an area of 1,779 hectares in the Racha area of Georgia and is held under a valid exploration-mining licence until March 2042. Krakatoa holds an exclusive option to acquire up to an 80% legal and beneficial interest in the granted mining licence covering the Zopkhito Project.

Situated approximately 170km from Kutaisi (Georgia's second largest city), the Project benefits from rail infrastructure linking to western ports (Poti and Batumi) on the Black Sea. The closest town is a village called Ghebi approximately 20km from site (see Figure 8).

Zopkhito was first discovered in 1929 and explored by the Soviet Government until 1979, with additional exploration undertaken during 2006-2019.

Georgia

Positioned as a trade gateway between Europe and Asia, Georgia is regarded as an investor-friendly nation. With a population of 3.7 million, the country has achieved remarkable economic milestones. Georgia provides duty-free access to approximately 2.8 billion people through its network of Free Trade Agreements.

Georgia continues to rank among the world's most attractive mining investment jurisdictions, supported by an investor-friendly regulatory framework, established mining history and strategic access to European and Asian markets. Georgia was ranked 7th in the world by the World Bank for ease of doing business.[2]

MT CLERE PROJECT

No new material exploration activities for Mt Clere were carried out during the September 2026 quarter. Several licence areas were reduced to focus on the priority targets as these areas are considered non-core.

CORPORATE

Capital Raising

During the quarter, the Company completed two placements to fund ongoing exploration at Zopkhito.

In July, Krakatoa completed a placement of 400,000,000 fully paid ordinary shares at $0.004 per share to raise approximately $1.6 million. Participants were entitled to one free-attaching unlisted option for every four shares subscribed for, exercisable at $0.01 and expiring on 29 September 2028.

In August, Krakatoa completed a placement of 400,000,000 fully paid ordinary shares at $0.006 per share to raise $2.4 million before costs, anchored by a $1.8 million investment from a Hong Kong-based private investor. Participants were entitled to one free-attaching unlisted option for every four shares subscribed for, exercisable at $0.01 and expiring on 29 September 2028.

General Meeting

The Company advised that all resolutions put to shareholders at the General Meeting held on 6 October 2026 were passed. Full voting details can be found here: Results of General Meeting

Annual General Meeting

The Company advised that the Annual General Meeting will be held on Friday 27 November.

Cash Position

As at 30 September 2026, the Company had $2.03 million cash on hand. The Company continues to evaluate complementary critical minerals opportunities.

Exploration

Under ASX Listing Rule 5.3.1, Exploration and Evaluation Expenditure for the September Quarter totaled $2,298K, largely comprising drilling related costs for Zopkhito.

ASX Listing Rule 5.3.2: There were no mining production and development activities during the Quarter.

Tenements held by the company, at the end of the quarter are presented in Appendix 1.

Related Party Payments

In accordance with item 6 of the Company's Appendix 5B – Quarterly Cashflow Report for the Quarter ended 30 September 2026, payments of $73K were made to related parties relating to existing remuneration arrangements (director fees and superannuation).

Disclaimer

Forward-looking statements are statements that are not historical facts. Words such as "expect(s)", "feel(s)", "believe(s)", "will", "may", "anticipate(s)" and similar expressions are intended to identify forward-looking statements. These statements include, but are not limited to statements regarding future production, resources or reserves and exploration results. All of such statements are subject to certain risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: (i) those relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits and conclusions of economic evaluations, (ii) risks relating to possible variations in reserves, grade, planned mining dilution and ore loss, or recovery rates and changes in project parameters as plans continue to be refined, (iii) the potential for delays in exploration or development activities or the completion of feasibility studies, (iv) risks related to commodity price and foreign exchange rate fluctuations, (v) risks related to failure to obtain adequate financing on a timely basis and on acceptable terms or delays in obtaining governmental approvals or in the completion of development or construction activities, and (vi) other risks and uncertainties related to the Company's prospects, properties and business strategy. Our audience is cautioned not to place undue reliance on these forward-looking statements that speak only as of the date hereof, and we do not undertake any obligation to revise and disseminate forward-looking statements to reflect events or circumstances after the date hereof, or to reflect the occurrence of or non-occurrence of any events.

Competent Person's Statement

The information in this announcement is based on, and fairly represents information compiled by Mark Major, Krakatoa Resources CEO, who is a Member of the Australasian Institute of Mining and Metallurgy and a full-time employee of Krakatoa Resources. Mr Major has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he has undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Major consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

Previously announced ASX material references and information relating to exploration results and Foreign Mineral Resource estimations are publicly available on the Company website and the ASX. The information in this report that relates to exploration results previously announced by the Company have been extracted from the Company's announcements to the ASX from 9 December 2024 to the 28 October 2026. The Company confirms that it is not aware of any new information that materially affects the information included in the original market announcements.

If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

For personal use only

8.	Estimated cash available for future operating activities	$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(2,548)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(2,548)
8.4	Cash and cash equivalents at quarter end (item 4.6)	2,032
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	2,032
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	0.80

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: Yes, throughout the next quarter the Company will continue its focus on exploration at the Zopkhito Antimony-Gold Project

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: Yes, the Company has raised a $4.0M (before costs) in this financial period to date, and will continue to raise funds as and when necessary for exploration at the Zopkhito Antimony-Gold Project

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes, for the reason noted in 8.8.2 above

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: **30 October 2026**

Authorised by: **By the Board**

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
