

RUMBLE RESOURCES LTD

ASX:RTR

SEPTEMBER QUARTERLY ACTIVITIES REPORT

ASX RELEASE I 30 October 2026

For personal use only

Rumble Resources Ltd (**ASX: RTR**) ("**Rumble**" or "the **Company**") is pleased to provide a summary of activities conducted during the September 2026 Quarter in which the Company continued to advance the Western Queen Gold-Tungsten Project toward development, reported high-grade gold-copper drilling results at Munarra Gully, appointed an experienced General Manager Operations and commenced a program of regional exploration drilling across Wardawarra and Munarra Gully.

HIGHLIGHTS

1. WESTERN QUEEN GOLD-TUNGSTEN PROJECT

- Jake Campbell appointed as General Manager Operations to lead Western Queen through development and into steady-state operations
- Work continued on technical, permitting, funding and execution planning for the proposed underground development
- Revised Mineral Resource Estimate of **3.92Mt @ 3.1 g/t for 393,100ozs** optimised for underground mining released[1]. **Resource grade increased by 19% to 3.1 g/t Au**, including a 27% grade increase in Indicated Resources at Western Queen South
- Updated gold-only Scoping Study on Western Queen demonstrating potential for a significantly **longer mine life and more than double the gold production,** compared to the November 2025 Western Queen South Scoping Study[2]
- Work now focused on **incorporating the tungsten resources into the mine plan** which could add a **valuable additional revenue stream**. Metallurgical test work and preliminary marketing discussions indicate that a saleable scheelite concentrate can be produced
- A structural review of the Western Queen Project and surrounding Wardawarra Greenstone Belt to identify regional settings analogous to the Western Queen deposits **identified a priority target approximately 7km north of Western Queen Central. A drill program was completed during September, results awaited**

2. MUNARRA GULLY COPPER–GOLD PROJECT

- Reported the highest grade drilling result achieved at Munarra Gully to date from hole MGRC26011[3]:
  - **13m @ 21.64g/t Au from 122m;**
  - **including 5m @ 55.56g/t Au from 124m;**
  - **concurrent with 7m @ 0.52% Cu from 128m.**

- Other significant results included:
  - **MGRC26007: 7m @ 2.15g/t Au from 132m, concurrent with 4m @ 0.62% Cu from 132m;**
  - **MGRC26012: 7m @ 3.86g/t Au from 65m, including 1m @ 26.10g/t Au from 68m; and**
  - **MGRC26006: 1m @ 5.86g/t Au from 149m, concurrent with 6m @ 0.39% Cu from 140m, including 1m @ 1.54% Cu from 140m.**

3. CORPORATE

- Cash balance at 30 September 2026 of **$8.3 million**
- Board refresh underway with Matthew Banks and Michael Smith stepping down and a short list of new directors under consideration
- Released the Company's Annual Report for the year ended 30 June 2026 on 30 September 2026.
- The Company's 2026 Annual General Meeting is scheduled to be held at 2:00pm AWST on Friday, 27 November 2026 at the Celtic Club, 48 Ord Street, West Perth, Western Australia.

EXPLORATION AND DEVELOPMENT ACTIVITIES

Rumble has a significantly advanced project portfolio in Western Australia hosting a mixture of gold, base metals and specialty metals. During the September 2026 Quarter, the Company prioritised Western Queen development activities while continuing work programs across selected exploration projects.

Western Queen Gold-Tungsten Project, Mt Magnet, Western Australia

During the September 2026 Quarter, Rumble continued to advance the Western Queen Gold-Tungsten Project toward development. The Company appointed Jake Campbell as General Manager Operations, effective 10 August 2026. Mr Campbell has more than 15 years' experience in underground mining, project development, commissioning and operations and will lead the operational planning and development of Western Queen.

Updated Scoping Study

The Company continued work on the Updated Scoping Study incorporating material from Western Queen South and Western Queen Central with ore to be toll treated at the Kirkalocka processing plant (Figure 2) under the Toll Milling and Blending Agreement with Gylden Resources Pty Ltd ("Gylden")[4] executed in the previous quarter. The study was released subsequent to the quarter[5] with key findings including:

- **Resources utilised** - The Study considers underground mining of the Western Queen South and Central Resources using uphole stoping with paste fill due to simple, steep-dipping deposit geometry. The Study incorporates the optimised October 2026 gold Mineral Resource Estimate[6] of **3.92Mt @ 3.1g/t Au for 393,100oz**, including Indicated Resources of **1.87Mt @ 3.7g/t Au for 223,800oz;**
- **Production Target - 1.2Mt at 3.2g/t for 125koz** contained gold over an initial production period four years at a production rate of approximately 30kt mineralised material per month when at full production;
- **Processing** - Mineralised material to be blended and toll treated at Kirkalocka on a campaign basis in 75,000 tonne batches. Historical production and metallurgical testwork indicates recoveries of 90-94% gold are achievable, while the Study has assumed a 92% recovery given that the ore will be blended (more testwork is required to confirm recoveries for the blended ore);
- **Economics** - Free cash flow of $133M, a pre-tax NPV (at 8% discount rate) of $86M and an IRR of 45% at a gold price of A$5,714/oz[7];
- **All in sustaining costs** - A$4,390/oz gold sold;
- **Low upfront capital** ~$8M; and
- **Potential to extend mine life** - Only approximately 30% of the current Mineral Resource at Western Queen is included in the mining production target of this Study, providing additional opportunities to extend Project life and life of mine (LOM) production.

Work is now focused on incorporating the tungsten resources into the mine plan which could add a valuable additional revenue stream. Metallurgical test work and preliminary marketing discussions indicate that a saleable scheelite concentrate can be produced

Next steps include a Feasibility Study incorporating the tungsten, metallurgical testwork to confirm gold and tungsten recoveries, sourcing finance, obtaining all regulatory approvals, and progressing to a Final Investment Decision.

Optimised Mineral Resource Estimate

Rumble released a revised Mineral Resource estimate on 28 October 2026 which has been optimised for underground mining studies. The optimised Resources total **3.92Mt @ 3.1g/t Au for 393,100ozof contained gold** (refer Table 1 and Figure 3)**.** This represents a **19% increase in total resource grade to 3.1g/t Au**, for only 9% reduction in total ounces compared to the June 2026 resource. Most importantly, Indicated Resources at Western Queen South and Central **increased 27% in grade** with a negligible 1% reduction of ounces. The optimised gold resource also retains the high-grade zone at Western Queen Central, now comprising **129kt at 11.6 g/t Au for 48,500 oz of gold** and located directly below the historical underground workings.

Notes: Mineral Resources reported on a dry in-situ basis.

- *The Statement of Estimates of Mineral Resources has been compiled by Mr. Shaun Searle who is a Director of Ashmore Advisory and a Member of the AIG. Mr. Shaun Searle has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that he has undertaken to qualify as a Competent Person as defined in the JORC Code (2012).*
- *All Mineral Resources figures reported in the table above represent estimates as of October 2026. Mineral Resource estimates are not precise calculations, being dependent on the interpretation of limited information on the location, shape and continuity of the occurrence and on the available sampling results.*
- *Mineral Resources are reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The Joint Ore Reserves Committee Code – JORC 2012 Edition).*
- *Cranes Mineral Resource figures are derived from the 2024 Mineral Resource estimate.*

Resource Drilling

Rumble drilled 17 slimline RC holes for 1,180m at Cranes Prospect on M59/208 during September. This drilling was part of the Wardawarra drill program and was planned to better define the Cranes mineral resource for potential inclusion in future development studies. Assay results are awaited.

Environment and Permitting

All required approval applications to allow underground mining to be undertaken, including the Mine Development and Closure Proposal, Works Approval and ancillary permits, have been submitted to the relevant government departments. The Works Approval, Native Vegetation Clearance Approval and, more recently, the Groundwater Extraction Licence for dewatering of Western Queen South open pit have been granted. The Mine Development and Closure Proposal is the last outstanding major approval.

During August, a passive seismic program was conducted over two areas that were considered to potentially host hypersaline paleochannels as possible re-injection sites for pit dewatering. Three water monitoring holes were drilled on E20/967 to test the paleochannels. Initial results indicated that a highly saline paleochannel was encountered in two of the holes. Further drilling is planned to follow up on these results.

Tungsten Study

During the quarter, Rumble continued to advance the tungsten opportunity at Western Queen. Western Queen contains a tungsten Mineral Resource Estimate of 4.31Mt @ 0.31% WO_3 for 13,200t contained WO_3, which occurs within and adjacent to the gold mineralisation. Initial metallurgical testwork and preliminary marketing discussions indicate that a saleable scheelite concentrate can be produced.

The known tungsten resources could potentially be mined in conjunction with the gold and processed at Kirkalocka (subject to positive outcomes from additional metallurgical testwork, suitable studies being completed, and Gylden making any plant modifications to recover tungsten). Work has now commenced on a mining study to quantify the amount of gold and tungsten-bearing material that could be mined.

Other Exploration Projects, Western Australia

Earaheedy Zinc-Lead-Silver Project, Wiluna, Western Australia

Rumble continued to advance metallurgical and technical evaluation work at the Earaheedy Zinc-Lead-Silver Project. Early metallurgical results from the Chinook deposit show that a separate zinc concentrate and lead-silver concentrate can be produced by differential flotation using standard reagents. To complete this metallurgical work program a diamond drilling program is being planned to provide a suitable sample from the Tonka deposit for further metallurgical test work. Given that the Tonka deposit has an average zinc:lead ratio of 6:1 Tonka should also separate into a zinc concentrate and a lead-silver concentrate.

Subsequent to the quarter end, Rumble made voluntary partial surrenders of tenements E69/3862 (4 blocks) and E69/3787 (27 blocks).

Wardawarra Regional Gold Exploration, Mt Magnet, Western Australia

During the quarter, Rumble completed further regional targeting work across the Wardawarra Project surrounding Western Queen. Model Earth Global Geological Services completed a structural review to identify structural settings across the Wardawarra Greenstone Belt that may be analogous to the Western Queen deposits.

Three prospective structural positions were identified. The priority target is a 2km by 1km area located approximately 7km north of Western Queen Central. A heritage survey with the Wajarri Yamaji People was completed during August 2026 and 48 aircore holes for 2,045m were drilled over the priority target area in September. Assays results are awaited.

During July, two exploration tenement applications, E59/2816 and E59/3021 were granted.

Munarra Gully Gold-Copper-Silver Project, Western Australia

During the quarter, Rumble released results from the reverse circulation and aircore drilling program completed at the Munarra Gully Gold-Copper Project. The program comprised 28 aircore holes for 1,933m and 12 reverse circulation holes for 1,715m, for a total of 3,648m.

The program tested the Amaryllis Shear Zone by extending drilling beneath historical holes that did not effectively test fresh rock and by infilling previously untested sections of the mineralised structure.

Hole MGRC26011 returned the highest-grade result achieved at Munarra Gully to date:

- **13m @ 21.64g/t Au from 122m**;
- including **5m @ 55.56g/t Au from 124m**;
- including **1m @ 221.00g/t Au from 124m**; and
- concurrent with **7m @ 0.52% Cu from 128m**.

Other significant results included:

- **MGRC 26007: 7m @ 2.15g/t Au from 132m**, concurrent with **4m @ 0.62% Cu from 132m**;
- **MGRC26012: 7m @ 3.86g/t Au from 65m**, including **1m @ 26.10g/t Au from 68m**; and
- **MGRC26006: 1m @ 5.86g/t Au from 149m**, concurrent with **6m @ 0.39% Cu from 140m**, including **1m @ 1.54% Cu from 140m**.

Subsequent to the quarter a follow-up drill program commenced but was cut short due to technical difficulties. Assay results are awaited for three holes. Further RC drilling and a diamond hole are planned.

Thunderstorm Gold Project, Fraser Range, Western Australia

Rumble continued planning a drilling program at the 100%-owned Thunderstorm Gold Project in the Fraser Range. The proposed program comprises up to 5,000m of aircore and reverse circulation drilling to test both palaeochannel and structurally hosted basement gold targets at the Gazelle and Pion prospects.

Historical drilling at Gazelle returned intersections including **16m @ 6.69g/t Au from 42m**, including **4m @ 22.2g/t Au from 50m**, and **6m @ 9.15g/t Au from 48m**. At Pion, historical drilling returned **4m @ 3.80g/t Au from 86m**.

A heritage survey was completed with the Ngadju People and approximately 7,400m of drill lines were heritage cleared ahead of the planned program.

Subsequent to the quarter three tenements, E28/2528, E282529, and E28/3384 were surrendered. A voluntary partial surrender of E28/2595 was also initiated. Surrendered ground was assessed to have been sufficiently tested by IGO drilling and did not warrant further exploration.

Braeside Base Metal Project, East Pilbara, Western Australia

No material exploration results were released for Braeside during the quarter. Subsequent to the quarter Rumble surrendered E45/4368, the last Braeside tenement.

Warroo Uranium and Base Metal Project, East Pilbara, Western Australia

No material exploration results were released for Warroo during the quarter. During August, tenement E45/5689 expired and was not renewed.

CORPORATE

2026 Annual General Meeting

The Company's 2026 Annual General Meeting will be held in person at **2:00pm AWST on Friday, 27 November 2026 at the Celtic Club, 48 Ord Street, West Perth, Western Australia**.

The Notice of Meeting and Explanatory Memorandum will be available from the Company's website and through the Company's ASX market announcements platform. Shareholders who are unable to attend the meeting are encouraged to complete and return their proxy form.

Office Relocation

During the quarter, Rumble progressed the relocation of its head office from Level 1, 16 Ord Street to Level 1, 52 Kings Park Road, West Perth WA 6005.

Capital Management and Funding

The Company continued to evaluate funding options to support the development of Western Queen and maintain exploration activity across its portfolio. In the previous quarter, Rumble completed the Western Queen gold royalty funding transaction with Elemental Royalty, receiving total consideration of A$10 million for the sale of a 2.5% net smelter return royalty over gold production from Western Queen. The transaction provided non-dilutive capital to support pre-development activities, including dewatering, feasibility, permitting and mine planning workstreams.

Lamil Project Divestment

In the previous quarter, Rumble and AIC Mines Limited entered into a Tenement Sale Agreement with Aventine Resources Limited for the sale of their respective interests in Exploration Licence E45/5271, comprising the Lamil Joint Venture. Under the agreement, Aventine will acquire a 100% legal and beneficial interest in E45/5271 and associated geological information.

Rumble will receive A$250,000 in cash, Aventine shares to a value of A$300,000 calculated using a deemed issue price equal to Aventine's IPO share price, and a 0.5% net smelter return royalty. Completion has not yet occurred and remains conditional on satisfaction of the outstanding conditions precedent, including heritage assignment steps and ASX and IPO-related confirmations by Aventine.

Financial Position

As at 30 September 2026, Rumble held approximately $8.30 million in cash.

Appendix 5B – Quarterly Cash Flow

The Appendix 5B – Statement of Consolidated Cash Flows is provided in a separate report. Information disclosed in the Cash Flow Report shows Exploration and Evaluation expenditure during the quarter totalled $1.18 million.

Cash outflows for the September 2026 Quarter totalled $1.892 million, comprising exploration activity (63%), staff costs (20%) and administration and corporate costs (17%).

Cash inflows for the September 2026 Quarter totalled $108K, government grants and tax incentives (7%) and interest received (93%).

Appendix 5B – Payments to related parties and their associates

Payments to related parties and their associates totalled $225,222 for the quarter, comprising $156,255 in Directors' fees, $13,651 in statutory superannuation, $54,000 in consulting fees to related entities and $1,316 in business-related expense reimbursements.

Tenement Holdings

In accordance with ASX Listing Rule 5.3.3, please refer to Appendix 1 for a listing of all tenement holdings.

About Rumble Resources

Rumble Resources is an Australian based exploration company, listed on the ASX in July 2011. Rumble was established with the aim of adding significant value to its selected mineral exploration assets and to search for suitable mineral acquisition opportunities in Western Australia.

Rumble has a unique suite of resources projects including the Western Queen Gold-Tungsten Project which is being developed to deliver near term cash flow from the existing underground resources and resource growth through future exploration success.

In addition, the discovery of the Earaheedy Zinc-Lead-Silver Project has demonstrated the capabilities of the exploration team to find world class orebodies.

Competent Person Statement

The information in this report that relates to Exploration Results at Western Queen and other Rumble Projects is based on and fairly represents information compiled by Mr Peter Venn and Mr Simon Davies, who are Members of the Australian Institute of Geoscientists. Mr Peter Venn and Mr Simon Davies are full-time employees of Rumble Resources Limited. Mr Peter Venn and Mr Simon Davies have sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Peter Venn and Mr Simon Davies consent to the inclusion in the report of the matters based on this information in the form and context in which it appears.

Previously Reported Information

The information in this report that references previously reported exploration results is extracted from the Company's ASX market announcements released on the date noted in the body of the text where that reference appears. The previous market announcements are available to view on the Company's website or on the ASX website (www.asx.com.au). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Disclaimer

This report contains certain forward-looking statements and forecasts, including possible or assumed reserves and resources, production levels and rates, costs, prices, future performance or potential growth of Rumble Resources Ltd, industry growth or other trend projections. Such statements are not a guarantee of future performance and involve unknown risks and uncertainties, as well as other factors which are beyond the control of Rumble Resources Ltd. Actual results and developments may differ materially from those expressed or implied by these forward-looking statements depending on a variety of factors. Nothing in this report should be construed as either an offer to sell or a solicitation of an offer to buy or sell securities. This document has been prepared in accordance with the requirements of Australian securities laws, which may differ from the requirements of United States and other country securities laws. Unless otherwise indicated, all ore reserve and mineral resource estimates included or incorporated by reference in this document have been, and will be, prepared in accordance with the JORC classification system of the Australasian Institute of Mining, and Metallurgy and Australian Institute of Geoscientists.

The Statement of Estimates of Mineral Resources (Gold) has been compiled by Mr Shaun Searle, who is a Director of Ashmore Advisory and a Member of the AIG. Mr Shaun Searle has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that he has undertaken to qualify as a Competent Person as defined in the JORC Code (2012).

All Mineral Resources figures reported in the table above represent estimates as of October 2026. Mineral Resource estimates are not precise calculations, being dependent on the interpretation of limited information on the location, shape and continuity of the occurrence and on the available sampling results.

Mineral Resources are reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The Joint Ore Reserves Committee Code – JORC 2012 Edition).

Cranes Mineral Resource figures are derived from the 2024 Mineral Resource estimate.

Open Pit optimisations and preliminary underground Mining Shape Optimisations (MSO) have shown that a large proportion of the resource has the potential to be mined economically, and further mining studies are warranted to further progress the project. Mineral Resources that are not Ore Reserves have not demonstrated economic viability at this point. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues.

Table 2 – Tungsten Mineral Resource Estimate tabulation for the Western Queen Project by Resource Area

Western Queen August 2025 Tungsten Mineral Resource Estimate (0.1% WO_3 Cut-off)			
Prospect	Inferred Mineral Resource		
	Tonnage kt	WO_3 %	WO_3 t

Appendix 5B

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name of entity

Rumble Resources Limited

ABN	Quarter ended ("current quarter")
74 148 214 260	30 September 2026

Consolidated statement of cash flows		Current quarter $A'000	Year to date (3 months) $A'000
1.	**Cash flows from operating activities**		
1.1	Receipts from customers	-	-
1.2	Payments for		
	(a) exploration & evaluation	-	-
	(b) development	-	-
	(c) production	-	-
	(d) staff costs	(379)	(379)
	(e) administration and corporate costs	(334)	(334)
1.3	Dividends received (see note 3)	-	-
1.4	Interest received	100	100
1.5	Interest and other costs of finance paid	-	-
1.6	Income taxes paid	-	-
1.7	Government grants and tax incentives	8	8
1.8	Other - (Net GST movement)	(989)	(989)
1.9	**Net cash from / (used in) operating activities**	**(1,594)**	**(1,594)**

2.	**Cash flows from investing activities**		
2.1	Payments to acquire or for:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	(24)	(24)
	(d) exploration & evaluation	(1,182)	(1,182)
	(e) investments	-	-
	(f) other non-current assets	-	-

For personal use only

For personal use only

Consolidated statement of cash flows		Current quarter $A'000	Year to date (3 months) $A'000
2.2	Proceeds from the disposal of:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) investments	-	-
	(e) other non-current assets	-	-
2.3	Cash flows from loans to other entities	-	-
2.4	Dividends received (see note 3)	-	-
2.5	Other (provide details if material)	-	-
2.6	**Net cash from / (used in) investing activities**	**(1,206)**	**(1,206)**

3.	**Cash flows from financing activities**		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)	-	-
3.2	Proceeds from issue of convertible debt securities	-	-
3.3	Proceeds from exercise of options	-	-
3.4	Transaction costs related to issues of equity securities or convertible debt securities	-	-
3.5	Proceeds from borrowings	-	-
3.6	Repayment of borrowings	-	-
3.7	Transaction costs related to loans and borrowings	-	-
3.8	Dividends paid	-	-
3.9	Other (provide details if material)	-	-
3.10	**Net cash from / (used in) financing activities**	**-**	**-**

4.	**Net increase / (decrease) in cash and cash equivalents for the period**		
4.1	Cash and cash equivalents at beginning of period	11,097	11,097
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(1,594)	(1,594)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(1,206)	(1,206)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	-	-

Consolidated statement of cash flows		Current quarter $A'000	Year to date (3 months) $A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	**Cash and cash equivalents at end of period**	**8,297**	**8,297**

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter $A'000	Previous quarter $A'000
5.1	Bank balances	4,146	7,033
5.2	Call deposits	4,151	4,064
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	**Cash and cash equivalents at end of quarter (should equal item 4.6 above)**	**8,297**	**11,097**

6.	Payments to related parties of the entity and their associates	Current quarter $A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	171
6.2	Aggregate amount of payments to related parties and their associates included in item 2	54

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

Item 6.1 includes $156,255 directors' fees, $13,650 statutory superannuation and $1,316 travel expense reimbursements. Item 6.2 includes $54,000 (ex GST) in consulting fees to related entities.

For personal use only

7.	**Financing facilities** *Note: the term "facility' includes all forms of financing arrangements available to the entity.* *Add notes as necessary for an understanding of the sources of finance available to the entity.*	**Total facility amount at quarter end $A'000**	**Amount drawn at quarter end $A'000**
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	**Total financing facilities**	-	-

7.5	**Unused financing facilities available at quarter end**	-

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

N/A

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(1,594)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(1,182)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(2,776)
8.4	Cash and cash equivalents at quarter end (item 4.6)	8,297
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	8,297
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	2.99

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

N/A

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

30 October 2026

Date: .....

The Board

Authorised by: .....
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
