September 2026 Quarterly Activities Report & Appendix 5B

Key Quarterly Highlights

- **Maiden SOKO W1 trenching returned gold in all six deep trenches, including 10m @ 10.15g/t Au**, across ~1.0km N-S by ~1.2km E-W[38].
- **Greater Oko expanded by 29km² to 457km²** via a binding option over adjoining permits, increasing Oko Shear Contact exposure by ~30% to ~18km[40].
- **Drilling underway across Greater Oko**: diamond drilling commenced at North Peters, with RC drilling at South Oko and North Peters and three rigs active, targeting ~8,000m per month by October 2026[37,39]. This forms part of the fully funded 75,000m program (40,000m diamond and 35,000m RC)[30].
- Strong cash balance at the end of the quarter of ~A$26.85 million.

SOKO – South Oko

- **TR-W1-06 returned 10m @ 10.15g/t Au**, the fourth-best trench intercept on the Oko Shear Contact by grade × width (102 gram-metres)[38].

Rank	Company	Target	Trench Name	Length (m)	Grade (g/t Au)	Grade x Width	Total Trenching (m)
1	GMIN (Reunion Gold)	Oko West	T21-44	69.0	5.98	413	
2	GMIN (Reunion Gold)	Oko West	T21-26	34.5	5.59	193	11,259
3	GMIN (Reunion Gold)	Oko West	T20-09	50.0	2.04	102	
4	Altair Minerals	SOKO W1	TR-W1-06	10.0	10.15	102	2,478
5	GMIN (G2 Goldfields)	Ghanie	GTR-05	6.0	16.00	96	12,361

Table 1: *Top 5 trench intercepts reported along the Oko Shear Contact to date, on a Grade X Interval Width basis.*[1,3,38]

- **Mineralisation is associated with sheared quartz veins dipping ~60° west**; the shear corridor continues west and southwest beneath cover, and TR-W1-04 and TR-W1-06 terminated in duricrust[38].
- **15,000m Phase I RC program underway at SOKO**, with the first holes testing the W1 target[39].
- **All six deep (>3m) W1 trenches intersected gold**[38]:
  - **TR-W1-04 –** 10m @ 1.42g/t Au
  - **TR-W1-05 –** 5m @ 0.75g/t Au
  - **TR-W1-06 –** 10m @ 10.15g/t Au
  - **TR-W1-07 –** 4m @ 1.06g/t Au
  - **TR-W1-08 –** 10m @ 1.13g/t Au
  - **TR-W1-09 –** 16m @ 1.32g/t Au

For personal use only

NP – North Peters

- **Diamond drilling commenced at NP in mid-August 2026** – Phase I comprises 5,600m of diamond and 2,000m of RC drilling, targeting the structural controls on high-grade mineralisation[37].
- **Historic diamond drilling** at NP – including 85m @ 4.81g/t Au from 24m and 89m @ 2.40g/t Au from 45m (incl. 24m @ 7.17g/t Au from 51m) – provides the target framework for Phase I drilling[19,20].
- **Visible gold intersected in diamond hole NPDD26011** (subsequent to quarter end), with ~7,200m drilled to date[42]. (See Cautionary Statement)
- **Three drill rigs active across SOKO and NP, targeting ~8,000m per month by October 2026**[39].

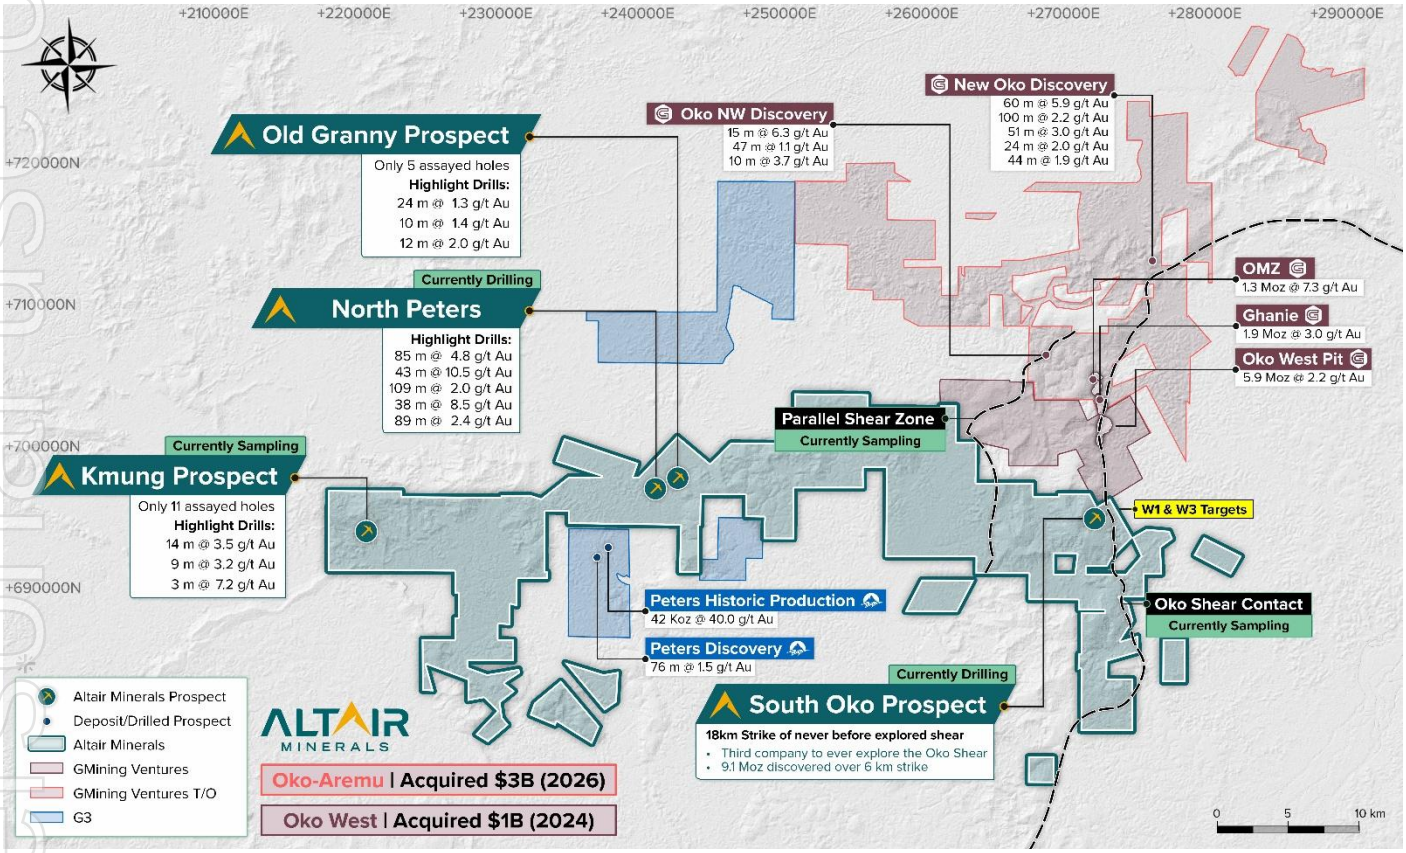

Figure 1: *Plan view of the Greater Oko Project with Altair's project size in comparison to its two adjoining neighbours (G3, GMIN). For clarity, GMining Ventures resources are located outside of Altair's Greater Oko Project. WGS84, UTM Zone 21N.*[1,2,3,9,10,11,12,13,14,19,20,25,26,40]

Altair Minerals Limited (ASX: ALR) (**'Altair'** or **'the Company'**) is pleased to provide an update in relation to the activities carried out during the September 2026 quarter.

On 16 July 2026, Altair announced upscaled exploration plans for Greater Oko, comprising a fully funded 75,000m program (40,000m diamond and 35,000m RC drilling). Of this, 20,000m of diamond and 25,000m of RC drilling are allocated to SOKO. The program also includes more than 1,000 additional soil sample, auger infill drilling, supported by three camps at SOKO and a LiDAR survey over more than 400km^2.

Cautionary Statement – Visual Estimates: *This announcement contains references to visual observations of visible gold and visual estimates of sulphide mineral abundance in diamond drill core. Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analysis where concentrations or grades are the factor of principal economic interest. Visual estimates also provide no information regarding impurities or deleterious physical properties relevant to valuations. Visible gold is subject to a strong nugget effect, and its presence does not indicate the grade, width or continuity of any mineralisation. Laboratory assays are required to determine the presence and grade of any mineralisation. Assays for the holes referred to in this announcement are pending, with first results expected in November 2026. Details of the visual observations, including lithology, mineralisation style and estimated abundance, are provided in Table 3 (Appendix B).*

SOUTH OKO

During the quarter, Altair completed its maiden trenching program at the W1 target at South Oko ("SOKO"), comprising six deep (>3m) trenches and three shallow trenches. All six deep trenches intersected gold over an area of approximately 1.0km N-S by 1.2km E-W, confirming the W1 geochemical target as a coherent, mineralised system[38].

The highest-grade result was returned from trench TR-W1-06, which intersected 10m @ 10.15g/t Au. This is the fourth-best trench intercept on the Oko Shear Contact by grade × width (102 gram-metres). Results for the deep trenches are summarised below:

- **TR-W1-04 –** 10m @ 1.42g/t Au (and separately 5m @ 1.06g/t Au and 2m @ 1.64g/t Au)
- **TR-W1-05 –** 5m @ 0.75g/t Au
- **TR-W1-06 –** 10m @ 10.15g/t Au (terminated in duricrust)
- **TR-W1-07 –** 4m @ 1.06g/t Au
- **TR-W1-08 –** 10m @ 1.13g/t Au
- **TR-W1-09 –** 16m @ 1.32g/t Au

Mineralisation is associated with sheared quartz veins dipping at approximately 60° to the west. Trenches TR-W1-04 and TR-W1-06 terminated at the duricrust, and the shear corridor continues to the west and southwest beneath cover, indicating that the mineralised system remains open and that the trenching has not tested its full extent[38].

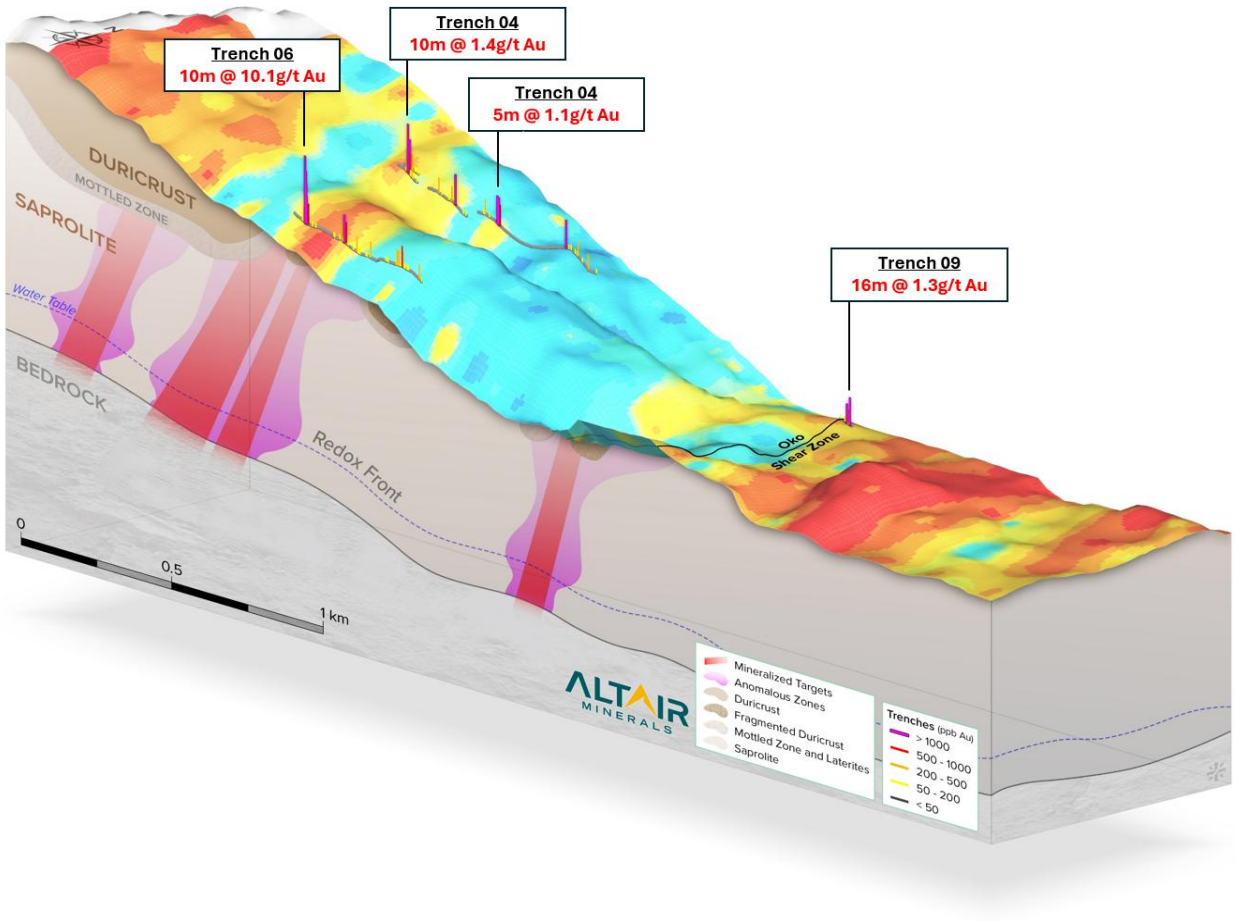

Figure 2: *Conceptual SOKO regolith model with IP Chargeability and interpreted target structures.*[23,38,39]

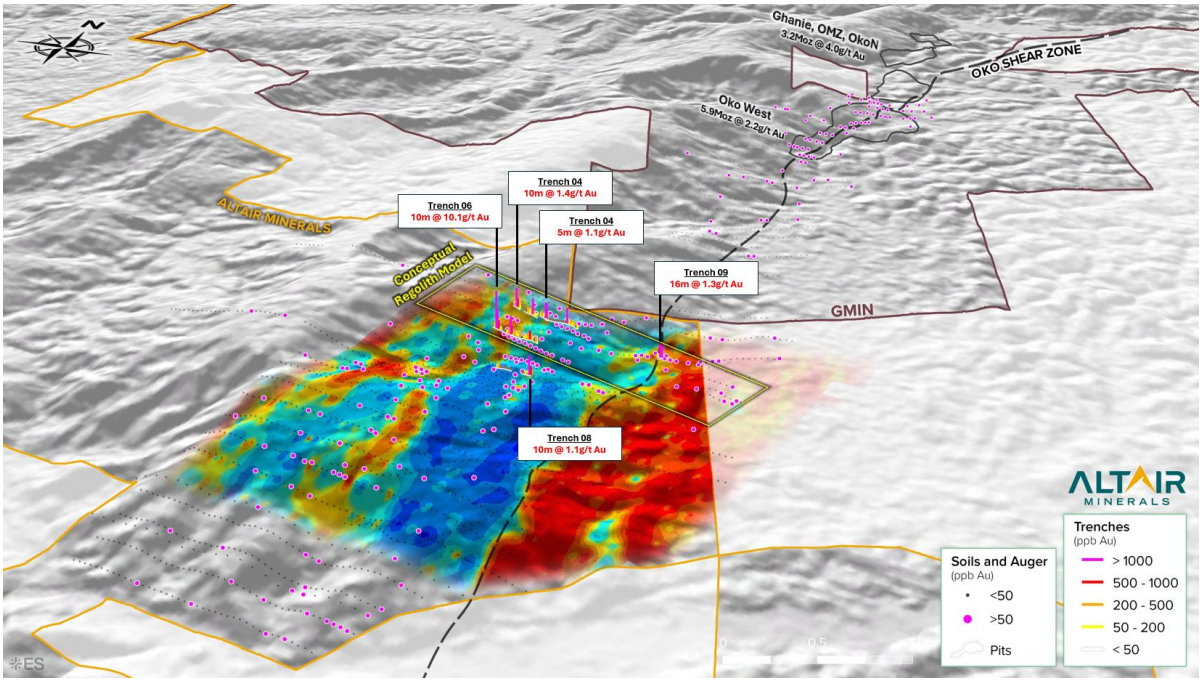

Figure 3: *Perspective 3D view at SOKO of ground gradient array IP chargeability survey, soil and auger geochemistry and selected trenching results at SOKO. Note: 3D perspective view skews axis and scale moving from image centre.* [1,3,23,33,34,38,43]

Following the trenching results, the Phase I RC program at SOKO commenced, with two RC rigs executing a planned ~15,000m drill program. The initial holes are aimed to test the W1 target, with RC holes averaging approximately 50m in depth. By 1 September 2026, three rigs were active across SOKO and North Peters, with the Company targeting ~8,000m per month by October 2026[39].

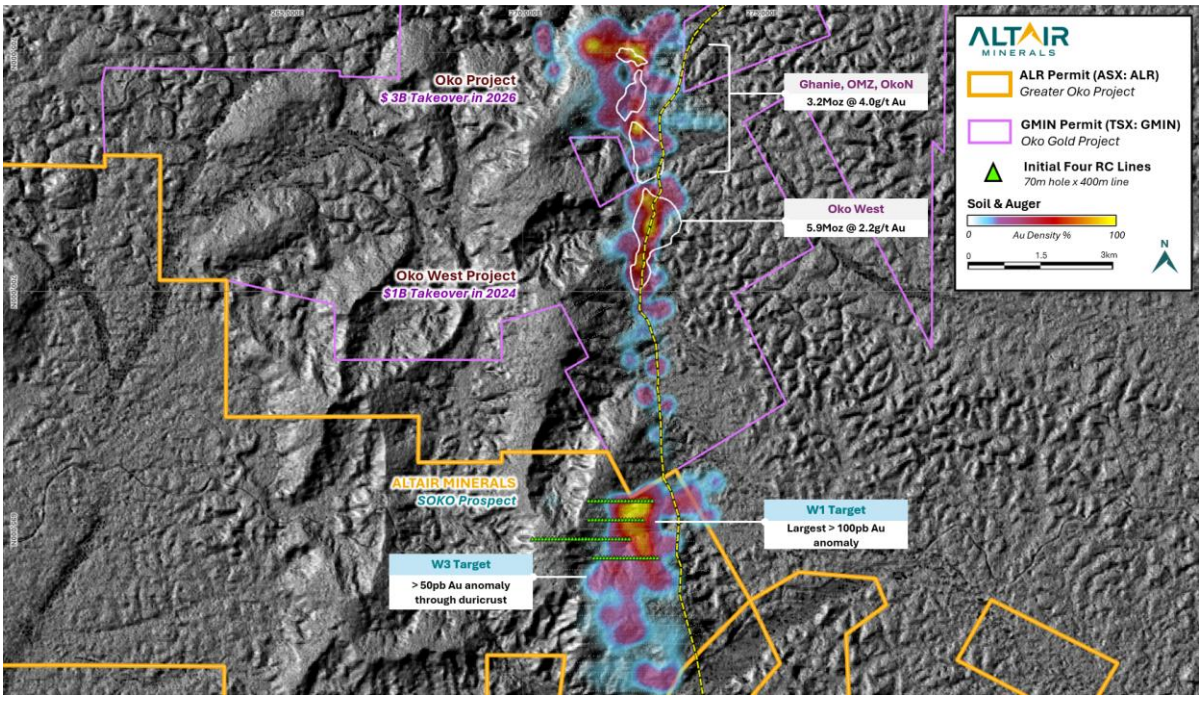

Figure 4: *Soil & auger (Au ppb) density map within Oko district and initial four RC lines planned at SOKO. Neighbouring deposits and pit outlines shown outside and adjoining Altair's Greater Oko Project. Key controlling Oko Shear Contact between granite and greenstone outlined in dotted yellow. WGS84 UTM Zone 21N.* [1,2,3,25,30,33,34,43]

NORTH PETERS

Diamond drilling commenced at North Peters ("NP") in August 2026. Phase I at NP comprises 5,600m of diamond drilling and 2,000m of RC drilling, with diamond holes averaging approximately 250m depth and RC holes approximately 50m. RC drilling at NP was expected to commence the following week, and by 1 September 2026 NP was being tested by one diamond rig and one RC rig[37,39].

The program is designed to test the structural controls on high-grade mineralisation identified through the Company's relogging and remodelling of historic drilling at NP. Historic diamond intercepts that frame the Phase I targets include 85m @ 4.81g/t Au from 24m, 89m @ 2.40g/t Au from 45m (including 24m @ 7.17g/t Au from 51m), 63m @ 2.25g/t Au from 55m (including 11m @ 8.55g/t Au from 57m) and 57m @ 1.40g/t Au from surface (including 24m @ 2.63g/t Au)[19,20,37].

Historic trenching results at NP, which remain open in places, include[35]:

- **Trench 0106 – 16.5m @ 9.68g/t Au, ending in mineralisation on both ends**
- **Trench 0206 – 39.0m @ 3.78g/t Au, ending in mineralisation on one end**
  - **Incl. 16.5m @ 5.30g/t Au**
- **Trench 0306 – 18.0m @ 5.63g/t Au, ending in mineralisation on both ends**
- **Trench 0406 – 27.0m @ 3.40g/t Au, ending in mineralisation on both ends**
  - **Incl. 12.0m @ 4.11g/t Au**

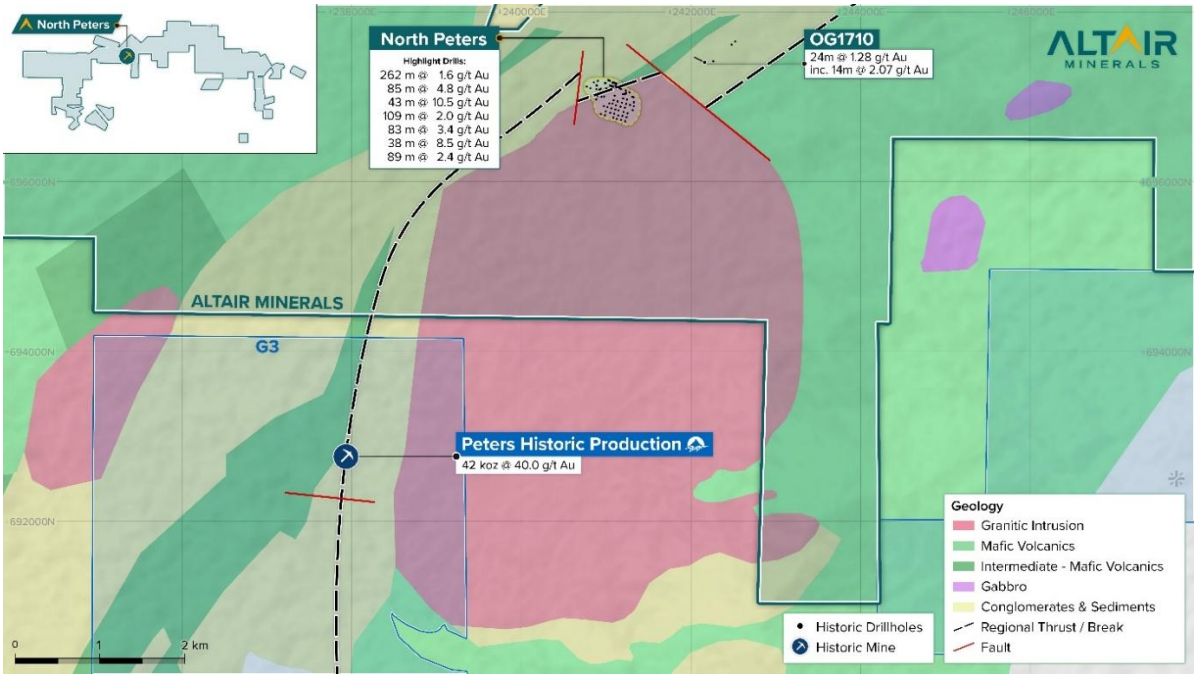

Figure 5: *Geological map of Puruni District with NP historic drilling. WGS84 UTM Zone 21N.*[19,20,26,34]

Subsequent event – visible gold at NP: On 15 October 2026, Altair reported visible gold in diamond hole NPDD26011, with the upper vein at 45.6m and 45.7m and the lower vein at 107.4m and 107.7m (See Cautionary Statement).

Approximately 7,200m had been drilled to date between SOKO and NP, and further notable intervals were reported in holes NPDD26008, NPDD26009 and NPDD26010. Field mapping has defined two intersecting shear corridors at NP. Samples have been dispatched to two ISO-certified laboratories, with assay turnaround of 5–7 weeks, and DetectORE is to mobilise at SOKO[42].

For personal use only

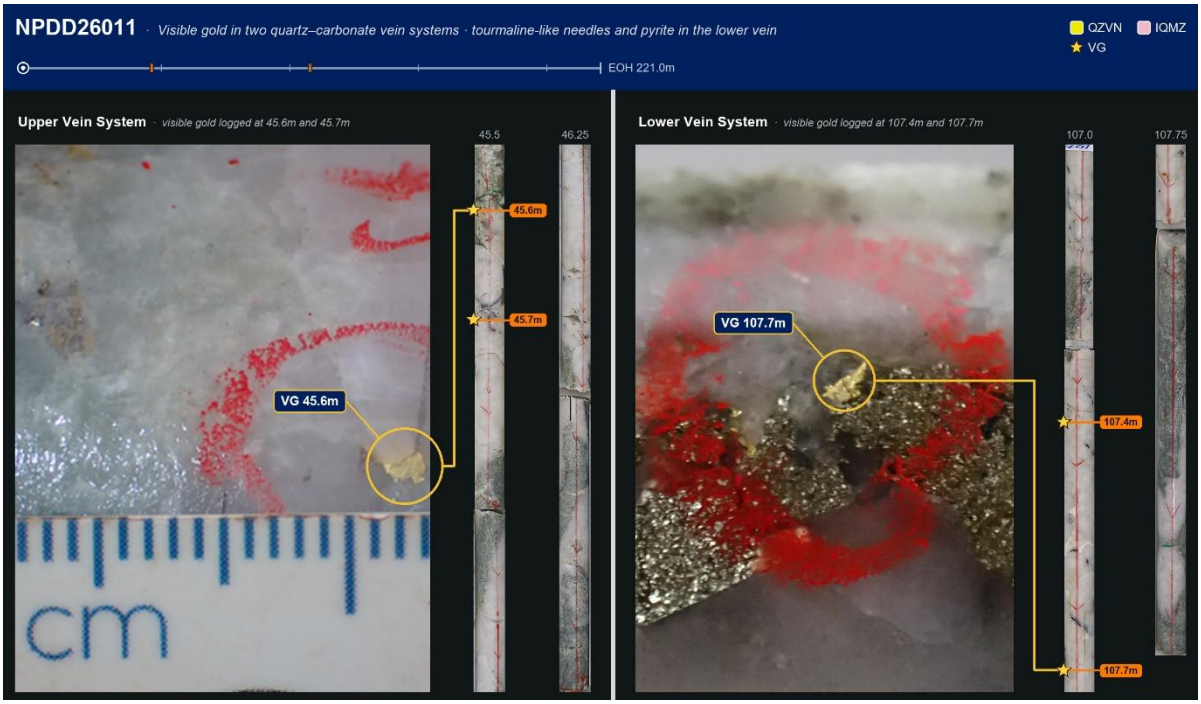

Figure 6: *Visible gold in NPDD26011. A – stylolitic quartz–carbonate vein within broader veining system, with visible gold at 45.6m (close-up with centimetre scale). B – visible gold at 107.7m within a quartz–carbonate vein carrying tourmaline-like needles and pyrite. Visual observations only; see Cautionary Statement[42].*

Cautionary Statement – Visual Estimates: *This announcement contains references to visual observations of visible gold and visual estimates of sulphide mineral abundance in diamond drill core. Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analysis where concentrations or grades are the factor of principal economic interest. Visual estimates also provide no information regarding impurities or deleterious physical properties relevant to valuations. Visible gold is subject to a strong nugget effect, and its presence does not indicate the grade, width or continuity of any mineralisation. Laboratory assays are required to determine the presence and grade of any mineralisation. Assays for the holes referred to in this announcement are pending, with first results expected in November 2026. Details of the visual observations, including lithology, mineralisation style and estimated abundance, are provided in Table 3 (Appendix B).*

OLYMPIC DOMAIN PROJECT

The Olympic Domain Project consists of three projects (Horse Well, Pernatty C, Lake Torrens) situated in one of the largest copper provinces in the world – the Gawler Craton, which hosts mega-IOCG discoveries such as Oak Dam West, Olympic Dam, Prominent Hill and Carrapateena. Altair's exploration opportunity is underpinned by previous drilling which has shown significant mineralised intercepts spanning over 8km distance, sitting on the peripherals of major untested conductive and gravity anomalies.

The matter regarding BHP's proposed use of Altair's project area for infrastructure and development purposes in connection with BHP's Oak Dam Deposit remains ongoing, with the Company continuing to retain leading commercial mining lawyers. Olympic Domain remains 100% owned by Altair. During the quarter, BHP Olympic Dam Corporation Pty Ltd and Altair Minerals Ltd (together, the "Parties"), made submissions for Discovery. Subsequent to end of quarter, on 26 October 2026, Altair filed an application for additional Discovery from BHP. A directions hearing was completed on 19 October 2026 and the matter has been adjourned to 14 December 2026, during which the Parties antcipate preparing expert reports.

Altair intends to follow up on highly compelling and untested targets at Olympic Domain in due course, following either a commercial resolution or determination of the matter, which will allow it to plan and execute follow-up programs with a clear overall assessment and efficient use of capital.

During the quarter, exploration resources have been prioritised toward the Greater Oko drilling program, and this does not alter Altair's 100% ownership of the Olympic Domain tenements or the strategic value of the Olympic Domain project. For full details, refer to the Company's ASX announcements dated 3 September 2025, 11 September 2025, 13 November 2025 and 25 February 2026.

VENATICA PROJECT

The Venatica Project is a district-scale copper exploration opportunity located in the Apurimac region of southern Peru, positioned along the globally significant Andahuaylas-Yauri Porphyry Belt, approximately 60km from the Las Bambas mine. No material activity was undertaken at Venatica during the September 2026 quarter, with no material changes to the Company's interests since the last quarterly update. As at the date of this report, the remaining 327km^2 of the Venatica Project remains in good standing and 100% owned by Altair, with details of the Company's option over the Irka Permit as set out in the Company's Announcement on 4 February 2025[27].

Following the extension of the due diligence period, shareholders approved the issue of Performance Rights in part consideration for the acquisition of the Irka Project at the General Meeting held on 3 September 2026, with 98.8% of votes cast in favour[41]. The Company has sought a further extension of time with the vendor to complete the set up the joint venture entity and will provide further updates in over the coming weeks.

To date Altair has completed extensive surface work programs across Venatica West, Irka NE and SW, and Venatica East, which collectively defined several copper-anomalous zones and confirmed the presence of porphyry-style mineralisation.

CORPORATE

General Meeting

On 3 September 2026, Altair held a General Meeting at which both resolutions were carried on a poll. Shareholders approved (1) the issue of Performance Rights in part consideration for the acquisition of the Irka Project (Venatica), with approximately 98.8% of votes cast in favour, and (2) the issue of Advisor Options to Mr Simon Bolster, with approximately 98.75% of votes cast in favour[41].

Technical Collaboration[31]

Altair and Endeavour have formed a joint Technical Committee to leverage technical synergies between the two companies, recognising that the Guiana Shield is a geological continuation of the West African Birimian greenstone belt in which Endeavour has discovered 22.4Moz of Measured and Indicated gold resources since 2016. The Committee comprises Pascal Van Osta (Head of Exploration), Faheem Ahmed (CEO) and Rob Curtis (Non-Executive Director) for Altair, and Eduardo Etchart (VP of New Ventures) and Tanguy Nobilet (Exploration Manager) for Endeavour.

Simon Bolster – Technical Advisor[32]: Appointed in June 2026, Mr Bolster brings more than 30 years' experience in regolith geochemistry and remote sensing, having held senior technical roles at Newmont, Gryphon Minerals, Normandy and Anglo American.

Mr. Simon Bolster was previously Newmont's Global Manager of Remote Sensing and Consulting Geochemist, Head of Exploration for successful West African explorer Gryphon Minerals and Regolith Specialist at Normandy and Anglo American (Africa).

Mr Bolster co-founded Portable PPB, commercialising the CSIRO-invented detectORE™ pXRF technology, which Altair intends to deploy across Greater Oko to enable 24 to 48 hour gold assay turnaround.

Dr Sonia Scarselli – Specialist Advisor to the Board[31]: Sonia Scarselli has been nominated by Altair and Endeavour following completion of its placement as Specialist Advisor to the Altair Board. Dr Scarselli is Executive Vice President of Exploration and Growth at Endeavour Mining, and was previously VP of Exploration at BHP where she founded the Xplor programme.

SOKO Expansion – Option over 29km^2 of Adjoining Permits[40]

On 17 September 2026, Altair announced a binding heads of agreement with Henry Alphonso, Lorenzo Alphonso, Clinton Alphonso and Vincent Thakur granting Altair an exclusive option to acquire 100% of 29km^2 of permits adjoining SOKO. The additional permits increase Oko Shear Contact exposure by ~30% to ~18km and lift Greater Oko to 457km^2 (previously 428km^2). On exercise, Altair expects to grant operational rights over the permits to the Greater Oko JV Company (70% Altair, 30% Adamantium) under the earn-in. The key terms are: a US$175,000 signing fee (paid) for a 60-day due diligence period; US$1,075,000 on completion of due diligence to commence a 12-month option period; US$650,000 per annum option retention for up to 48 months; total exercise consideration of US$4,500,000; and a US$4/oz production payment on permits T-32/MP/000 and T-32/MP/001. No Listing Rule 10.1 parties are involved. As the permits are held under option only, they are not yet included in the Interests in Mining Permits – Guyana table below.

Expenditure during the quarter

The Company's cash flows for the September 2026 quarter, including exploration and evaluation expenditure at Greater Oko and administration costs, are set out in the accompanying Appendix 5B Quarterly Cash Flow Report lodged with this announcement. There were no substantive mining production and development activities during the quarter.

Appendix 5B related party payments

The amounts paid to related parties during the quarter as noted in section 6.1 of the Appendix 5B were for Directors fees in relation to the September 2026 quarter.

For and on behalf of the board:

Faheem Ahmed – CEO

This announcement has been approved for release by the Board of ALR.

About Altair Minerals

Altair Minerals Limited is listed on the Australian Securities Exchange (ASX) with the primary focus of investing in the resource sector through direct tenement acquisition, joint ventures, farm-in arrangements and new project generation. The Company has projects located in Guyana, South Australia, Western Australia, Queensland and Peru with a key focus on its Greater Oko Project in Guyana. The shares of the Company trade on the Australian Securities Exchange under the ticker symbol ALR.

Streamline Statement

Altair confirms that it is not aware of any new information or data which affects the exploration results and information which has been previously disclosed and cross-referenced and included within this announcement.

Cautionary Statement – Visual Estimates

This announcement contains references to visual observations of visible gold and visual estimates of sulphide mineral abundance in diamond drill core. Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analysis where concentrations or grades are the factor of principal economic interest. Visual estimates also provide no information regarding impurities or deleterious physical properties relevant to valuations. Visible gold is subject to a strong nugget effect, and its presence does not indicate the grade, width or continuity of any mineralisation. Laboratory assays are required to determine the presence and grade of any mineralisation. Assays for the holes referred to in this announcement are pending, with first results expected in November 2026. Details of the visual observations, including lithology, mineralisation style and estimated abundance, are provided in Table 3 (Appendix B).

For personal use only

Forward Looking Statement

This announcement contains 'forward-looking information' that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes, among other things, statements with respect to the Company's business strategy, plans, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations, mineral reserves and resources, results of exploration and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'potential', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this announcement are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information.

For personal use only

NPDD26009	193.0	209.1	16.1	IQMZ	Silica-flooded hydrothermal breccia with potassic alteration	Pyrite	Disseminated + fracture	3–5% diss.+frac. pyrite
NPDD26010	16.0	30.4	14.4	IQMZ	Quartz-flooded fractures and qz–carb vein swarm	Pyrite	Fracture / vein-selvage	2–3% fine pyrite
NPDD26010	102.9	140.3	37.4	IQMZ	High-density brittle zones with potassic quartz	Pyrite	Fracture / vein-selvage	1–2% pyrite from 124.2–128.7m
NPDD26010	191.2	207.2	16.1	IQMZ	Strong ductile shear zone with silica flooding	Pyrite	Disseminated + fracture	3–4% diss.+frac. pyrite
NPDD26011	45.5	47.0	1.5	QZVN	Quartz–carbonate vein	Gold	Vein-hosted (stylolites)	VG: point observations, ~1 – 2mm
NPDD26011	63.4	68.0	4.6	IQMZ	Brittle-ductile zone with up to 15% pyrite	Pyrite	Fracture / vein-selvage	Up to 15% pyrite
NPDD26011	107.0	108.3	1.3	QZVN	Tourmaline-bearing qz–carb vein	Gold, Pyrite	Vein-hosted (stylolites)	VG: point observations ~1 – 2mm
NPDD26011	113.3	116.3	3.0	IQMZ	Strong brittle zone with 15% qz–carb veining	Pyrite	Fracture / vein-selvage	3% frac. pyrite
NPDD26011	129.4	143.9	14.5	IQMZ	Strongly altered brittle zone with chaotic veining	Pyrite	Disseminated + fracture	~3% diss.+frac. pyrite

Table 3: *Visual observations referred to in this announcement (NPDD26003 – 005 and NPDD26008 – 011). Visual estimates are field estimates by geologists and do not imply mineralisation, see Cautionary Statement in Page 1 and Page 2. True widths are not known at this stage until certified assays are received. Litho = Lithology, and refers to the dominant unit observed in each interval. From, To, Interval measurements are downhole. Visual estimates of mineralogical abundance are not a proxy for grade. Litho codes and other abbreviations are defined in Appendix C (Table 4). Lengths rounded to nearest one decimal point.*

APPENDIX C: GLOSSARY OF ABBREVIATED TERMS

Abbreviated Code	Term
Au	Gold (chemical symbol)
DDH	Diamond drill hole (diamond core drilling)
Diss.	Disseminated
ENE–WSW	East-northeast to west-southwest (trend)
epid–chl	Epidote–chlorite (alteration)
Fol.	Foliation / foliation-controlled
Frac.	Fracture / fracture-controlled
g/t	Grams per tonne
incl.	Including
IQMZ	Quartz monzonite (intrusive)
K-alt	Potassic (potassium) alteration; also shown as K-alteration
K-feldspar	Potassium feldspar
Litho	Lithology (rock type)
NE–SW	Northeast to southwest (trend)
NNE	North-northeast
NW–SE	Northwest to southeast (trend)
Py	Pyrite
QMZ	Quartz monzonite (IQMZ)
qz	Quartz
qz–carb	Quartz–carbonate
QZVN	Quartz (–carbonate) vein
RC	Reverse circulation (drilling)
S-C	S-C fabric – ductile shear-zone fabric of foliation (S) planes and shear (C) planes
SCGL	Sheared conglomerate
SSW	South-southwest
TCBX	Tectonic breccia
VAND	Andesite (volcanic)
VG	Visible gold
VMBS	Magnetic basalt (volcanic)
WNW	West-northwest

Interests in Mining Tenements – Australia

Below is a summary of the mining tenements held by the Company at the end of the quarter:

Mining Tenement	Location	Beneficial Percentage held	Interest acquired/farm-in or disposed/farm-out during the quarter
E74/594	Western Australia	100%	-
E74/768	Western Australia	100%	-
EPM 26379	Queensland	100%	-
EPM 26380	Queensland	100%	-
EPM 26376	Queensland	100%	-
EPM 26377	Queensland	100%	-
ML 2504	Queensland	80%	-
ML 2773	Queensland	80%	-
ML 90098	Queensland	80%	-
EL 6118	South Australia	100%	-
EL 6119	South Australia	100%	-
EL 6120	South Australia	100%	-
EL 6121	South Australia	100%	-
EL 6122	South Australia	100%	-
EL 6183	South Australia	100%	-
EL 6675	South Australia	100%	-

Interests in Mining Claims – Peru

Below is a summary of the mining tenements held in the Venatica Project by the Company:

Claim Name	Permit Code	Map Code	Province	Zone	Area (Ha)	Year	Status
IRKA	010184917	28-Q	Abancay	18	1,000	2017	Mining Concession
IRKA 2	010028725	28-Q	Abancay	18	1,000	2025	Mining Process

Altair has the right to acquire up to a 70% interest in the tenements noted above as held by Adamantium Exploration Inc. which comprises of the Greater Oko Project (refer to ASX Announcement 5 August 2025)[13].

On 17 September 2026, Altair secured an option to acquire 100% of eight additional permits adjoining SOKO (A-221/MP/000, A-64/MP/000, A-268/MP/000, A-26/MP/000, A-22/MP/000, M-1019/003, T-32/MP/000 and T-32/MP/001; 29km^2 in total). These permits are not included in the table above[40].

3.8	Dividends paid	-	-
3.9	Other (provide details if material)	-	-
3.10	**Net cash from / (used in) financing activities**	**(764)**	**(764)**

4.	**Net increase / (decrease) in cash and cash equivalents for the period**		
4.1	Cash and cash equivalents at beginning of period	33,644	33,644
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(235)	(235)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(5,791)	(5,791)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	(764)	(764)

Consolidated statement of cash flows		Current quarter $A'000	Year to date (3 months) $A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	**Cash and cash equivalents at end of period**	**26,854**	**26,854**

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter $A'000	Previous quarter $A'000
5.1	Bank balances	26,854	33,644
5.2	Call deposits	-	-
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	**Cash and cash equivalents at end of quarter (should equal item 4.6 above)**	**26,854**	**33,644**

6.	Payments to related parties of the entity and their associates	Current quarter $A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	34
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

For personal use only

7.	**Financing facilities** *Note: the term "facility' includes all forms of financing arrangements available to the entity.* *Add notes as necessary for an understanding of the sources of finance available to the entity.*	**Total facility amount at quarter end $A'000**	**Amount drawn at quarter end $A'000**
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	**Total financing facilities**	-	-
7.5	**Unused financing facilities available at quarter end**		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
	N/A		

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(235)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(5,791)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(6,026)
8.4	Cash and cash equivalents at quarter end (item 4.6)	26,856
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	26,856
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	4.46

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2026

Authorised by: The Board of Directors

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
