Paynes Find Project – Western Australia

During the quarter, Oakajee reported assay results for the Aircore (AC) drilling completed in August 2026 at the Paynes Find Gold Project in Western Australia (refer ASX announcement 28 September 2026). A total of 38 drill holes were completed to follow up and extend previously intersected gold mineralisation at the Paynes Find South target (refer ASX Announcements 19 February 2024 and 8 October 2025). The program revealed a gold mineralised zone trending NNW for 1,000m strike. This zone is along a NNW trending magnetic structure concealed beneath about 20m of lake clay and laterite gravel. The mineralisation is currently open along strike to the NW and SE (Figure 2).

A total of 38 drill holes (Table 2) were completed for 1,928m to follow up previous AC drilling that intersected anomalous gold (Figure 2).

Drilling was on 50m to 200m spaced lines with drill collars along the lines spaced 50m or 25m apart. All the drillholes were angled at -60 degrees to the east and drilled to blade refusal.

The best results from the current drilling are 464 ppb Au from the end of hole (PFAC149) and 305ppb Au (36-40m) in PFAC168. PFAC149 was drilled 130m NW of a previous drill intersection of 925ppb Au (PFAC122 36-40m) and PFAC168 was drilled a further 390m to the NW. These results together with previous result of 326ppb Au from 24-28m (PFAC125) located 400m to the SE suggest a probable NW trend over about 1,000m. This trend is currently open to the NW and SE. The gold mineralisation is hosted in basalts and gabbro associated with variable shearing and quartz veinlets concealed below up to 20m of lake clay and laterite gravel.

8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer:

Operating costs and overheads vary depending on the level of exploration work completed during each Quarter. The Company expects to have similar cash flows for the foreseeable future, noting that the current Quarter included a small drill campaign. It is expected that other operational costs will remain at similar levels for the foreseeable future.

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

For personal use only

Answer:

The Company continues to monitor its capital requirements. At present, the Company has not initiated any fundraising activities. However, the Company is confident in securing additional working capital through new equity issue should the need arise in the foreseeable future. The Company notes that it retains its full placement capacity under Listing Rules 7.1 and 7.1A.

The Company also notes that it has investments in listed shares valued at $3.1m at 30 September 2026 which it could monetise to fund operational expenditures.

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

The Company will be able to continue normal business operations. The Company has the ability to reduce its discretionary expenditure to reserve cash, including until such time as it finalises any future capital raising options. The directors are also confident that the Group will be successful in raising additional funds through the issue of new equity, should the need arise.
