About Blaze Minerals

Blaze Minerals is a mineral exploration company focussed on identifying and developing high-margin, high-grade, and high-value ore deposits in highly prospective regions.

The Company has a 72% interest in two projects in Uganda prospective for tungsten and an agreement to increase to a 90% interest:

- **Bahati Project:** The Bahati Project comprises 1 exploration licence covering ~43km^2 in south western Uganda in a region predominantly underlain by the Karagwe-Angkole Belt and host to three historic tungsten mines.
- **Buyaga Project:** The Buyaga Project comprises a significant landholding of ~250km^2 within the Buganda granitic suite surrounding the historic Buyaga mine (excised).

The Company has a 60% interest in two projects in Uganda prospective for critical minerals:

- **Ntungamo Project:** The Ntungamo Project is adjacent to the Mwirasandu Mine, the largest producing tin mine in Uganda, and highly prospective for critical minerals such as gallium and rubidium.
- **Mityana Project:** The Mityana Project is the site of a historic open-cut tantalite mine.

The Company has a 70% interest in three projects in Botswana with an agreement to increase to a 90% interest:

- **Dinokwe Copper Project:** The Dinokwe Project comprises 3 granted prospecting licenses and 1 application covering ~1771km^2 within the Limpopo Mobile Belt which is considered prospective for nickel-copper-PGE mineralisation.
- **The Kalahari Project:** The Kalahari Project includes 5 applications covering ~3,008km^2 within and adjacent to the Kalahari Copper Belt which is considered prospective for copper-silver mineralisation.
- **The Molopo Project:** The Molopo Project comprises 2 applications covering ~212km^2 over the Molopo Farms Complex which is considered prospective for nickel-copper-PGE mineralisation.
