

ASX Release | ClearVue Technologies Limited (ASX: CPV)

## ClearVue testing and certification for EU completed allowing sale of its high-tech solar window in Europe

### Highlights

- Testing and certification to European Standard EN 14351-1:2006+A2:2016 has now been completed on ClearVue's solar window allowing for ClearVue window products to be sold in the European Union
- European Standard EN 14351-1:2006+A2:2016 is the mandatory minimum specification for windows and doors sold and used in the EU

**23 July 2018:** Smart building material company ClearVue Technologies Limited (ASX:CPV) ("**ClearVue**" or "**the Company**") is pleased to confirm certification of its solar window product to European Standard EN 14351-1:2006+A2:2016 has been received.

Testing and certification was carried out by The Institute for Testing and Certification at Zlín in the Czech Republic through accredited test laboratory Intertek Testing Services Ltd in Shanghai China.

EN 14351-1:2006+A2:2016 is the mandatory minimum specification for windows and doors sold and used in the EU.

Testing was carried out to verify ClearVue's window products for sale and use in the European Union, as follows:

- Resistance to wind load (according to EN 12211, EN 12210)
- Watertightness (according to EN 1027 (method 1A), EN 12208)
- Air permeability (according to Annex I of EN 14351-1+A2)
- Impact resistance (according to EN 13049)

All tests are pass/fail with all tests being certified as passed.

ClearVue continues its Australian AS 4284 testing and certification on the Company's glass curtain wall product with results expected to be provided to the market in August 2018. ClearVue's US testing and certification is expected to commence next quarter as previously announced.

Commenting on completion of the European testing and certification for ClearVue's window product, ClearVue Executive Chairman Victor Rosenberg has said:

*"The testing and certification of the ClearVue window product for the European market means ClearVue can launch into key European markets with confidence that European window manufacturers and fabricators – ClearVue's potential licensees, will themselves be confident that they can easily make and sell the ClearVue solar window product in their own markets."*

#### About ClearVue Technologies Limited

ClearVue Technologies Limited (ASX: CPV) is an Australian technology company that operates in the Building Integrated Photovoltaic (BPIV) sector which involves the integration of solar technology into building and agricultural industries, specifically glass and building surfaces, to provide renewable energy. ClearVue has developed advanced glass technology that aims to preserve glass transparency to maintain building aesthetics whilst generating electricity.

Solar PV cells are incorporated around the edges of an Insulated Glass Unit (IGU) used in windows and the lamination interlayer between the glass in the IGU incorporates ClearVue's patented proprietary nano and micro particles, as well as its spectral selective coating on the rear external surface of the IGU.

ClearVue's window technology has application for use in the building and construction and agricultural industries (amongst others).

ClearVue has worked closely with leading experts from the Electron Science Research Institute, Edith Cowan University (ECU) in Perth, Western Australia to develop the technology.
